Executive Summary

The Medi-Cal Specialty Mental Health Services (SMHS) Supplement is required by Welfare and Institutions Code, Section 14100.51, to be submitted to the Legislature each year, by January 10 and concurrently with the release of the May Revision. This supplemental information provides children's and adults' caseloads and FY 2016-17 forecasts by service type, explanations of changes to these forecasts, fiscal charts containing children's and adults' claim costs and unduplicated client counts, and summary fiscal charts for the current-year and budget-year.

Specialty Mental Health Services, PC 70 and 71

Continued growth is forecasted for both children and adult services. Children's service costs are projected to be \$1.759 billion for the current year and grow by 0.5% to \$1.852 billion for budget year. The unduplicated number of children receiving specialty mental health services through Short-Doyle/Medi-Cal (SD/MC) providers is projected to grow 4.18% from 280,569 in the current year to 292,284 in the budget year. The unduplicated number of children receiving acute psychiatric inpatient hospital services through Fee-for-Service (FFS/MC) providers is projected to grow 6.44% from 14,040 in the current year to 14,944 in the budget year.

Growth for adult services is expected with a current year projection of \$1.090 billion and forecasted growth to about \$1.152 billion for budget year. The unduplicated number of adults receiving specialty mental health services through SD/MC providers is projected to increase 0.59% from 238,000 in the current year to 239,393 in the budget year. The unduplicated number of adults receiving acute psychiatric inpatient hospital services through FFS/MC hospitals is projected to decline 0.79% from 13,940 in the current year to 13,830 in the budget year. These numbers do not include claims from the Affordable Care Act (ACA) because claims are incomplete for a full fiscal year.

The SMHS Supplement contains data on the actual utilization of SMHS by Medi-Cal beneficiaries enrolled under the ACA Optional Expansion. The cost of approved claims for FY 2013-14 submitted through June 30, 2015 for specialty mental health services provided to Medi-Cal beneficiaries enrolled under the ACA Optional Expansion was \$177 million, which was 13% of approved claims for all beneficiaries during that same period of time. The number of beneficiaries served in FY 2013-14 who enrolled under the ACA Optional Expansion was 69,171, which was 21% of total beneficiaries served during that same period of time.

Service Descriptions

Overview

The Medi-Cal Specialty Mental Health Services Program is “carved-out” of the broader Medi-Cal program and is also administered by the Department of Health Care Services (Department) under the authority of a waiver approved by the Centers for Medicare and Medicaid Services (CMS). The Department contracts with a Mental Health Plan (MHP) in each county to provide or arrange for the provision of Medi-Cal specialty mental health services. All MHPs are county mental health departments.

Specialty mental health services are Medi-Cal entitlement services for adults and children that meet medical necessity criteria, which consists of having a specific covered diagnosis, functional impairment, and meeting intervention criteria. MHPs must certify that they incurred a cost before seeking federal reimbursement through claims to the State. MHPs are responsible for the non-federal share of Medi-Cal specialty mental health services. Mental health services for Medi-Cal beneficiaries who do not meet the criteria for specialty mental health services are provided under the broader Medi-Cal program either through managed care plans (by primary care providers within their scope of practice) or fee-for-service. Children’s specialty mental health services are provided under the federal requirements of the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) benefit, which is available to full-scope beneficiaries under age 21.

The following Medi-Cal specialty mental health services are provided for children and adults:

Service Descriptions

Adult Crisis Residential Services (CRS)

Adult crisis residential services provide an alternative to acute psychiatric hospital services for beneficiaries who otherwise would require hospitalization. The CRS programs for adults provide normalized living environments, integrated into residential communities. The services follow a social rehabilitation model that integrates aspects of emergency psychiatric care, psychosocial rehabilitation, milieu therapy, case management and practical social work.

Adult Residential Treatment Services

Adult Residential Treatment Services are rehabilitative services provided in a non-institutional, residential setting for beneficiaries who would be at risk of hospitalization or other institutional placement if they were not receiving residential treatment services. The services include a wide range of activities and services that support beneficiaries in their effort to restore, maintain, and apply interpersonal and independent living skills and to access community support systems. Service activities may include assessment, plan development, therapy, rehabilitation, and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Crisis Intervention

Crisis intervention services last less than 24 hours and are for, or on behalf of, a beneficiary for a condition that requires more timely response than a regularly scheduled visit. Service activities include, but are not limited to, assessment, collateral and therapy. Crisis Intervention services may either be face-to-face or by telephone with the beneficiary or the beneficiary's significant support person and may be provided anywhere in the community.

Crisis Stabilization

Crisis stabilization services last less than 24 hours and are for, or on behalf of, a beneficiary for a condition that requires a more timely response than a regularly scheduled visit. Service activities include but are not limited to one or more of the following: assessment, collateral, and therapy. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Day Rehabilitation (Half-Day & Full-Day)

Day rehabilitation services are a structured program of rehabilitation and therapy with services to improve, maintain or restore personal independence and functioning, consistent with requirements for learning and development and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Service Descriptions

Day Treatment Intensive (Half-Day & Full-Day)

Day treatment intensive services are a structured, multi-disciplinary program of therapy that may be used as an alternative to hospitalization, or to avoid placement in a more restrictive setting, or to maintain the client in a community setting and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to, assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Intensive Care Coordination (ICC)

Intensive Care Coordination is a targeted case management service that facilitates assessment of, care planning for and coordination of services to beneficiaries under age 21 who are eligible for the full scope of Medi-Cal services and who meet medical necessity criteria for this service. ICC service components include: assessing; service planning and implementation; monitoring and adapting; and transition. ICC services are provided through the principles of the Core Practice Model (CPM), including the establishment of the Child and Family Team (CFT) to ensure facilitation of a collaborative relationship among a youth, his/her family and involved child-serving systems. The CFT is comprised of – as appropriate, both formal supports, such as the care coordinator, providers, case managers from child-serving agencies, and natural supports, such as family members, neighbors, friends, and clergy and all ancillary individuals who work together to develop and implement the client plan and are responsible for supporting the child/youth and family in attaining their goals. ICC also provides an ICC coordinator who:

- Ensures that medically necessary services are accessed, coordinated and delivered in a strength-based, individualized, family/youth driven and culturally and linguistically competent manner and that services and supports are guided by the needs of the child/youth;
- Facilitates a collaborative relationship among the child/youth, his/her family and systems involved in providing services to the child/youth;
- Supports the parent/caregiver in meeting their child/youth's needs;
- Helps establish the CFT and provides ongoing support; and
- Organizes and matches care across providers and child serving systems to allow the child/youth to be served in his/her community

Intensive Home Based Services (IHBS)

Intensive Home Based Services are individualized, strength-based interventions designed to ameliorate mental health conditions that interfere with a child/youth's functioning and are aimed at helping the child/youth build skills necessary for successful functioning in the home and community and improving the child/youth's family's ability to help the child/youth successfully function in the home and community. IHBS services are provided according to an individualized treatment plan developed in accordance with the Core Practice Model (CPM) by the Child and Family Team (CFT) in coordination with the family's overall service plan which may include IHBS. Service

activities may include, but are not limited to assessment, plan development, therapy, rehabilitation and collateral. IHBS is provided to beneficiaries under 21 who are eligible for the full scope of Medi-Cal services and who meet medical necessity criteria for this service.

Medication Support

Medication support services include prescribing, administering, dispensing and monitoring of psychiatric medications or biologicals that are necessary to alleviate the symptoms of mental illness. Service activities may include but are not limited to: evaluation of the need for medication; evaluation of clinical effectiveness and side effects; obtaining informed consent; instruction in the use, risks and benefits of, and alternatives for, medication; collateral and plan development related to the delivery of service and/or assessment for the client; prescribing, administering, dispensing and monitoring of psychiatric medications or biologicals; and medication education.

Psychiatric Health Facility (PHF) Services

A Psychiatric Health Facility is a facility licensed under the provisions beginning with Section 77001 of Chapter 9, Division 5, Title 22 of the California Code of Regulations. "Psychiatric Health Facility Services" are therapeutic and/or rehabilitative services provided in a psychiatric health facility on an inpatient basis to beneficiaries who need acute care, which meets the criteria of Section 1820.205 of Chapter 11, Division 1, Title 9 of the California Code of Regulations, and whose physical health needs can be met in an affiliated general acute care hospital or in outpatient settings. These services are separate from those categorized as "Psychiatric Inpatient Hospital".

Psychiatric Inpatient Hospital Services

Psychiatric inpatient hospital services include both acute psychiatric inpatient hospital services and administrative day services. Acute psychiatric inpatient hospital services are provided to beneficiaries for whom the level of care provided in a hospital is medically necessary to diagnose or treat a covered mental illness. Administrative day services are inpatient hospital services provided to beneficiaries who were admitted to the hospital for an acute psychiatric inpatient hospital service and the beneficiary's stay at the hospital must be continued beyond the beneficiary's need for acute psychiatric inpatient hospital services due to lack of residential placement options at non-acute residential treatment facilities that meet the needs of the beneficiary.

Psychiatric inpatient hospital services are provided by SD/MC hospitals and FFS/MC hospitals. MHPs claim reimbursement for the cost of psychiatric inpatient hospital services provided by SD/MC hospitals through the SD/MC claiming system. FFS/MC hospitals claim reimbursement for the cost of psychiatric inpatient hospital services through the Fiscal Intermediary. MHPs are responsible for authorization of psychiatric inpatient hospital services reimbursed through either billing system. For SD/MC hospitals, the daily rate includes the cost of any needed professional services. The FFS/MC hospital daily rate does not include professional services, which are billed separately from the FFS/MC inpatient hospital services via the SD/MC claiming system.

Targeted Case Management (TCM)

Targeted case management is a service that assists a beneficiary in accessing needed medical, educational, social, prevocational, vocational, rehabilitative, or other community services. The service activities may include, but are not limited to, communication, coordination and referral; monitoring service delivery to ensure beneficiary access to services and the service delivery system; monitoring of the beneficiary's progress, placement services, and plan development. TCM services may be face-to-face or by telephone with the client or significant support persons and may be provided anywhere in the community. Additionally, services may be provided by any person determined by the MHP to be qualified to provide the service, consistent with the scope of practice and state law.

Therapeutic Behavioral Services (TBS)

Therapeutic behavioral services are intensive, individualized, short-term outpatient treatment interventions for beneficiaries up to age 21. Individuals receiving these services have serious emotional disturbances (SED), are experiencing a stressful transition or life crisis and need additional short-term, specific support services to accomplish outcomes specified in the written treatment plan.

Therapy and Other Service Activities (formerly referred to as Mental Health Services)

Individual or group therapies and interventions are designed to provide a reduction of mental disability and restoration, improvement or maintenance of functioning consistent with the goals of learning, development, independent living, and enhanced self-sufficiency. These services are separate from those provided as components of adult residential services, crisis intervention, crisis stabilization, day rehabilitation, or day treatment intensive. Service activities may include, but are not limited to:

1. **Assessment** - A service activity designed to evaluate the current status of mental, emotional, or behavioral health. Assessment includes, but is not limited to, one or more of the following: mental status determination, analysis of the clinical history, analysis of relevant cultural issues and history; diagnosis; and the use of mental health testing procedures.
2. **Plan Development** - A service activity that consists of development of client plans, approval of client plans, and/or monitoring and recording of progress.
3. **Therapy** - A service activity that is a therapeutic intervention that focuses primarily on symptom reduction as a means to reduce functional impairments. Therapy may be delivered to an individual or group and may include family therapy at which the client is present.
4. **Rehabilitation** - A service activity that includes, but is not limited to, assistance, improving, maintaining or restoring functional skills, daily living skills, social and leisure skills, grooming and personal hygiene skills; obtaining support resources; and/or obtaining medication education.
5. **Collateral** - A service activity involving a significant support person in the beneficiary's life for the purpose of addressing the mental health needs of the beneficiary in terms of achieving goals of the beneficiary's client plan.

Collateral may include, but is not limited to, consultation and training of the significant support person(s) to assist in better utilization of mental health services by the client, consultation and training of the significant support person(s) to assist in better understanding of mental illness, and family counseling with the significant support person(s) in achieving the goals of the client plan. The client may or may not be present for this service activity.

The distribution and use of expenditures of each service activity varies over time with changes in client needs.

Litigation and the Specialty Mental Health Services Program

Katie A. v. Bonta

The Katie A. v. Bonta lawsuit Settlement Agreement – in place since December 2011 - outlines a series of actions that are intended to transform the way children and youth who are in foster care or who are at imminent risk of foster care placement receive access to mental health services consistent with a Core Practice Model (CPM) that creates a coherent and all-inclusive approach to service planning and delivery. The Settlement Agreement also specifies that children and youth who meet subclass criteria (as defined in the Settlement Agreement) are eligible to receive Intensive Care Coordination (ICC), Intensive Home Based Services (IHBS), and Therapeutic Foster Care (TFC). County MHPs are required to provide ICC and, when medically necessary, IHBS services to all children and youth under the age of 21 who are eligible for full scope Medi-Cal benefits and who meet medical necessity criteria for these services. MHPs provide ICC and IHBS and claim federal reimbursement through the SDMC claiming system.

The Department's Mental Health Services Division (MHSD) Information Notice 13-11 instructed counties of the SDMC system changes required to support the implementation of ICC and IHBS which included submitting claims with a Demonstration Project Identifier (DPI) of "KTA" and procedure codes (T1017, HK) for Intensive Care Coordination and (H2015, HK) for Intensive Home Based Services.

MHPs began billing for ICC and IHBS services for dates of service starting January 1, 2013. This May budget estimate contains actual claims data for ICC and IHBS claims received through December 31, 2014. At present there is not enough data to generate budget forecasts for ICC and IHBS services.

Emily Q. v. Bonta

In 1998, a federal class action lawsuit, Emily Q. v. Bonta was filed with the Federal District Court on behalf of children with intensive mental health needs and who were eligible for Medi-Cal mental health benefits, but were denied specific Therapeutic Behavioral Services (TBS). In 1999, the district court issued a preliminary injunction requiring that a certified state-wide class of current and future beneficiaries of the Medicaid program below the age of 21 in California who: are placed in a Rate Classification Level (RCL) facility of 12 or above and/or a locked treatment facility for the treatment of mental health needs; are being considered for placement in these facilities; or have undergone at least one emergency psychiatric hospitalization related to their current presenting disability within the preceding 24 months. In 2001, the district court issued a permanent injunction favoring the plaintiffs and in 2004, the court approved a plan to increase the usage of TBS including increased monitoring and a special master was appointed. Pursuant to the Court agreement, the Department continues to perform specific activities related to the Emily Q lawsuit.

TBS is a short-term, intensive one-to-one behavioral mental health intervention that can help children, youth, parents, caregivers, and school personnel learn new ways of reducing and managing challenging behaviors. TBS can avert the need for a higher level

of care (or more restrictive placement) or help a child make a successful transition to a lower level of care.

Total Fiscal Year 2015-16 Nov 2015 Estimate	\$1,832,196	\$925,912	\$906,285

(1) The rate elimination adjustment estimates the affect of eliminating the statewide maximum allowance rates as described in regular PC 72. The adjustment is calculated by comparing the approved claims by service type and county to the approved units multiplied by the statewide maximum allowance rate that would have been in affect in Fiscal Year 2012-13 for each service type. The SMA adjustment is equal to the approved dollars in excess of the approved units multiplied by the statewide maximum allowance rate by service type and county. The SMA Adjustment for Fiscal Year 2014-15 is equal to the SMA Adjustment for Fiscal Year 2013-14 increased by the percentage change in the PC 70 - SD/MC estimate from Fiscal Year 2013-14 to Fiscal Year 2014-15.

(1) The rates elimination adjustment estimates the affect of eliminating the statewide maximum allowance rates as described in regular PC 72. The adjustment is calculated by comparing the approved claims by service type and county to the approved units multiplied by the statewide maximum allowance rate that would have been in affect in Fiscal Year 2012-13 for each service type. The SMA adjustment is equal to the approved dollars in excess of the approved units multiplied by the statewide maximum allowance rate by service type and county. The SMA Adjustment for Fiscal Year 2014-15 is equal to the SMA Adjustment for Fiscal Year 2013-14 increased by the percentage change in the PC 70 - SD/MC estimate from Fiscal Year 2013-14 to Fiscal Year 2014-15.

