Children's Medical Services Network
(CMS Net) - Information Bulletin #445**

June 6, 2014 Change Cycle

The CMS Net applications will be down at 5:00 p.m. on Friday, June 6th through 6:00 a.m. - Saturday, June 7th. This update will implement changes included in the June 2014 change cycle further described below:

CMS Net Web

Referral Tracking

Update to the duplication check for Referral Tracking. When a new referral is entered for a client, the referral type (Case), referral source, referral source name, and referral date constitutes a duplicate referral record regardless of the referral status.

A user may enter any number of referrals for the same client as long as the duplicate referral condition is met i.e. the user may not enter duplicate referrals at any time. However, the user may enter multiple referrals using the same referral date.

Once the referral is completed for registration another referral for the same date may not be completed. However, the user may enter non completed referral through referral tracking based on the above conditions.

In registration if the user tries to update an existing completed referral the duplicate validation will prevent the user from updating the record with existing referral information regardless of the referral status

If the user wants to correct the completed referral displayed in registration they must remove the existing non completed referral (that may cause a duplicate) first before updating the current referral.

Client Search

Correction to an issue when searching by DOB and County, if the user enters the correct DOB and County and clicks on find or presses Enter in the DOB field, No matches are found. If the user presses Enter in the County field, the match is found.

SAR

Correction to an issue related to the SAR Number of Days; when a user modifies a service begin date and end date as well as adding a special instructions, the system could not recalculate the new number of days and displayed an error message "The number of days must be equal to the days between the service begin date and service end date".
