

1115 Waiver Evaluation Components Update

Brian Hansen

Evaluation Components

1. Low Income Health Program (LIHP)
2. Seniors and Persons with Disabilities (SPD)
3. Delivery System Reform Incentive Payments (DSRIP)
4. California Children's Services (CCS) Pilots

Overarching Goals

Culture focused on quality, outcomes:

- Improve the health of program members
- Enhance the patient care experience
- Control costs, and ensure value
 - Value measured as outcomes per dollar spent

Specific Aims for 1115 Waiver

- Start-up - implementation monitoring and Evaluation
- Ongoing – process and outcomes quality improvement with targeted interventions
 - Will feed into DHCS-wide clinical dashboard
- Longer-term – rigorous independent evaluation of quality and best practices

Program Policy Questions

LIHP – Prepare for 2014

- Start-up and ongoing: ensure enrollment and quality care – and targeted Quality Improvement
- Information for transition to Medi-Cal/Exchange:
 - Define the population in ways necessary for transition
 - Health needs, utilization and patterns of care
 - Checklist for transition readiness for LIHPs/Medi-Cal
- Identify individual program best practices
 - Care coordination, integration, outreach, etc.

SPDs: Coordinated System of Care

- Start-up/ongoing Quality Improvement:
 - provider continuity, plan choice, network capacity, access, benefits and coordination
- Satisfaction:
 - Self-reported outcomes and satisfaction
- Tracking utilization to measure:
 - Quality – access, inpatient, readmission
 - Cost - where savings are being gained

DSRIP: Quality and Integration

Document the gain from this investment:

- Tracking and QI for planning and implementation - Years 1-2 and ongoing
- Best practices/barriers – measure specific projects :
 - Movement toward integrated delivery systems
 - Quality/cost for target populations

CCS Pilots – Whole Child Focus

Covered in the earlier presentation:

- Ensure start-up and ongoing quality care and consumer/provider satisfaction
- Measure each model's improvement of the delivery of health care services
- Compare quality and outcomes for the pilot models with non-pilot system
