Medi-Cal Managed Care Health Plan Name Abbreviations

HSAG uses the following abbreviated Medi-Cal managed care health plan (MCP) names in this volume.

- ◆ **AAH**—Alameda Alliance for Health
- ◆ **Aetna**—Aetna Better Health of California
- ◆ **Anthem Blue Cross**—Blue Cross of California Partnership Plan, Inc., DBA Anthem Blue Cross Partnership Plan
- ◆ **Blue Shield Promise**—Blue Shield of California Promise Health Plan
- ◆ **CalOptima**—CalOptima
- ◆ **CalViva**—CalViva Health
- ◆ **CAAH**—Central California Alliance for Health
- ◆ **CCHP**—Contra Costa Health Plan
- ◆ **CenCal**—CenCal Health
- ◆ **CHG**—Community Health Group Partnership Plan
- ◆ **CHW**—California Health & Wellness Plan
- ◆ **GCHP**—Gold Coast Health Plan
- ◆ **Health Net**—Health Net Community Solutions, Inc.
- ◆ **HPSJ**—Health Plan of San Joaquin
- ◆ **HPSM**—Health Plan of San Mateo
- ◆ **IEHP**—Inland Empire Health Plan
- ◆ **Kaiser NorCal**—Kaiser NorCal (KP Cal, LLC, in Amador, El Dorado, Placer, and Sacramento counties)
- ◆ **Kaiser SoCal**—Kaiser SoCal (KP Cal, LLC, in San Diego County)
- ◆ **KHS**—Kern Health Systems, DBA Kern Family Health Care
- ◆ **L.A. Care**—L.A. Care Health Plan
- ◆ **Molina**—Molina Healthcare of California
- ◆ **Partnership**—Partnership HealthPlan of California
- ◆ **SCFHP**—Santa Clara Family Health Plan
- ◆ **SFHP**—San Francisco Health Plan
- ◆ **UHC**—UnitedHealthcare Community Plan¹

¹ Note: DHCS' contract with UHC ended December 31, 2022.

Commonly Used Abbreviations and Acronyms

Following is a list of abbreviations and acronyms used throughout this volume.

- ◆ **APL**—All Plan Letter
- ◆ **CAP**—Corrective Action Plan
- ◆ **CMB**—California Medical Board
- ◆ **DHCS**—California Department of Health Care Services
- ◆ **ENT**—Ear, Nose, and Throat
- ◆ **EQR**—External Quality Review
- ◆ **EQRO**—External Quality Review Organization
- ◆ **FTE**—Full-Time Equivalent
- ◆ **HSAG**—Health Services Advisory Group, Inc.
- ◆ **HIV/AIDS**—Human Immunodeficiency Virus/Acquired Immunodeficiency Syndrome
- ◆ **IQR**—Interquartile Range
- ◆ **MCP**—Managed Care Health Plan
- ◆ **N/A**—Not Applicable
- ◆ **NPI**—National Provider Identifier
- ◆ **OB/GYN**—Obstetrics/Gynecology
- ◆ **PCP**—Primary Care Provider
- ◆ **PSP**—Population-Specific Health Plan
- ◆ **SFY**—State Fiscal Year
- ◆ **WIC**—Welfare and Institutions Code

1. Introduction

Overview

The California Department of Health Care Services (DHCS) is responsible for the ongoing monitoring and oversight of its contracted Medi-Cal managed care health plans (MCPs) and population-specific health plans (PSPs), including the assurance that MCPs' and PSPs' provider networks are adequate to deliver services to Medi-Cal members. If health care providers are unavailable or unwilling to serve Medi-Cal members such that the MCP or PSP is unable to meet provider network time or distance standards, MCPs and PSPs may request that DHCS allow an alternative provider network access standard for specified provider scenarios (e.g., provider type, geographic area). The DHCS All Plan Letter (APL) 23-001² provides DHCS' clarifying guidance regarding network certification requirements, including requests for alternative access standards.

In areas where MCPs do not meet time or distance standards but do meet specific DHCS criteria, MCPs may also choose to offer members telehealth services³ in lieu of submitting an alternative access standard request, consistent with California Welfare and Institutions Code (WIC) section (§)14197(f)(1).⁴ In general, if at least 85 percent of members in an area have access to in-person care within the time/distance standards, MCPs may propose to deliver synchronous telehealth to those members without access. The MCPs must meet the required telehealth provider-to-member ratio specified by DHCS for each eligible provider type while also facilitating in-person care for members who request it.

WIC §14197.05⁵ requires DHCS' annual external quality review (EQR) technical report to present information related to MCPs' alternative access standard requests. As such, DHCS requested its external quality review organization (EQRO), Health Services Advisory Group, Inc. (HSAG), to process and report on data related to alternative access standards for provider networks. In addition, DHCS requested that HSAG present information on instances for which DHCS approved MCP requests to offer telehealth in lieu of proposing an alternative access standard. The measurement period for this study is February 6, 2023, through October 9, 2023.

Reporting Elements

The following reporting elements are defined by WIC §14197.05 for inclusion in the annual EQR technical report:

1. The number of requests for alternative access standards in the plan service area for time or distance, categorized by provider types, including specialists, and by adult and pediatric.
2. The number of allowable exceptions for the appointment time standard, if known, categorized by provider types, including specialists, and by adult and pediatric.
3. Distance and driving time between the nearest network provider and ZIP Code of the member farthest from that provider for requests for alternative access standards.
4. The approximate number of members impacted by alternative access standards or allowable exceptions.
5. Percentage of providers in the plan service area by provider and specialty type that are under a contract with a Medi-Cal MCP.
6. The number of requests for alternative access standards approved or denied by ZIP Code and provider and specialty type, and the reasons for the approval or denial of the request for alternative access standards.
7. The process of ensuring out-of-network access.
8. Descriptions of contracting efforts and explanation for why a contract was not executed.
9. Time frame for approval or denial of a request for alternative access standards by DHCS.
10. Consumer complaints, if any.

