

## Summary of 06/29/15 Immigration Work Group Meeting

- **PRUCOL Change Request (CR)** -- The PRUCOL CR has been moved to 16.4 with an April 2016 install date. County workers are currently using work arounds because PRUCOL is not fully implemented in CalHEERS. MCED is currently working on this CR and will use this immigration workgroup to discuss issues as needed.
- **5 Year Bar** -- Advocates would like to add the 5 year bar to the agenda as a place holder to discuss the transition of Newly Qualified Aliens (NQIs) to Covered CA at a later date. MCED has added this item to the agenda.
- **Health Care for all Children** -- Advocates would like to know how MCED is handling the approval of Health Care for all Children regardless of immigration status. MCED is creating a work plan and will use this immigration workgroup to discuss issues as needed. MCED has added this item to the agenda.
- **CEC Certification Modules** -- DHCS shared advocate concerns that the module pieces on immigrant eligibility were confusing. DHCS is working to simplify them.
- **Covered California Notices**—Covered CA has made revisions to their notices and will send out a copy of the revised notices. Notices will be in the most common threshold languages, but will include the babel page which includes all threshold languages. These notices are for individuals who need to submit documents and a notice for individuals who submitted the wrong documents. Advocates would like to know which threshold languages the notices are going to be translated to other than Spanish. Advocates would also like to know if outreach will include phone calls and emails this year. Covered CA will follow up.
- **Pre-populated Cover Sheet**--Advocates are requesting that return cover sheet should be populated with case number, updated babel page and would like notices translated into all threshold languages. Covered CA will follow up.
- **Data on Inconsistencies**--Covered CA will provide data on inconsistencies for this year when that information is available.
