(CMS Net) - Information Bulletin #224**

## **CLARIFICATION OF END-DATED CODES FOR NON- CONTRACTED OSTOMY PRODUCTS**

EDS recently published a provider bulletin announcing that several codes for ostomy products would no longer be payable as of the end of September. EDS was instructed to include two of the one-piece ostomy products (9913P and 9959M) in the list of products to be end dated. These two codes were included in the list in error. This may have caused some confusion for issuance of SARs for these products.

EDS has been instructed to remove the end-date for these two codes and issue a corrected bulletin. In the meantime, Counties should continue issuing SARs for 9913P and 9959M as usual.
