## **Vision Care Code Conversions**

Effective **July 1, 2006**, vision care local HCPCS codes Z2700 through Z3184 will be end-dated. Most of these codes will be converted to national HCPCS level II or CPT level I codes. A few codes will be end-dated without any conversion due to minimal utilization, no national crosswalk (equivalent code), or the service is payable using other claims methodology.

The attached table provides the "old code", the "new code" if there is one, and the description of the new code. You will be receiving notification about SARs with the old codes (if there are any for your county), so that you can modify the SAR to add the new code(s), effective July 1, 2006. The old code(s) can remain on the SAR as the provider cannot be reimbursed for these codes as of July 1, 2006. If the old code does not have a new code listed (e.g., Z2704, Z2710, etc.), then you do not need to take any action.

None of the old codes are in Service Code Groupings. Three of the new codes are in SCG 01: 92310, 92311, and 92312. One of these will be the conversion code for Z2706. If the provider has been authorized Z2706 and also has SCG 01 authorized, then the SAR will not need to be modified unless there are additional old codes that need to be converted to new codes.

Vision care providers have been entering on their claims qualifying codes which are changing to national modifiers, effective July 1, 2006. When appropriate (i.e., HCPCS or CPT code pertains to a vision care appliance, such as spectacles or lenses) the modifier NU (new equipment – purchase) or RP (replacement or repair) can be selected on the SAR. The provider's claim will need to include the same modifier as on the SAR in order to get reimbursement.

None of the other modifiers required on the claim of the vision care provider can be added to the SAR; however, the provider will still need to claim with whatever modifiers are required. The system is designed such that if there are no modifiers on the SAR, the claim with the required modifiers will still be reimbursed. Therefore, if the HCPCS or CPT code requires NU or RP on the claim and you

did not select NU or RP on the SAR (because you forgot or were not sure if the request was for new, repair or replacement), the claim will still pay as long as the provider has the correct modifier and has entered everything else correctly.
