

# Department of Health Care Service (DHCS) Continuous Coverage Unwinding Dashboard

March 2023

# Medi-Cal Enrollment

**Total Enrollment for March 2023**  
**15,780,688**

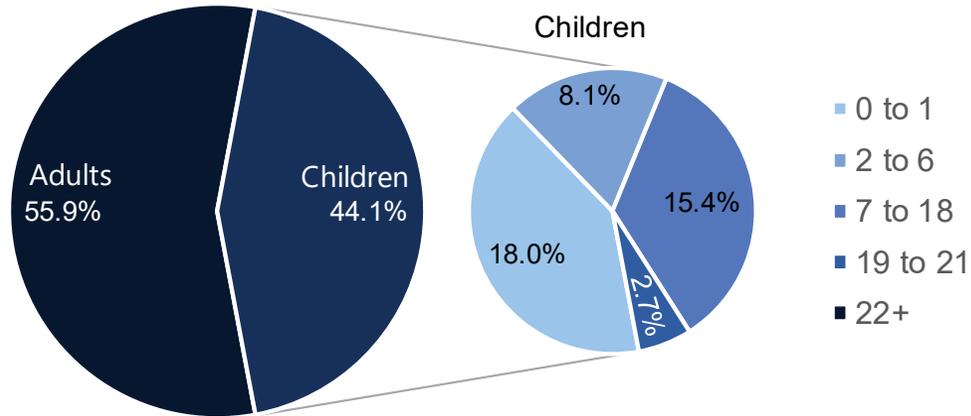

## **Data Definitions and Notes:**

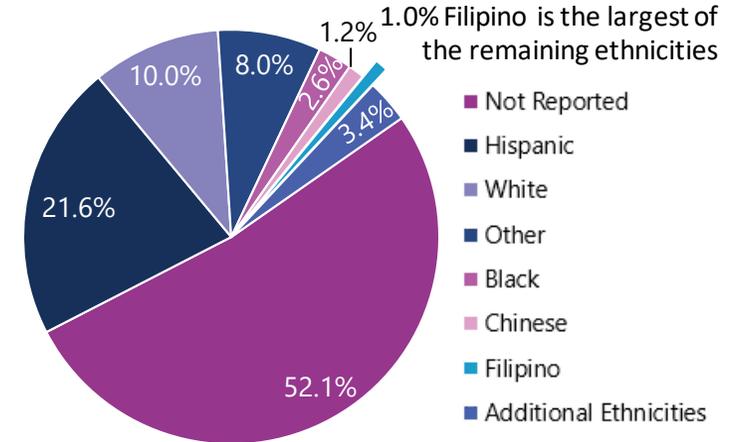

- **Data Source:** DHCS Management Information System/Decision Support System (MIS/DSS), April 2023
- County-specific breakdowns can be found [here](#).

# Newly Enrolled in March 2023

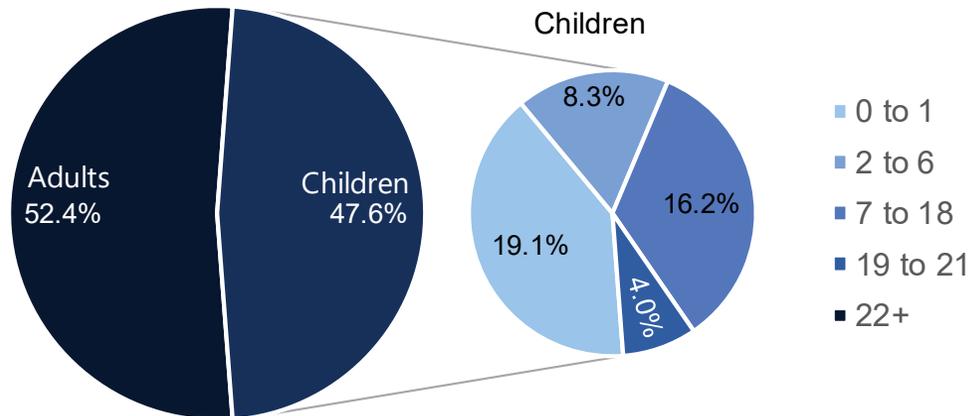

March 2023 - Male by Age Total = 55,139 (52%)