(1) Claims for reimbursement were limited to statewide maximum allowance rates through service Fiscal Year 2011-12. Since May 2012 Estimate for the Fiscal Year 2012-13 appropriation was based upon claims data prior to Fiscal Year 2012-13, there is no SMA adjustment.

(2) The rates elimination adjustment estimates the affect of eliminating the statewide maximum allowance rates as described in regular PC 72. The adjustment is calculated by comparing the approved claims by service type and county to the approved units multiplied by the statewide maximum allowance rate that would have been in affect in Fiscal Year 2012-13 for each service type. The SMA adjustment is equal to the approved dollars in excess of the approved units multiplied by the statewide maximum allowance rate by service type and county. The SMA Adjustment for Fiscal Year 2014-15 is equal to the SMA Adjustment for Fiscal Year 2013-14 increased by the percentage change in the PC 70 - SD/MC estimate from Fiscal Year 2013-14 to Fiscal Year 2014-15.

(1) Actual Approved Claims SD/MC Data for Specialty Mental Health as of June 30, 2015.

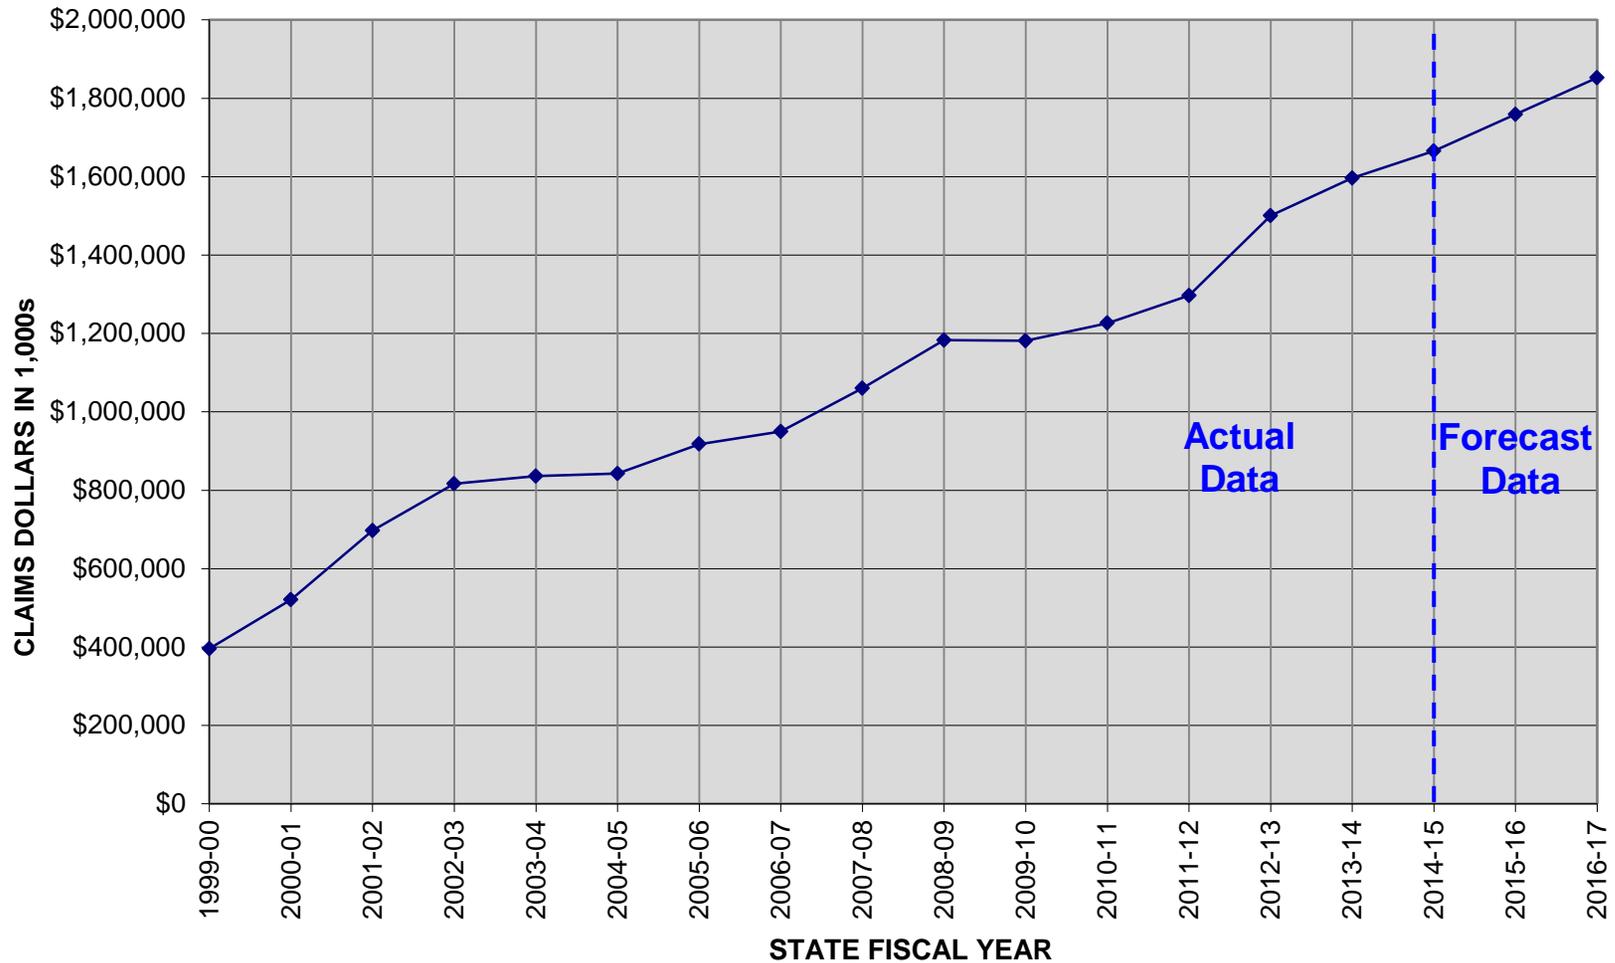

(2) Medi-Cal enrollment data based on average of 12 months of actual monthly enrollment data for each year (years prior to 2005-06 not readily available).

(3) Beginning with the May 2013 Estimate, all children's services (except FFS/MC inpatient services) are included in this table of approved claims for FY 2008-09 and on.

(4) The large increase in Medi-Cal enrollments are due to the Healthy Family Program transition and new enrollment through Covered California.

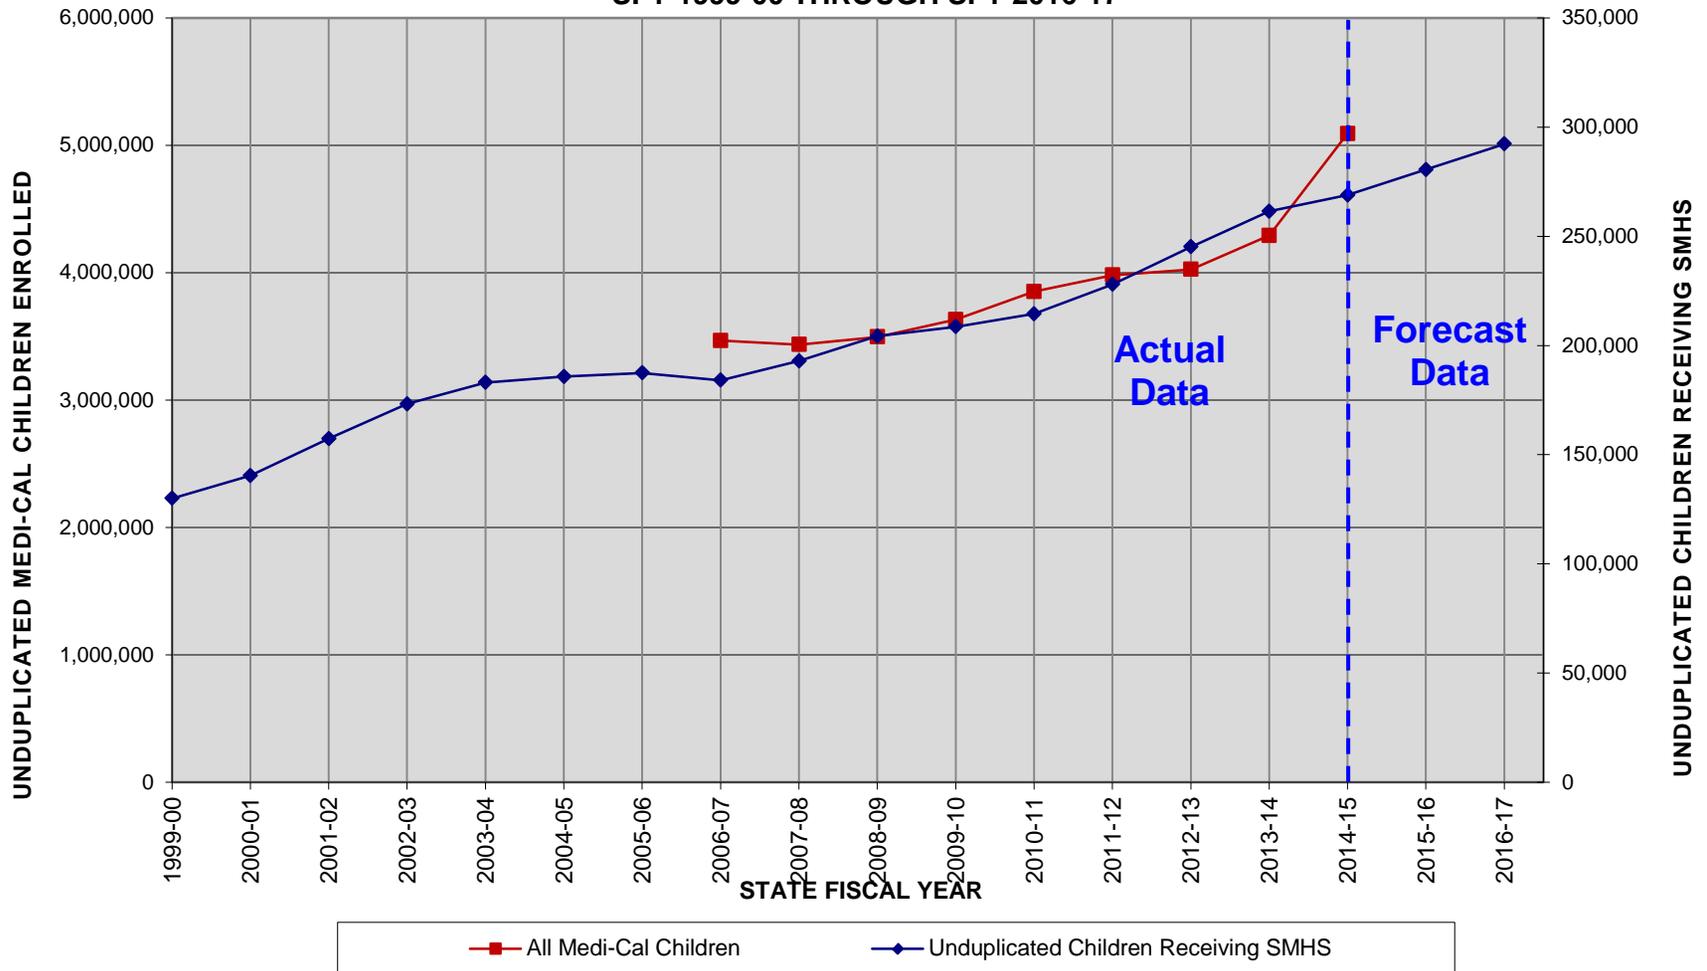

(5) The increase in approved claims costs is due to the elimination of the statewide maximum allowance rates on July 1, 2012, per AB 1297 (Statutes of 2011). Additionally, there is an increase in costs and client counts due to the transition of the Healthy Families Program to Medi-Cal beginning January 1, 2013, per AB 1494 (Statutes of 2012).

(1) Actual Approved Claims SD/MC Data for Specialty Mental Health as of June 30, 2015.

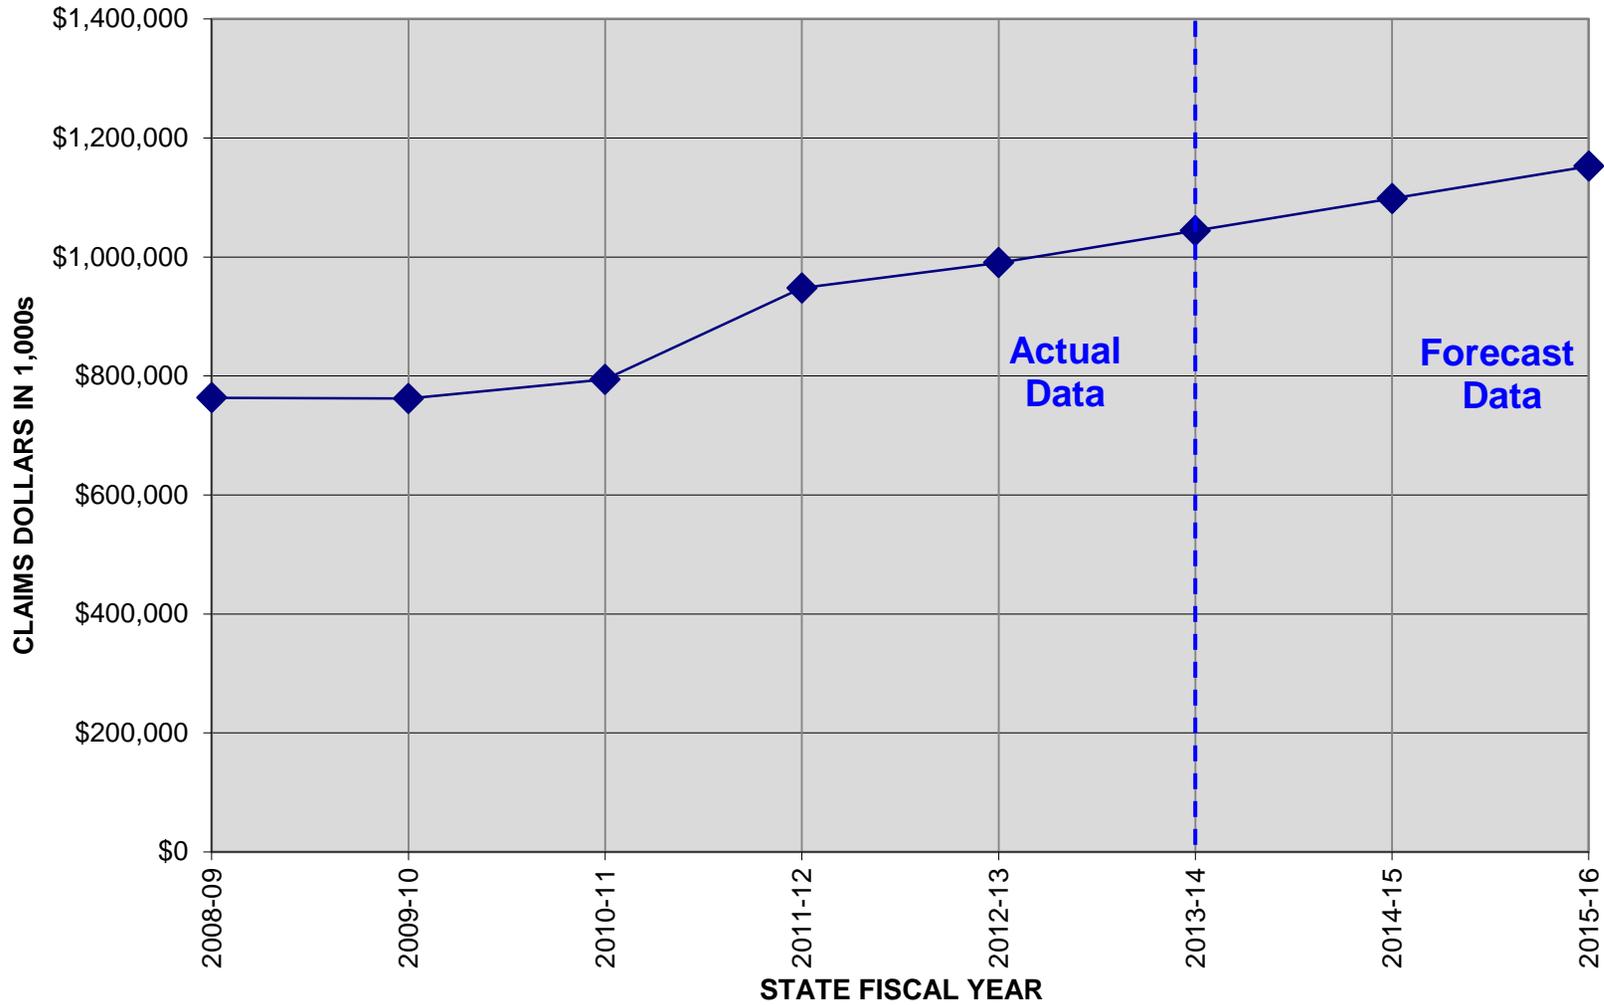

(2) Medi-Cal enrollment data based on average of 12 months of actual monthly enrollment data for each year.

