

SFY 15/16 Grouper settings based on the admit date on the claim

FAQ Table 3 Selected Year 3 Grouper Settings for Medi Cal		
Grouper Field	Setting	Comments
APR-DRG Grouper Settings		
Grouper Version	V.32	Effective with dates of admission on or after July, 1, 2015.
Mapping Type	NA	APR-DRG V.32 was released October 1, 2014, reflecting the ICD-9-CM diagnosis and procedure code set that is effective between October 1, 2014, and September 30, 2015. 3M Health Information Systems, the developer of the APR-DRG software, advises that the mapper functionality will not be needed for V.32 between July 1, 2015, and September 30, 2015.
Birth Weight Option	Option 5 coded weight with default	Medi-Cal reads the diagnosis codes (not the value codes) to identify birth weight and/or gestational age if coded using appropriate diagnosis codes on the claim. If the claim does not include a diagnosis code indicating birth weight or gestational age, then the grouper default is to a birth weight that indicates "normal newborn."
Discharge DRG Option	Compute excluding non-POA complication of care	Excluding non-POA Complication of Care (default) is used.

SFY 15/16 Admit date from 7/1/2015 to 9/30/2015 (Year 3)