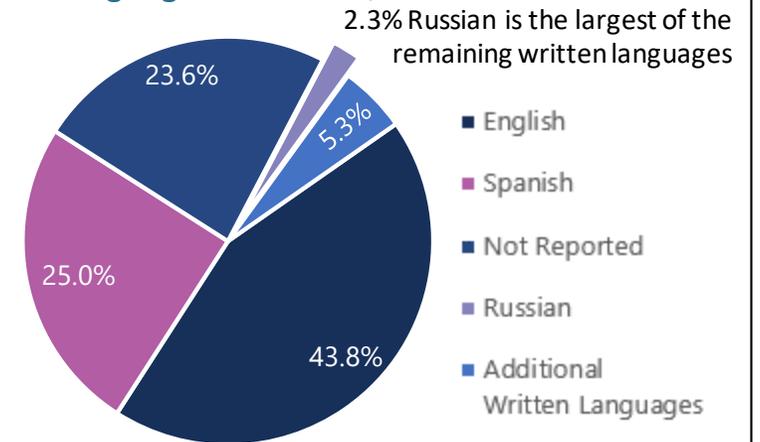

March 2023 - Ethnicity Total = 105,337

March 2023 - Female by Age Total = 50,198 (48%)

March 2023 - Written Language Total = 105,337

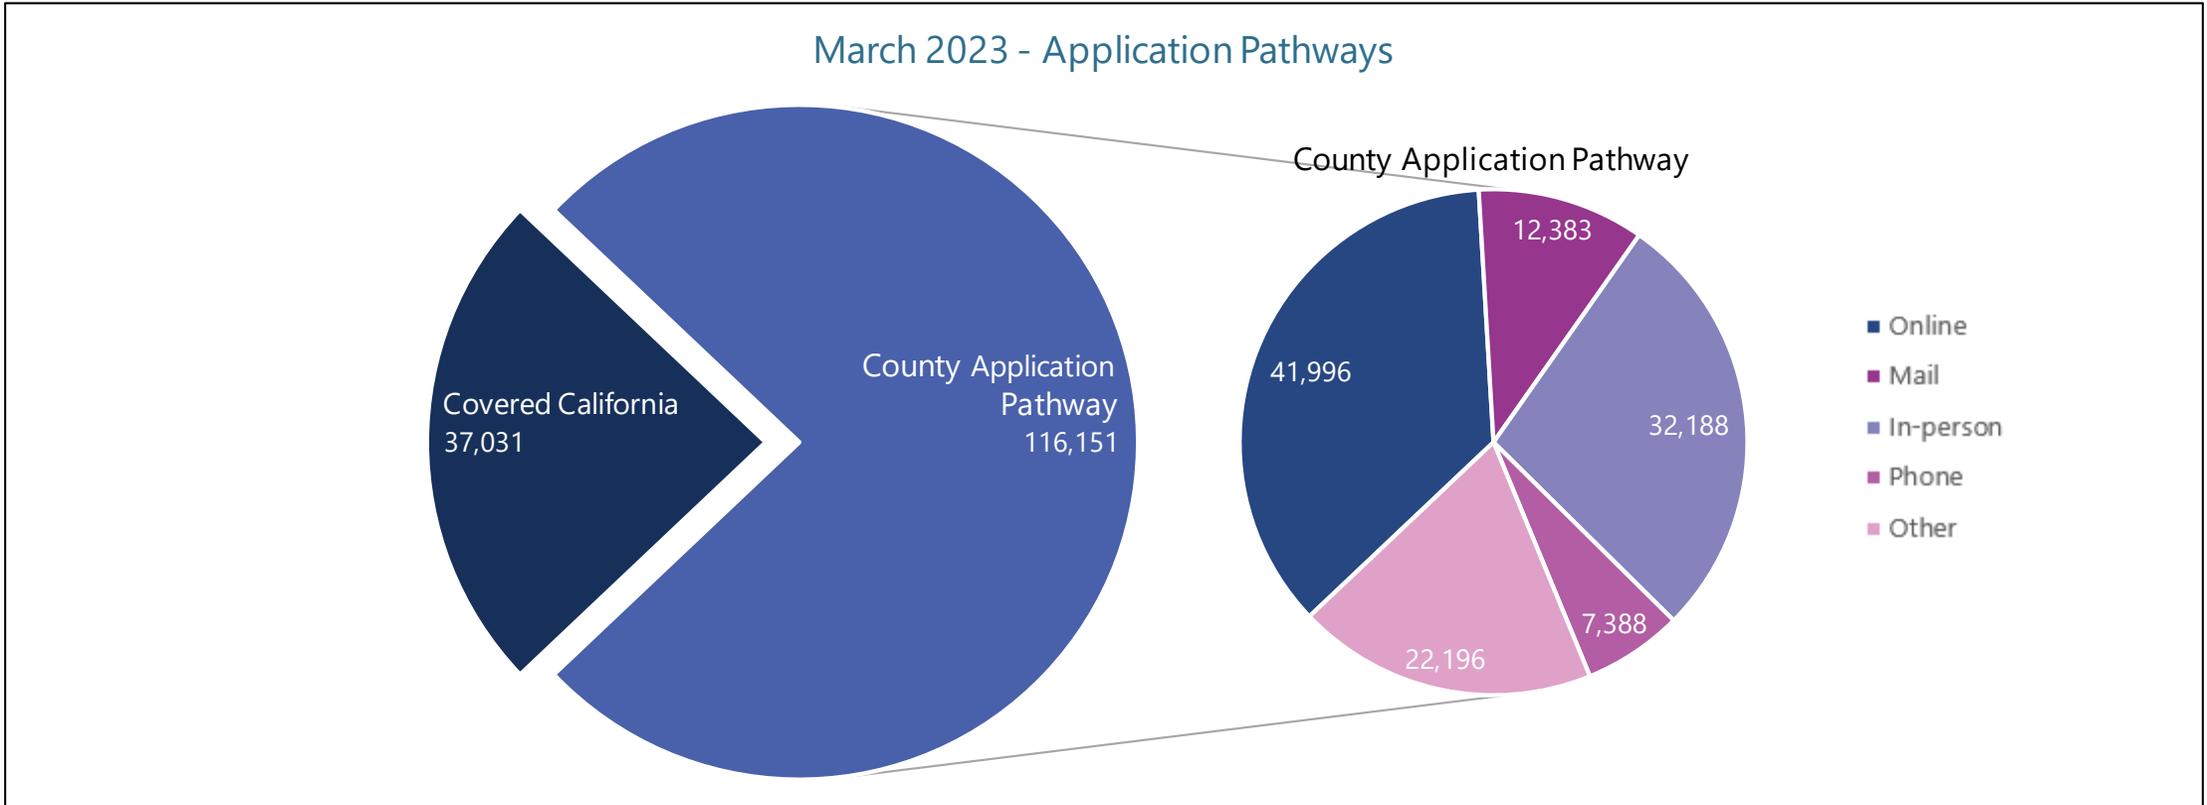

**Data Definitions and Notes:**

- Newly Enrolled are Individuals with no prior history of Medi-Cal coverage.
- County-specific breakdowns can be found [here](#).
- Values presented in this report may not add up to 100 percent due to rounding.
- Source: DHCS Management Information System/Decision Support System (MIS/DSS) April 2023

# March 2023: Snapshot of Applications Received by Submission Pathways

<b>Covered California</b> <b>37,031</b>	<b>County Application Pathway</b> <b>116,151</b>
--	---

## **Data Definitions and Notes:**

- **Data Source:** Statewide Automated Welfare System (SAWS), April 2023
- **"Other":** Defined as applications that are received by In Home Supportive Services (IHSS) and Community-based organizations (CBOs)
- County-specific breakdowns can be found [here](#).

# March 2023: Snapshot of Application Processing

## Newly Enrolled<sup>1</sup>

105,337

## Applications in Process<sup>2</sup>

100,667

## Eligible for Coverage<sup>3</sup>

133,325

## Ineligible for Coverage<sup>4</sup>

117,698

