MEDI-CAL PHARMACY BENEFITS DIVISION PRICING TEMPLATE

(April 2025)

Please select one option below: The intent of this business proposal is to offer a:	: The AMP and CMS pricing are per:			
Supplemental Rebate as a % of AMP		Each (capsule, tablet, blister pack, kit, syringe, etc)		
Total Rebate as a % of AMP		mL		
Net Cost (GNUP)		Gram		

NDC	Product Name	Medi-Cal's Reimbursement per unit (NADAC or WAC if no NADAC exist)	CMS Rebate per unit	AMP	%CMS Rebate	State Rebate per unit	%State Rebate	Total Rebate per unit	%Total Rebate	Net Cost aka GNUP = Reimbursement – Total Rebate

Please complete all fields regardless of the type of business proposal offered (i.e., AMP based or Net Cost).

- » Column C- must be a NADAC price unless there is no NADAC published by CMS
- » Columns D, E use the most current quarter of CMS data
- » Columns F, H, J are rebate amounts as a percentage of AMP ([rebate/AMP]*100)

- » Column I- this is the sum of the CMS Rebate and the State Rebate
 - Note: if the business proposal is presented with WAC pricing when there is currently a NADAC published by CMS, the offer will be denied.
 - o Note: Please complete all columns and the fields requiring checkmarks. Failure to do so may result in the offer being denied.

W&I Code 14105.332 Calculations

- » The following applies to AMP-based contracts only
 - Additionally, the following calculations shall apply pursuant to California W&I Code 14105.332 and Section 3.2 of the AMP-based Supplemental Rebate Agreements.
- The following amounts will be added to the State RPU invoice if there are within quarter restatements of CMS/AMP data that result in a lower supplemental rebate and/or lower CMS rebate paid:
 - 1: An amount equal to the supplemental rebate calculated with the highest AMP and the revised AMP if lower.
 - 2: An amount equal to the difference between the initial CMS rebate paid and the revised CMS amount if lower.
- » Note: For "Total Rebate" Agreements, a supplemental rebate can fluctuate due only to within quarter restatements of the CMS rebate; this scenario alone does not trigger W&I Code 14105.332.
- » Note: Net Cost (GNUP) supplemental rebate agreements are not subject to the requirements of W&I Code 14105.332.

Net Cost Calculations: multiple values during a calendar quarter

- » The following applies to Net Cost (GNUP) contracts only
 - Reimbursement to pharmacy providers is at Actual Acquisition Cost (AAC).

- The default AAC is the NADAC. If no NADAC is available, the AAC is WAC + 0% (WAC).
- When there are multiple AACs as reimbursement to pharmacy providers during the calendar quarter, the supplemental rebate will be calculated using the highest value in accordance with Section 2.1 of the Medi-Cal Net Cost Supplemental Drug Rebate Agreement.
- **Note:** the WAC is typically higher than the NADAC; therefore, if the WAC was the AAC any time during the calendar quarter, the WAC would be the value used in the supplemental rebate calculation.
