This differs from the 90-day updates for June, July, and August 2023 since those three months were queried in December 2023, which allows additional time for the Medicaid data to settle.

California reports lower number of renewals at the 90-day update for September 2023 due impacts of system migration, in addition to changes in case circumstances that could potentially have reset the redetermination dates for individuals within the original September cohort within the 90-days.
5b.