### Data Definitions and Notes:

- Application counts are **rolling** across each month since Medi-Cal application timelines are 45-days for non-disability applications and 90-days for disability applications. The four metrics **will not add up** to the monthly “Applications Received by Submission Pathways” since the counts will include retroactive months of determination and applications over 45-day or 90-day due to good cause and/or county working with the Medi-Cal applicant
- <sup>1</sup> Newly Enrolled: Individuals with no prior history of Medi-Cal coverage for the reporting month.
- <sup>2</sup> Applications in Process: Applications currently being reviewed by county social services agencies in the reporting month.
- <sup>3</sup> Eligible for Coverage: Individual is determined eligible for Medi-Cal or Children’s Health Insurance Program in the reporting month.
- <sup>4</sup> Ineligible for Coverage: Individual is determined ineligible for Medi-Cal or Children’s Health Insurance Program in the reporting month.
- The Department of Health Care Services (DHCS) publishes a [public dataset](#) of monthly counts of Notice of Inaction (NOI) sent to Medi-Cal applicants whose pending application is reaching 45 days due to an improper delay by the county that is processing the application. A NOI is not issued when the application delay is due to the applicant failing to provide requested information to the county, which is considered a proper delay. The monthly counts include the total Medi-Cal and Covered California applications received and the total number/percentage of Medi-Cal applications pending 45 days, including both proper and improper application processing delays.

