MEDI-CAL MONTHLY
ENROLLMENT
FAST FACTS

Characteristics of the Medi-Cal population
as captured by the Medi-Cal Eligibility Data System
(MEDS)

The enrollment data included in this document represent only certified eligible
counts. Certified eligibles are those beneficiaries deemed qualified for Medi Cal by a
valid eligibility determination, and who have enrolled into the program. This
classification excludes beneficiaries who have a monthly share of cost obligation that
has not been met, as well as other specific populations. Enrollment counts exclude
information related to applications received or any other eligibles that may be in the
process of becoming certified eligible.

The counts presented are considered PRELIMINARY and subject to change. The
certified eligible counts reflected in this document incorporate three Medi Cal
eligibility updates and reflect roughly 99.2% of all Medi Cal certified eligibles for the
most recent month displayed. A specific month’s enrollment count is considered
complete for statistical reporting purposes 12 months after the month’s end.

Please note that the values presented in figures included in this report may not add
up to 100% due to rounding.

Note: MAGI (Modified Adjusted Gross Income) is a methodology created under the ACA to calculate income eligibility for Medi-Cal. The MAGI eligibility rules apply to most people eligible for Medi-Cal, except the elderly or individuals who qualify based on a disability. Many certified eligibles in Non-MAGI aid codes are transitioned into MAGI aid codes during the redetermination process.