(3) FFS/MC inpatient service costs are not included in this table of approved claims.

(4) The increase in approved claims costs are due to the elimination of the statewide maximum allowance rates on July 1, 2012, per AB 1297 (Statutes of 2011).

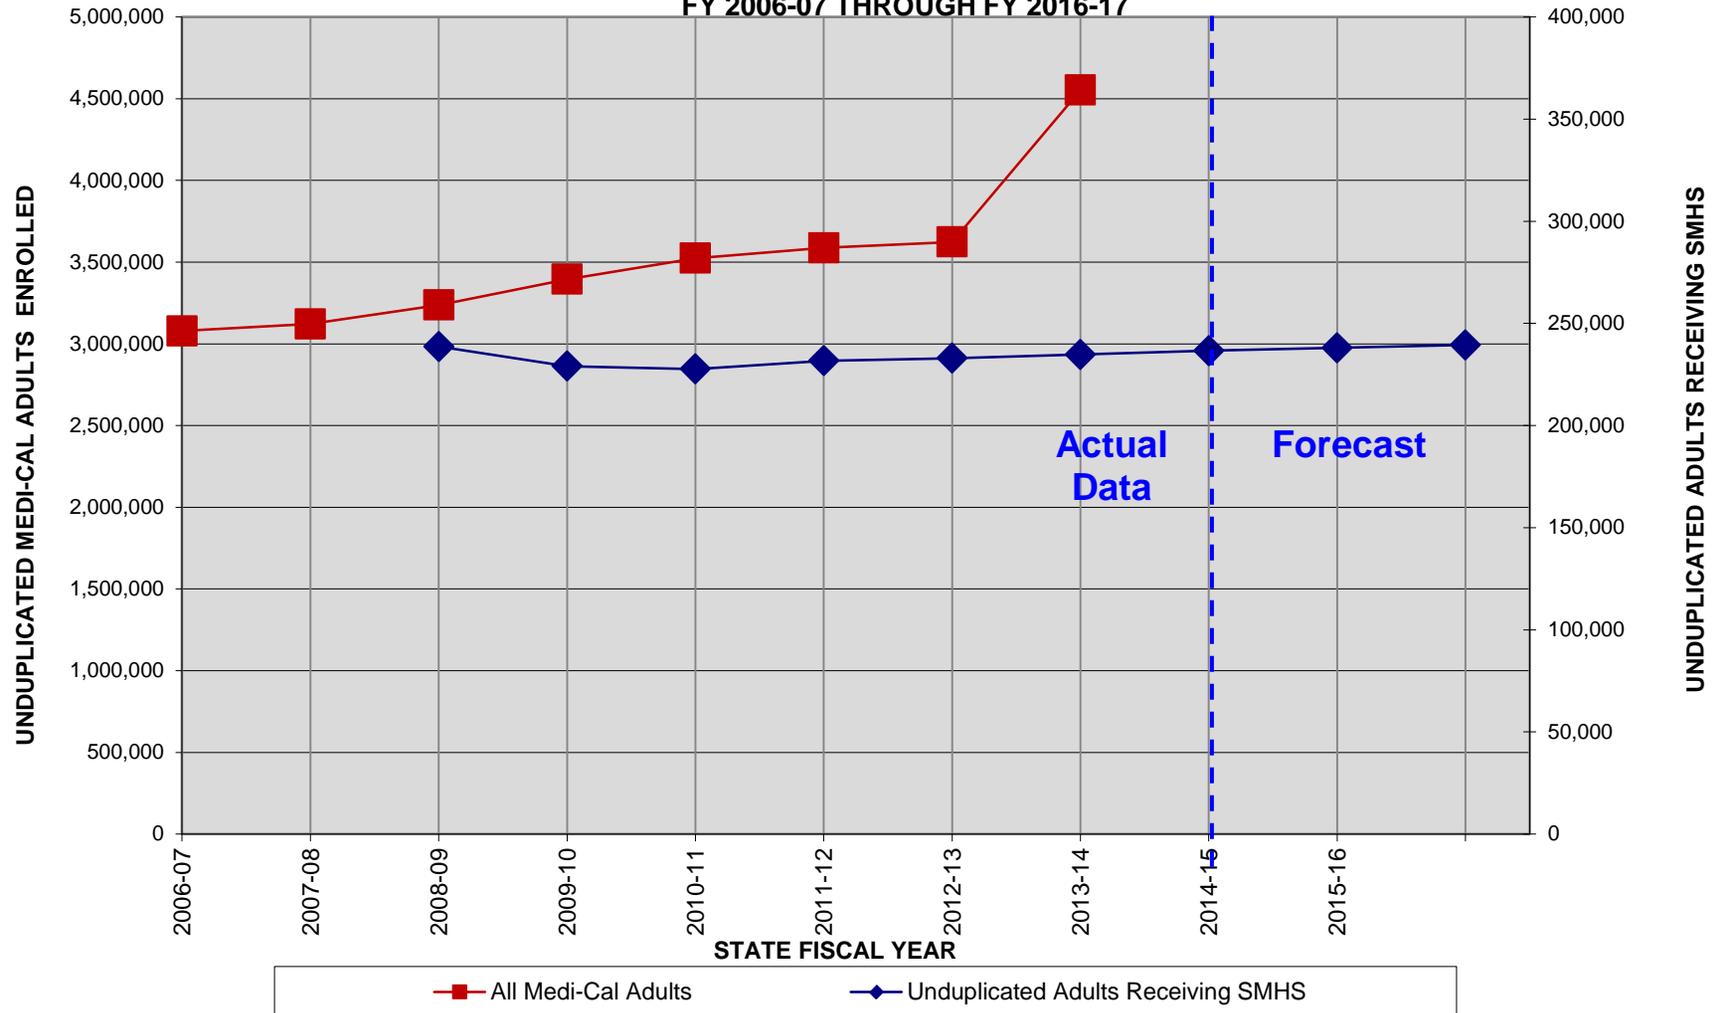

(5) Approved claims are slightly weighted as it is estimated that 90% of FY 13-14 claims have been approved.

About the Healthy Families Program

The Healthy Families Program (HFP) provided low cost insurance coverage for health, dental, and vision services to children who did not have insurance and did not qualify for no-cost Medi-Cal. Due to a change in State law; children who were enrolled in the HFP have been transitioned into Medi-Cal beginning January 1, 2013. The last HFP claims were approved in January 2014.

About the Healthy Families Program (HFP) Transition to Medi-Cal

Pursuant to Assembly Bill (AB) 1494, (Committee on Budget, Chapter 28, Statutes of 2012), all Healthy Families Program (HFP) enrollees transitioned to Medi-Cal as targeted low-income Medicaid children, as allowed under federal law, beginning January 1, 2013. The transition of approximately 875,000 HFP enrollees was implemented in four separate phases over the course of one year and in a manner that was intended to minimize disruptions in services, maintain adequate provider networks, and ensure access to care. Each Phase required an implementation plan, including information on health and dental plan network adequacy, continuity of care, eligibility and enrollment requirements, consumer protections, and family notifications.

Healthy Families Transition Approved Claims Amounts Statewide Summary

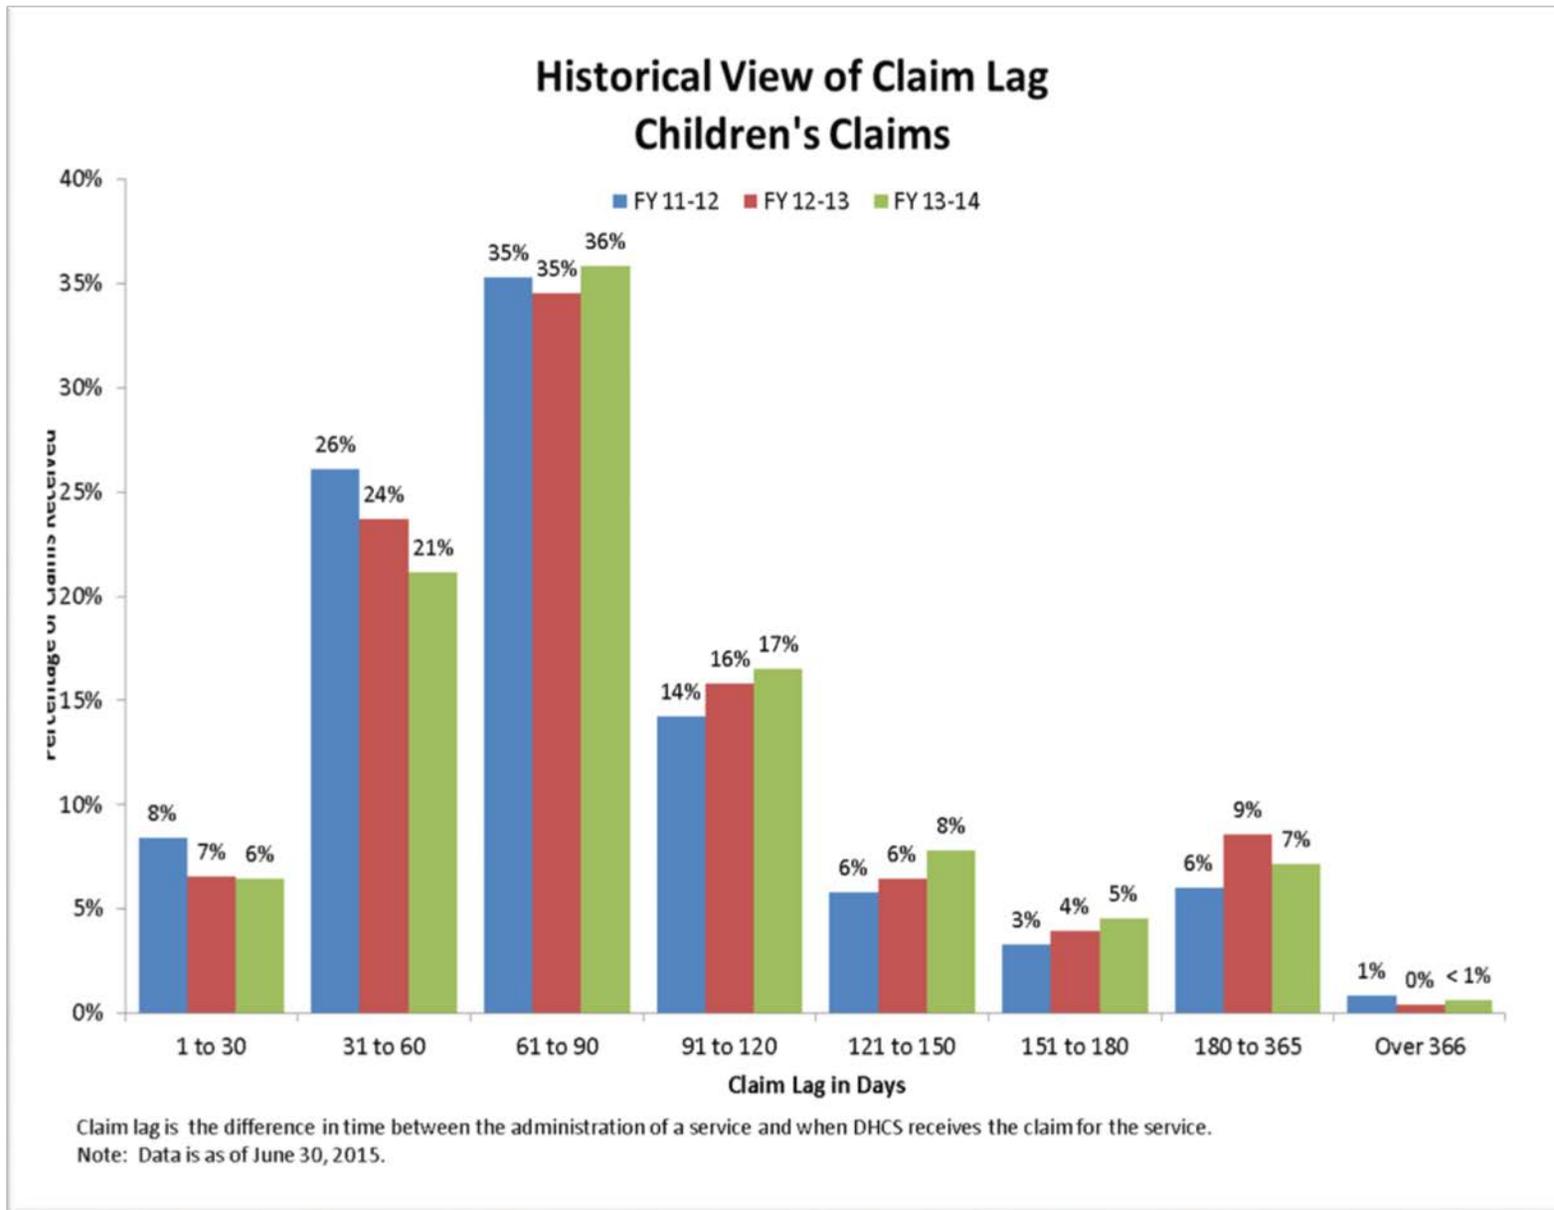

Note: Claims data is as of March 19, 2015 and is comprised of only SDMC claims. Due to the lag in claim submissions, data in more recent months is incomplete and therefore only represents a percentage of the claims that will come from services rendered in those months.

