October 16, 2024

Tyler Sadwith
State Medicaid Director
Department of Health Care Services
Director's Office
P.O. Box 997413, MS 0000
Sacramento, CA 95899-7413

Dear Director Sadwith:

In accordance with section 1115(a) of the Social Security Act (the Act), the Centers for Medicare & Medicaid Services (CMS) is approving California's request to amend the demonstration titled "California Advancing and Innovating Medi-Cal (CalAIM)" (Project Numbers 11-W-00193/9 and 21-W-00077/0) (the "demonstration"), to provide expenditure authority for coverage of traditional health care practices. This approval is effective from October 16, 2024, through December 31, 2026, upon which date, unless extended or otherwise amended, all authorities granted to operate this demonstration will expire.

With this amendment, California will have expenditure authority to provide coverage for traditional health care practices received through Indian Health Service (IHS) facilities, facilities operated by Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act (ISDEAA) (here called Tribal facilities), or facilities operated by urban Indian organizations under Title V of the Indian Health Care Improvement Act (IHCIA) (here called urban Indian organization facilities). Coverage of these traditional health care practices will be available to Medicaid and Children's Health Insurance Program (CHIP) beneficiaries who are able to receive services delivered by or through these facilities.

We are pleased to approve this amendment, which is part of a groundbreaking demonstration initiative that is expected to promote the objectives of Medicaid and CHIP by broadening the health coverage that can be furnished by states to Medicaid and CHIP beneficiaries who are able to receive services delivered by or through IHS, Tribal, and urban Indian organization facilities. This demonstration coverage is expected to be particularly impactful for American Indian and Alaska Native populations and individuals with physical or behavioral health needs because it is expected to improve their access to coverage of culturally appropriate health care. American Indian and Alaska Native traditional health care practices have historically been paid for and delivered by or through IHS, Tribal, or urban Indian organization facilities, but have not until now been covered or paid for by Medicaid or CHIP. Medicaid and CHIP payment for these

services will promote access to care for American Indian and Alaska Native Medicaid and CHIP beneficiaries and improve access to services at IHS, Tribal, and urban Indian organization facilities.

CMS's approval is subject to the limitations specified in the attached expenditure authorities, special terms and conditions (STC), and any supplemental attachment defining the nature, character, and extent of federal involvement in this project. The state may deviate from Medicaid and CHIP state plan requirements only to the extent those requirements have been identified in the attached expenditure authorities list as not applicable to expenditures under the amendment.

Section 1115(a) of the Act gives the Secretary of Health and Human Services authority to approve experimental, pilot, or demonstration projects that are found by the Secretary to be likely to assist in promoting the objectives of the Medicaid program. This approval will permit CMS to evaluate the effects of providing Medicaid and CHIP coverage for these traditional health care practices, which cannot currently be covered under the Medicaid or CHIP state plans.

Extent and Scope of Demonstration Amendment

Background

Traditional health care practices are described by the World Health Organization as the "sum total of the knowledge, skill, and practices based on the theories, beliefs, and experiences indigenous to different cultures, whether explicable or not, used in the maintenance of health as well as in the prevention, diagnosis, improvement or treatment of physical and mental illness."[1] American Indian and Alaska Natives have long recognized the contribution of traditional healers and practitioners who are valued for their role in aiding the healing process. There are 574 federally recognized Tribes in the United States,[2] each with its own traditional health care practices. Some Tribes, bands, groups, pueblos, rancherias, nations, colonies, or communities, including Native villages or Native groups, see traditional health care practices as a fundamental element of health care that can help patients with specific physical and mental ailments.

American Indians and Alaska Natives experience significantly worse health disparities as compared to the general population, including higher incidence and prevalence of obesity, diabetes, tobacco addiction, and cancer. In addition to significant physical health issues, American Indians and Alaska Natives face mental health illnesses, substance use disorders, and suicide rates that impact Tribal communities at rates significantly higher than the general

population.[3] A number of factors contribute to these persistent disparities, including barriers to quality and timely medical care; geographic isolation; contemporary threats to culture, language, and lifeways; and lack of access to traditional foods.[4,5] However, several studies have demonstrated that traditional health care practices might help to improve mental health symptoms and outcomes and quality of life, including with respect to individuals with substance use disorder.[6,7,8] Section 1115 demonstrations can therefore further test the effects of providing coverage for traditional health care practices in Medicaid and CHIP.

