

Title X Backfill Funding Report, June 2023

Background

The Title X program was established by Congress in 1970 to support access to and the delivery of family planning services for patients with low-incomes nationwide. Title X funding can be used to support direct services for patients up to 200% of the federal poverty level, clinician and ancillary staff salaries, infrastructure, provider training and quality improvement activities, and community outreach and education. Essential Access Health (Essential Access) is an original Title X grantee and has effectively served as the program administrator in California, distributing millions in federal funding throughout the state each year for more than 50 years. The Title X program in California is the largest and most diverse Title X system in the nation. The Title X-funded network of clinics includes City and County Health Departments, federally qualified health centers, Urban Indian Health Centers, university and hospital clinics, Planned Parenthood affiliates, and stand-alone women's health and family planning providers.

In 2019, harmful Trump-era regulations took effect that interfered with the provider/patient relationship, denied patients complete and unbiased information about their pregnancy options, placed restrictions on abortion referrals, and enacted extreme rules requiring physical separation of abortion and family planning services. As a result, the California Title X Provider Network was decimated, with many providers across the state forced to make the difficult decision to leave the program. The number of patients served by Title X went from nearly 1,000,000 in 2018 to less than 200,000 in 2020. The Biden administration rescinded and replaced the Trump Title X rules in 2022. Essential Access took immediate action to rebuild California's Title X network to include more clinics than prior to the Trump rules taking effect.

In response to an increased need for federally funded family planning services in states with abortion bans and severe restrictions in a post-Roe landscape, and stagnant funding levels for 8 years in a row, the Office of Population Affairs reduced funding for California's Title X program by more than 40% (\$21 million in 2021 to \$13.2 million in 2022).

State Action

Understanding the important role Title X funding plays in our state's health care safety net, the progress we have reducing unintended pregnancy rates with Title X, Family PACT and Medi-Cal working in tandem, and the essential role family planning services are to the overall health and well-being and economic security of Californians, the California State Legislature took action to backfill the devastating loss of federal funding in the state budget. The fiscal year (FY) 2022 budget included an allocation of \$10 million to maintain the California Title X Provider Network. Without the state's investment, more than 100 clinic sites would have been cut from the program and without vital resources to support their delivery of equitable, inclusive, high quality, and adolescent-friendly family planning services for Californians with low-incomes. The FY 2022 budget bill outlined that the California Department of Health Care Services would be responsible for distributing the Title X backfill funding to Essential Access and submitting a report on the use of the state funding by June 30, 2023.

The following expenditure report and tables reflect how funding was leveraged and Title X program data submitted to the federal government during FY 2022-2023 regarding the number of patients served and other relevant program usage data.

Senate Bill 154 (Skinner, Budget Act of 2022, Chapter 43)

Title X Backfill

Project Period: October 1, 2022 - June 30, 2023

BUDGET CATEGORY	PROJECTED EXPENDITURES
<u>Personnel</u>	
Total Salaries and Wages	519,262
<i>Fringe Benefits</i>	138,175
Total Personnel Cost	657,437
<u>Other Cost</u>	
Office Lease	41,241
Conference and meetings	17,000
Outside Services	37,304
Travel	1,406
Dues + Subscription	13,675
