INTRODUCTION

The purpose of the Perinatal Directory (Directory) is to provide a current list of publicly funded substance use disorder (SUD) treatment programs for pregnant and parenting women (PPW) in California. Please note that some counties provide SUD treatment services within county departments including Health and Human Services, Alcohol and Other Drug Services, or Behavioral Health. For programs that are contracted and provide services with more than one county, those programs are *only* listed under the county where the program is physically located.

This Directory also includes a list of the service modalities and definitions, as offered by the county SUD treatment programs. Service modalities are listed after the address of each treatment program.

The Department of Health Care Services, Community Services Division ensures that programs comply with requirements set forth in the Substance Use Prevention, Treatment and Recovery Services Block Grant follow the requirements set forth in the 45 Code of Federal Regulations (CFR), Part 96, Subpart L. Pursuant to CFR §96.131(d)(1) by providing the Directory as a resource for referrals. *If a treatment facility does not have availability for a pregnant woman who seeks treatment, referrals must be provided to another treatment facility.ⁱ In the event that no other program is available, treatment programs must provide interim services.ⁱⁱ* When referring PPW to SUD treatment programs or interim services, please follow the Perinatal Practice Guidelines.

TECHNICAL ASSISTANCE AND PROGRAM SUPPORT

The Department of Health Care Services, Community Services Division provides program support and technical assistance (TA) to counties and providers. TA is available to support or aid counties and providers in the provision of services and for clarification of regulations. Counties may request TA as needed at the following e-mail:

DHCSPERINATAL@dhcs.ca.gov.

SERVICE MODALITIES

Service modalities include the following comprehensive continuum of outpatient, residential, and inpatient evidence-based SUD services as described in the Department of Health Care Services [Behavioral Health Information Notice 24-001 Drug Medi-Cal Organized Delivery System \(DMC-ODS\) Requirements for the Period of 2022-2026](#).ⁱⁱⁱ

Withdrawal Management

Withdrawal Management (WM), previously known as “detox,” or detoxification, is a service to assist a patient’s withdrawal. WM services may be provided in an outpatient, residential, or inpatient setting.

Narcotic Treatment Program

Narcotic Treatment Programs (NTPs), also described in the American Society of Addiction Medicine criteria to as Opioid Treatment Programs (OTP) is an outpatient program to provide medication assistance to opioid users to aid in relief from symptoms of withdrawal from narcotics. Treatment is prescribed by a physician as medically necessary and is available to patients receiving treatment in a licensed NTP.^{iv}

Outpatient Treatment Services

Outpatient Treatment Services (also known as Outpatient Drug Free or ODF) are provided when medically necessary in an outpatient setting, such as a counseling center, clinic, or facility. Treatment may include medications, counseling, groups, support, and/or a 12-step approach. ODF offers up to nine hours of treatment a week for adults, and six hours a week for members under the age of 21. Services are determined based on individual medical necessity.^v

Intensive Outpatient Treatment

Intensive Outpatient Treatment (IOT) services are delivered by addiction professionals providing a structured treatment program that includes a minimum of nine hours with a maximum of 19 hours a week for adults, and a minimum of six hours with a maximum of 19 hours a week for members under the age of 21. Services are determined based on individual medical necessity.

Residential

Recommendations for Residential are based on assessment of the person. Some residential programs provide in-house WM, medical needs, classes, groups, counseling, and support for re-integration. Program design varies and may include transitioning the client from residential to another level of care when clinically appropriate based on treatment progress.

Recovery Services

Recovery Services are designed to support recovery and prevent relapse with the objective of restoring pregnant and parenting women to their best possible functional level. Recovery Services include assessment, care coordination, counseling (individual and group), family therapy, recovery monitoring, and relapse prevention. Recovery Services may be provided in clinical or non-clinical settings (including the community).

Medications for Addiction Treatment

Medication for Addiction Treatment (MAT) is the use of medications, in combination with counseling and behavioral therapies, to provide a “whole-patient” approach to the treatment of SUD. Medications used in MAT are approved by the Food and Drug Administration and MAT programs are clinically driven and tailored to meet each patient’s needs. MAT is primarily used for the treatment of addiction to opioids such as heroin and prescription pain relievers that contain opiates.^{vi} MAT may be provided in clinical or non-clinical settings.

CHILD CARE

For questions regarding child care regulations licensing or cooperative agreements, please refer to the [California Department of Social Services](#) webpage.

Licensed Child Care (LCC)

Licensed Child Care in accordance with child care licensing requirements as stated in the [California Code of Regulations, Title 22, Division 12](#).

Cooperative Child Care (CCC)

Cooperative Child Care is the on-site, license-exempt child care through a cooperative arrangement between parents as stated in the [Health and Safety Code Section 1596.792](#).
