Information Notice 21-01 (Supersedes prior notice issued July 27, 2021)

Date: July 29, 2021

To: Program for All-Inclusive Care for the Elderly (PACE) Organizations

Subject: Guidance to PACE Organizations on requirements for COVID-19 vaccination verification, testing and masking for PACE facility employees

Reference: State Public Health Officer Order of July 26, 2021

Dear PACE Partners:

The California Department of Public Health (CDPH) issued new requirements for health care and congregant care facilities to decrease the risk of COVID-19 outbreaks, given emergence of more contagious variants and recent surges of COVID-19 cases. DHCS requires all PACE facilities to follow CDPH public health orders. This PACE Information Notice covers new requirements for (1) vaccination verification, (2) testing, and (3) masking.

Background:

The COVID-19 pandemic remains a significant challenge in California. COVID-19 vaccines are effective in reducing infection and serious disease. At present, 62% of Californians 12 years of age and older are fully vaccinated with an additional 9% partially vaccinated. California is currently experiencing the fastest increase in COVID-19 cases during the entire pandemic with 11.2 new cases per 100,000 people per day, with case rates increasing fivefold within two months. The Delta variant, which is very highly contagious and possibly more virulent, is currently the most common variant causing new infections in California.

Unvaccinated persons are more likely to get infected and spread the virus, which is transmitted through the air. Most current hospitalizations and deaths are among unvaccinated persons. Thanks to vaccinations and to measures taken since March 2020, California’s health care system is currently able to address the increase in cases and hospitalizations. However, additional statewide facility-directed measures are necessary to protect particularly vulnerable populations, and ensure a sufficient, consistent supply of workers in high-risk health care and congregate settings.
Hospitals, skilled nursing facilities (SNFs), and the other health care facility types identified in this order are particularly high-risk settings where COVID-19 outbreaks can have severe consequences for vulnerable populations including hospitalization, severe illness, and death. Further, the congregate and residential settings in this order share several features. They all are residential facilities where the residents have little ability to control the persons with whom they interact. There is frequent exposure to staff and other residents. In many of these settings, the residents are at high risk of severe COVID-19 disease due to underlying health conditions, advanced age, or both.

Vaccinations have been available in California from December 2020 to the present, and from January 1, 2021, to July 12, 2021, a total of 9,056 confirmed COVID-19 outbreaks and 110,734 outbreak-related cases were reported to CDPH. The two most common settings for these outbreaks were: Residential care facilities (22.7%) and SNFs (9.7%). There have been over 4,000 outbreaks in residential care facilities, over 2,000 outbreaks in SNFs, over 450 outbreaks in hospitals, over 200 outbreaks in correctional facilities, and over 450 outbreaks reported in shelters in California to date. We also noted increasing numbers of health care workers as new positive cases, despite vaccinations being prioritized for this group when vaccines initially became available. Recent outbreaks in health care, SNFs, and other congregate settings have frequently been traced to unvaccinated staff members.

Thus, current requirements of staff in health care settings, such as universal mask requirements for all staff, are not proving sufficient to prevent transmission of the Delta variant, which is more transmissible and may cause more severe illness. Vaccination against COVID-19 is the most effective means of preventing infection with the COVID-19 virus, and subsequent transmission and outbreaks. As we respond to the dramatic increase in cases, transmission prevention measures must be increased for the significant proportion of unvaccinated health and congregate care workers remaining to reduce the chance of transmission to vulnerable populations. Reinforcement of well-fitting facemasks for source control, emphasis on increased respiratory protection with respirators in some settings, and regular testing (when appropriately followed by isolation of individuals who test positive), should contribute to reduction of transmission risk in these high-risk settings to mitigate the absence of vaccination protection.

For these reasons, COVID-19 remains a concern to public health and, in order to prevent its further spread in hospitals, SNFs, high-risk congregate settings and other health care settings, limited and temporary public health requirements are necessary at this time.

