

Leveraging ICD-10 for Excellence

*ICD-10 presents us with an
opportunity to focus on what really
matters...population health.*

Welcome

CMS strives to focus on what really matters:

- Better Care - *Working together to improve care coordination*
- Better Health - *Keeping people healthy*
- Lower Healthcare Costs - *Spending dollars wisely*

Today's Session Objectives:

- To gain an awareness of the complexity of ICD-10 and the challenges implementation brings to our core business.
- To gain an understanding of how ICD-10 can be leveraged to SMAs' advantage.
- To provide an opportunity to share best practices and implementation strategies.

CMS has partnership with Noblis:

- CMS has partnered with Noblis to provide advisory services, training and ICD-10 Technical Assistance to State Medicaid Agencies.

1

Purpose: To clearly state the objectives for the training session

Additional Talking Points:

Better healthcare: Improve individual patient experiences of care along the Institute of Medicine's six domains of quality: Safety, Effectiveness, Patient-Centeredness, Timeliness, Efficiency, and Equity.

Better health: Encourage better health for entire populations by addressing underlying causes of poor health, such as physical inactivity, behavioral risk factors, lack of preventive care and poor nutrition.

Lower costs through improvement: Lower the total cost of care resulting in reduced monthly expenditures for each Medicare, Medicaid or CHIP beneficiary by improving care

For the best of reasons

We focus our resources on five areas of National importance

Health Innovation

Sustainability

National Security & Intelligence

Enterprise Services

Transportation Systems

4

Purpose: To introduce the Noblis Organization

Talking Points:

Noblis has been recognized as one the World's Most Ethical Companies for 2012 by the Ethisphere Institute.

This award recognizes companies that implement business practices and initiatives that contribute to the company's success, benefit the community, and raise the bar for ethical standards within the industry.

"This is the fourth time that Noblis has been named one of the World's Most Ethical Companies and we are extremely proud to be recognized for our ongoing commitment to ethics and integrity." We pride ourselves on doing what's right for our employees, our clients, and the public that we serve.

According to Ethisphere, the methodology for choosing the World's Most Ethical Companies includes reviewing codes of ethics, litigation and regulatory infraction histories; evaluating the investment in innovation and sustainable business practices; looking at activities designed to improve corporate citizenship; and studying nominations from senior executives, industry peers, suppliers, and customers. This year's nominations came from companies in more than 100

countries and 36 industries. Read about the methodology and view the complete list of the 2012 World's Most Ethical Companies at <http://ethisphere.com/wme>.

"Each year the competition for World's Most Ethical Companies intensifies as the number of nominations submitted for consideration grows," said Alex Brigham, Executive Director of Ethisphere. "This year's winners know that a strong ethics program is a key component to a successful business model, and they continue to scrutinize their ethical standards to keep up with an ever-changing regulatory environment."
