AGENDA ITEM:	Involuntary Detention Rates
ENCLOSURES:	California Involuntary Detentions Data Report Work project questions

BACKGROUND/DESCRIPTION:

Advocacy Committee is trying to determine the influence that MHSA has had on involuntary detention rates and Community Mental Health Care Services, in respect to cover and reintegration from institutions into independent living. DHCS has agreed to interpret the California Involuntary Detentions Data Report (attached) as it relates to our work project questions (attached).

California's Welfare and Institutions Code (WIC) Section 5402 requires the Department of Health Care Services (DHCS) to collect from each county mental health program or treatment facility and publish quantitative information on the number and types of involuntary detentions. For the benefit of the general public, medical, legal, and other groups, DHCS publishes this report annually, in accordance with the WIC code. This report contains the number and duration of involuntary detentions, temporary and permanent conservatorships established by the superior court of the county, the number of persons transferred from a jail for mental health services, the number of persons admitted to a Lanterman Petris Short (LPS) approved treatment program within a jail facility, and the number of outpatient mental health services provided to persons detained in jail facilities. Certain data cells were suppressed to protect health information (PHI) and personal information (PI) in accordance with DHCS's Public Aggregate Reporting Guidelines.
