

NS syringe
Pre-packaged

Medication
(label removed for picture)

Close Medication System

- Claves at NS port and medication port
- Pre-packaged 10 ml NS syringe, change every 24 hours (preservative free)
- System stays on syringe pump at all times, even when not in use
- Minimum volume of medications is 1 ml (to minimize loss of medication in stopcock)
- After medication infuses, using stopcock withdraw 1 ml of NS into medication syringe (no disconnection) and finish infusion
- Tubing changed every 72 hours