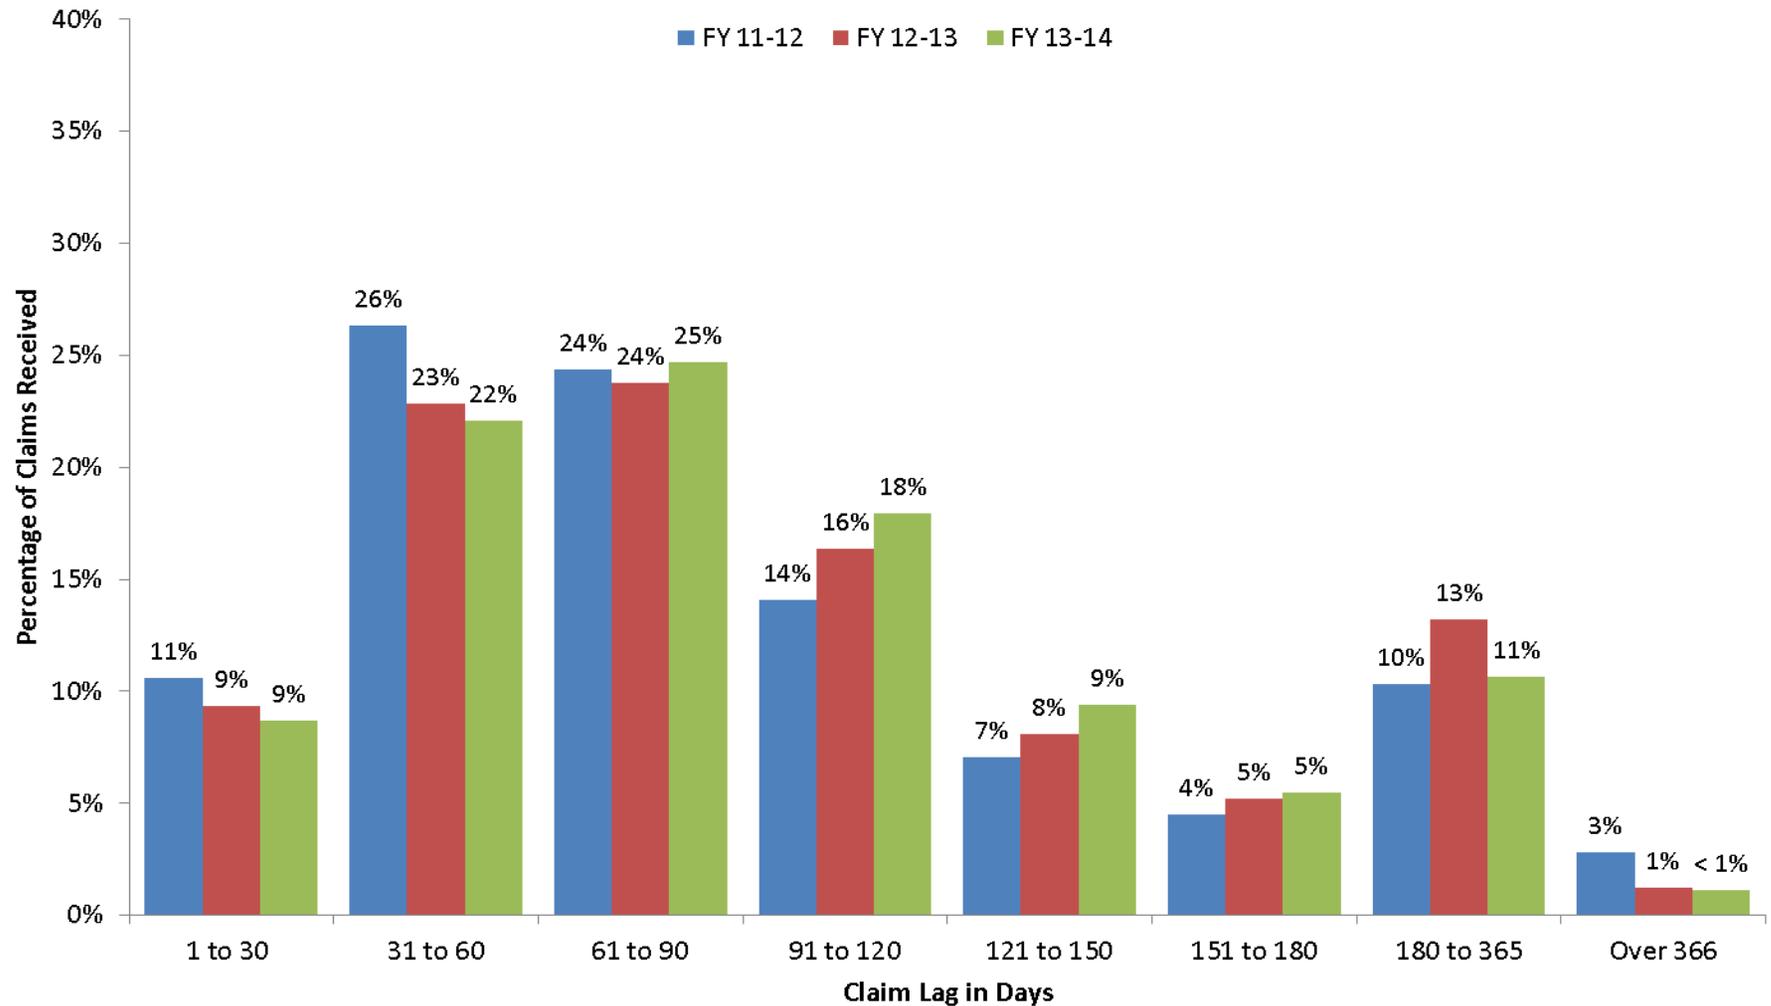

About Claim Lag

Claim lag is a normal part of the claims reimbursement process. The lag time is defined as the period of time from when the actual service occurred to when the county submits the claim to the State. The lag time may vary depending on local provider and county claim submission and review processes. Also, some counties submit claims on a weekly basis, while others submit claims on a monthly basis in batches.

The charts on the next pages provide a historical view of claim lag for Children and Adult services rendered in the last three fiscal years.

Historical View of Claim Lag Adult Claims

Claim lag is the difference in time between the administration of a service and when DHCS receives the claim for the service.
Note: Data is as of June 30, 2015.

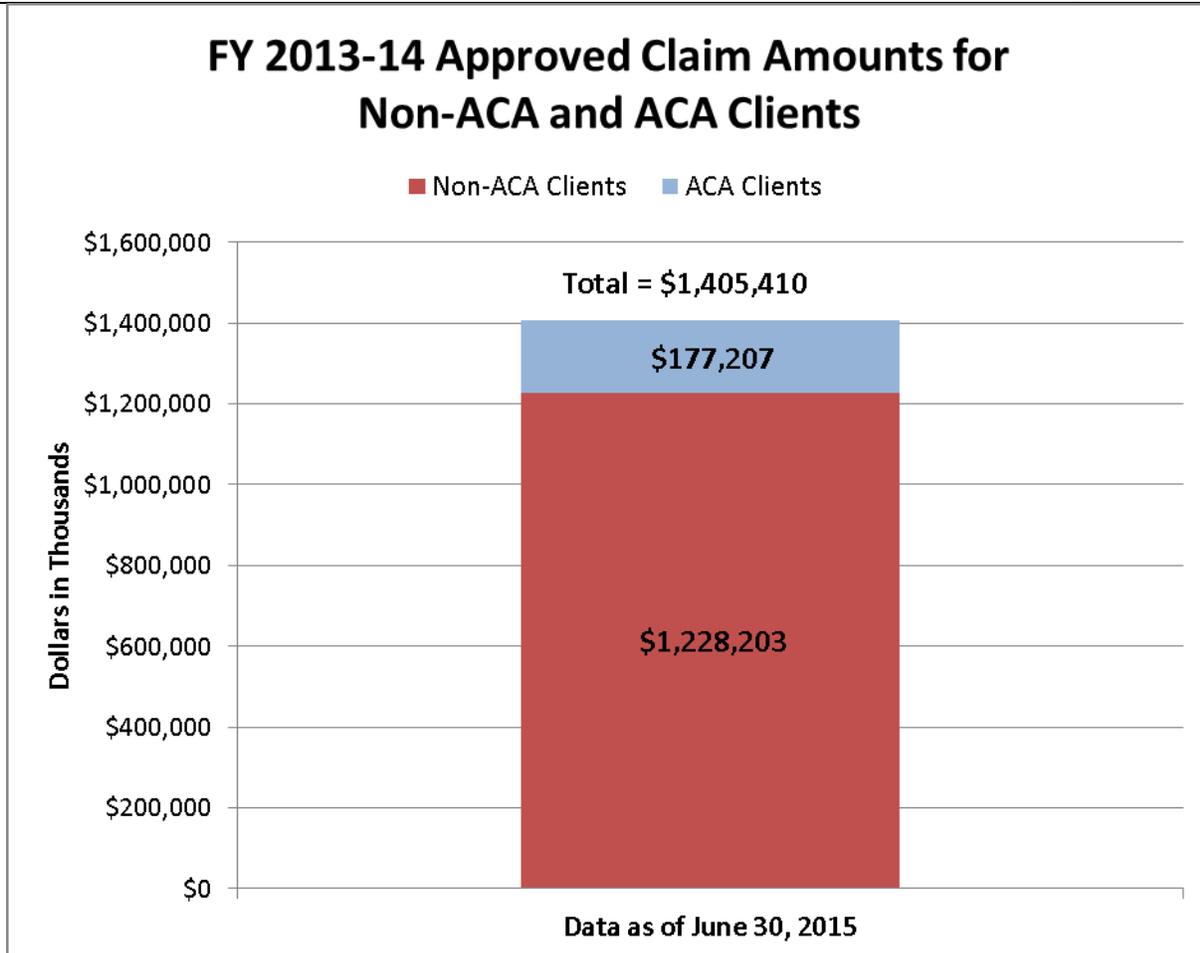

The Affordable Care Act and Specialty Mental Health Services

The Affordable Care Act has made specialty mental health services available to newly enrolled individuals who meet medical necessity criteria. The data for the Affordable Care Act (ACA) Expansion Clients is as of June 30, 2015. The data represents actual approved claims received as of June 30, 2015 and is not adjusted for claim lag nor has any forecasting methodology been applied to the data. The presented data simply serves as an early indication of the growth and utilization of SMHS by ACA Expansion Clients.

Impact of the ACA on SMHS

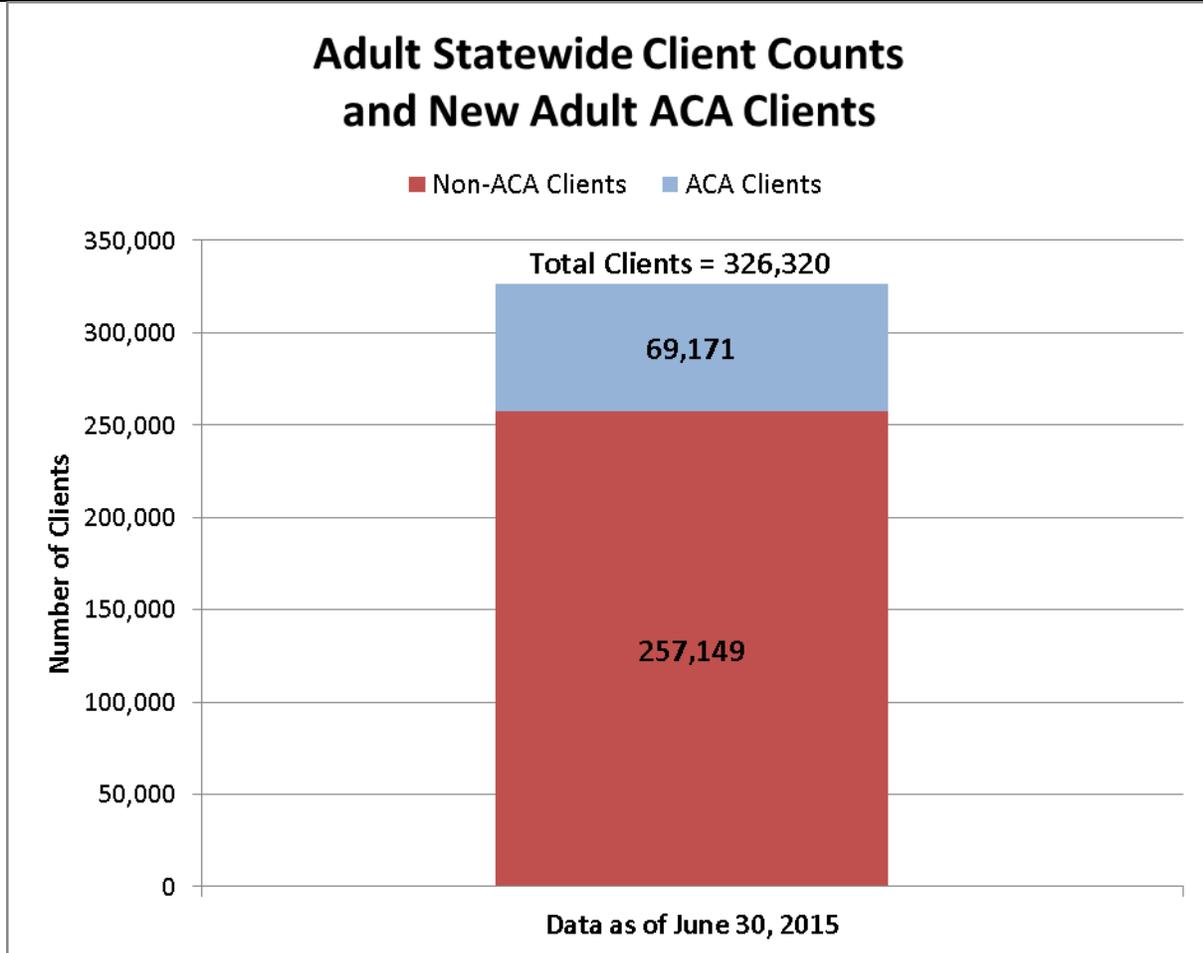

Based on the current data, the ACA has increased the number and dollar amount of approved SMHS claims for adults. Specialty Mental Health Services defines adults as individuals who are 21 or older. Under the ACA expansion, individuals ages 18 and older can apply for Medi-Cal. As such, the ACA expansion clients being compared with Non-ACA adults currently receiving SMHS cannot be equally compared; however, given that only 1.8% of the ACA clients are between the ages of 18 and 20, the comparison should be considered reasonably accurate.

The ACA approved claim amounts shown below are not forecasted amounts due to the short six month data collection period. This is because claims associated with the ACA were first approved beginning in January 2014 and the 2013-14 state fiscal year ended on June 30, 2014. The non-ACA data in the following tables are also not forecasted amounts and therefore may differ when compared to other data in this document. The \$177 million shown below represents approved claims from ACA clients that were received by June 30, 2015.

Growth in the Client Base

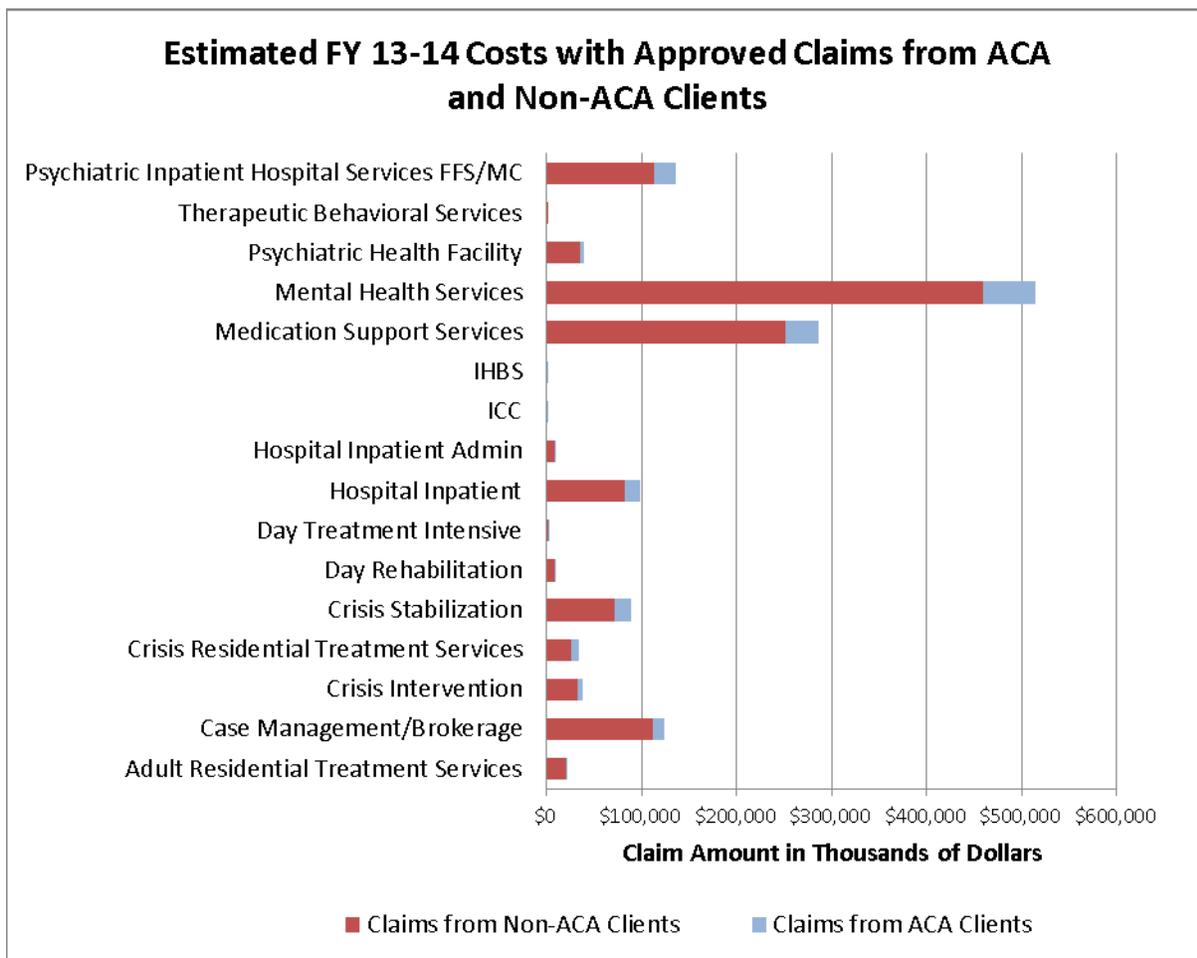

The growth in new adult clients receiving SMHS due to the ACA is significant. Clients from both the Short-Doyle Medi-Cal and Fee-for-Service claiming systems are included in these counts.

