| **ACA 2703 Health Homes**  
Bradley Gilbert, IEHP: There are still concerns from plans about some specifics in the concept, such as the community based entities, staffing, 24-7 availability and the role of plan, and wrap around services. These concerns were voiced in concept paper 1.0 and I still see those in concept paper 2.0. What are the steps to work through those issues? | 
**Hannah Katch, DHCS:** As part of ongoing conversations with health plans partners, we continue to work on these issues. We want to make the program work in rural or other areas without capacity. We intend to be flexible to ensure this works. You proposed a good model for this and we want to continue to have conversations about that. | Program has been in touch with health plan representatives to discuss these issues. |
| **CMS Managed Care Regulations**  
Marty Lynch, Lifelong Medical Care and California Primary Care Association: We agree these are good concerns for the comments. Can you provide a summary so we can include some of these points in our comment language? | 
**Jennifer Kent, DHCS:** We will share our letter broadly through stakeholder groups and welcome receiving copies of your letters. | Comment letter shared with stakeholders July 27, available at this link: [http://www.dhcs.ca.gov/services/Documents/MMCD/ManagedCareRegulations.pdf](http://www.dhcs.ca.gov/services/Documents/MMCD/ManagedCareRegulations.pdf) |
| **Timeline for Implementation -- Full-Scope Coverage for All Children**  
Anthony Wright, Health Access California: On the transition from limited to full scope, the budget was estimated on 30 day timing. Is there a timetable for the steps to get the system up and running? We are interested in reviewing the steps and system changes related to the timeline. | 
**Rene Mollow, DHCS:** We are working on the timelines but I don’t’ have them for today. We need to be thoughtful and determine the right timing. | Developing; discussion included on Oct. 14 agenda |
