

# Person-Centered Planning Process

HCBS Advisory Workgroup Meeting  
December 4, 2015

# State Responsibility

- Set the standards that comply with the requirements of the HCBS Final Rule
- Ensure the goals of person-centeredness are achieved through appropriate quality monitoring
- Collect feedback from consumers who received or are receiving services

# Role of CCT

- CCT is the initial intake and enrollment process for waivers and other state plan services
- Essential to keep the CCT transition process person centered
  - DHCS' goal is to ensure the consumer experience is improved and the whole person is treated
  - Complies with the new requirements set forth the HCBS final rule

# HCBS Final Rule

- Section 1915(i)(1)(G) of the Social Security Act requires that the State Plan HCBS benefit be furnished under an individualized care plan based on the assessment
- To fully meet individual needs and ensure meaningful access to his/her surrounding community, systems that deliver HCBS must be based upon a strong foundation of person-centered planning and approaches to service delivery

# Person-Centered Service Plan

- Assessment must include consultation with appropriate persons
- Must identify the specific State plan HCBS to be provided to the individual, that take into account the individual's strengths, preferences, needs (clinical and support), and desired outcomes
- Should be constructed in a manner that promotes service delivery and independent living in the most integrated setting possible
- Must address medical and support needs as well as other individual goals related to community living including services covered under the State Plan as well as services outside of the State plan HCBS benefit

*(42 CFR § 441.725) (Proposed § 441.665)*

# Person-Centered Service Plan (continued)

- Provides for all needed services to the individual while preventing provision of duplicative or unnecessary services
- Individual must share the authority for developing and implementing the service plan
- This shared authority increases the individual's self-efficacy and involvement in the activities and outcomes contained within the service plan

*(42 CFR § 441.725) (Proposed § 441.665)*

# Questions for Consideration

- Is my organization's transition process person-centered?
- How does my organization strike a balance between wants and needs?
- How does my organization adhere to person-centeredness when there are limited options?
