

Stakeholder Advisory Committee
DSRIP Category 5 HIV Transition Projects Discussion
July 23, 2012

Questions for discussion:

1. An element of the DSRIP Category 5 HIV Transition Projects is shared learning. One of the actions suggested for shared learning is to collaborate in the dissemination/implementation of best practices with HIV/AIDS agencies and public health departments, LIHPs in which the DPH system participates, and other public agencies, and/or other relevant non-profit or private organizations. What are your ideas on the best ways to communicate best practices information to other public agencies and/or other relevant non-profit or private organizations?

2. What are some ideas on how the data collected to measure improvement in clinical and operational outcomes can be used to inform the discussions on essential Medicaid benchmark benefits?
