

Of the applications completed, about 39 percent or 135,000 will likely result in Medi-Cal coverage for currently uninsured or underinsured individuals.

“The tremendous interest in Covered California’s health coverage options has been a positive influence to motivate those who are uninsured to take advantage of their new coverage options,” said Toby Douglas, Director of the Department of Health Care Services. “It is very encouraging to see that the rate of approvals for Medi-Cal continues to increase.”

The rate of enrollment in Covered California health plans has also increased. As of Nov. 19, 79,891 Californians had selected a health plan. Compared with the first week of October, during which about 700 people a day selected a health plan, the enrollment rate nearly quadrupled by the second week of November, to about 2,700 plan selections per day.

The increase is mirrored by Medi-Cal, both through Covered California and by applications processed by county health agencies. In October, county human services agencies processed 270,670 applications, a 30% increase over the previous month.

In October, Los Angeles County, where pricing regions 15 and 16 are located, had the largest number of enrollments, totaling 6,978, including subsidy-eligible and nonsubsidized consumers. San Diego County, Orange County and San Bernardino/Riverside counties followed closely.

Expanded data about those who enrolled during October shows that 18- to 34-year-olds are applying in direct proportion to California’s population.

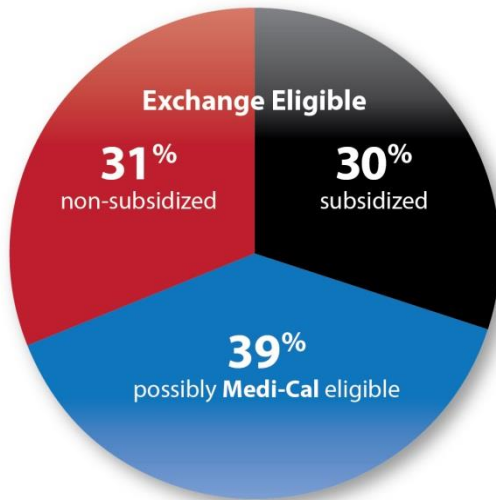

“Not only are we seeing strong enrollment numbers overall, but enrollment in key demographics like the so-called young invincibles is very encouraging,” said Lee.

Of the 30,830 individuals who enrolled during October, 22.5 percent, or about 6,900, were between 18 and 34 years old. This group makes up about 21 percent of the state’s population.

English was by far the predominant language of those who enrolled during October. Covered California anticipates a more diverse language mix in the coming months, with greater in-person enrollment, as language-specific outreach and marketing rolls out in November and December.

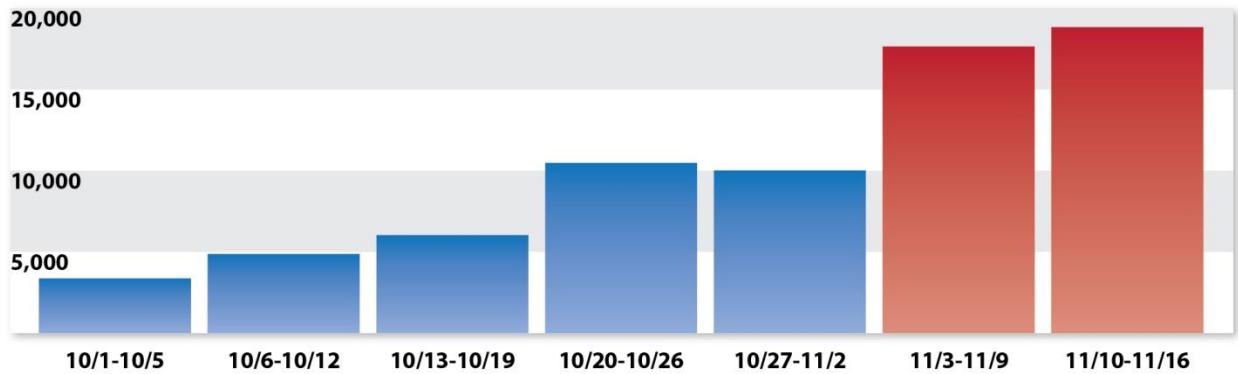

“The enrollment numbers so far reflect a tremendous demand for health insurance, which will only grow stronger as the facts about Covered California health coverage options spread across California’s diverse communities of language and culture,” said Lee.

For more details about applications and enrollment, please see the charts on the following pages.

Based on enrollment trends through Oct. 31, 2013.

Plan Selections – Individual Enrollment

As of Nov. 19, 2013, 79,891 individuals have selected a plan.

Note: These represent individual application counts for the weekly federal reporting periods. The numbers are not additive for accumulative purposes due to the dynamic nature of application status throughout the enrollment cycle (e.g., an applicant may have changed application status).

¹ Enrollment is defined as application submitted, plan selected, but not yet effectuated.

² Enrollment data based on data extracted from California Healthcare Eligibility, Enrollment and Retention System (CalHEERS) on November 6, 2013 and application data based on data extracted from CalHEERS on November 14, 2013.

³ Taken from 2010 US Census data with an error margin of +/- 1%.

⁴ This data reflects only the first month of a six month enrollment process. The rates and distribution are very likely to change over time. Additional analysis will be conducted in the future.

⁵ This data does not include Medi-Cal.

- Children are underrepresented compared to the population. This is largely due to the fact that children in families with incomes up to 250% of the Federal Poverty Level are likely Medi-Cal eligible and are not reflected in the enrollments above.
- Oldest age brackets, 45-64, are overrepresented compared to the population.
- 18-34 year olds are applying in very similar proportion to the population.

About Covered California

Covered California is the state's marketplace for the federal Patient Protection and Affordable Care Act. Covered California, in partnership with the California Department of Health Care Services, was charged with creating a new health insurance marketplace in which individuals and small businesses can get access to affordable health insurance plans. With coverage starting in 2014, Covered California helps individuals determine whether they are eligible for premium assistance that is available on a sliding-scale basis to reduce insurance costs or whether they are eligible for low-cost or no-cost Medi-Cal. Consumers can then compare health insurance plans and choose the plan that works best for their health needs and budget. Small businesses can purchase competitively priced health insurance plans and offer their employees the ability to choose from an array of plans and may qualify for federal tax credits.

Covered California is an independent part of the state government whose job is to make the new market work for California's consumers. It is overseen by a five-member board appointed by the Governor and the Legislature. For more information on Covered California, please visit www.CoveredCA.com.