The Indian Health Care Improvement Act (IHCIA) (25 U.S.C. 1601 *et seq*.) serves as one of the federal government's statutory authorities for IHS's provision of health care to American Indians and Alaska Natives and is based on the unique government-to-government relationship between the federal government and Indian Tribes. The United States Department of Health and Human Services promotion of traditional health care practices is authorized in the IHCIA at 25 U.S.C. 1680u.[9] Over the years, the provision of traditional health care practices has been supported primarily through IHS appropriations, Tribal resources, various pilot programs, and grant funding. Additionally, Medicaid is the largest source of third-party payment for services billed by IHS and Tribal facilities, accounting for nearly two-thirds of health coverage payments to these facilities.[10] Fifty-five percent of patients served by urban Indian organization facilities in 2021 had Medicaid or CHIP coverage.[11] Given the significant role of Medicaid as a payer for IHS, Tribal, and urban Indian organization facility services, authorizing Medicaid and CHIP payment to these facilities for traditional health care practices may potentially improve patient access to culturally appropriate practices to maintain and sustain health and otherwise support these facilities' ability to serve their patients.

As noted above, with this amendment, California will have expenditure authority to provide coverage for traditional health care practices received through IHS, Tribal, or urban Indian organization facilities by Medicaid and CHIP beneficiaries who are able to receive services delivered by or through these facilities.[12] CMS expects that this amendment will broaden the

[12] Whether a beneficiary is able to receive services from a qualifying facility will be determined by the applicable facility. Under IHS authorities, IHS and Tribal facilities serve Medicaid and CHIP beneficiaries who are able

health coverage that can be furnished by states to these Medicaid and CHIP beneficiaries. The amendment is also expected to expand utilization of these traditional health care practices and improve access to culturally appropriate care; support these facilities' ability to serve their patients; maintain and sustain health; improve health outcomes and the quality and experience of care; and reduce existing disparities in access to and quality of care and health outcomes. This amendment also aligns with this Administration's policy priorities articulated in the 2022 guidance and implementation memorandum for Federal Agencies on recognizing and including Indigenous Knowledge in Federal research, policy, and decision making.[13] Furthermore, this approval supports the CMS Tribal Technical Advisory Group (TTAG) Strategic Plan 2020-2025 Objective 1C, Task 4, which states that CMS will support work to evaluate, use, and inform states on how the use of state plan amendments, section 1115 demonstrations, or other demonstrations can improve access for Tribal citizens and other IHS-eligible individuals to timely health care services.[14] Lastly, Medicaid and CHIP provide health coverage for approximately 35 percent of all American Indian and Alaska Native nonelderly adults and more than 60 percent of American Indian and Alaska Native children.[15] Given the scope of the American Indian and Alaska Native population covered by Medicaid and CHIP, this demonstration approval can play a key role in enhancing health equity for these populations.

Scope of Approval

Traditional health care practices vary widely by Tribe, facility, and geographic area. Under this amendment, traditional health care practices received through IHS, Tribal, or urban Indian organization facilities will be covered when provided to a Medicaid or CHIP beneficiary who is able to receive services delivered by or through these qualifying providers. Whether a beneficiary is able to receive services from a qualifying provider will be determined by the applicable provider. Purchased/referred care under 25 U.S.C. 1603(5) and 42 CFR 136.21(e) is included in this coverage. To be covered, the traditional health care practices must be provided by practitioners or providers who are employed by or contracted with one of these facilities (which could include an urban Indian organization contracted with an IHS or Tribal facility), in order to ensure that the practices are provided by culturally appropriate and qualified practitioners at facilities that are enrolled in Medicaid and CHIP. The qualifying facility is expected to make the following determinations and to provide documentation of these determinations to the state, upon request. Each qualifying facility is responsible for determining that each practitioner, provider, or provider staff member employed by or contracted with the qualifying facility to provide traditional health care practices 1) is qualified to provide traditional

