Background and Overview

In accordance with Welfare and Institutions Code (WIC) section 14197, the Department of Health Care Services (DHCS) will annually publish on its website the outcomes of the Annual Network Certification reports for Medi-Cal managed care health plans (MCPs).¹ This report identifies MCPs subject to a corrective action plan (CAP) due to noncompliance with the Annual Network Certification requirements, and each MCP's response to the CAP.

Under terms of the 2020 Annual Network Certification, MCPs were placed under a CAP for not meeting provider-to-member ratios and/or not meeting time and distance standards.

Annual Network Certification CAP Components

MCPs did not meet provider-to-member ratios for required provider types in one of two ways:

- The MCP did not meet the standard of one full-time-equivalent (FTE) primary care physician (PCP) to every 2,000 members *and* a total-network-physician ratio of one FTE physician to every 1,200 members; or
- The MCP contracted with DHCS to provide specialty mental health (SMH) services did not meet ratios for SMH services providers compared to the statewide provider-to-member ratios that county mental health plans must meet.

MCPs did not meet time and distance standards for the required provider type(s) in the following ways:

- The MCP submitted inadequate accessibility analysis charts, which failed to demonstrate that providers were within time and distance by ZIP code in their service area(s);
- The MCP did not submit an Alternative Access Standard (AAS) request(s) for provider(s) that were outside of time and distance for ZIP codes within the service area(s);
- The MCP submitted inadequate Alternative Access Standard (AAS) requests. DHCS has identified the MCP's AAS request as incomplete per Attachment C of APL 20-003;
- In reviewing the MCP's AAS request, DHCS identified a closer provider than the provider that the MCP requested;
- In reviewing the MCP's Alternative Access Standard (AAS) request, DHCS identified the MCP's proposed miles and minutes in relation to the in-network

¹ Code of Federal Regulations, C.F.R. 438.207

provider as insufficient or excessive. Therefore, DHCS denied the AAS request.

Corrective Action Plan Process

MCPs that did not meet the Annual Network Certification requirements were placed under an Annual Network Certification CAP. After DHCS submitted the Assurance of Compliance to Centers for Medicare and Medicaid Services (CMS), DHCS notified the MCPs that they were placed under a CAP. Thereafter, DHCS held CAP entrance conferences with each MCP to discuss specific deficiencies that led to the imposition of the CAP. MCPs have six months to rectify their CAP deficiencies and are required to report on their progress monthly until the deficiencies have been corrected.

The CAP requires MCPs to immediately initiate and document good faith efforts to contract with out-of-network (OON) providers. MCPs must reach the enrollment and/or credentialing stage of the contracting process before the six-month CAP timeline expires. MCPs under a CAP are subject to a temporary standard that requires OON access, in addition to CAP mandates outlined.

Corrective Action Plan Mandates

Out-of-Network Access

For unmet Annual Network Certification requirements, MCPs must authorize OON services to meet time-and-distance and timely-access standards. If MCPs can provide services in-network and meet timely access standards, they may do so; however, they must document how they intend to meet these requirements without approving OON access.

DHCS will not include in future rate adjustments any increased costs that result from the requirement to authorize OON services during the CAP period; such costs will be the responsibility of the MCP.

Conversely, the MCP may choose not to refer members to a specific OON provider with whom the MCP has been unable to reach an agreement on payment or with whom the MCP has documented quality-of-care issues. MCPs must make best efforts and document all attempts to resolve non-substantive rate disputes. MCPs are also responsible for payment of all OON transportation costs. Further, MCPs must not deny access to OON services based on travel time or transportation costs.

Good Faith Contracting Efforts

The CAP requires MCPs to immediately initiate and document good faith efforts to contract with OON providers to increase compliance with standards for time and distance and appointment waiting time. MCPs must reach the enrollment and/or credentialing stage of the contracting process before the six-month CAP timeline

expires.

Member Services Training

MCPs must ensure that all member services staff, who provide information to members for appointments or process authorization requests (including those of subcontractors), are aware of and appropriately trained on processing appointments to meet timely access and OON access requirements.

DHCS will require MCPs to submit their policies and procedures, call center scripts, and training materials on OON access to DHCS for review and approval. DHCS will conduct secret shopper calls to validate the adequacy of member services staff training. MCP Member Services Handbooks must include procedures that members can use to access OON providers.

MCPs under a Corrective Action Plan

The following MCPs are under the 2020 Annual Network Certification CAP for not meeting outpatient non-specialty mental health provider to member ratio requirements:

- Molina Healthcare of California Partner Plan, Inc.

The following MCPs are under the 2020 Annual Network Certification CAP for not meeting time and distance requirements:

- Aetna Better Health
- Alameda Alliance for Health
- Anthem Blue Cross Partner Plan
- Blue Shield of CA Promise Health Plan
- California Health and Wellness
- CalViva Health
- CenCal Health
- Central California Alliance for Health
- Community Health Group Partnership Plan
- Contra Costa Health Plan
- Gold Coast Health Plan
- Health Net Community Solutions, Inc.
- Health Plan of San Joaquin
- Health Plan of San Mateo
- Inland Empire Health Plan
- Kern Health Systems
- L.A. Care Health Plan
- Molina Healthcare of California Partner Plan, Inc.
- Partnership Health Plan of California
- Santa Clara Family Health Plan
- United Healthcare Community Plan

Specific deficiencies for each MCP are listed below. The MCPs' responses will be updated as the deficiencies are rectified after the 2020 Annual Network Certification CAPs are closed.