2. Methodology

Data Sources

To compile information for each reporting element, HSAG used the following datasets and background information supplied by DHCS:

- ◆ Export(s) from DHCS' Alternative Access Standard Request and Decision Database.
 - Exports included all alternative access standard requests submitted to DHCS by the MCPs during the measurement period, and all approval/denial administrative data corresponding to the alternative access standard requests. (Reporting Elements 1, 3, 4, 6, and 9)
 - Exports also included information on provider contracting efforts. (Reporting Element 8)
- ◆ Grievance data that included MCP identification information, county name, reporting quarter associated with the grievance, and quarterly results for accessibility-related grievance categories.⁶ (Reporting Element 10)
- ◆ DHCS 274 provider network data files current as of September 2023. (Reporting Element 5)
- ◆ Documentation on DHCS requirements for the process of ensuring out-of-network access. (Reporting Element 7)
- ◆ Telehealth request data for areas and provider types for which telehealth was approved in lieu of alternative access standards.

Analysis

HSAG reviewed each data source for completeness and internal consistency. Reporting elements were computed as described under the Reporting Elements heading in Section 1 of this volume ("Introduction"), subject to the analytic considerations described below. Results were compared to those from the previous year. Section 5 of this volume ("Alternative Access Standards Tables") provides methodological details for each data element and data table.

⁶ The accessibility-related grievance categories available from DHCS that will be used for the 2022–23 analysis include (1) Geographic Access, (2) Out-of-Network, (3) Rural Member Denied Out-of-Network Request, and (4) Timely Access.

Analytic Considerations

No MCPs requested exceptions to the appointment time standard during the measurement period; therefore, Reporting Element 2 (the number of allowable exceptions for the appointment time standard) is not included in the analysis.

Reporting Element 5, the percentage of providers in the plan service area that are under a contract with a Medi-Cal MCP, requires a count of all providers practicing in each plan service area. HSAG was unable to locate a data source capable of producing a reliable estimate of the total provider population in each plan service area.⁷ Alternatively, HSAG identified the universe of all Medi-Cal-contracted providers physically located in the plan service area who were under contract with any MCP using data from the DHCS 274 provider data files. This choice has consequences for the interpretation of percentages in Table 5.7 through Table 5.64. Because the number of Medi-Cal-contracted providers practicing in a service area is inherently less than the number of all providers, the percentages shown in the tables will be greater than would have been the case had the number of all providers in the service area been known. The percentages in Table 5.7 through Table 5.64 can therefore be interpreted as the upper limit of the percentage of providers located within a service area who are contracted with each MCP serving that area as a percentage of all providers.

For Reporting Element 10, consumer complaints, the data are limited to grievance calls received by the MCPs. Data from the Medi-Cal Managed Care and Mental Health Office of the Ombudsman are not presented. While the Office of the Ombudsman likely receives relevant complaints, the complaint categories provided in its database do not allow the specific identification of travel time or distance issues.

Please note that MCPs and PSPs with specific types of health care delivery systems are eligible to petition DHCS to consider system-level exemptions to the time or distance standard.⁸ This approach is used by Kaiser NorCal, Kaiser SoCal, and the PSPs (AIDS Healthcare Foundation and SCAN Health Plan). Each MCP and PSP requesting an exemption must document the capability to deliver the appropriate level of care within its specialized delivery structure. If DHCS concludes that the MCP or PSP is delivering the appropriate level of access to care, the MCP or PSP is not required to submit detailed time or distance alternative access standard requests. DHCS reviews each exemption request to determine that the requesting MCP or PSP has adequately described its delivery structure to exhibit a

⁷ HSAG's review of the California Medical Board (CMB) licensing data determined that these data do not contain adequate information about providers' practice locations to be a reliable estimate of the total number of providers for a specific county. Further, the 274 provider network data files and CMB licensing data do not share a common identifier such as National Provider Identifier (NPI) or license number, preventing HSAG from linking the two datasets to assess the completeness of the CMB data.

⁸ California WIC §14197(f)(2)(B). Available at: <https://codes.findlaw.com/ca/welfare-and-institutions-code/wic-sect-14197/>. Accessed on: Jan 24, 2024.

clinically integrated health care model/network consisting of, but not limited to either of the following:

- ◆ Medical Home: A team-based health care delivery model led by a health care team in a centralized facility to provide comprehensive and continuous medical care to patients with a goal to obtain maximal health outcomes.
- ◆ Specialty Services for Specialty Population: A limited but comprehensive network that renders services specific to the diagnoses of the members and ensures that care coordination and support services are available across the continuum of care regardless of location.

This exemption from the time or distance standard does not preclude MCPs and PSPs from meeting the other Annual Network Certification (ANC) components. DHCS reserves the right to revoke an approved alternative access standard request if concerns regarding quality of care are discovered through avenues including but not limited to grievances and appeals reporting and timely access survey results.

