July 18, 2008

The federal Advisory Committee on Immunization Practices (ACIP) has recommended annual influenza vaccination for **all children** ages six months through 18 years beginning in 2008 with the 2008-09 influenza season. Accordingly, the requirement for a high risk factor for inactivated influenza vaccine has been removed for all CHDP inactivated influenza vaccine codes. Live Attenuated Influenza Vaccine (FluMist™) for children two years through 18 years, 11 months, has not required a high risk factor since 2006.

An updated CHDP Vaccine Benefit and Reimbursement Table dated August 1, 2008 is enclosed.

Your continuing participation in the CHDP Program is greatly appreciated. If you have any questions about CHDP vaccine benefits or other CHDP issues, please contact your local CHDP program office.