Note: Under the ACA, adults are defined as individuals who are 18 and older. For the SMHS program adults are defined as individuals 21 and older. Only 1.8% of the ACA clients are between the ages of 18 and 20 and therefore are being grouped with the SMHS adult client base as they do not significantly impact the comparative analysis.

Impact of the ACA at the Service Type Level

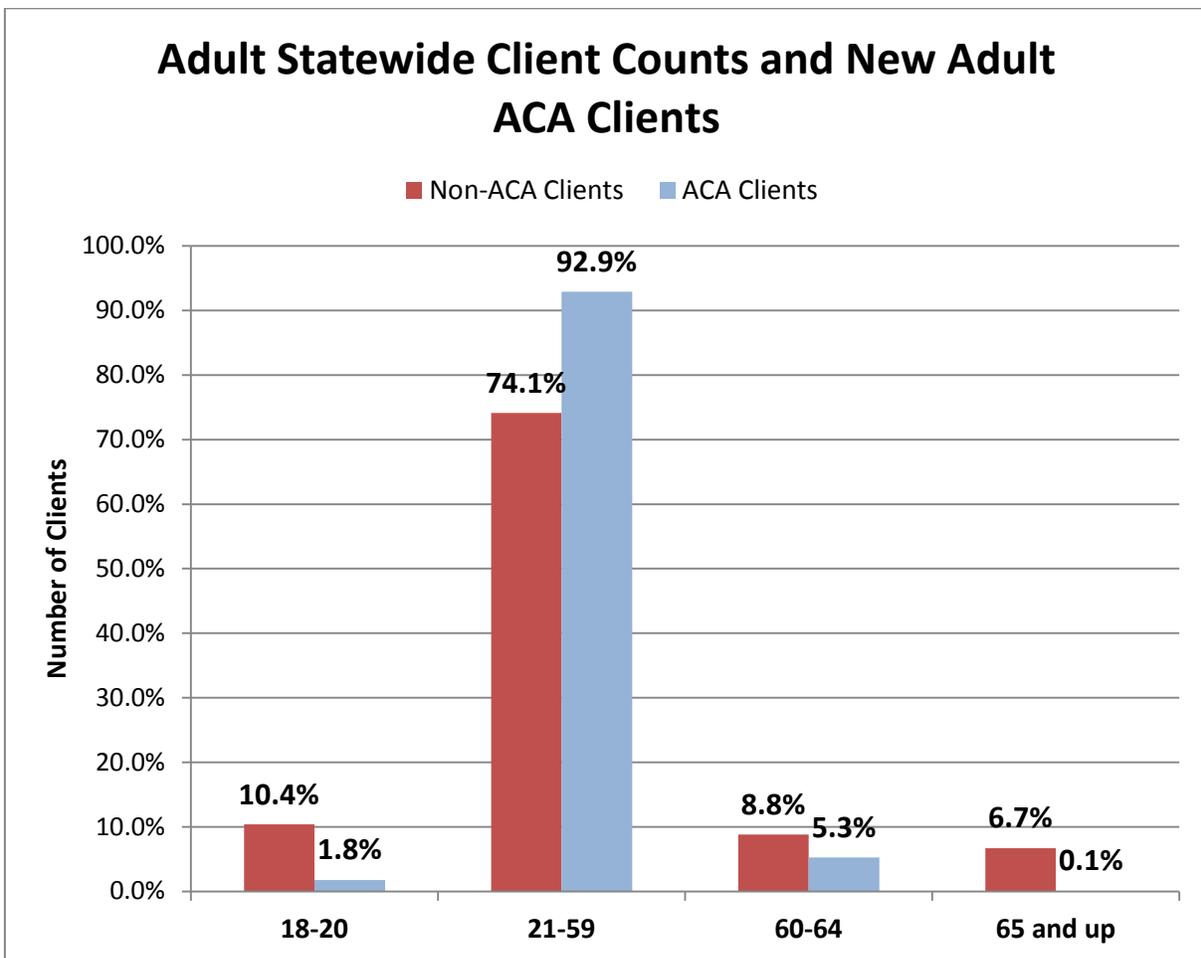

The chart below shows the FY 13-14 service type costs from Non-ACA adult clients and the added cost to those respective service types from ACA clients from claims received as of June 30, 2015. At present the average service type may see a 7% to 25% increase in costs due to new ACA clients. Due to unknown claim lag factors for the ACA approved claims, the data presented below does not constitute a forecast of the total FY 13-14 approved claim amounts by service type with ACA clients.

Demographics by Age: Non-ACA vs. ACA enrollees

The ACA broadened the qualifications for Medi-Cal by raising the maximum income level for an individual to 138% or lower of the Federal Poverty Level and broadened the age requirement to individuals 18 and older. This expansion of the Medi-Cal qualifications has allowed millions of Californians to be able to select Medi-Cal as an insurance plan through Covered California.

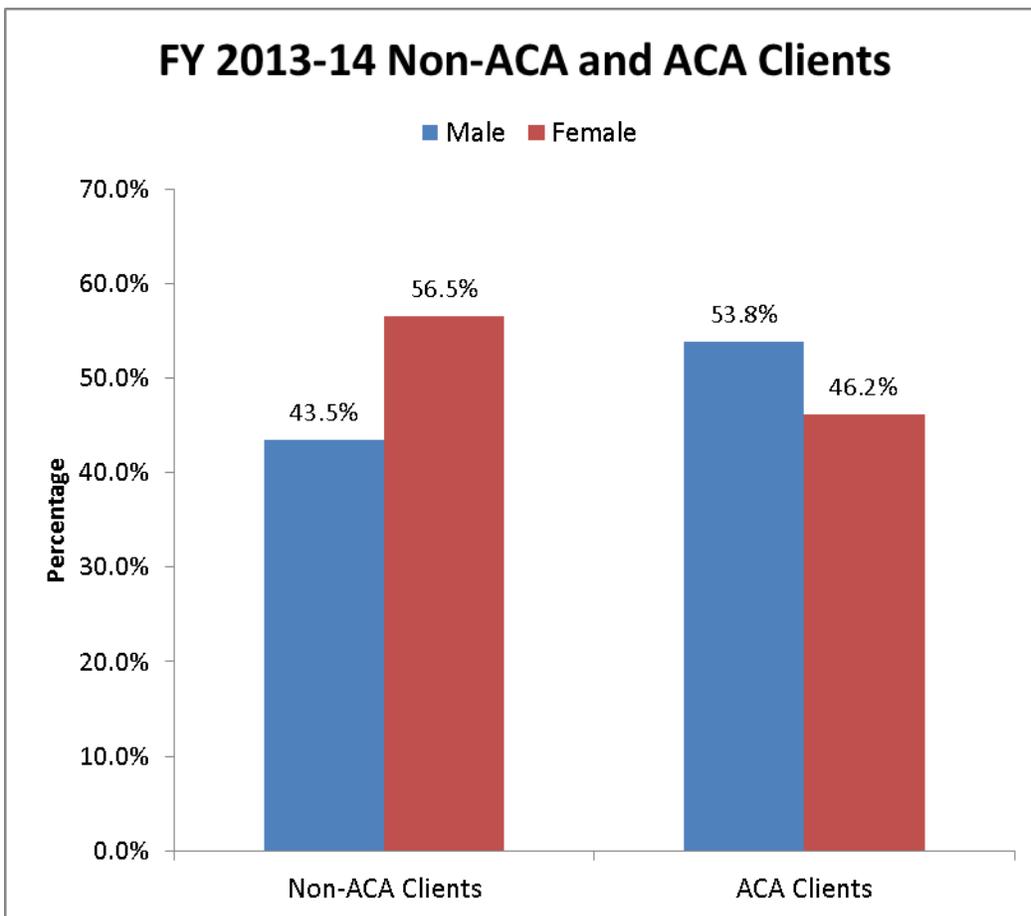

The chart below shows that 74.1% of non-ACA clients were between the ages of 21 and 59 while for ACA clients, the percentage was 92.9%. More ACA clients are in the 21 to 59 age group partly because prior to the implementation of the ACA, most individuals who qualified for Medi-Cal were either children under 21 or adults aged 65 and older.

Note: For SMHS services the age distribution was adjusted to include 18 to 20 year old beneficiaries in order to make the ACA and Non-ACA client age groups comparable.

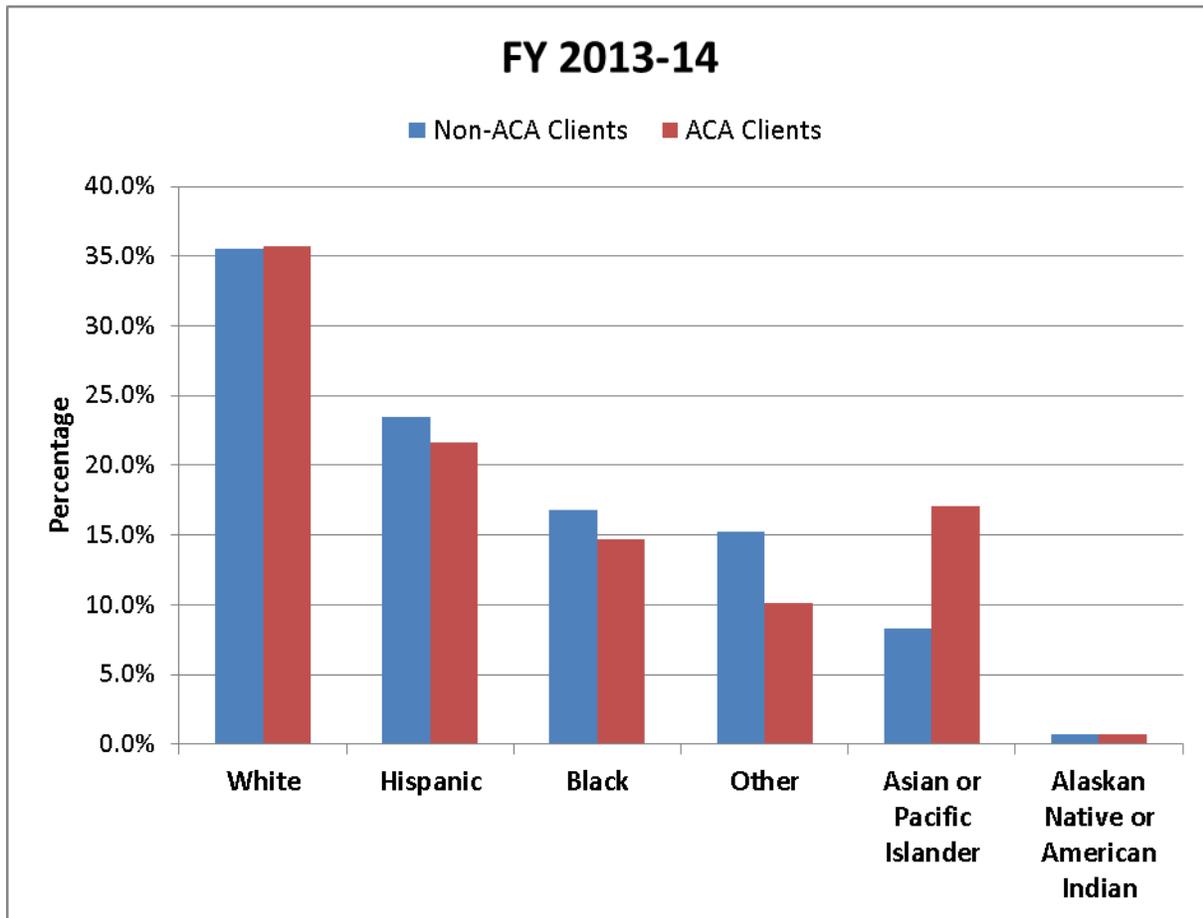

Demographics by Gender: Non-ACA vs. ACA enrollees

The chart below shows that of the ACA clients who received SMHS, 53.8% were men, while 46.2% were women. For non-ACA clients, a higher percentage of females received services compared to males.

Demographics by Race: Non-ACA vs. ACA enrollees

The chart below shows that 35.7% of ACA clients are White, 21.7% are Hispanic, and 14.7% of ACA clients are Black. For Hispanic and Black clients, the difference between ACA and non-ACA clients is approximately 2%.

Summary Findings ACA and its impact to SMHS

The ACA is having a significant impact to SMHS. Utilizing claims data as of June 30, 2015 we can conservatively state that an additional \$177 million in SMHS was provided to approximately 63 thousand Medi-Cal ACA clients. The \$177 million is a conservative figure as it represents claims received through June 30, 2015 and is not adjusted for claim lag. The full impact of the ACA on SMHS will not be known until additional data become available.

Children Adult Crisis Residential Services

Adult Crisis Residential Services (CRS):

Adult crisis residential services provide an alternative to acute psychiatric hospital services for beneficiaries who otherwise would require hospitalization. The CRS programs for adults provide normalized living environments, integrated into residential communities. The services follow a social rehabilitation model that integrates aspects of emergency psychiatric care, psychosocial rehabilitation, milieu therapy, case management and practical social work.

Summary:

The forecast for Adult Crisis Residential Services include an increase in client counts and increases in annual costs over the next few fiscal years.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Actual data as of June 30, 2015			

Budget Forecast Narrative:

A slight growth in dollars while clients are forecasted to stay consistent for FY 2015-16 and FY 2016-17.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2013-14 client tables and the historical trends tables are based upon claims received as of June 30, 2015.

Note:

The following tables utilize data for FY 2013-2014. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Children

Adult Residential Services

Adult Residential Treatment Services:

Adult Residential Treatment Services are rehabilitative services provided in a non-institutional, residential setting for beneficiaries who would be at risk of hospitalization or other institutional placement if they were not receiving residential treatment services. The services include a wide range of activities and services that support beneficiaries in their effort to restore, maintain, and apply interpersonal and independent living skills and to access community support systems. Service activities may include assessment, plan development, therapy, rehabilitation, and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Adult Residential Services indicates a slight decline in costs and a slight decline in clients.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Actual data as of December 31, 2014

Budget Forecast Narrative:

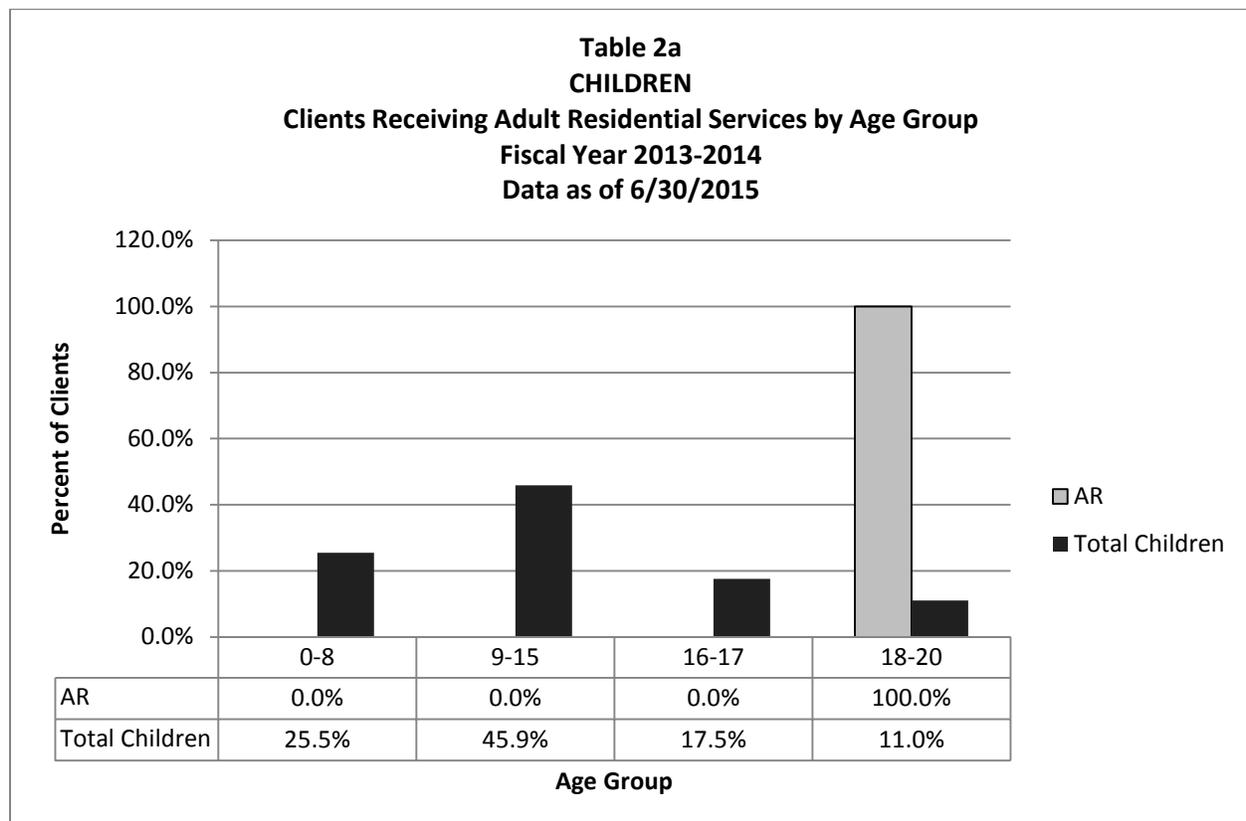

The forecast indicates a declining trend in costs and clients through FY 2015-16 and FY 2016-17.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Crisis Intervention

Crisis Intervention:

Crisis intervention services last less than 24 hours and are for, or on behalf of, a beneficiary for a condition that requires more timely response than a regularly scheduled visit. Service activities include, but are not limited to, assessment, collateral and therapy. Crisis Intervention services may either be face-to-face or by telephone with the beneficiary or the beneficiary’s significant support person and may be provided anywhere in the community.