In workplaces, employers are subject to the Cal/OSHA COVID-19 Emergency Temporary Standards (ETS) or in some workplaces the CalOSHA Aerosol Transmissible Diseases (ATD) Standard and should consult those regulations for additional applicable requirements.
POLICY:

The Public Health Order applies to the following facilities:

A. Acute Health Care and Long-Term Care Settings:
   1. General Acute Care Hospitals
   2. Skilled Nursing Facilities (including Subacute Facilities)
   3. Intermediate Care Facilities

B. High-Risk Congregate Settings:
   4. Adult and Senior Care Facilities
   5. Homeless Shelters
   6. State and Local Correctional Facilities and Detention Centers

C. Other Health Care Settings:
   7. Acute Psychiatric Hospitals
   8. Adult Day Health Care Centers
   9. Adult Day Programs Licensed by the California Department of Social Services
   10. Program of All-Inclusive Care for the Elderly (PACE) and PACE Centers
   11. Ambulatory Surgery Centers
   12. Chemical Dependency Recovery Hospitals
   13. Clinics & Doctor Offices (including behavioral health, surgical)
   14. Congregate Living Health Facilities
   15. Dental Offices
   16. Dialysis Centers
   17. Hospice Facilities
   18. Pediatric Day Health and Respite Care Facilities
   19. Residential Substance Use Treatment and Mental Health Treatment Facilities

1. Vaccination requirements:

All facilities must verify vaccine status of all employees, paid or unpaid.

Per the CDPH Guidance for Vaccine Records Guidelines & Standards, only the following modes may be used as proof of vaccination:

1. Covid-19 Vaccination Record Card (issued by the Department of Health and Human Services Centers for Disease Control & Prevention or WHO Yellow Card\(^1\)) which includes name of person vaccinated, type of vaccine provided and date last dose administered; OR

2. a photo of a Vaccination Record Card as a separate document; OR

\(^1\) WHO Yellow Card refers to the original World Health Organization International Certificate of Vaccination or Prophylaxis issued to the individual following administration of the COVID-19 vaccine in a foreign country
3. a photo of the client's Vaccination Record Card stored on a phone or electronic device; OR
4. documentation of COVID-19 vaccination from a healthcare provider; OR
5. digital record that includes a QR code that when scanned by a SMART Health Card reader displays to the reader client name, date of birth, vaccine dates and vaccine type. The QR code must also confirm the vaccine record as an official record of the state of California; OR
6. documentation of vaccination from other contracted employers who follow these vaccination records guidelines and standards.

In absence of knowledge to the contrary, a facility may accept the documentation presented as valid.

Facilities must have a plan in place for tracking verified worker vaccination status. Records of vaccination must be made available, upon request, to the local health jurisdiction for purposes of case investigation.

Workers who are not fully vaccinated or for whom vaccine status is unknown or documentation is not provided, must be considered unvaccinated.

See CDPH Guidance for Vaccine Records Guidelines & Standards for information on how individuals may obtain a record of their vaccine. A digital copy of vaccine records for vaccinations administered in California is also available at myvaccinerecord.cdph.ca.gov.

2. Respirator or mask requirements:

All facilities identified above must strictly adhere to current CDPH Masking Guidance. To the extent they are already applicable, facilities must also continue to adhere to Cal/OSHA's standards for Aerosol Transmissible Diseases (ATD), which requires respirator use in areas where suspected and confirmed COVID-19 cases may be present, and the Emergency Temporary Standards (ETS) that requires all unvaccinated workers be provided a respirator upon request.

Acute Health Care and Long-Term Care Settings:

In addition to respirators required under Title 8 of the California Code of Regulations, facilities must provide respirators to all unvaccinated or incompletely vaccinated workers who work in indoor work settings where (1) care is provided to patients or residents, or (2) to which patients or residents have access for any purpose. Workers are strongly encouraged to wear respirators in all such settings. The facility must provide the respirators at no cost, and workers must be instructed how to properly wear the respirator and how to perform a seal check according to the manufacturer's instructions.
High-Risk Congregate Settings and Other Health Care Settings:

Where Title 8 of the California Code of Regulations does not require the use of respirators, facilities shall provide all unvaccinated or incompletely vaccinated workers with FDA-cleared surgical masks. Workers are required to wear FDA-cleared surgical masks in indoor settings anywhere they are working with another person.

