

JENNIFER KENT
DIRECTOR

State of California—Health and Human Services Agency
Department of Health Care Services

EDMUND G. BROWN JR.
GOVERNOR

Date: August 22, 2017

To: EXECUTIVE DIRECTOR

Subject: YOUTH REGIONAL TREATMENT CENTERS (YRTC)

This letter serves to inform Indian health providers of updates to the referral process for eligibility, referral, and payment processes for YRTC services provided to American Indians who are Medi-Cal members. The changes to the referral process are due to the recent opening of the California YRTC Desert Sage Youth Wellness Center located in Hemet, California.

Services will continue to be coordinated through the Federal Indian Health Service California Area Office (IHS/CAO). Some IHS funded tribally and federally operated YRTCs that are enrolled as Medi-Cal providers will bill Medi-Cal directly for these services. Medi-Cal will not reimburse for travel expenses. The IHS/CAO will continue to cover the cost for services to American Indian youth who are not Medi-Cal members; however, IHS is a payor of last resort so all resources must be explored prior to seeking reimbursement from IHS.

The responsibility for assessment, referral, health record documentation, and follow up after discharge will remain with the Indian health provider that is the primary care provider and referring agency for the identified youth.

The following steps outline the YRTC process for American Indian youth who are Medi-Cal members:

- The referring Indian health provider determines the need for residential substance use disorder treatment
- The referring Indian health provider screens for Medi-Cal enrollment status. If eligible, but not a current Medi-Cal member, the Indian health provider provides Medi-Cal application information/assistance for eligibility determination.
- The referring Indian health provider contacts the Desert Sage Intake coordinator (at the address below) and the Desert Sage Intake staff will send an admissions packet to the Indian health provider.

- The admissions application is returned and reviewed by Desert Sage. The youth will then be admitted to the Desert Sage Youth Wellness Center, if appropriate.
- If the Desert Sage Youth Wellness Center is not appropriate for the youth, the Desert Sage Intake staff will work with the Indian health provider to select an age appropriate residential treatment program from those listed below, or may refer to a private program.
- If the American Indian youth is IHS eligible and a Medi-Cal member, the identified YRTC's may bill Medi-Cal directly.
- After discharge, the referring provider resumes responsibility for care and follow up

In collaboration with IHS, the following IHS funded (Title 25 U.S.C. 1665c) tribally and federally operated YRTC's have been identified as possible placement locations (subject to availability) for American Indian youth Medi-Cal members
