

Update: DRG Claims Erroneously Grouping to APR-DRG 951 and 952

September 8, 2016

A previously published [NewsFlash](#) stated that the Department of Health Care Services (DHCS) had identified a claims processing issue causing some All Patient Refined Diagnosis Related Groups (APR-DRG) claims for vaginal deliveries with a day of discharge on or after October 1, 2015, to group to APR-DRG 951 or 952 in error. This issue was resolved on April 25, 2016.

No action is required of providers. Affected claims will be reprocessed via an Erroneous Payment Correction (EPC).