3. Results

This section contains a summary of analytic results. Full results for the quantitative reporting elements (i.e., all elements except Process of Ensuring Out-of-Network Access and Contracting Efforts) may be found in Section 5 of this volume (“Alternative Access Standards Tables”).

Number of Requests, Approvals, and Denials

The alternative access standard requests were tabulated and stratified by the following characteristics: MCP, county, ZIP Code, provider type (including specialty), and population served (adult, pediatric, or not applicable [N/A]).⁹ For each combination of the strata, HSAG tabulated the total number of requests submitted and then identified the final disposition of the request as approved or denied. Regardless of the number of requests submitted for a given MCP, county, ZIP Code, provider type, or adult or pediatric combination, there is only one final approval or denial for that combination of characteristics.

During the measurement period, MCPs submitted 7,479 alternative access standard requests to DHCS. There were 6,897 distinct combinations of request characteristics, of which DHCS approved 5,265 (76.3 percent), denied 531 (7.7 percent), and rendered no decision for 1,101 (16.0 percent). The primary reason for not rendering a decision, according to DHCS, was that the ZIP Code in the request is a special, non-residential ZIP Code (e.g., a post office box only ZIP Code), where an alternative access standard would not be appropriate because no members reside there.

The complete results of the analysis of the total number of requests submitted and the number approved or denied are located in Section 5 of this volume (“Alternative Access Standards Tables”).

⁹ The population served for the following provider types can be either adult or pediatric: mental health (non-psychiatry) outpatient services, core specialists as defined in APL 23-001 Attachment B, and PCPs. The population served for Hospitals and OB/GYN specialists is designated as “N/A,” because these provider types do not exclusively serve adults or children.

Reasons for the Approval or Denial of Alternative Access Standard Requests

DHCS requires, as part of the process of developing an alternative access standard request, that MCPs identify the name and location of the nearest network provider outside the time/distance standard, as well as the names and locations of the two nearest out-of-network providers.¹⁰ MCPs are also required to demonstrate that they have attempted to contract with the identified out-of-network providers if they are closer to affected members than the identified network provider. (See additional information under the “Contracting Efforts” heading in this section of the volume.) DHCS approvals and denials relate to the appropriateness and completeness of alternative access standard requests, the MCP’s selection of providers, and the MCP’s documented contracting efforts. In the data provided for the 2022–23 analyses, the most common reasons for DHCS to approve or deny an alternative access standard request included:

◆ Approval Reasons

- The MCP is contracted with the closest provider (network or out-of-network), and DHCS did not identify a closer network or out of-network provider than the provider indicated on the request.
- Although DHCS identified closer out-of-network providers than the network provider indicated on the request, the MCP has attempted to contract with those providers and clearly explained why they could not be added to the MCP’s network.

◆ Denial Reasons

- The MCP’s alternative access standard request is incomplete. The MCP is to revise the request that follows APL 23-001¹¹ Attachment C instructions and resubmit.
- DHCS located a closer out-of-network provider than the network provider and out-of-network provider that the MCP identified on the alternative access standard request. The MCP is to revise the request for miles/minutes or provide a justification and resubmit.
- DHCS located a network provider within the time or distance standards that the MCP did not identify on the alternative access standard request. The MCP is to submit an updated accessibility analysis that shows the MCP is already meeting the time or distance standard.
- The MCP’s justification as to why the MCP was unable to contract with the closer out-of-network provider is insufficient. The MCP is to revise the justification and resubmit.

¹⁰ See Instructions in APL 23-001, Attachment C. Available at <https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2023/APL23-001-ANC-Attachment-C.xls>. Accessed on January 25, 2024.

¹¹ All Plan Letter 23-001. Available at: [APL 23-001 \(ca.gov\)](https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2023/APL23-001-ANC-Attachment-C.xls). Accessed on: January 25, 2024.

Distance and Driving Time Between Nearest Network Provider and Farthest Member

A completed alternative access standard request submission includes the distance and drive time between the nearest network provider and the member farthest from that provider within the specified ZIP Code.¹² Each MCP may submit several alternative access standard requests for different provider types and populations served within a single ZIP Code. To summarize the characteristics of requests at the ZIP Code level, HSAG computed the median driving distance and time between the nearest network provider and the farthest member within each ZIP Code, across all provider types and populations served. HSAG also calculated the median number of members impacted and the range of driving distances, driving times, and members impacted across requests for the affected ZIP Codes. The calculations used all requests submitted except those with missing or invalid ZIP Codes. DHCS did not approve all requests included in this analysis, and DHCS approvals may have included driving distance or time standards that differed from submitted requests.

Across all combinations of MCPs and ZIP Codes, the shortest median driving distance was one mile for Molina and ZIP Code 92311, while the longest median driving distance was 178.5 miles for CHW and ZIP Code 92389. The shortest median driving time was one minute for Molina and ZIP Code 92311, while the longest median driving time was 222 minutes for IEHP and ZIP Code 92310. The smallest median number of impacted members was zero individuals in 60 distinct combinations of MCPs and ZIP Codes associated with seven different MCPs. The largest median number of impacted members was 29,206 individuals for IEHP and ZIP Code 92201.

The complete results for the analysis of distances, drive times, and impacted members are located in Section 5 of this volume (“Alternative Access Standards Tables”).

Time Frame for Approval or Denial of Requests

In accordance with WIC §14197(f)(4), DHCS must approve or deny an alternative access standard request within 90 days of submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny

¹² This is operationalized in the instructions for APL 23-001, Attachment C, as the driving distance or time “between the identified nearest network provider and the farthest edge of the ZIP code border.”

