

## **Access to Care**

### **Performance measure 2 (Revised)**

The percentage of CCS-enrolled children 12 years of age and older who were screened within a calendar year for clinical depression using a standardized tool and, if screened positive, who received follow-up care

- *Depression Screening.* The percentage of CCS-enrolled children 12 years of age and older who were screened within a calendar year for clinical depression using a standardized tool
- *Follow-Up on Positive Screen.* The percentage of CCS-enrolled children 12 years of age and older who screened positive for depression within a calendar year and received follow-up care within 30 days

#### Depression Screening

**Numerator** CCS-enrolled children 12 years of age and older who were screened for clinical depression within a calendar year using an age-appropriate standardized tool

**Denominator** CCS-enrolled children 12 years of age and older within the calendar year

#### Follow-Up on Positive Screen

**Numerator** CCS-enrolled children 12 years of age and older who received positive results on a clinical depression screening within a calendar year and received follow-up care within 30 days

**Denominator** CCS-enrolled children 12 years of age and older who screened positive for depression within the calendar year
