Medi-Cal DRG Pricing Calculator for FY 2014-15

Effective for Dates of Admission on or after July 1, 2014

September 5, 2014

This DRG Pricing Calculator is intended to enable hospitals and other interested parties to understand and predict estimated payment for inpatient stays covered by fee-for-service Medi-Cal. This version applies to stays with dates of admission on or after July 1, 2014, through June 30, 2015. Annual updates necessitate a new calculator that reflects new wage index values, hospital-specific base rates, and other changes. For stays with dates of admission prior to July 1, 2014, see the 2013 version of the calculator dated July 16, 2013, on the DHCS DRG webpage. The "Calculator" sheet incorporates the pricing logic for the DRG base payment, cost outlier payments, etc. The "DRG Table" sheet shows information specific to each DRG. The "Hospital Characteristics" sheet shows information specific to each hospital. "The FY 14-15 DRG Transition Rate" file can be found on the DRG webpage.

Under DRG payment, the Medicaid claims processing system assigns each complete inpatient stay to an All Patient Refined Diagnosis Related Group (APR-DRG) based on the diagnoses and procedures on the claim. (Note that Medi-Cal does not use Medicare DRGs, which were not designed for a Medicaid population.) Hospitals need not put the DRG on the claim and need not purchase APR-DRG software. The "Calculator" sheet assumes the user knows which APR-DRG applies to a particular stay. For more information on APR-DRGs, contact 3M Health Information Systems, which developed and owns the software.

This calculator is intended to be helpful to users to estimate pricing, but it cannot capture all the editing and pricing complexity of the Medicaid claims processing system. In cases of difference, the claims processing system is correct.

A "Frequently Asked Questions" document is available and is essential in understanding the payment method. This DRG Pricing Calculator is also available in spreadsheet form as an interactive Excel file. Both documents are at the Medi-Cal DRG page at http://www.dhcs.ca.gov. To sign up for the DRG listserve or to ask a DRG policy question, email drg@dhcs.ca.gov. (Do not send any protected health information by email.) For questions about claims, contact the Medi-Cal Telephone Service Center at 800.541.5555.

Medi-Cal DRG Pricing Calculator Effective Dates of Admission on or after July 1, 2014

September 5, 2014

Instructions:

1. The hospital or other user inputs data in cells C14-C23 & C33. Values for cell C33 can be found on the Hospital Characteristics tab.
2. Medi-Cal payment policy parameters have already been entered in cells C34-C40.
3. The calculator will show the predicted allowed amount and paid amount in cells C68 and C72 respectively.
4. LOS = discharge date minus admission date. If a patient is admitted and discharged on the same day, the calculated LOS equals zero.
5. "Transfer" discharge statuses include 02, 05,63, 65, and 66.
6. This calculator spreadsheet is intended to be helpful to users, but it cannot capture all the editing and pricing complexity of the Medicaid claims processing system. In cases of difference, the claims processing system is correct.

Medi-Cal DRG Table
Effective July 1, 2014

1. The DRG base payment equals the DRG base rate times the casemix relative weight times any applicable policy adjustors.
2. Average length of stay and casemix relative values were calculated from the Nationwide Inpatient Sample by 3M Health Information Systems for APR-DRG V.31.
3. Average length of stay is the untrimmed arithmetic value.
4. For purposes of illustration, the table uses a DRG base rate of $7,500. In fact, DRG base rates are hospital specific. For non-transition hospitals, see Tab 4, Column K. For transition hospitals, see a separate document, "FY 2014-15 Transition Rates," on the DHCS DRG webpage.
5. "Pediatric" is defined as under age 21.
6. This table shows information for 1,258 DRGs (314 base DRGs, each with four levels of severity, plus two error DRGs).
7. Inclusion of a service in this list does not necessarily imply coverage by Medi-Cal. Rehabilitation services (APR-DRG 860) will be paid outside the DRG method.
8. This calculator was developed by Xerox, the fiscal intermediary contractor for Medi-Cal.

DRG Base Rate

For each stay, the DRG base payment is calculated as the relative weight for the specific APR-DRG times a hospital-specific DRG base rate (what Medicare calls the standard amount). For the relative weight, see the DRG tab.

The DRG base rate reflects several factors:

1) A statewide DRG base rate, set to achieve the overall budget target for fee-for-service Medi-Cal inpatient care. The statewide DRG base rate for FY 2014-15 is $6,289.

2) DHCS-designated remote rural hospitals receive a higher DRG statewide base rate. The remote rural statewide DRG base rate is $10,640.

3) The statewide DRG base rate is adjusted by the local wage area, in a similar fashion to what Medicare does. The wage index value reflects the various hospital-specific adjustments the Medicare uses (from the Medicare impact file). The following table shows the values by wage area; note that Medicare sometimes assign wage area values to a specific hospital that are not shown in the following table. See the "Hospital Characteristics" tab, Column L, for the specific value. The labor component of the DRG base rate is adjusted for differences in local area wages, as shown in the calculator below.

4) The statewide base rate is only applicable to non-transition hospitals. During a three-year transition period (Year 2 begins July 1, 2014), transition hospitals are paid a DRG base rate that moves them in steps toward the statewide base rate. See the Medi-Cal DRG webpage for hospital-specific base rates for transition hospitals. See the "Hospital Characteristics" tab, Column K, for the hospital-specific base rates for non-transition hospitals.

DRG Base Rate Calculator Adjusted for Wage Area

To calculate the draft DRG base rate applicable in any wage area, type the statewide or remote rural DRG base rate into Cell A and the wage index value into Cell B. 69.6% of the unadjusted base rate is adjusted by the wage index to establish the adjusted base rate (Cell C).

A	B	C