*See Appendix for masking guidance for individuals and non-health care businesses.*

3. Testing Requirements:

*For PACE facilities (Other Healthcare Facilities):*

Asymptomatic **unvaccinated** or incompletely vaccinated workers are **required to undergo** diagnostic screening testing.

Workers may choose either antigen or molecular tests to satisfy this requirement, but unvaccinated or incompletely vaccinated workers must be tested **at least once weekly** with either PCR testing or antigen testing. More frequent testing improves outbreak prevention and control and is encouraged, especially with antigen testing. Any PCR (molecular) or antigen test used must either have Emergency Use Authorization by the U.S. Food and Drug Administration or be operating per the Laboratory Developed Test requirements by the U.S. Centers for Medicare and Medicaid Services.

Unvaccinated or incompletely vaccinated workers must also observe all other infection control requirements, including masking, and are not exempted from the testing requirement even if they have a medical contraindication to vaccination, since they are still potentially able to spread the illness. Previous history of COVID-19 from which the individual recovered more than 90 days earlier, or a previous positive antibody test for COVID-19, **do not** waive this requirement for testing.

Diagnostic screening testing of asymptomatic **fully vaccinated** workers is **not** currently required. However, fully vaccinated workers may consider continuing routine diagnostic screening testing if they have underlying immunocompromising conditions (e.g., organ transplantation, cancer treatment), which might impact the level of protection provided by COVID-19 vaccine.

Facilities with workers required to undergo workplace diagnostic screening testing should have a plan in place for tracking test results, conducting workplace contact tracing, and must report results to local public health departments. There are IT platforms available that can facilitate these processes for employers.

Testing costs are coverable on employee insurance. Facilities may obtain information about free antigen testing (and how to obtain follow-up PCR testing) on the **CDPH**
testing website. Free testing may also be available through the local public health department for uninsured employees.

As a reminder, employees testing positive for COVID-19 must follow CDPH isolation guidance, and cannot work in health care settings (the flexibilities allowing work in health care under specified conditions expired June 30, 2021). See links below for details:

- [Self-isolation Instructions for Individuals Who Have or Likely Have COVID-19 (ca.gov)](ca.gov)
- [California Department of Public Health Self-Isolation Instructions for Individuals with COVID-19](ca.gov)
- [Guidance on Returning to Work or School Following COVID-19 Diagnosis](ca.gov)
- [Responding to COVID-19 in the Workplace for Employers](ca.gov): This guidance is not intended for use in managing or preventing outbreaks in healthcare, congregate living settings, or other workplaces where the California Aerosol Transmissible Diseases (ATD) standard (title 8 section 5199) applies.

Employers should also consult:

- CDC guidance for businesses and small businesses for information on preventing outbreaks;
- [Cal/OSHA guidance](ca.gov) to ensure that they are complying with legal requirements for worker protection; and
- The California statewide industry-specific guidance to reduce risk during and after reopening of businesses.

4. Definitions:

For purposes of the Public Health Order and this BH Information Notice, the following definitions apply:

A. "Fully Vaccinated" means individuals who are considered fully vaccinated for COVID-19: two weeks or more after they have received the second dose in a 2-dose series (Pfizer-BioNTech or Moderna or vaccine authorized by the World Health Organization), or two weeks or more after they have received a single-dose vaccine (Johnson and Johnson [J&J]/Janssen). COVID-19 vaccines that are currently authorized for emergency use:
   b. By the World Health Organization, are listed at [https://extranet.who.int/pqweb/vaccines/covid-19-vaccines](https://extranet.who.int/pqweb/vaccines/covid-19-vaccines).

B. "Incompletely vaccinated" means persons who have received at least one dose of COVID-19 vaccine but do not meet the definition of fully vaccinated.
C. "Respirator" means a respiratory protection device approved by the National Institute for Occupational Safety and Health (NIOSH) to protect the wearer from particulate matter, such as an N95 filtering facepiece respirator.

