

**Enhanced Care Management and In Lieu of Services
Coding Options
February 7, 2020**

The Department of Health Care Services (DHCS) is releasing for public comment the below draft proposed Enhanced Care Management and In Lieu of Services Coding Options.

Enhanced Care Management – Coding Options

The following codes are representative of care management and care coordination services. Determination of the most appropriate codes will require defining the services and who provides those services. For example, is the Care Manager/Coordinator required to be a healthcare professional such as a Registered Nurse (RN) or Licensed Clinical Social Worker? Care Management codes require that a physician or other qualified healthcare professional (i.e. Nurse Practitioner (NP), Physician Assistant (PA), etc.) provide the services. However, the Care Coordination Services codes are less restrictive and are more applicable in the non-clinical environment. DHCS will suggest using modifiers with many of these codes.

HCPCS Level II Code	HCPCS Description
G0506 with defined modifier (TBD)	Comprehensive assessment of and care planning for patients requiring chronic care management services
T1016 with defined modifier (TBD)	Case management; each 15 minutes