Summary:

The costs are forecasted to increase while the number of clients decreases slightly for Crisis Intervention services through FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Crisis Stabilization

Crisis Stabilization:

Crisis stabilization services last less than 24 hours and are for, or on behalf of, a beneficiary for a condition that requires a more timely response than a regularly scheduled visit. Service activities include but are not limited to one or more of the following: assessment, collateral, and therapy. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Crisis Stabilization Services is for moderate growth in clients and costs over the next few fiscal years.

Children

Day Rehabilitation Half Day

Day Rehabilitation (Half-Day):

Day rehabilitation services are a structured program of rehabilitation and therapy with services to improve, maintain or restore personal independence and functioning, consistent with requirements for learning and development and that provide services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Day Rehabilitation Half Day Services is for a decline in both dollars and clients.

The Department believes that the reduction in the use of Day Treatment and Day Rehabilitation Half Day and Full Day services is due to counties using more community based services to achieve the same or better outcomes through more cost-effective services. Counties are serving fewer children in group home and non-public school settings, which are the primary providers of day treatment and day rehabilitation services. This is due to the implementation of Mental Health Services Act (MHSA) Full Service Partnerships, the ongoing Katie A. core practice model and services, and other innovations that allow counties to effectively meet the needs of clients at home rather than institutional settings.

Children

Day Rehabilitation Full Day

Day Rehabilitation (Full-Day):

Day rehabilitation services are a structured program of rehabilitation and therapy with services to improve, maintain or restore personal independence and functioning, consistent with requirements for learning and development and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Day Rehabilitation Full Day Services shows a decrease in clients and cost through FY 2014-15 and FY 2015-16.

The Department believes that the reduction in the use of Day Treatment and Day Rehabilitation Half Day and Full Day services is due to counties using more community based services to achieve the same or better outcomes with less costly services. Counties are serving fewer children in group home and non-public school settings, which are the primary providers of day treatment and day rehabilitation services. This is due to the implementation of Mental Health Services Act (MHSA) Full Service Partnerships, the Katie A. core practice model and services, and other innovations that allow counties to effectively meet the needs of clients at home rather than institutional settings.

Children

Day Treatment Intensive Half Day

Day Treatment Intensive (Half-Day):

Day treatment intensive services are a structured, multi-disciplinary program of therapy that may be used as an alternative to hospitalization, or to avoid placement in a more restrictive setting, or to maintain the client in a community setting and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to, assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Day Treatment Intensive Half Day Services is for a sharp decrease in costs.

The Department believes that the reduction in the use of Day Treatment and Day Rehabilitation Half Day and Full Day services is due to counties using more community based services to achieve the same or better outcomes with less costly services. Counties are serving fewer children in group home and non-public school settings, which are the primary providers of day treatment and day rehabilitation services. This is due to the implementation of Mental Health Services Act (MHSA) Full Service Partnerships, the Katie A. core practice model and services, and other innovations that allow counties to effectively meet the needs of clients at home rather than institutional settings.

<small>⁽¹⁾The forecast dollars are unreasonably low due to a reporting error by San Diego county that year Actual data as of December 31, 2014</small>			

Budget Forecast Narrative:

There has been a sharp decline in cost with Day Treatment Intensive Half Day services over the past few years. The dollar amount for claims is expected to significantly decrease in FY 2015-16 and FY 2016-17.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Children Medication Support

Medication Support:

Medication support services include prescribing, administering, dispensing and monitoring of psychiatric medications or biologicals that are necessary to alleviate the symptoms of mental illness. Service activities may include but are not limited to: evaluation of the need for medication; evaluation of clinical effectiveness and side effects; obtaining informed consent; instruction in the use, risks and benefits of, and alternatives for, medication; collateral and plan development related to the delivery of service and/or assessment for the client; prescribing, administering, dispensing and monitoring of psychiatric medications or biologicals; and medication education.

Summary:

The number of clients is forecasted to increase slightly with an overall increase in costs through FY 2014-15 and FY 2015-16.

Psychiatric Health Facility Services

Psychiatric Health Facility (PHF):

“Psychiatric Health Facility” means a facility licensed under the provisions beginning with Section 77001 of Chapter 9, Division 5, Title 22 of the California Code of Regulations. “Psychiatric Health Facility Services” are therapeutic and/or rehabilitative services provided in a psychiatric health facility on an inpatient basis to beneficiaries who need acute care, which meets the criteria of Section 1820.205 of Chapter 11, Division 1, Title 9 of the California Code of Regulations, and whose physical health needs can be met in an affiliated general acute care hospital or in outpatient settings. These services are separate from those categorized as “Psychiatric Hospital Inpatient”.

Summary:

The forecast for Psychiatric Health Facility (PHF) Services shows an increase in the number of clients and total costs through FY 2014-15 and FY 2015-16.

Psychiatric Hospital Inpatient Services – SD/MC Hospitals

Psychiatric Hospital Inpatient Services – SD/MC Hospitals:

Psychiatric hospital inpatient services include both acute psychiatric inpatient hospital services and administrative day services. Acute psychiatric hospital inpatient services are provided to beneficiaries for whom the level of care provided in a hospital is medically necessary to diagnose or treat a covered mental illness. Administrative day services are inpatient hospital services provided to beneficiaries who were admitted to the hospital for an acute psychiatric hospital inpatient service and the beneficiary’s stay at the hospital must be continued beyond the beneficiary’s need for acute psychiatric hospital inpatient services due to lack of residential placement options at non-acute residential treatment facilities that meet the needs of the beneficiary.

Psychiatric hospital inpatient services are provided by SD/MC hospitals and FFS/MC hospitals. Mental Health Plans (MHPs) claim reimbursement for the cost of psychiatric hospital inpatient services provided by SD/MC hospitals through the SD/MC claiming system. FFS/MC hospitals claim reimbursement for the cost of psychiatric hospital inpatient services through the FFS/MC Fiscal Intermediary system. MHPs are responsible for authorization of psychiatric hospital inpatient services reimbursed through either billing system. For SD/MC hospitals, the daily rate includes the cost of any needed professional services. The FFS/MC hospital daily rate does not include professional services, which are billed separately from the FFS/MC hospital inpatient services via the SD/MC claiming system.

Summary:

The forecast for Psychiatric Hospital Inpatient Services provided by SD/MC hospitals shows a small growth in cost and a slight decrease in clients through FY 2014-15 and FY 2015-16.

Costs for Psychiatric Hospital Inpatient Services are forecast to increase slightly through FY 2015-16 and FY 2016-17.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Targeted Case Management

Targeted Case Management (TCM):

Targeted case management (TCM) is a service that assists a beneficiary in accessing needed medical, educational, social, prevocational, vocational, rehabilitative, or other community services. The service activities may include, but are not limited to, communication, coordination and referral; monitoring service delivery to ensure beneficiary access to services and the service delivery system; monitoring of the beneficiary's progress, placement services, and plan development. TCM services may be face-to-face or by telephone with the client or significant support persons and may be provided anywhere in the community. Additionally, services may be provided by any person determined by the MHP to be qualified to provide the service, consistent with the scope of practice and state law.

Summary:

The forecast for Targeted Case Management Services shows slight decline in cost and slight growth in clients through FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Children

Therapeutic Behavioral Service

Therapeutic Behavioral Services (TBS):

Therapeutic behavioral services are intensive, individualized, short-term outpatient treatment interventions for beneficiaries up to age 21. Individuals receiving these services have serious emotional disturbances (SED), are experiencing a stressful transition or life crisis and need additional short-term, specific support services to accomplish outcomes specified in the written treatment plan.

Summary:

TBS has shown rapid growth since its inception. Recent trends reflected in claims data points to continued growth, consistent with the settlement objectives of the Emily Q. lawsuit.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>
Actual	FY 2010-11	\$ 80,379,357	6,424
Actual	FY 2011-12	\$ 87,071,833	7,332
Actual	FY 2012-13	\$ 103,451,558	7,990
Actual	FY 2013-14	\$ 101,772,706	8,085
Actual + Forecast	FY 2014-15	\$ 101,771,510	8,560
Forecast	FY 2015-16	\$ 108,213,099	9,239
Forecast	FY 2016-17	\$ 114,654,693	9,915

Actual data as of December 31, 2014

Budget Forecast Narrative:

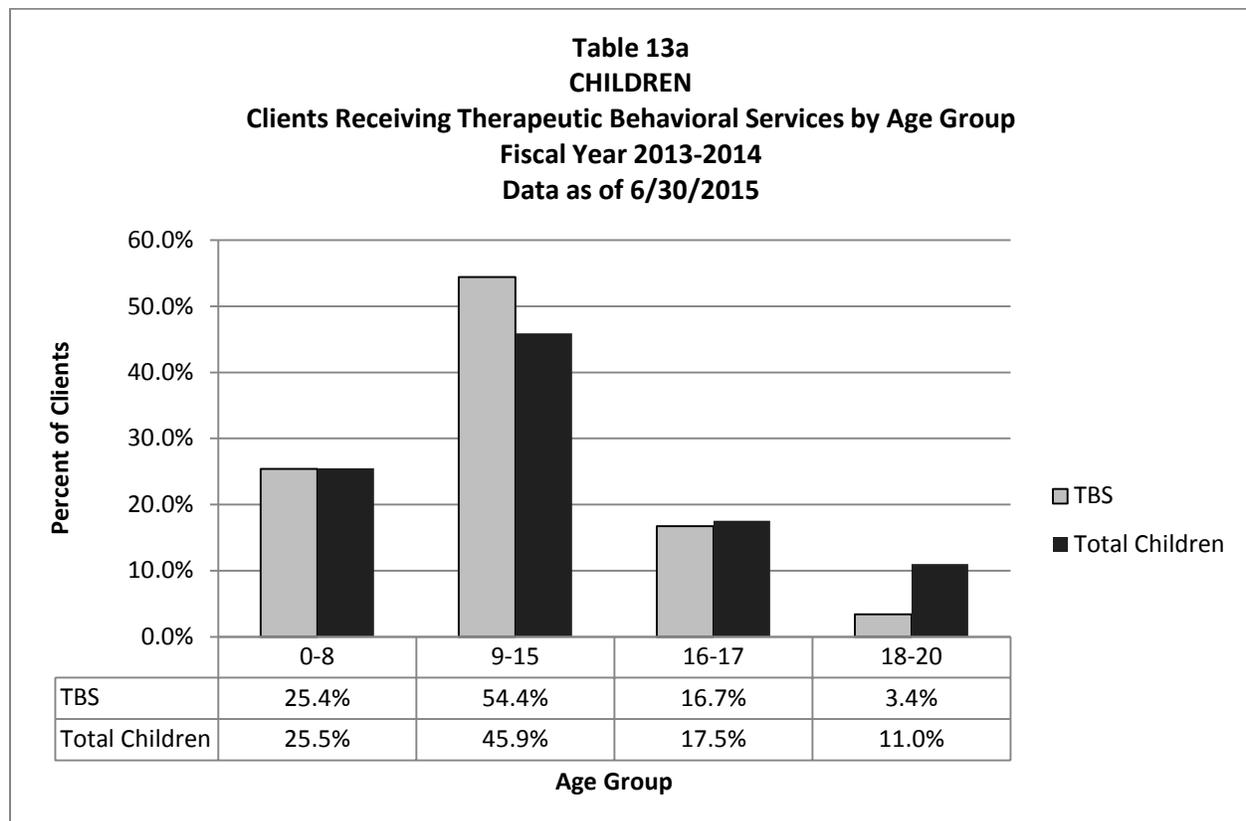

Medi-Cal is required to provide TBS services to eligible Medi-Cal beneficiaries under age 21; this requirement was an outcome of a 2001 Judgment and Permanent Injunction in the Emily Q. lawsuit. The settlement established a benchmark whereby four percent of children and youth receiving EPSDT services would be recipients of TBS. TBS has experienced significant caseload and expenditure growth in recent years, with expenditures increasing at a slightly higher rate.