For requests submitted during the initial request and decision phase between February 6, 2023, and July 31, 2023, the median number of days to approval or denial across MCPs was 58 days.

The complete results for the analysis of the time between an alternative access standard request and approval or denial are located in Section 5 of this volume (“Alternative Access Standards Tables”).

In areas where MCPs do not meet time or distance standards but do meet specific DHCS criteria,¹⁴ MCPs may also choose to offer members telehealth services in lieu of submitting an alternative access standard request, consistent with WIC §14197(f)(1).¹⁵ In general, if at least 85 percent of members in an area have access to in-person care within the time/distance standards, MCPs may propose to deliver synchronous telehealth to those members without access. In doing so, MCPs must agree to contract with a sufficient number of telehealth-only providers. DHCS calculates the number of full-time equivalent (FTE) providers required based on the minimum provider-to-member ratios defined in MCP contracts for each provider type and on the number of members without in-person access within the time/distance standards.

¹⁵ California WIC §14197(f)(1). Available at: https://leginfo.legislature.ca.gov/faces/codes_displayText.xhtml?lawCode=WIC&division=9.&title=&part=3.&chapter=7.&article=6.3. Accessed on: January 25, 2024.

MCPs are also required to facilitate in-person care for members who do not have access to care within the time/distance standards but decline to use telehealth services.

For each approved request, the telehealth data provided by DHCS included the MCP, county, ZIP Code, population served (adult, pediatric, or N/A), provider type, percentage of members with in-person access, number of telehealth providers required by DHCS, and number of telehealth providers contracted. For 2022–23, DHCS approved 33 requests received from six MCPs. Anthem Blue Cross received approval for 13 requests, more than any other MCP. The provider types associated with requests were Hematology, Mental Health (non-psychiatry) Outpatient Services, Nephrology, Primary Care Provider (PCP), and Psychiatry. Both adult and pediatric requests were received for all listed provider types except Hematology; only adult requests were received for Hematology. The population served and provider type for which requests were most frequently approved was Pediatric Psychiatry, with six approved requests. Across all approved requests, the percentage of members with in-person access ranged from 87 percent to 99 percent, with a median of 96 percent. The number of FTE providers required by DHCS ranged from 0.25 to 4.00, with a median of 0.50. The number of telehealth providers contracted by the MCP was greater than or equal to the number of providers required by DHCS for all approved requests.

The complete results for the analysis of approved telehealth requests are located in Section 5 of this volume (“Alternative Access Standards Tables”).

Consumer Complaints

HSAG reviewed DHCS’ quarterly grievance reports from State Fiscal Year (SFY) 2021–22 Quarter 3 through SFY 2022–23 Quarter 2 (January 2022 through December 2022) for member complaints related to access to providers. Grievance call frequencies were collected for four categories of complaints: “Timely Access,” “Geographic Access,” “Out-of-Network,” and “Rural Member Denied Out-of-Network Request.” Results were stratified by MCP and county. On average, across all categories of complaints, MCPs received 544.7 complaints per county where any complaints were received. The smallest number of complaints for any MCP and county where any complaints were received was one complaint (CHW, Kaiser NorCal, and Partnership), and the largest number of complaints for an MCP and county was 18,160 complaints (L.A. Care). In all, 52,840 complaints were received across the four included categories, with 85.8 percent related to Timely Access, 10.4 percent related to Geographic Access, 3.8 percent related to Out-of-Network provider issues, and less than 0.1 percent related to Rural Member Denied Out-of-Network Request issues.

The complete results for the analysis of consumer complaints are located in Section 5 of this volume (“Alternative Access Standards Tables”).

Process of Ensuring Out-of-Network Access

DHCS sets the requirements for MCPs to provide out-of-network access. Specifically, MCPs must provide out-of-network access if their network is unable to provide medically necessary covered services within timely access standards. Additionally, MCPs must provide for the completion of covered services by a terminated or out-of-network provider at the request of a member in accordance with the continuity of care requirements in the California Health and Safety Code Section 1373.96. In addition to the aforementioned requirements, MCPs that are under a CAP for failing to meet time or distance standards must also ensure subcontractors and delegated entities adhere to the out-of-network access requirements, submit a policy or procedure to ensure there is a consistent process for out-of-network access compliance, and demonstrate their ability to effectively provide out-of-network access information to members.

Contracting Efforts

MCPs are also required to document their attempts to contract with the providers and the outcomes of those attempts. Contracting attempts are not required, however, for out-of-network providers farther away than the nearest network provider.

HSAG reviewed data on MCP contracting efforts and the outcomes of those efforts as documented in alternative access standard requests submitted between February 6, 2023, and October 9, 2023. The following bullet points summarize common themes in the current year's data:

- ◆ No contracting efforts required
 - Network provider closer than out-of-network provider
 - Provider location outside of MCP's licensed service area
- ◆ Provider outreach in progress
 - Planning to contact provider in near future
 - Contacted or attempted to contact provider by telephone, mail, or email
 - Contracting steps/negotiations in progress¹⁶
 - Provider already contracted with MCP but not yet credentialed
 - Provider already contracted with MCP but not yet contracted at location
 - Provider affiliated with network contracted with MCP but not yet credentialed or contracted at location
- ◆ Provider outreach unsuccessful
 - Provider unreachable due to incorrect or outdated directory information

¹⁶ If applicable, the rationale must detail the targeted time frame for execution.

