

# This Computes!

**Department of Health Care Services  
Children's Medical Services Network  
(CMS Net) - Information Bulletin #434**

## **CORRECTED July 26, 2013 Change Cycle**

The CMS Net applications will be down at 5:00 p.m. on Friday, July 26<sup>th</sup> through noon Saturday, July 27<sup>th</sup>. This update will implement changes included in the July 2013 change cycle further described below:

### **CMS Net Web**

#### Patient Search

- Correction to error received when using advanced search option County and User in combination.
- If a case is active, the Edit Duplicate button on Registration search screen was allowing users to route to the Mark Duplicate and search for the correct case then would display an error. Since you cannot mark an active case as duplicate, an error is now displayed when clicking Edit Duplicate, "Active cases cannot be marked as duplicate. Please close the case before marking as duplicate." This prevents a user from going through unnecessary steps before finding out they cannot mark the case duplicate.

#### Registration (Patient Information)

- Correction to the birth name. Deleted birth names were displaying in error and unable to delete.
- Correction to the real, birth or alias name. "Comma" is no longer a valid entry.
- Correction to the Social Security Number. Deleted SSN were displaying in error and unable to delete.

- Add new rule for adding referral for user without the Correct Referral role: New referral received date by new Legal County must have referral date after previous Legal County's referral date.
- The provider type is now required for all referrals.

#### Registration (Face Sheet)

- Correction to the diagnosis codes displayed. Deleted diagnosis were displaying in error.
- Modify the patient real, alias and birth names to display Last Name, Appellation, First Name, Middle Name.
- Modify the telephone number fields to display all telephone numbers for each contact type, including phone notes.
- Modify to display the attention line with each addressee type.
- Correction to addressee information when multiple clients are selected. The addressee information was blank for all clients in error when more than 1 client selected at a time.
- Correction to Face sheet displays the MTU Address, School Address and LEA/SELPA Name completely.

#### Registration (Addressee)

- Display the Specialty in which the provider is paneled on the medical home and specialists fields once selected from the PMF if paneled.
- Modify the telephone number fields to display all telephone numbers for each contact type, including phone notes.

#### Registration (Additional Information)

- When entering case note (additional information) for referral subject codes, the system will insert the current referral information as the source for the case note.
- Modify the telephone number fields to display all telephone numbers for each contact type, including phone notes.

#### Referral Tracking

- Correction to the provider search results for a case or service referral. All provider types (inpatient and outpatient) associated to the NPI entered will be display in the search results.
- The provider type is now required for all referrals.
- User may now edit the patient details fields for unregistered clients for referrals entered through the Referral Tracking.

- When a user enters and rejects a Referral as Inappropriate for cases that were closed, denied or not open in another county the system will now generate the C-80 Inappropriate Referral Notice.
- Added County as a Referral Search Criteria which now allow users to search for referrals by County.

#### Correspondence

- Correction to all correspondence letters that have DX. When the DX was updated on correspondence, the previous DX or DXs were displaying.

#### Case Notes

- Correction to automatic case note for Insurance/MEDS (Insur-MEDSElig) which was missing text. Insur-MEDSElig case note generates if there are changes to the client's eligibility from MEDS.
- Correction to SAR case note. System was auto adding quotation marks at the beginning and end of case notes after saving.
- When entering a new referral in Referral Tracking, users may enter a comment/case note. However, if the client is not registered and the user tries to search for the case note, they receive error, "Registration for this patient record is incomplete". Going forward, users can search by client and view case notes even when Registration is incomplete.

#### Reports

- Correction to all reports to display patient name as Last Name, Appellation, First Name, Middle Name.

#### Menus

- My Profile option was not being displayed in the Administration menu when viewing the MTP module and is now appearing correctly.

#### Authorization

- Authorized by field will retain the correct user selection

#### MTP

- Correction to allow reopening of a case when the case is closed from one county and reopened in another. The reopen tab was not displaying the save button.
- Correction to retain proposed MTP Dx on the MTP Referral Information Screen Correction to allow reopening of a case when the case is closed from one county and reopened in another. The reopen tab was not displaying the save button.

### Caseload

- Multiple caseloads without any team members were being created from registration. Correction to code to disallow creation.

### **Legacy**

#### Medical Eligibility

- Correction to Diagnosis search by description. Searching by description in medical eligibility wouldn't bring the result.

### **Business Objects**

- County Case Manager will now correctly display either the first Nurse Case Manager or a user listed on a caseload.
- Regional Case Manager field will now correctly display either the first Patient Financial Service Worker or a user listed on a caseload.
