Aug 11	CAPH Input to California's 1115 Medicaid Waiver Renewal Concepts	Erica B. Murray President and CEO California Association of Public Hospitals and Health Systems	Input to Waiver Concepts; Clarification Questions	Comments on: Strengthen the DSRIP through a successor program that is more standardized, with a heavier emphasis on outcomes; payment reforms for the remaining uninsured; voluntary county pilots that would integrate physical and behavioral health services, and provide robust coordination with social, housing, vocational training and other services critical to holistically addressing the needs and care of targeted high-risk patients; advance alternatives to FQHC PPS payments in a way that transforms payments while expanding access to services;
July 30	Suggestion for Stakeholder Participation	Suzanne Jacobson, CPA Deputy Director/Chief Financial Officer Santa Barbara County Public Health Department	Input to Stakeholder Participation	Include input from the 6 <i>Clinic Counties</i> (those counties that operate clinics, but not public hospitals). While we are members of CHEAC and enjoy our organizational representation as Health Departments from the excellent leadership of Judith Reigel, we are not members of the CPCA and would like a voice as publicly administered FQHCs. Perhaps we could be allowed to participate in or give input into the sub-workgroups on FQHC and safety net payment aspects of the waiver?
July 23	Input into CA's 1115 Medicaid Waiver Renewal Concepts	Andrew Deckert, MD, MPH, Health Officer, Shasta Co HHS— Public Health	Input to Waiver Concepts- Workforce Development	Needs to address not only access to health care insurance but also to actual health care providers willing to see new patients. The concept paper cover a portion of medical malpractice idea for existing docs to see low-income is fine but still does not address need for additional primary care providers. Most of our primary care providers were full before ACA, now several practices have closed (retirement) or closed their practice to new patients. The main challenge is sufficient providers to see the increased patients.