- Incorrect directory information regarding provider location, specialty, or population served
- Provider on extended leave, retired, died, or no longer practices at location
- Members cannot make appointments for care at the location
- ◆ Contracting efforts failed
 - Unable to resolve rate dispute with provider
 - Provider lacks capacity to take on new patients/new networks
 - Provider affiliated with closed network that prohibits additional contracts
 - Provider policy against contracting with Medi-Cal or MCPs
 - Provider credentialing failed or other quality of care issue

It is noteworthy that, in instances where contracting efforts failed, MCPs often indicated that individual providers' contractual relationships with other networks played an important role.

Providers under Contract

To understand the scope of each MCP's network in its service areas, HSAG calculated the percentage of all providers located within a given county who are contracted with each MCP serving that county.¹⁷ Due to the absence of a reliable and sufficiently detailed source of data that includes all providers and their practice locations, the pool of providers in each county is limited to a smaller group of providers for which full data are available—those contracted with MCPs. These are the results of calculations based on provider data current as of September 2023:

- ◆ For all MCPs, the median percentage of contracted providers across counties, populations served, and provider types is 50.3 percent (interquartile range [IQR] 13.6 percent–86.6 percent).¹⁸ This indicates that an MCP typically contracts with roughly half of the providers who are contracted with any MCP in a county.
- ◆ The MCPs with the highest median percentage of contracted providers across counties and provider types are CenCal (100.0 percent; IQR 93.0 percent–100.0 percent) and Partnership (100.0 percent; IQR 75.7 percent–100.0 percent). These MCPs typically

¹⁷ Within the 274 provider network data files received from DHCS, 111,653 records were missing the Taxonomy data required to determine provider type. These records were excluded from analysis because it was not possible to determine whether they represented provider types within the scope of this analysis. After limiting records to those with a provider type within the scope of the analysis, another 1,277 records were missing the NPI data required to uniquely identify specific providers. No records were dropped from the analysis due to missing data on any other required fields in the 274 provider network data files.

¹⁸ The IQR of a distribution is the distance from the 25th percentile value to the 75th percentile value, delimiting the middle 50 percent (approximately) of values.

contract with a higher proportion of providers located within the counties they serve than other MCPs.

- ◆ The MCP with the lowest median percentage of contracted providers across counties and provider types is Aetna (11.9 percent; IQR 4.3 percent–33.9 percent). This MCP typically contracts with a lower proportion of providers located within the counties it serves than other MCPs.
- ◆ The provider type with the highest median percentage of contracted providers across counties and MCPs is Hospitals (69.2 percent; IQR 46.7 percent–100.0 percent). MCPs typically contract with a higher proportion of providers of this type located within the counties they serve compared to other provider types.
- ◆ The provider type with the lowest median percentage of contracted providers across counties and MCPs is Adult Ear, Nose, and Throat (ENT)/Otolaryngology (4.4 percent; IQR 0.0 percent–75.6 percent). MCPs typically contract with a lower proportion of providers of this type located within the counties they serve compared to other provider types.

The complete results for the analysis of the number of providers contracted with an MCP within each county for each provider and specialty type as a percentage of all providers in that county are located in Section 5 of this volume (“Alternative Access Standards Tables”).

4. Conclusions and Considerations

Conclusions

Overall, the results presented in Section 3 of this report are broadly consistent with those presented in *Volume 4 of 5 Medi-Cal Managed Care External Quality Review Technical Report—July 1, 2021–June 30, 2022*.¹⁹ For example:

- ◆ The volume of alternative access standard requests was slightly greater in 2022–23 compared to 2021–22 (7,479 requests versus 7,375 requests).
- ◆ The percentage of distinct alternative access standard requests approved was slightly lower in 2022–23 compared to 2021–22 (76.3 percent versus 78.7 percent).
- ◆ The median number of days across MCPs between the initial submission of an alternative access standard request and the delivery of an initial approval or denial by DHCS was somewhat higher in 2022–23 during the initial submission phase (58 days versus 47 days) but somewhat lower in 2022–23 during the resubmission phase (32 days versus 47 days) compared to 2021–22. Note that in accordance with WIC §14197(f)(4), DHCS must approve or deny an alternative access standard request within 90 days of submission. The results for 2021–22 and 2022–23 fell well below the 90-day threshold.
- ◆ The average number of member complaints per MCP per county was slightly lower in 2022–23 compared to 2021–22 (544.7 complaints versus 587.2 complaints).
- ◆ The median number of providers contracted with an MCP as a percentage of providers contracted with any MCP in a county was slightly lower in 2022–23 compared to 2021–22 (50.3 percent versus 52.0 percent).

Stability over time can be positive; however, DHCS may want to determine whether the number of distinct requests each year is reasonable and expected. If the number of distinct requests is not reasonable or expected, DHCS may want to assess whether there are additional steps it can take to address the factors that are driving MCPs to submit alternative access standard requests. DHCS also may want to determine whether the State legislature or other governmental bodies can further assist MCPs with addressing barriers to contracting with providers in their service areas. Barriers to contracting would include reasons that contracting efforts failed, such as payment issues, nearby out-of-network providers being affiliated with closed networks, and the difficulties providers face in contracting with multiple networks (see “Contracting Efforts” in Section 4).

¹⁹ *Volume 4 of 5 Medi-Cal Managed Care External Quality Review Technical Report—July 1, 2021–June 30, 2022*. Available at: [Volume 4 of 5 Medi-Cal Managed Care External Quality Review Technical Report July 1, 2021–June 30, 2022](#). Accessed on Jan 26, 2024.