---

(authorized) to receive services from the facility under IHS regulations at 42 CFR part 136, and also may serve other Medicaid and CHIP beneficiaries under 25 U.S.C. 1680c. Under IHS authorities, urban Indian organization facilities that receive funding from IHS are authorized to use the IHS funding to serve urban Indians (as defined in 25 U.S.C. 1603(28)), residing in the urban centers (as defined in 25 U.S.C. 1603(27)) in which such organizations are situated, including Medicaid and CHIP beneficiaries who also meet those definitions. Urban Indian organization facilities may also serve other Medicaid and CHIP beneficiaries with non-IHS funds, such as those that are dual-funded by IHS and the Health Resources & Services Administration's Health Center Program. https://www.hrsa.gov/about/organization/offices/hrsa-iea/tribal-affairs/tribal-urban-indian-health-centers (including, for example, the urban Indian organization Native American Rehabilitation Association).

[15] https://www.kff.org/racial-equity-and-health-policy/issue-brief/health-coverage-by-race-and-ethnicity/

health care practices to the qualifying facility's patients; and 2) has the necessary experience and appropriate training. The qualifying facility also is expected to: 1) establish its methods for determining whether its employees or contractors are qualified to provide traditional health care practices, 2) bill Medicaid or CHIP for traditional health care practices furnished only by employees or contractors who are qualified to provide them, and 3) provide documentation to the state about these activities upon request. The state must make any documentation it receives from qualifying facilities about these activities and determinations available to CMS upon request.

California will initially provide this coverage only to Medicaid and CHIP beneficiaries eligible to participate in the Drug Medi-Cal Organized Delivery System. However, with this approval, California will have the authority to expand this coverage to all Medicaid beneficiaries who are able to receive services delivered by or through an IHS, Tribal, or urban Indian organization facility, without the submission of a formal amendment, as long as the state complies with public notice and tribal consultation processes, as specified under 42 CFR 431.408, and provides CMS with at least 60 days' notice prior to implementation. The state is required to comply with all existing rules for operating within the available CHIP allotment. The state will only be able to expand eligibility for traditional health care practices without submitting a formal amendment. Any reduction in the population eligible for traditional health care practices would require submission of a formal amendment, as described in the STCs.

Because some of the traditional health care practices covered under this demonstration may be considered religious or may contain elements of religious or spiritual practices, the state must attest, as a condition of receiving federal matching funds for its expenditures under this approval, to: 1) providing adequate access to secular alternatives, including but not limited to preventive services, primary care, pharmacy services, mental health and substance use disorder services, as approved in its state plan, 1115 demonstration(s), or 1915 waiver(s), and in compliance with federal laws and regulations; 2) for any condition(s) addressed by and through covered traditional health care practices, ensuring beneficiaries have a genuine, independent choice to use other Medicaid- and CHIP-covered services; and 3) assuring that traditional health care practices may not be used to reduce, discourage, or jeopardize a beneficiary's access to services or settings covered under the state plan, 1115 demonstration(s), or 1915 waiver(s) and that the state will not deny access to services or settings on the basis that the beneficiary has been offered, is currently receiving, or has previously utilized traditional health care practices. Provided that all other applicable requirements for claiming FFP have been met, the state may begin claiming FFP for its expenditures on traditional health care practices only after submitting this attestation to CMS. The state must notify beneficiaries of their rights to file grievances, complaints, and appeals related to this attestation and take any needed actions or monitoring, consistent with federal laws and regulations regarding grievances, complaints, and appeals. As per the STCs, the state must report any such grievances, complaints, and appeals to CMS in Monitoring Reports. CMS will review all reports and will follow up on credible concerns in those reports, as well as any credible concerns raised by members of the public. If the state is found to be out of compliance with the attestation and related STCs, CMS may: 1) require the state to submit a corrective action plan, 2) issue a deferral, or 3) withdraw authority for traditional health care practices.

