* The estimate is statistically unstable due to large variation in survey respondent characteristics

(1) Population estimates are based on the following criteria:

Federal Poverty Level under 200%; Age 19 - 64; Uninsured; and Citizen or Legal Resident with at least 5 years of US residency.

(2) Population estimates for 2009 were not available at the time of this study. However, the number of uninsured individuals in each county has likely increased since 2007. The increase may vary by county, partially depending on the current unemployment rate in that county. For further information, see UCLA research brief entitled:

[Number of Uninsured Jumped to More Than Eight Million from 2007 to 2009](#)