Reporting on approved telehealth requests is new for 2022–23; therefore, HSAG is unable to make any comparisons to 2021–22 for telehealth requests. DHCS approved 33 telehealth requests for six MCPs in 2022–23, a tiny number compared to the 5,265 alternative access standard requests DHCS approved for 20 MCPs during the same period. The relatively small number of approved telehealth requests may indicate the presence of barriers to telehealth adoption by MCPs, such as difficulties meeting program requirements, being unable to locate qualified providers, or perceiving that telehealth services are poorly accepted by members for technical or other reasons. To assess the magnitude of the potential for replacing alternative access standards with telehealth providers would require investigation into the number of denied telehealth requests, if any were denied; the reasons for denial; and the number of alternative access standard requests that met basic DHCS' telehealth requirements. Further research to answer these questions could be helpful.

Consumer complaints are widely regarded as a guide to areas that need improvement. In 2022–23, 85.8 percent of consumer complaints received by MCPs and transmitted to DHCS regarding access to care were focused on timely access, greatly outnumbering complaints about geographic access (10.4 percent). It is difficult for members to access care if there are no providers within a reasonable travel time/distance radius; however, the timely access complaints are a reminder that members can be in physical proximity to multiple contracted providers and still not be able to get care when they need it. Proximity is no guarantee that providers have the capacity and willingness to serve the needs of Medi-Cal managed care members in a timely fashion. DHCS may be able to assist MCPs in promoting access to care by continuing to provide leadership on how to address these two dimensions of access simultaneously.

Considerations

HSAG identified the following considerations for DHCS that may improve access to care and alternative access reporting:

- ◆ DHCS enhanced alternative access standards reporting in 2022–23 by providing data on approved telehealth requests for the first time. The detailed information provided by DHCS includes the MCP requesting telehealth, the population served, the provider type, and the county and ZIP Code. While informative, the provided data do not permit assessment of whether DHCS approved most telehealth requests or just a few of them, or whether the approved telehealth requests represent a large proportion or only a small fraction of the instances where alternative access standard requests could be viably replaced with telehealth requests. For 2023–24, DHCS and HSAG should discuss whether it would be beneficial for DHCS to provide additional data for expanded telehealth data analyses.
- ◆ Consumer complaints can be a useful indicator of issues that require attention. It is natural to assess whether the number of complaints for an MCP in a county is relatively high or low by comparing across MCPs and counties. There are limitations to comparing raw complaint counts across MCPs and counties, since counties vary greatly in population size and MCP membership can also vary considerably within counties. To enhance comparability, DHCS may want to consider reporting the number of complaints per 1,000 members in Table 5.6 in addition to the absolute number of complaints.

5. Alternative Access Standards Tables

The tables in this section present key reporting elements defined in WIC §14197.05 regarding alternative access standard requests for provider networks.

Table 5.1—Reporting Elements 1 and 6

Table 5.1 shows the number and final disposition of MCPs’ alternative access standard requests. Results are presented according to the MCP’s service area (County and ZIP Code), provider type (including specialists), and population served (adult, pediatric, or N/A). The analysis is based on alternative access standard requests submitted to DHCS between February 6, 2023, and October 9, 2023.

Note the following regarding Table 5.1:

- ◆ Requests for alternative access standards with missing or invalid ZIP Codes were excluded. All other requests submitted by MCPs were counted, including resubmissions for a given service area and provider type.
- ◆ The population served (adult, pediatric, N/A) is reported as “N/A” for Hospitals and OB/GYN specialists.
- ◆ Final dispositions listed as “Approve” in the DHCS data are reported as “Approved”; and final dispositions listed as “Denial” in the DHCS data are reported as “Denied.”
- ◆ If the final disposition of a request is “No decision,” DHCS had not reported a decision as of October 9, 2023. The primary reason for not rendering a decision, according to DHCS, is that the ZIP Code in the request is a special, non-residential ZIP Code (e.g., a post office box only ZIP Code), where an alternative access standard would not be appropriate because no members reside there.
- ◆ MCPs received results for all alternative access standard requests, including those with “No decision,” by the end of the corrective action period.
- ◆ A small number of alternative access standard requests were submitted and approved by DHCS but were subsequently reconsidered as telehealth requests and were approved and implemented as such. These requests and approvals are included in this table because they are part of the record for the Annual Network Certification process, but the standards have not been implemented.

Table 5.1—Number of Requests and Final Disposition for Alternative Access Standards, by MCP, Service Area, and Provider Type

MCP	County	ZIP Code	Adult Pediatric N/A	Provider Type (Including Specialists)	Number of Requests	Final Disposition (Approved or Denied)
AAH	Alameda	94550	Pediatric	Endocrinology	1	Approved

Table 5.2—Reporting Elements 3 and 4

For alternative access standard requests submitted to DHCS, Table 5.2 shows the median distance in miles and drive time in minutes between the nearest network provider and the member farthest from that provider within the specified ZIP Code, and the median number of members impacted. Minimum, maximum, and median values are presented by MCP and ZIP Code for distance, drive time, and number of members impacted. The analysis is based on alternative access standard requests submitted to DHCS between February 6, 2023, and October 9, 2023.

Note the following regarding Table 5.2:

- ◆ Calculations in this table are based on all submitted alternative access standard requests except those with missing or invalid ZIP Codes.
- ◆ Not all requests were approved, and DHCS approvals may have included distance or travel time standards differing from the submitted requests.
- ◆ A small number of alternative access standard requests were submitted and approved by DHCS but were subsequently reconsidered as telehealth requests and were approved and implemented as such. These requests and approvals are included in this table because they are part of the record for the Annual Network Certification process, but the standards have not been implemented.