D. "Unvaccinated" means persons who have not received any doses of COVID-19 vaccine or whose status is unknown.

E. "WHO Yellow Card" refers to the original World Health Organization International Certificate of Vaccination or Prophylaxis issued to the individual following administration of the COVID-19 vaccine in a foreign country.

F. "Worker" refers to all paid and unpaid persons serving in health care, other health care or congregate settings who have the potential for direct or indirect exposure to patients/clients/residents or SARS-CoV-2 airborne aerosols. Workers include, but are not limited to, nurses, nursing assistants, physicians, technicians, therapists, phlebotomists, pharmacists, students and trainees, contractual staff not employed by the health care facility, and persons not directly involved in patient care, but who could be exposed to infectious agents that can be transmitted in the health care setting (e.g., clerical, dietary, environmental services, laundry, security, engineering and facilities management, administrative, billing, and volunteer personnel).

5. Terms of Public Health Order:

The Terms of the Public Health Order supersede any conflicting terms in any other CDPH orders, directives, or guidance.

Except to the extent the Public Health Order provides otherwise, all other terms in the Order of June 11, 2021 remain in effect and shall continue to apply statewide.

The Order shall take effect on August 9, 2021, at 12:01 am. Facilities must be in full compliance with the Order by August 23, 2021.

The Order is issued pursuant to Health and Safety Code sections 120125, 120140, 120175, 120195 and 131080 and other applicable law.

Should you have any questions about the content of this letter, please contact the PACE Policy Unit at PACE@dhcs.ca.gov.

Thank you,

Department of Health Care Services
Appendix: Guidance for the use of masks.

The following guidance is taken from the CDPH website and is current at the time of publication.

**Masking Requirements**

Masks are **required for all individuals** in the following indoor settings, regardless of vaccination status:

- On public transit[1] (examples: airplanes, ships, ferries, trains, subways, buses, taxis, and ride-shares) and in transportation hubs (examples: airport, bus terminal, marina, train station, seaport or other port, subway station, or any other area that provides transportation)
- Indoors in K-12 schools[2], childcare[3]

Masks are **required for all individuals**, in the following indoor settings, regardless of vaccination status (and surgical masks are recommended):

- State and local correctional facilities and detention centers[7]
- Homeless shelters[8]
- Long Term Care Settings[9] & Adult and Senior Care Facilities[10]

Additionally, masks are **required* for unvaccinated individuals** in indoor public settings and businesses (examples: retail, restaurants, theaters, family entertainment centers, meetings, state and local government offices serving the public).

See State Health Officer Order, issued on July 26, 2021, for a full list of high-risk congregate and other healthcare settings where surgical masks are required for unvaccinated workers, and recommendations for respirator use for unvaccinated workers in healthcare and long-term care facilities in situations or settings not covered by Cal OSHA ETS or ATD.

For additional information on types of masks, the most effective masks, and ensuring a well-fitted mask, individuals should refer to CDPH Get the Most out of Masking and see CDPH Masking Guidance Frequently Asked Questions for more information.

*Guidance for Businesses, Venue Operators or Hosts

In settings where masks are required only for unvaccinated individuals, businesses, venue operators or hosts may choose to:

- Provide information to all patrons, guests and attendees regarding vaccination requirements and allow vaccinated individuals to self-attest that they are in compliance prior to entry.
- Implement vaccine verification to determine whether individuals are required to wear a mask.
- Require all patrons to wear masks.

No person can be prevented from wearing a mask as a condition of participation in an activity or entry into a business.

**Exemptions to masks requirements**

The following **individuals** are exempt from wearing masks at all times:
• Persons younger than two years old. Very young children must not wear a mask because of the risk of suffocation.
• Persons with a medical condition, mental health condition, or disability that prevents wearing a mask. This includes persons with a medical condition for whom wearing a mask could obstruct breathing or who are unconscious, incapacitated, or otherwise unable to remove a mask without assistance.
• Persons who are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication.
• Persons for whom wearing a mask would create a risk to the person related to their work, as determined by local, state, or federal regulators or workplace safety guidelines.