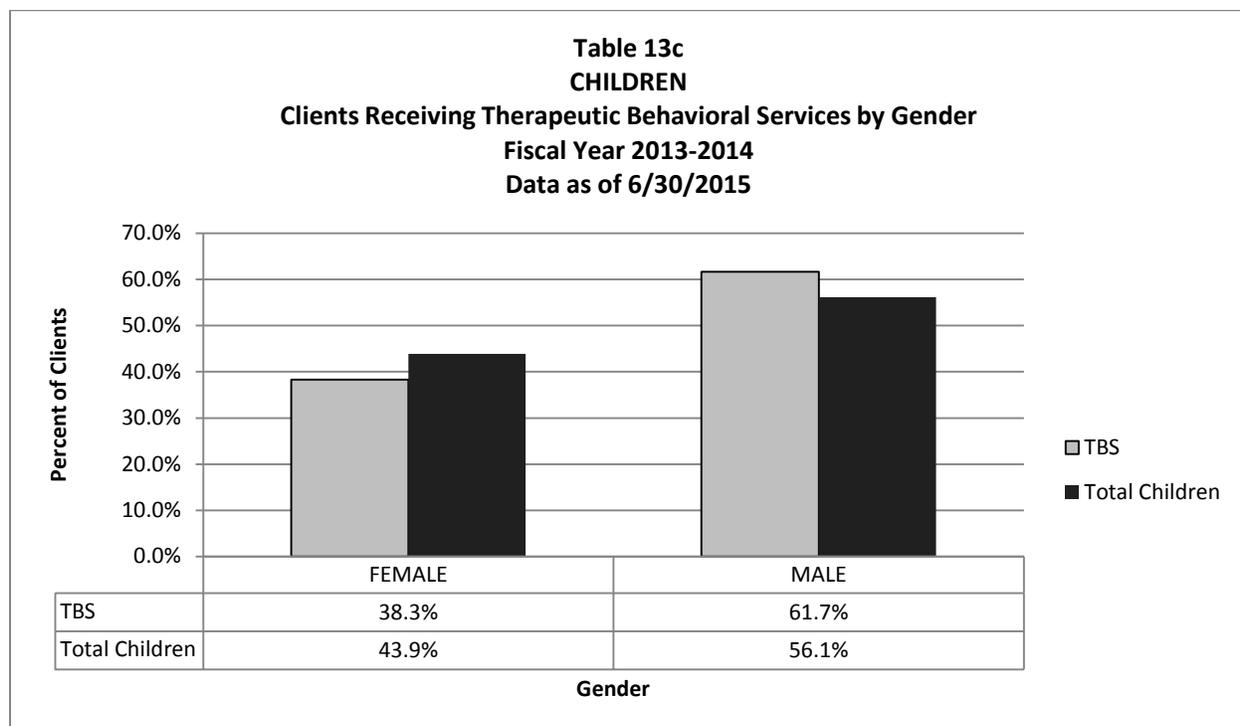

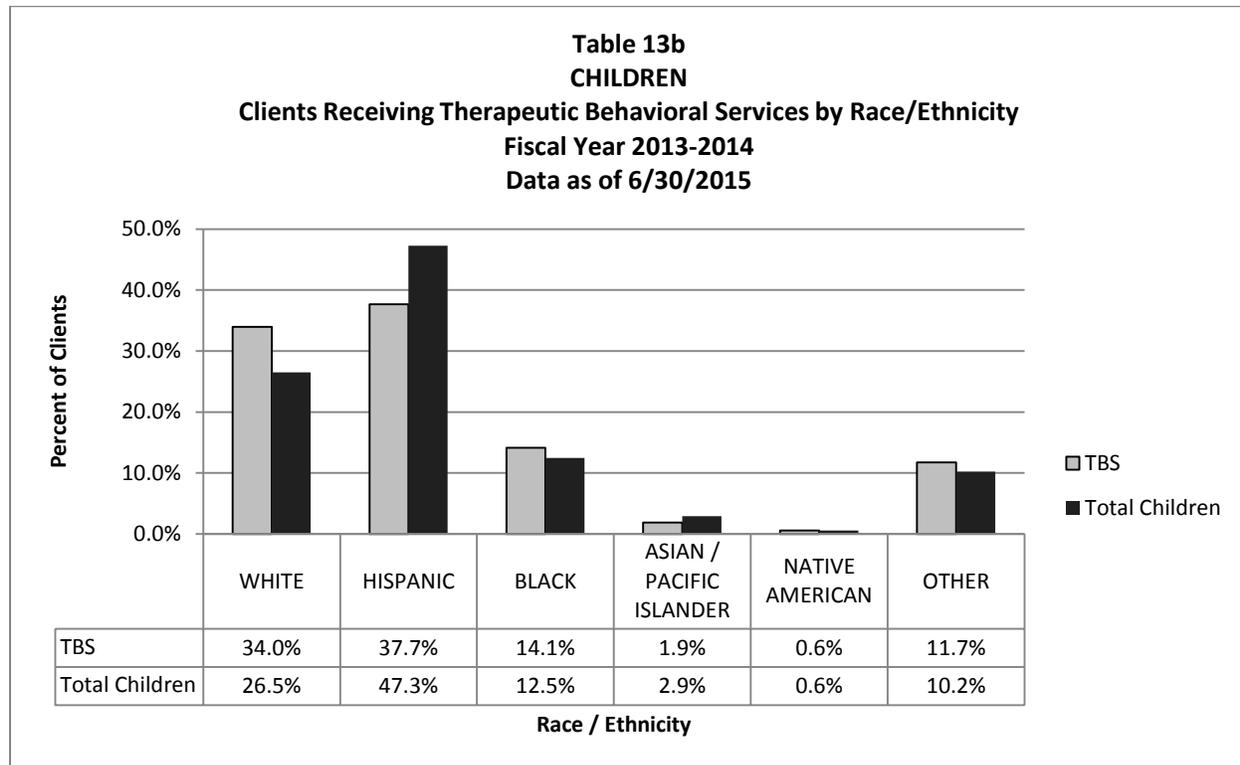

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. Therapy and Other Service Activities

Therapy and Other Service Activities (formerly referred to as Mental Health Services):

Individual or group therapies and interventions are designed to provide a reduction of mental disability and restoration, improvement or maintenance of functioning consistent with the goals of learning, development, independent living, and enhanced self-sufficiency. These services are separate from those provided as components of adult residential services, crisis intervention, crisis stabilization, day rehabilitation, or day treatment intensive. Service activities may include, but are not limited to:

1. Assessment – A service activity designed to evaluate the current status of mental, emotional, or behavioral health. Assessment includes, but is not limited to, one or more of the following: mental status determination, analysis of the clinical history, analysis of relevant cultural issues and history; diagnosis; and the use of mental health testing procedures.
2. Plan Development – A service activity that consists of development of client plans, approval of client plans, and/or monitoring and recording of progress.
3. Therapy – A service activity that is a therapeutic intervention that focuses primarily on symptom reduction as a means to reduce functional impairments. Therapy may be delivered to an individual or group and may include family therapy at which the client is present.
4. Rehabilitation – A service activity that includes, but is not limited to, assistance, improving, maintaining or restoring functional skills, daily living skills, social and leisure skills, grooming and personal hygiene skills; obtaining support resources; and/or obtaining medication education.
5. Collateral – A service activity involving a significant support person in the beneficiary's life for the purpose of addressing the mental health needs of the beneficiary in terms of achieving goals of the beneficiary's client plan. Collateral may include, but is not limited to, consultation and training of the significant support person(s) to assist in better utilization of mental health services by the client, consultation and training of the significant support person(s) to assist in better understanding of mental illness, and family counseling with the significant support person(s) in achieving the goals of the client plan. The client may or may not be present for this service activity.

The distribution of use and expenditures of each service activity varies over time with changes in client needs.

Summary:

The forecast for Therapy and Other Service Activities dollars and clients shows substantial growth primarily driven by an increase in the number of clients served.

Children

Psychiatric Hospital Inpatient Services – FFS/MC Hospitals

Psychiatric Hospital Inpatient Services – FFS/MC Hospitals:

Psychiatric hospital inpatient services include both acute psychiatric hospital inpatient services and administrative day services. Acute psychiatric hospital inpatient services are provided to beneficiaries for whom the level of care provided in a hospital is medically necessary to diagnose or treat a covered mental illness. Administrative day services are inpatient hospital services provided to beneficiaries who were admitted to the hospital for an acute psychiatric hospital inpatient service and the beneficiary's stay at the hospital must be continued beyond the beneficiary's need for acute psychiatric hospital inpatient services due to lack of residential placement options at non-acute residential treatment facilities that meet the needs of the beneficiary.

Psychiatric hospital inpatient services are provided by Short-Doyle / Medi-Cal (SD/MC) hospitals and Fee-for-Service / Medi-Cal (FFS/MC) hospitals. Mental Health Plans (MHPs) claim reimbursement for the cost of psychiatric hospital inpatient services provided by Short-Doyle Medi-Cal hospitals through the Short-Doyle Medi-Cal (SD/MC) claiming system. FFS/MC hospitals claim reimbursement for the cost of psychiatric hospital inpatient services through the FFS/MC Fiscal Intermediary system. MHPs are responsible for authorization of psychiatric hospital inpatient services reimbursed through either billing system. For SD/MC hospitals, the daily rate includes the cost of any needed professional services. The FFS/MC hospital daily rate does not include professional services, which are billed separately from the FFS/MC hospital inpatient services via the SD/MC claiming system.

Summary:

The forecast for Psychiatric Hospital Inpatient Services provided by FFS/MC hospitals projects growth in costs and clients through 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Children

Intensive Care Coordination

Intensive Care Coordination (ICC):

Intensive care coordination is a targeted case management service that facilitates assessment of, care planning for and coordination of services, including urgent services for all children and youth under the age of 21 who are eligible for full scope Medi-Cal benefits and who meet medical necessity criteria for these services. ICC services are provided within the Child and Family Team (CFT) and in accordance with the Core Practice Model (CPM). ICC must be used to facilitate implementation of the cross-system/multi-agency collaborative services approach described in the CPM. ICC service components include: assessing; service planning and implementation; monitoring and adapting; and transition. The CFT is comprised of the child/youth and family and all ancillary individuals who work together to develop and implement the client plan and are responsible for supporting the child/youth and family in attaining their goals. There must be an ICC coordinator who:

- Ensures that medically necessary services are accessed, coordinated and delivered in a strength-based, individualized family/youth driven and culturally and linguistically competent manner and that services and supports are guided by the needs of the child/youth;
- Facilitates a collaborative relationship among the child/youth, his/her family and involved child-serving systems;
- Supports the parent/caregiver in meeting their child/youth’s needs;
- Helps establish the CFT and provides ongoing support; and
- Organizes and matches care across providers and child serving systems to allow the child/youth to be served in his/her community

Summary:

Intensive Care Coordination is provided to all children and youth under the age of 21 who are eligible for full scope Medi-Cal benefits and who meet medical necessity criteria for these services.

Actual data as of December 31, 2014			
*Data is not weighted and only represents claims received as of 12/31/2014			

Budget Forecast Narrative:

There is insufficient data to produce a forecast at this time. Cost figures reported are actual claim costs for claims received through December 31, 2014 and do not represent an estimate of total service costs for FY 2014-15. Claim costs for 14-15 will be higher as additional claims are submitted.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Children

Intensive Home Based Services

Intensive Home Based Services (IHBS):

Intensive home based services are individualized, strength-based interventions designed to ameliorate mental health conditions that interfere with a child/youth’s functioning and are aimed at helping the child/youth build skills necessary for successful functioning in the home and community and improving the child/youth’s family ability to help the child/youth successfully function in the home and community. IHBS services are provided within the Child and Family Team (CFT) and in accordance with the Core Practice Model (CPM). The CFT participates in the development of the child’s and family’s overall service plan which may include IHBS. Service activities may include, but are not limited to assessment, plan development, therapy, rehabilitation and collateral. IHBS is provided to all children and youth under the age of 21 who are eligible for full scope Medi-Cal benefits and who meet medical necessity criteria for these services.

Summary:

Intensive Home Based Services are provided to all children and youth under the age of 21 who are eligible for full scope Medi-Cal benefits and who meet medical necessity criteria for these services.

Adult Services Section

Adults

Adult Crisis Residential Services

Adult Crisis Residential Services (CRS):

Adult crisis residential services provide an alternative to acute psychiatric hospital services for beneficiaries who otherwise would require hospitalization. The CRS programs for adults provide normalized living environments, integrated into residential communities. The services follow a social rehabilitation model that integrates aspects of emergency psychiatric care, psychosocial rehabilitation, milieu therapy, case management and practical social work.

Summary:

The forecast for Adult Crisis Residential Services includes slight increases in client counts and slight increases in annual costs over the next few fiscal years.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Forecast	FY 2016-17	\$ 29,199,822	4,897

Actual data as of June 30, 2015

Budget Forecast Narrative:

Dollars and clients are expected to continue to grow for FY 2015-16 and FY 2016-17 for Adult Crisis Residential Services.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Adults

Adult Residential Services

Adult Residential Treatment Services:

Adult Residential Treatment Services are rehabilitative services provided in a non-institutional, residential setting for beneficiaries who would be at risk of hospitalization or other institutional placement if they were not receiving residential treatment services. The services include a wide range of activities and services that support beneficiaries in their effort to restore, maintain, and apply interpersonal and independent living skills and to access community support systems. Service activities may include assessment, plan development, therapy, rehabilitation, and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Adult Residential Services indicates a slight decrease in clients and total cost through FY 2014-15 and FY 2015-16.

Adults

Crisis Intervention

Crisis Intervention:

Crisis intervention services last less than 24 hours and are for, or on behalf of, a beneficiary for a condition that requires more timely response than a regularly scheduled visit. Service activities include, but are not limited to, assessment, collateral and therapy. Crisis Intervention services may either be face-to-face or by telephone with the beneficiary or the beneficiary's significant support person and may be provided anywhere in the community.

Summary:

While the number of clients is forecast to decrease in FY 2014-15 and FY 2015-16 for Crisis Intervention services, the costs should hold around current estimated FY 2013-14 levels.

Forecast	FY 2016-17	\$ 32,520,964	27,898,

Actual data as of December 31, 2014

Budget Forecast Narrative:

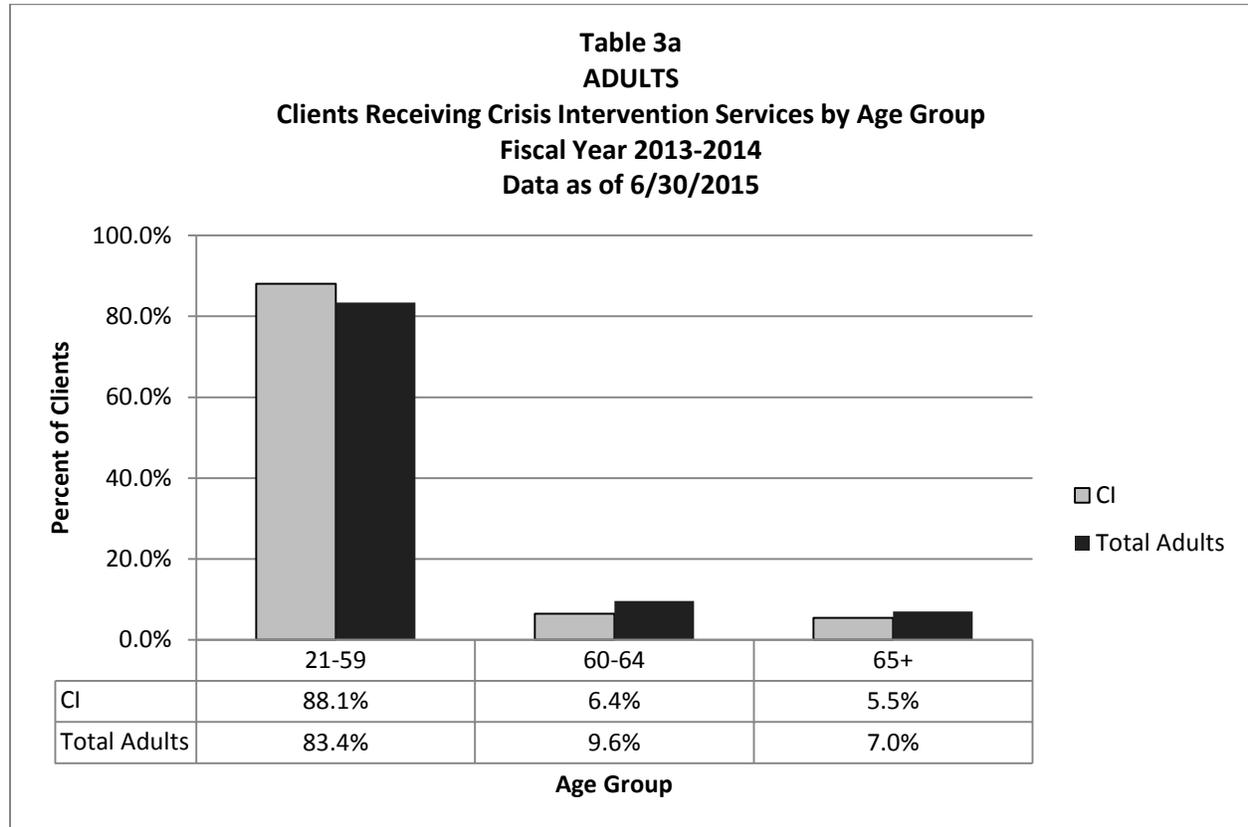

Costs for Crisis Intervention services are forecasted to grow up to over \$30 million for the next two fiscal years.