# March 2023: Redetermination Processing

## Redeterminations Due

**1,097,172**

## Renewed (Via Ex Parte Process)<sup>1</sup>

**321,903 / 29.3%**

## Valid Disenrollments<sup>2</sup>

**3,202 / 0.29%**

## Maintained in Coverage Under Continuous Coverage Protections<sup>3</sup>

**772,067 / 70.4%**

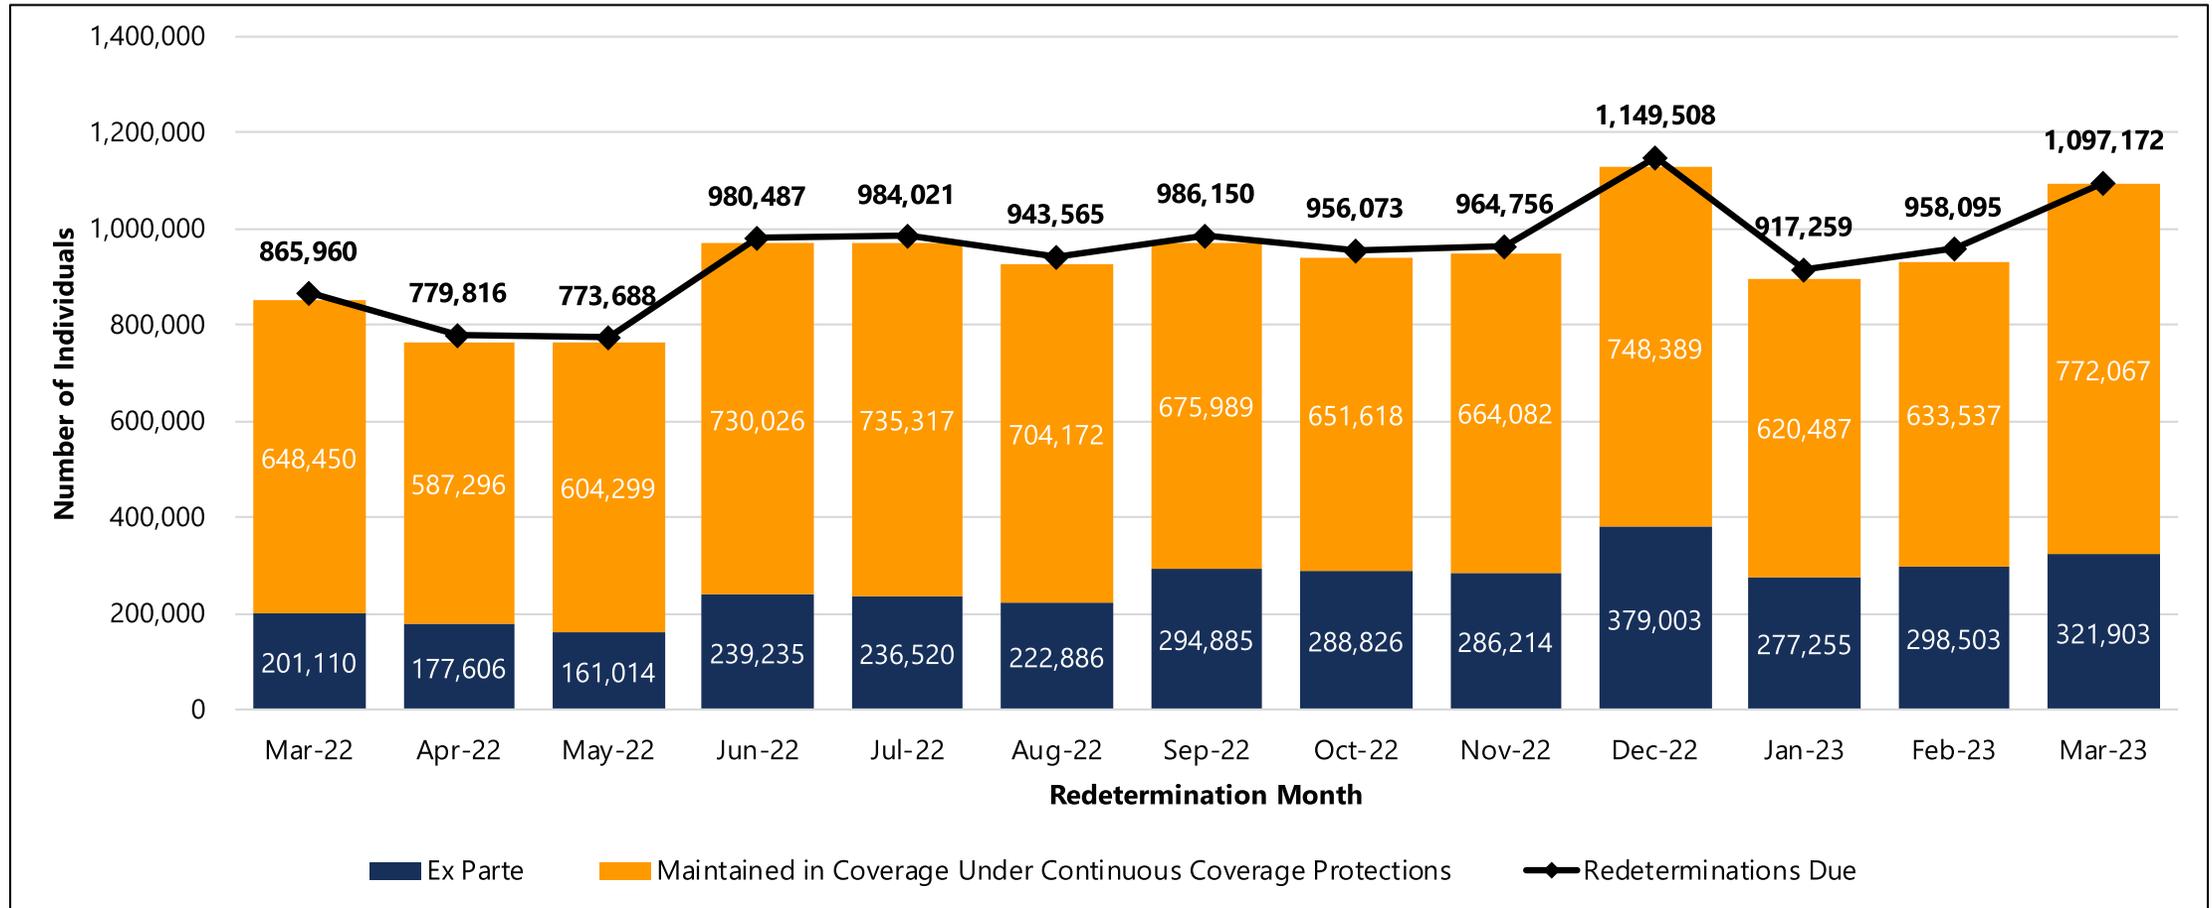

### **Data Definitions and Notes:**

- <sup>1</sup> *Renewed (Via Ex parte Process)* is one of the most critical components of the Medi-Cal determination process, as it allows redeterminations to process automatically once all information passes through the Federal and State databases for verification or using available information to the county without the need to contact the beneficiary. Beneficiaries who are renewed via ex parte have their Medi-Cal cases renewed for another year. Please note that data anomalies were reported for all renewal metrics for Wave 2 Migration counties (Contra Costa, Santa Clara, and Tulare). Wave 2 migration occurred at the end of February 2023.
- <sup>2</sup> *Valid Disenrollments:* Medi-Cal members who were validly discontinued during the continuous coverage period due to moving out of state, death, or voluntary withdrawal requesting discontinuance.
- <sup>3</sup> *Maintained in Coverage under Continuous Coverage Protections:* Total number of individuals not renewed via ex parte, but maintained in coverage due to the continuous coverage period.
- DHCS does not conduct annual renewals for the CalWORKS, Foster Care or Supplemental Security Income (SSI) coverage groups. California full renewal distribution report can be found [here](#).
- Values presented in this report may not add up to 100 percent due to rounding.

### **Data Source:**

- *Statewide Automated Welfare System (SAWS); CalWIN renewals data was queried on April 06, 2023, and CalSAWS renewals data was queried April 11, 2023*
- County-specific breakdowns can be found [here](#).

# Monthly Redetermination Processing

• NOTE: Values of less than 1% are statistically insignificant and will not be represented on this visual chart ("Discontinued" value is <1%)

**Data Source:**

- Statewide Automated Welfare System (SAWS); CalWIN renewals data was queried on 04/06/2023, and CalSAWS renewals data was queried on 04/11/2023.
- County-specific breakdowns can be found [here](#).