Table 5.2—Median Distance, Drive Time, and Number of Members Impacted by Alternative Access Standard Requests, by MCP and ZIP Code

MCP	ZIP Code	Median Distance (Range)	Median Time (Range)	Median Number of Members Impacted (Range)
AAH	94550	37.5 (35.0, 40.0)	42.5 (40.0, 50.0)	2.0 (2.0, 100.0)
AAH	94551	30.0 (30.0, 30.0)	40.0 (40.0, 40.0)	99.0 (99.0, 99.0)
AAH	94566	30.0 (30.0, 30.0)	40.0 (40.0, 40.0)	96.0 (96.0, 96.0)
AAH	94568	25.0 (25.0, 25.0)	35.0 (35.0, 35.0)	5.0 (5.0, 5.0)

Table 5.3—Reporting Element 9—Initial Submission Period

Table 5.3 presents the number of distinct alternative access standard requests submitted and the median number of days between the initial submission of an alternative access standard request and the delivery of an initial approval or denial by DHCS for each MCP that submitted alternative access standard requests during the initial review between February 6, 2023, and July 31, 2023.

In accordance with WIC §14197(e)(3), DHCS must approve or deny an alternative access standard request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standard request within 30 days of submission of the additional information.

Note the following regarding Table 5.3:

- ◆ Alternative access standard requests with missing or invalid ZIP Codes were excluded.
- ◆ Median days were calculated only using initial requests for which a decision was rendered by July 31, 2023.²⁰
- ◆ The number of days is the difference between the date an alternative access standard request was first submitted by the MCP for a specific service area and type of provider and the date of the earliest decision delivered by DHCS.
- ◆ NR = not reportable. No decisions were rendered by July 31, 2023, for initial requests submitted by the MCP during this period.
- ◆ A small number of alternative access standard requests were submitted and approved by DHCS but were subsequently reconsidered as telehealth requests and were approved and implemented as such. These requests and approvals are included in this table because they are part of the record for the Annual Network Certification process, but the standards have not been implemented.

²⁰ The median represents the time to a decision at the 50th percentile in Table 5.3. This summary statistic was chosen because it is not easily influenced by outliers (e.g., a small group of requests with unusually large numbers of days to a decision).

Table 5.3—Time Frame for DHCS Approval or Denial of Alternative Access Standard Requests for the Initial Submission Period, by MCP

MCP	Number of Requests	Median Days
AAH	8	32
Aetna	811	36
Anthem Blue Cross	415	90
Blue Shield Promise	486	41
CCAH	51	58
CHG	430	50
CHW	417	99
CalViva	64	32

IEHP	940	48
KHS	64	82
L.A. Care	184	73
Molina	1143	102
Partnership	324	52
SCFHP	38	54
UHC	683	81

Table 5.4—Reporting Element 9—Resubmission Period

Table 5.4 presents the number of distinct alternative access standard requests submitted and the median number of days between the initial submission of an alternative access standard request and the delivery of an initial approval or denial by DHCS for each MCP that submitted alternative access standard requests during the CAP review between August 1, 2023, and October 9, 2023.

In accordance with WIC §14197(e)(3), DHCS must approve or deny an alternative access standard request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standard request within 30 days of submission of the additional information.

Note the following regarding Table 5.4:

- ◆ Alternative access standard requests with missing or invalid ZIP Codes were excluded.
- ◆ Median days were calculated only using requests for which a decision was rendered by October 9, 2023.²¹
- ◆ The number of days is the difference between the date an alternative access standard request was first submitted by the MCP for a specific service area and type of provider and the date of the earliest decision delivered by DHCS.
- ◆ NR = not reportable. No decisions were rendered by October 9, 2023, for initial requests submitted by the MCP during this period.
- ◆ A small number of alternative access standard requests were submitted and approved by DHCS but were subsequently reconsidered as telehealth requests and were approved and implemented as such. These requests and approvals are included in this table because they are part of the record for the Annual Network Certification process, but the standards have not been implemented.

²¹ The median represents the time to a decision at the 50th percentile in Table 5.4. This summary statistic was chosen because it is not easily influenced by outliers (e.g., a small group of requests with unusually large numbers of days to a decision).

Table 5.4—Time Frame for DHCS Approval or Denial of Alternative Access Standard Requests for the Resubmission Period, by MCP

MCP	Number of Requests	Median Days
Anthem Blue Cross	96	32
CHW	219	27
Health Net	131	38
Molina	114	NR

Table 5.5—Telehealth

Table 5.5 shows the percentage of members with in-person access, the number of telehealth providers required by DHCS, and the number of telehealth providers contracted by the MCP for telehealth requests approved by DHCS. Results are presented according to the MCP's service area (County and ZIP Code), provider type (including specialists), and population served (adult, pediatric, or N/A). The analysis is based on telehealth requests submitted to DHCS between February 6, 2023, and October 9, 2023.

In areas where MCPs do not meet the time or distance standards but do meet specific DHCS criteria,²² MCPs may also choose to offer members telehealth services in lieu of submitting an alternative access standard request, consistent with California WIC §14197(f)(1).²³ In general, if at least 85 percent of members in an area have access to in-person care within the time/distance standards, MCPs may propose to deliver synchronous telehealth to those members without access. The MCPs must meet the required telehealth provider-to-member ratio specified by DHCS for each eligible provider type while also facilitating in-person care for members who request it.

