Reimbursement Unit of Services

For client data purposes and research, a case management unit of service is defined by DMH as a face-to-face or telephone contact with a client, regardless of the length of time. That contact is documented in the client case management record and, ultimately, reported to the State as part of the Client Data System. For purposes of cost analysis, rate development, and reimbursement, the case management unit of service is defined as a service period (accumulated contacts with the client, the client's family, significant others, and care providers) of fifteen minutes; partial units of time are rounded to the nearest quarter-hour increment. The unit of time serves as the basis for reimbursement for both Short-Doyle (State funds only) and SD/MC (State funds and FFP).
