

The background features a purple-tinted image of a stethoscope and a line graph. The graph has a vertical axis on the left with numerical markers at 3, 6, 9, 12, and 15. The main title is centered in large, bold, white capital letters.

# MEDI-CAL COVID-19 VACCINATIONS

(for beneficiaries aged 12 years and older)

June 2021

DHCS recognizes the disproportionate impact of COVID-19 on disadvantaged communities, including many communities of color, which account for a large share of the Medi-Cal beneficiary population. Until recently, our knowledge of the extent of COVID-19 vaccination among the Medi-Cal population was limited to what was gathered from claims data. Now, with new linkages to immunization registry data from the California Department of Public Health, DHCS has a much clearer view of Medi-Cal vaccination rates compared to statewide rates, stratified by county and by health plan. While Medi-Cal COVID-19 vaccination rates are gradually improving across the state, the percentage of Medi-Cal beneficiaries with at least one dose lags the population-at-large rate, sometimes by as much as 30 percent.

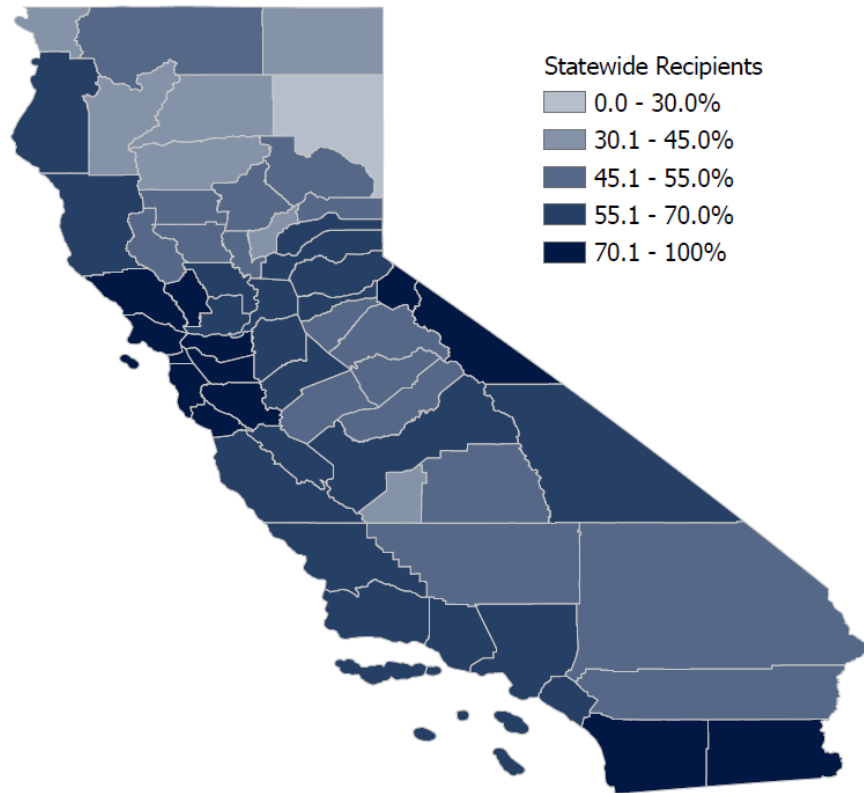

DHCS is strengthening its efforts to work with managed care plans, local public health departments, agencies and stakeholders serving our homebound populations, as well as providers, health systems and community-based organizations to improve vaccination rates and help ensure that our beneficiaries are protected against infection from current and emerging strains.

To support and empower our partners with data and transparency, we will update and publish this data on a bi-weekly basis to support monitoring of progress and to guide further interventions.

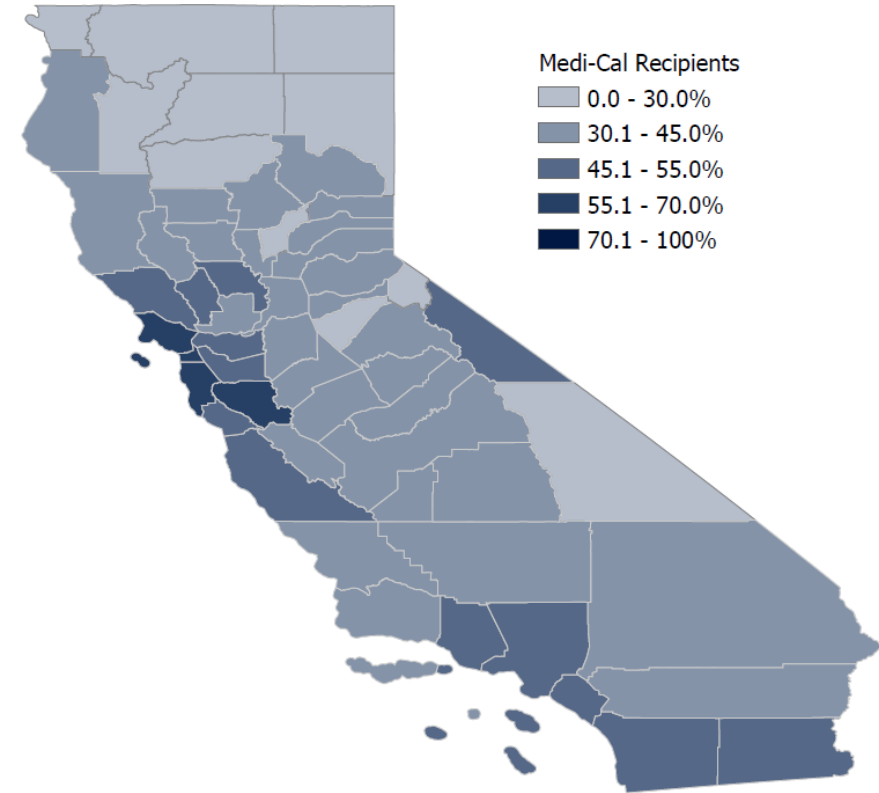

# Received at least one dose as of June 27, 2021

## Percentage of 12+ years old, by county

### All Californians

### Medi-Cal Beneficiaries

Note: Medi-Cal beneficiaries are a subset of all Californians

# Medi-Cal COVID-19 Vaccination Status

- » Data sources:
  - DHCS Data: Eligibility data from the Medi-Cal Data Warehouse - Management Information System/Decision Support System
  - CDPH Data: COVID-19 vaccination data from the California Immunization Registry. Data does not include doses administered by federal agencies who received vaccine allocated directly from CDC.
- » DHCS receives COVID-19 vaccination data every Sunday, links it securely to Medi-Cal eligibility data and loads it to the COVID-19 reporting module. The lag time between vaccinations and the corresponding data might be several days.
