**RENEWALS DATA - INDIVIDUAL LEVEL
APRIL 2016**

FOOTNOTES AND ADDITIONAL INFORMATION

The data table represents Medi-Cal Renewals due for the month of March, by county. This data, reported by SAWS, captures processing activities performed up to and including the month in which the Medi-Cal renewal is due. The numbers reflected are individual-level counts, not case. The counts represent Medi-Cal Renewals that were fully Processed¹, which resulted in an eligibility determination; as well as cases that were Not Processed² by the end of the renewal Due month, which indicates processing activity and/or system resolution continued beyond the renewal month.

(See Footnotes below for further detail.)

¹ "Processed" reflects cases for which all necessary data entries were made and the case was coded correctly in the system to reflect a fully processed renewal, including cases that transition to Covered CA. "Processed, Resulting in Continued Medi-Cal" reflects only those cases that remained Medi-Cal eligible. The difference between these 2 columns includes Discontinuances and/or whole cases that transitioned to Covered CA coverage.

² "Not Processed" reflects cases where necessary data entries were not complete and/or the case was unable to be coded correctly in the system to reflect a fully processed renewal. This includes cases where the county has worked on the case but is unable to complete the renewal process or complete the renewal process so that it is reflected in SAWS as a completed renewal. Reasons include system errors; manual workarounds, that resulted in cases showing as not processed; administrative verification needed to override federal hub verification results, as appropriate; or renewals processed manually. In some cases, it may be due to incomplete data being entered into the system and cases pending Long Term Negative Action functionality. Additionally, this number reflects counties' ongoing work with beneficiaries who are making good faith efforts in providing what is needed to complete their renewal.

Additional Information:

The variation between counties within the "Processed" data/counts can be attributed to:

- 1) Different county business processes and staffing levels have resulted in different outcomes
- 2) Due to delays in implementing 2015 renewals, counties did not have the full calendar year of 2015 to process 2015 renewals
- 3) Different counties prioritized renewals vs. new applications, manual workarounds and resolution of problem cases resulting from systems issues differently

NOTE:

April 2016 Medi-Cal Renewals data do not include Pre-ACA renewals.

The universe of cases reflected on this report includes Medi-Cal cases that are case-managed by the counties and do include cases that are linked to cash assistance such as
