

**California Department of Health Care Services - Medi-Cal Children's Health Dashboard
(September 2016)**

Goal: This dashboard provides an overview of children's health and demographic measures for children enrolled in Medi-Cal, California's Medicaid program. Key features of this document include a broad range of measures across physical health, mental health, managed care, and key demographics, as well as updated overall enrollment data. This document is being developed in partnership with the Medi-Cal Children's Health Advisory Panel (MCHAP) and other stakeholders.

Figure 1 and 2: Enrollment and Delivery System Trends for Children in Medi-Cal (updated quarterly). Figure 1 shows total enrollment and enrollment by delivery system for children age 0-20 in Medi-Cal. Key factors in enrollment growth include the transition of children enrolled in Healthy Families to Medi-Cal in 2013 and implementation of the Affordable Care Act in 2014. Figure 2 is a breakdown of the percentage of children enrolled in fee-for-service and the percentage of children enrolled in a managed care delivery system.

Figure 1 & 2 Notes: Data compiled based on eligibility and enrollment data in Medi-Cal Eligibility Data System (MEDS), as of April 2016, accessed September 2016. Figures represent information from last month of each quarter (i.e. Q4 2015 is December 2015 data).

Immunization Rate for Children Enrolled in Medi-Cal Managed Care (updated annually)

Figure 5: Childhood Immunization Status – Combination 3: Measure calculates the percentage of children identified as having the following vaccinations: four diphtheria, tetanus, and pertussis (DTaP); three inactivated poliovirus (IPV); one measles, mumps, and rubella (MMR); three Haemophilus influenza type B (HiB); three hepatitis B; one varicella-zoster virus (chicken pox or VZV); and four pneumococcal conjugate vaccinations on or before the child's second birthday. Source: Medi-Cal Performance Measurement Report for 2015.

Benchmark: The DHCS goal for the above measure is 80% by Mid-Year 2015. An updated goal for this measure will be included in the upcoming 2016 [DHCS Medi-Cal Managed Care Quality Strategy Report](#), currently in development.

Figure 6: Immunizations for Adolescents – Combination 1: Measure assesses the percentage of adolescents 13 years of age who had one dose of meningococcal vaccine and one tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap) or one tetanus, diphtheria toxoids vaccine (Td) by their 13th birthday. The measure calculates a rate for each vaccine and one combination rate. Source: Medi-Cal Performance Measurement Report for 2015.
