

PAVE Newsletter – March 2018

Welcome to the PAVE Newsletter

PAVE Release 3.0 is coming this summer. Results for the current release continue to impress and we cannot wait for all of our providers to have access. Until then, there will be several opportunities to engage with PAVE and get ready for Release 3.0.

- Open House offers learning stations with demonstrations of PAVE's exciting features.
- Provider Beta Testing allows our users to help our team get PAVE ready for roll out.
- Provider training will be offered via webinar so you can attend from anywhere.

Information about all of these events and more will be sent to the PAVE mailing list, and posted on the PAVE webpage.

PAVE User Spotlight

Sutter Bay Medical Foundation (SBMF) and Sutter Physician Services (SPS) utilize PAVE as part of their provider enrollment process. Both SBF and SPS jumped right in as Beta testers for Release 2.0. They consistently attended webinars, labs, and stakeholder meetings to gain further experience and updates with PAVE. They seized the opportunity to provide DHCS with great feedback on how PAVE fits within their environment. We definitely appreciate their enthusiasm and continued support for moving the Medi-Cal provider enrollment process into the digital age.

Thank you Sutter Bay Medical Foundation and Sutter Physician Services!

Features, Fixes & Facts

Fact: When individual providers complete the "Profile Information" section of their application, they are asked to list their own Residential Address - this address will differ from the address listed in the "Addresses" section, in which providers indicate where they will be providing services.

Fix: When affiliating a Rendering provider to a Group NPI, PAVE Portal will now display the appropriate Provider Types next to each Group location to ensure that providers are affiliating to the correct location.

Upcoming Events

Event	Date
PAVE Open House	March 19 th – 23 rd
Provider Beta Testing	May 2018
Provider Training	June 2018
PAVE Release 3.0	Summer 2018
PAVE User Group Labs & Webinars	Summer 2018

PAVE Pro Tips

How do I know if a provider is already affiliated to a Group?

The PAVE Portal Account has a list of all active Rendering providers who are affiliated to this location. In the "Rendering Provider" section of your account, Groups can view the Account ID, Provider Type, NPI, and Name of all affiliated providers to ensure accurate information.
