On-line Pharmacy Billing:

In reviewing payment information from EDS, we are continuing to see a large number of pharmacy claims that are being denied because the pharmacy has billed before the SAR is on file at EDS. When you issue a SAR for use by a pharmacy, it is essential that you let them know that the SAR will not be available to use for billing until the next day. The files at EDS are not updated real time; each night CMS Net sends over all the SAR's that have been generated. These SAR's are then available the next day for use in online billing by the pharmacies.