Note the following regarding Table 5.5:

- ◆ Eligible provider types are limited to Cardiology/Interventional Cardiology, Dermatology, Endocrinology, ENT/Otolaryngology, Gastroenterology, Hematology, HIV/AIDS Specialists/Infectious Diseases, Nephrology, Neurology, Non-Specialty Mental Health Providers, OB/GYN, Oncology, Ophthalmology, Primary Care, Psychiatry, and Pulmonology.

²² All Plan Letter 23-001. Available at: [APL 23-001 \(ca.gov\)](https://apl23001.ca.gov). Accessed on: Feb 1, 2024.

²³ California WIC §14197(f)(1). Available at: https://leginfo.ca.gov/faces/codes_displayText.xhtml?lawCode=WIC&division=9.&title=&part=3.&chapter=7.&article=6.3. Accessed on: Feb 1, 2024.

- ◆ The “Number of Telehealth Providers Required by DHCS” is the number of FTE telehealth providers needed to meet the required provider-to-member ratio for the provider type. This number is rounded to the nearest 0.25 FTEs.
- ◆ A small number of alternative access standard requests were submitted and approved by DHCS but were subsequently reconsidered as telehealth requests and were approved and implemented as such. These requests and approvals are included in Table 5.1 through Table 5.4 because they are part of the record for the Annual Network Certification process, but the standards have not been implemented.

Table 5.5—Telehealth: Percent of Members with In-Person Access, Number of Providers Required by DHCS, and Number of Providers Contracted, by MCP, Service Area, and Provider Type

Table 5.6—Reporting Element 10—Grievances

Table 5.6 summarizes consumer complaints related to access to providers collected in DHCS' quarterly grievance reports from SFY 2022 Quarter 3 through SFY 2023 Quarter 2 (i.e., January 2022 through December 2022).

Note the following regarding Table 5.6:

- ◆ DHCS assigns each grievance call to one of a large set of categories. This analysis is limited to the following categories deemed relevant to network adequacy:
 - Geographic Access
 - Out-of-Network
 - Rural Member Denied Out-of-Network Request
 - Timely Access
- ◆ The number of calls for a category is only reported if it exceeds one call.

Table 5.6—Consumer Complaints: Number of Calls to MCPs Regarding Access to Care, by MCP, County, and Type of Grievance

Table 5.7 through Table 5.64—Reporting Element 5

Reporting Element 5 is defined by WIC §14197.05²⁴ as the percentage of providers in the plan service area by provider and specialty type that are under contract with a Medi-Cal MCP. Table 5.7 through Table 5.64 show the number of providers that an MCP has under contract within a plan service area and the number of providers under contract by the MCP as a percentage of providers in the service area under contract with any MCP, by provider type (including specialists) and population served (adult, pediatric, or N/A). Note that if the total number of providers in the service area had been the denominator for calculation of the percentage rather than the number of providers under contract with any MCP, the percentage would likely be smaller. This makes the percentage reported in Table 5.7 through Table 5.64 the upper limit of the number of providers under contract by the MCP as a percentage of all providers in the service area. For additional information, see the “Limitation” subsection below.

Limitation

The numerator for Reporting Element 5 is the number of providers contracted with a specific MCP in a specific service area as identified in DHCS 274 provider network data files. The denominator for Reporting Element 5 is the number of providers practicing in the service area. HSAG’s review of the CMB licensing data determined that the licensing data do not contain adequate information about providers’ practice locations to be a reliable estimate of the total number of providers for a specific county. Furthermore, the 274 provider network data files and CMB licensing data could not be linked by an NPI or license number to ensure that providers identified in the 274 provider network data files were also identified in the CMB data. For these reasons, the available data are limited in their ability to identify the denominator as defined above. The alternative denominator used in Table 5.7 through Table 5.64 is the count of providers physically located in the plan service area that are under contract with any MCP. The total number of providers located in a service area will exceed the number of Medi-Cal contracted providers, making the actual percentage of providers under contract with Medi-Cal MCPs smaller than the percentage reported in Table 5.7 through Table 5.64.

Note the following regarding Table 5.7 through Table 5.64:

- ◆ The analysis is based on DHCS 274 provider network data files current as of September 2023.
- ◆ The population served (adult, pediatric, or N/A) is derived from a “Sees Children” indicator in the 274 provider network data files, not from taxonomy codes. The population served field is reported as “Pediatric” for providers who see only children or see both children and adults, “Adult” for providers who do not see children, and “N/A” for Hospital and OB/GYN specialist providers.

²⁴ California WIC §14197.05. Available at:

https://leginfo.ca.gov/faces/codes_displaySection.xhtml?lawCode=WIC§ionNum=14197.05. Accessed on: Feb 1, 2024.

- ◆ The number (percent) of providers in the county contracted by the MCP is limited to providers with addresses in the county to allow accurate comparisons across MCPs serving the same county. While MCPs may contract with providers outside a county to provide needed coverage, they are not required to do so. The actual number of providers contracted by the MCP to serve the county may therefore be larger than the total number of providers located within the county.
- ◆ The number (percent) of providers in the county contracted by the MCP is reported as “N/A” if there are no providers of a given type (Adult/Pediatric/N/A and Provider Type [Including Specialists]) located in the county that are contracted with any MCP.

Table 5.7—Number (Percent) of Providers Contracted by an MCP, by MCP and Provider Type for the Alameda County Service Area
