

Performance Outcomes System Initial Reports

Report run on October 25, 2017

Background

This is the first in the series of new Adult/Older Adult Consumer Perception Survey (CPS) reports for the Performance Outcomes System (POS). The reports meet the intent of the Legislation, as stated in Welfare and Institutions Code Section 14707.5, to develop a performance outcomes system for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) mental health services that will improve outcomes at the individual, program, and system levels and inform fiscal decision-making related to the purchase of services. This reporting effort is part of the implementation of the performance outcomes system for Medi-Cal Specialty Mental Health Services (SMHS) for children and youth.

Since 2012 DHCS has worked with several groups of stakeholders to create a structure for reporting, develop the Performance Measurement Paradigm, and develop indicators and measures. Through this process, seven domains were identified as necessary to assess in order to meet the legislative requirements for the POS. The domains are: Access, Engagement, Service Appropriateness to Need, Service Effectiveness, Linkages, Cost Effectiveness and Satisfaction.

Purpose and Overview

For the Consumer Perception Survey (CPS) Adult/Older Adult data one statewide aggregate report will be produced. Due to the small yearly sample sizes it is not possible to provide reports at the population-based county grouping level or at the county-specific level. These are the initial statewide, aggregate reports using CPS data created for the Performance Outcomes System; they establish a foundation for on-going reporting and are anticipated to be produced on an annual basis.

These reports provide trend information by displaying information for Fiscal Years (FY) 12/13, 13/14, 14/15 and 15/16. This report includes all the CPS questions broken out by Adult/Older Adult respondents. The CPS questions address the following seven domains: General Satisfaction, Perception of Access, Perception of Quality and Appropriateness, Perception of Participation in Treatment Planning, Perception of Outcomes of Services, Perception of Functioning, and Perception of Social Connectedness.

Definitions

Population - Adults (age 18-59) and Older Adults (age 60 and over) and receiving Specialty Mental Health Services.

Data Source - Consumer Perception Survey Database FY 12/13 through FY 15/16.

Performance Outcomes System Initial Reports

Report run on October 25, 2017

Additional Information

The **Measures Catalog** is the companion document for these reports and provides the methodology and definitions for the measures. Each measure is defined and the numerator and denominator used to develop the metrics are provided with relevant notes and additional references. The Measures Catalog may be found at:

http://www.dhcs.ca.gov/individuals/Documents/POS%20Measures%20Catalog_2.17.15.pdo

Background information on the Performance Measures System implementation is available on the DHCS website through the POS landing page. Documents posted include the relevant legislation, plans submitted to the Legislature, and handouts for meetings with the Stakeholder Advisory Committee dating back to the first meeting in 2012. To obtain this information go to:

<http://www.dhcs.ca.gov/individuals/Pages/POSReports.aspx>

Report Highlights

Sample size varies by question and by domain.*

The number of respondents for FY 12/13 was 3,948.

The number of respondents for FY 13/14 was 41,998.

The number of respondents for FY 14/15 was 50,289.

The number of respondents for FY 15/16 was 41,350.

Each of the questions are answered using a 5-point Likert scale with the following values: 1 = Strongly Disagree; 2 = Disagree; 3 = Undecided; 4 = Agree; and 5 = Strongly Disagree.

- in FY 15/16 the average response for the General Satisfaction domain was 4.4
- in FY 15/16 the average response for the Perception of Access domain was 4.3
- in FY 15/16 the average response for the Perception of Quality and Appropriateness domain was 4.3
- in FY 15/16 the average response for the Perception of Participation in Treatment Planning domain was 4.3
- in FY 15/16 the average response for the Perception of Outcomes of Services domain was 3.9
- in FY 15/16 the average response for the Perception of Functioning domain was 3.9
- in FY 15/16 the average response for the Perception of Social Connectedness domain was 3.9

**Note: The Consumer Perception Survey has typically been administered two times a year. However, for FY 12/13 the CPS was administered only once during the year. Thus, for FY 12/13 the sample sizes are smaller when compared to the other FY's that are included in this report.*

Please contact cmhpos@dhcs.ca.gov for any questions regarding this report.

Consumer Perception Survey Questions For Adults

Individual Item	
1	I liked the services that I received here.
2	If I had other choices, I would still get services at this agency.
3	I would recommend this agency to a friend or family member
4	The location of services was convenient.
5	Staff were willing to see me as often as I felt was necessary.
6	Staff returned my calls within 24 hours.
7	Services were available at times that were good for me.
8	I was able to get all the services I thought I needed.
9	I was able to see the a psychiatrist when I wanted to.
10	Staff believed I could grow, change and recover.
11	I feel comfortable asking questions about my treatment and medications.
12	I feel free to complain.
13	I was given information about my rights.
14	Staff encouraged me to take responsibility for how I live my life.
15	Staff told me what side effects to watch out for.
16	Staff respected my wishes about who is and is not to be given information about my treatment.
17	I, not staff, decided my treatment goals.
18	Staff were sensitive to my culture/ethnic background.
19	Staff helped me obtain the information needed so I could take charge of managing my illness.
20	I was encourages to use consumer-run programs.
21	I deal more effectively with daily problems.
22	I am better able to control my life.
23	I am better able to deal with crisis.
24	I am getting along better with my family.
25	I do better in social situations
26	I do better in school and/or work.
27	My housing situation has improved.
28	My symptoms are not bothering me as much.
29	I do things that are more meaningful to me.
30	I am better able to take care of my needs.
31	I am better able to handle things when they go wrong.
32	I am better able to do things that I want to do.
33	I am happy with the friendships that I have.
34	I have people with whom I can do enjoyable things.
35	I feel I belong in my community.
36	In a crisis, I would have the support I need from family and friends.
