## Department of Health Services Children's Medical Services Network (CMS Net) - Information Bulletin #128

### August Change Cycle

Following is a list of changes that were implemented to the CMS Net system for the August Change Cycle on Saturday, 8/27/05:

#### **CMS Net Web:**

1. **SAR Report Date Fields:** Modified the date fields for SAR reports so that the date can be entered free text in the format of MM/DD/YYYY or selected from a drop down calendar. This is the first phase of the date field modifications. All dates within the SAR system will be modified for free text entry or calendar selection. When the date field modifications are completed, the free text date entry will be enhanced to enter either YY or YYYY format for the year.
2. **Dental Provider Master File:** Modified the dental PMF file layout to correct the issue regarding the blank billing addresses. Also added new provider types B, G and U to the Delta Dental Provider Master File for issuing a SAR:
  - B = Billing Provider of an individual practice
  - G = Billing Provider of an individual practice or group practice
  - U = University Provider
3. **Client Search by CIN:** Modified the SAR client search by CIN to remove the requirement of the CIN check digit.
4. **Provider Management – SCC Bulletin:** Modified the system to display the SCC team members in order of Medical Director first and then group team members alphabetically by specialty groups.
5. **Service Code Grouping:** A new service grouping (SCG 09) titled Chronic Dialysis Clinic has been added to the system. SCG 09 can be authorized to provider types 42 (Chronic Dialysis Clinics), 15 (Community Hospital Outpatient), 61 (County Hospital Outpatient) and Special Care Centers (SCC). Also provider type 42 (Chronic Dialysis Clinics) can be authorized SCG 01.
6. **Restricted Drug Listing:** Added enteral nutrition products to the restricted drug listing per Numbered Letter 22-0805 for the following:
  - Infant formulas
  - Dietary supplements
  - Food oils
  - Nutritional therapy, special formulations

A separate This Computes! will be distributed explaining implementation dates and how to authorize these enteral nutrition products.

**CMS Net Legacy:**

1. **SAR Auto-narratives:** Correction to the edit narrative function for auto-narratives generated from the SAR system. The auto-narrative was displaying in the Legacy system with the first line of text blank and presenting an error message "Error, Mandatory TEXT". Also, the extra blank lines appearing between narrative text were removed.
2. **School Table:** The school table in CMS Net will be updated current information as received from the Department of Education.