Client Profile Data:

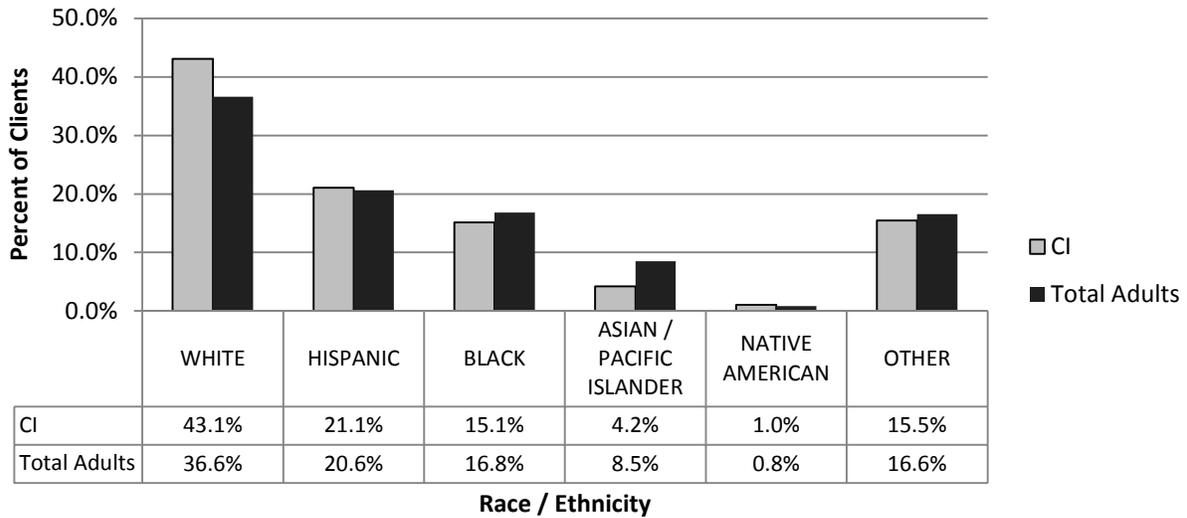

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Adults

Crisis Stabilization

Crisis Stabilization:

Crisis stabilization services last less than 24 hours and are for, or on behalf of, a beneficiary for a condition that requires a more timely response than a regularly scheduled visit. Service activities include but are not limited to one or more of the following: assessment, collateral, and therapy. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The forecast for Crisis Stabilization Services is for moderate growth in clients and costs over the next few fiscal years.

Adults

Day Rehabilitation Half Day

Day Rehabilitation (Half-Day):

Day rehabilitation services are a structured program of rehabilitation and therapy with services to improve, maintain or restore personal independence and functioning, consistent with requirements for learning and development and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

For Day Rehabilitation Half Day Services, the forecast for FY 2014-15 and FY 2015-16 is slight increase in dollars and clients from FY 2013-14 levels.

Adults

Day Treatment Intensive Half Day

Day Treatment Intensive (Half-Day):

Day treatment intensive services are a structured, multi-disciplinary program of therapy that may be used as an alternative to hospitalization, or to avoid placement in a more restrictive setting, or to maintain the client in a community setting and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to, assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

County mental health plans use Day Treatment Intensive Full Day services for adults, if needed. No half day service costs were claimed in FY 2008-09 or thereafter.

Adults

Day Treatment Intensive Full Day

Day Treatment Intensive (Full-Day):

Day treatment intensive services are a structured, multi-disciplinary program of therapy that may be used as an alternative to hospitalization, or to avoid placement in a more restrictive setting, or to maintain the client in a community setting and which provides services to a distinct group of beneficiaries who receive services for a minimum of three hours per day (half-day) or more than four hours per day (full-day). Service activities may include, but are not limited to, assessment, plan development, therapy, rehabilitation and collateral. Collateral addresses the mental health needs of the beneficiary to ensure coordination with significant others and treatment providers.

Summary:

The number of clients receiving Day Treatment Intensive Full Day has been declining since FY 2009-10. No clients are expected to be served in FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Medication Support

Medication Support:

Medication support services include prescribing, administering, dispensing and monitoring of psychiatric medications or biologicals that are necessary to alleviate the symptoms of mental illness. Service activities may include but are not limited to: evaluation of the need for medication; evaluation of clinical effectiveness and side effects; obtaining informed consent; instruction in the use, risks and benefits of, and alternatives for, medication; collateral and plan development related to the delivery of service and/or assessment for the client; prescribing, administering, dispensing and monitoring of psychiatric medications or biologicals; and medication education.

Summary:

The number of unduplicated clients is forecast to decrease slightly while minutes are expected to increase overall, causing total costs to increase through FY 2014-15 with the same trend continuing in FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>
Actual	FY 2010-11	\$ 187,244,631	161,831

Forecast	FY 2015-16	\$ 252,913,968	163,514
Forecast	FY 2016-17	\$ 263,091,573	163,422

Actual data as of December 31, 2014

Budget Forecast Narrative:

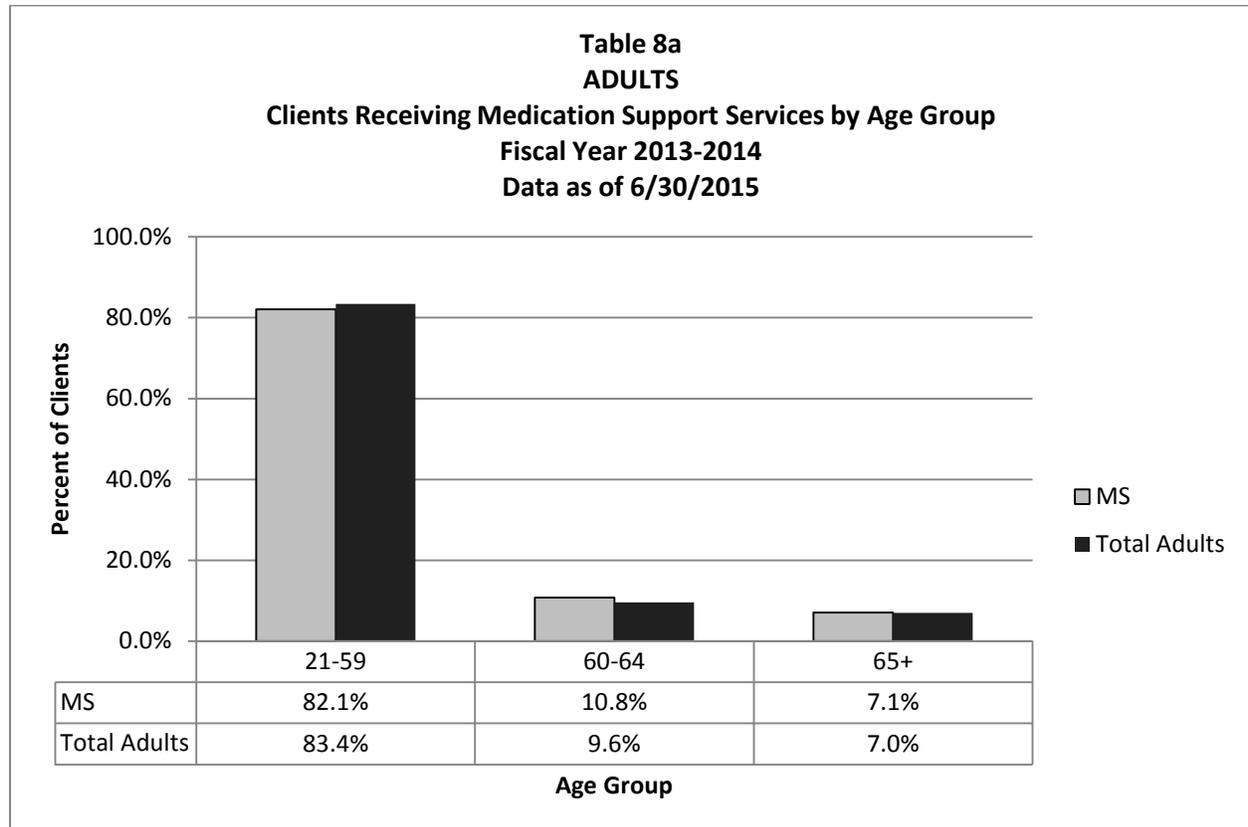

The Medication Support costs are expected to continue to increase through FY 2015-16 and FY 2016-17 while the clients stay pretty consistent.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Psychiatric Health Facility Services

Psychiatric Health Facility (PHF):

“Psychiatric Health Facility” means a facility licensed under the provisions beginning with Section 77001 of Chapter 9, Division 5, Title 22 of the California Code of Regulations. “Psychiatric Health Facility Services” are therapeutic and/or rehabilitative services provided in a psychiatric health facility on an inpatient basis to beneficiaries who need acute care, which meets the criteria of Section 1820.205 of Chapter 11, Division 1, Title 9 of the California Code of Regulations, and whose physical health needs can be met in an affiliated general acute care hospital or in outpatient settings. These services are separate from those categorized as “Psychiatric Hospital Inpatient”.

Summary:

The forecast for Psychiatric Health Facility (PHF) Services shows an increase in the number of clients and total costs through FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Psychiatric Hospital Inpatient Services – SD/MC Hospitals

Psychiatric Hospital Inpatient Services – SD/MC Hospitals:

Psychiatric hospital inpatient services include both acute psychiatric hospital inpatient services and administrative day services. Acute psychiatric hospital inpatient services are provided to beneficiaries for whom the level of care provided in a hospital is medically necessary to diagnose or treat a covered mental illness. Administrative day services are inpatient hospital services provided to beneficiaries who were admitted to the hospital for an acute psychiatric hospital inpatient service and the beneficiary’s stay at the hospital must be continued beyond the beneficiary’s need for acute psychiatric hospital inpatient services due to lack of residential placement options at non-acute residential treatment facilities that meet the needs of the beneficiary.

Psychiatric hospital inpatient services are provided by Short-Doyle / Medi-Cal (SD/MC) hospitals and Fee-for-Service / Medi-Cal (FFS/MC) hospitals. Mental Health Plans (MHPs) claim reimbursement for the cost of psychiatric hospital inpatient services provided by Short-Doyle Medi-Cal hospitals through the Short-Doyle Medi-Cal (SD/MC) claiming system. FFS/MC hospitals claim reimbursement for the cost of psychiatric hospital inpatient services through the FFS/MC Fiscal Intermediary. MHPs are responsible for authorization of psychiatric hospital inpatient services reimbursed through either billing system. For SD/MC hospitals, the daily rate includes the cost of any needed professional services. The FFS/MC hospital daily rate does not include professional services, which are billed separately from the FFS/MC inpatient hospital services via the SD/MC claiming system.

Summary:

The forecast for Psychiatric Hospital Inpatient Services shows a slight decrease in clients and a small increase in cost, driven by an increase in the cost per day, through FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>

Targeted Case Management

Targeted Case Management (TCM):

Targeted case management is a service that assists a beneficiary in accessing needed medical, educational, social, prevocational, vocational, rehabilitative, or other community services. The service activities may include, but are not limited to, communication, coordination and referral; monitoring service delivery to ensure beneficiary access to services and the service delivery system; monitoring of the beneficiary's progress, placement services, and plan development. TCM services may be face-to-face or by telephone with the client or significant support persons and may be provided anywhere in the community. Additionally, services may be provided by any person determined by the MHP to be qualified to provide the service, consistent with the scope of practice and state law.

Summary:

The forecast for Targeted Case Management Services shows a slight increase in cost and a small decrease in clients through FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>
Actual	FY 2010-11	\$ 86,490,569	97,276

Therapy and Other Service Activities

Therapy and Other Service Activities (formerly referred to as Mental Health Services):

Individual or group therapies and interventions are designed to provide a reduction of mental disability and restoration, improvement or maintenance of functioning consistent with the goals of learning, development, independent living, and enhanced self-sufficiency. These services are separate from those provided as components of adult residential services, crisis intervention, crisis stabilization, day rehabilitation, or day treatment intensive. Service activities may include, but are not limited to:

1. Assessment - A service activity designed to evaluate the current status of mental, emotional, or behavioral health. Assessment includes, but is not limited to, one or more of the following: mental status determination, analysis of the clinical history, analysis of relevant cultural issues and history; diagnosis; and the use of mental health testing procedures.
2. Plan Development - A service activity that consists of development of client plans, approval of client plans, and/or monitoring and recording of progress.
3. Therapy - A service activity that is a therapeutic intervention that focuses primarily on symptom reduction as a means to reduce functional impairments. Therapy may be delivered to an individual or group and may include family therapy at which the client is present.
4. Rehabilitation - A service activity that includes, but is not limited to, assistance, improving, maintaining or restoring functional skills, daily living skills, social and leisure skills, grooming and personal hygiene skills; obtaining support resources; and/or obtaining medication education.
5. Collateral - A service activity involving a significant support person in the beneficiary's life for the purpose of addressing the mental health needs of the beneficiary in terms of achieving goals of the beneficiary's client plan. Collateral may include, but is not limited to, consultation and training of the significant support person(s) to assist in better utilization of mental health services by the client, consultation and training of the significant support person(s) to assist in better understanding of mental illness, and family counseling with the significant support person(s) in achieving the goals of the client plan. The client may or may not be present for this service activity.

The distribution of use and expenditures of each service activity varies over time with changes in client needs.

Summary:

The forecast for Therapy and Other Service Activities dollars and clients shows growth primarily driven by an increase in the number of clients served beginning in FY 2011-12.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>
Actual	FY 2010-11	\$ 307,568,478	160,894

Actual	FY 2012-13	\$ 380,854,518	171,559
Actual + Forecast	FY 2013-14	\$ 387,888,554	171,728
Forecast	FY 2014-15	\$ 391,709,696	166,334
Forecast	FY 2015-16	\$ 408,652,252	166,975
Forecast	FY 2016-17	\$ 425,594,803	167,614

Actual data as of December 31, 2014

Budget Forecast Narrative:

Costs for Therapy and Other Service Activities are forecasted to increase through FY 2015-16 and 2016-17. Any potential effects of the Affordable Care Act on the forecast are not included due to the newness of the program and lack of claims data.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.

Psychiatric Hospital Inpatient Services – FFS/MC Hospitals

Psychiatric Hospital Inpatient Services – FFS/MC Hospitals:

Psychiatric hospital inpatient services include both acute psychiatric hospital inpatient services and administrative day services. Acute psychiatric hospital inpatient services are provided to beneficiaries for whom the level of care provided in a hospital is medically necessary to diagnose or treat a covered mental illness. Administrative day services are inpatient hospital services provided to beneficiaries who were admitted to the hospital for an acute psychiatric hospital inpatient service and the beneficiary's stay at the hospital must be continued beyond the beneficiary's need for acute psychiatric hospital inpatient services due to lack of residential placement options at non-acute residential treatment facilities that meet the needs of the beneficiary.

Psychiatric hospital inpatient services are provided by Short-Doyle / Medi-Cal (SD/MC) hospitals and Fee-for-Service / Medi-Cal (FFS/MC) hospitals. Mental Health Plans (MHPs) claim reimbursement for the cost of psychiatric hospital inpatient services provided by Short-Doyle Medi-Cal hospitals through the Short-Doyle Medi-Cal (SD/MC) claiming system. FFS/MC hospitals claim reimbursement for the cost of psychiatric hospital inpatient services through the FFS/MC Fiscal Intermediary system. MHPs are responsible for authorization of psychiatric hospital inpatient services reimbursed through either billing system. For SD/MC hospitals, the daily rate includes the cost of any needed professional services. The FFS/MC hospital daily rate does not include professional services, which are billed separately from the FFS/MC inpatient hospital services via the SD/MC claiming system.

Summary:

The forecast for Psychiatric Hospital Inpatient Services provided by FFS/MC hospitals shows growth in costs through FY 2014-15 and FY 2015-16.

<u>Data Composition</u>	<u>Fiscal Year</u>	<u>Dollars</u>	<u>Clients</u>
Actual	FY 2010-11	\$ 121,192,957	14,717

Forecast	FY 2016-17	\$ 147,268,617	13,830

Actual data as of December 31, 2014

Budget Forecast Narrative:

Costs for FFS Psychiatric Hospital Inpatient Services by FFS/MC hospitals are forecast to increase with a slight decline in unique client counts through FY 2014-15 and FY 2015-16.

Client Profile Data:

Client profile data is derived from statistical programs and may not exactly match financial reporting due to some overlap with grouping of data categories for analysis purposes. The SFY 2012-13 client tables and the historical trends tables are based upon claims received as of December 31, 2014.

Note:

The following tables utilize data for FY 2012-2013. The time period for filing a claim has changed from six months to one year effective July 1, 2012. Consequently, counties still have time to submit timely claims with service dates in fiscal year 2013-2014 at the time of this May 2015 Budget Revise Estimate. For this reason, data for FY 2012-2013 was used in these tables as all approved claims have been submitted and received representing a full fiscal year. DHCS estimates that a small, but non-trivial share of claims is still outstanding for FY 2013-2014.