Consistent with CMS's longstanding interpretation of section 1905(b) of the Act, the state will receive a 100 percent federal medical assistance percentage (FMAP) for its expenditures on the services for which coverage is authorized under this approval when those services are received through IHS or Tribal facilities by Medicaid beneficiaries who are American Indians or Alaska Natives.[16] State expenditures for these services when delivered to Medicaid beneficiaries by urban Indian organization facilities, state expenditures for these services when delivered by or through qualifying facilities to CHIP beneficiaries, and state expenditures for these services when delivered by or through qualifying facilities to Medicaid beneficiaries who are not American Indians or Alaska Natives will be federally matched at the otherwise applicable state service match. California is approved to cover traditional health care practices for any Medicaid or CHIP beneficiary who is able to receive services delivered by or through IHS, Tribal facilities, or urban Indian organization facilities. Implementation of the amendment will be subject to the approval of the state legislature if the state is required to secure non-federal share for the expenditures authorized by this amendment.

As discussed in State Health Official letter #16-002, IHS facilities and facilities operated by Tribes and Tribal organizations under the Indian Self-Determination and Education Assistance Act "may enter into care coordination agreements with [non-IHS or Tribal] providers to furnish certain services for their patients who are [American Indian and Alaska Native] Medicaid beneficiaries, and the amounts paid by the state for services requested by facility practitioners in accordance with those agreements would be eligible for the enhanced federal matching…of 100 percent."[17]

Budget Neutrality

Under section 1115(a) demonstrations, states can test innovative approaches to operating their Medicaid programs if CMS determines that the demonstration is likely to assist in promoting the objectives of the Medicaid statute. CMS has long required, as a condition of demonstration approval, that demonstrations be "budget neutral," meaning the federal costs of the state's Medicaid program with the demonstration cannot exceed what the federal government's Medicaid costs in that state likely would have been without the demonstration. In requiring demonstrations to be budget neutral, CMS is constantly striving to achieve a balance between its interest in preserving the fiscal integrity of the Medicaid program and its interest in facilitating state innovation through section 1115 demonstration approvals. In practice, budget neutrality generally means that the total computable (i.e., both state and federal) costs for approved demonstration expenditures are limited to a certain amount for the demonstration approval period. This limit is called the budget neutrality expenditure limit and is based on a projection of the Medicaid expenditures that could have occurred absent the demonstration, the "without waiver" (WOW) costs.

As discussed earlier, the expenditure authority provided for the coverage of traditional health care practices is limited to practices that are delivered by or through certain facility types that

[16] Section 1905(b) of the Social Security Act (third sentence). Under CMS's longstanding interpretation of this statutory language, the 100 percent FMAP applies only when services are received through IHS and Tribal facilities by American Indian or Alaska Native Medicaid beneficiaries.

[17] https://www.medicaid.gov/federal-policy-guidance/downloads/sho022616.pdf.

are defined by the IHCIA and ISDEAA (laws that stem from the unique government-to-government relationship between the federal government and Indian Tribes). This expenditure authority is also limited to coverage for Medicaid beneficiaries who are able to receive services from those facilities. Further, traditional health care practices are being covered as a complement to services covered by Medicaid under existing authority. This expenditure authority is not likely to increase overall expenditures beyond what those expenditures could have been without the demonstration. This expenditure authority will not expand the Medicaid-eligible populations, and CMS anticipates that the Medicaid payment rate for most of these services will be the IHS All-Inclusive Rate that is published annually in the Federal Register.[18] CMS has therefore determined that this coverage of traditional health care practices is expected to be budget neutral and will not require a specific budget neutrality expenditure sub-limit. The state will be held to the general monitoring and reporting requirements, as per the STCs, and will continue to be held accountable to the overall budget neutrality expenditure limit of the demonstration (for more information on CMS's current approach to budget neutrality, see State Medicaid Director letter #24-003). Failure to meet the monitoring and reporting requirements might result in CMS requiring the state to include these expenditures in the budget neutrality agreement for this demonstration, to ensure that CMS has sufficient information to support its initial determination that the approval of these expenditures is expected to be budget neutral. CMS reserves the right to request budget neutrality expenditures and analyses from the state at any time, or whenever the state seeks a change to the demonstration, per STC 3.7.

CHIP Allotment Neutrality

Under this amendment, the state will be subject to a limit on the amount of federal title XXI funding that the state may receive on allowable demonstration expenditures during the demonstration period. CMS has long required, as a condition of demonstration approval, that demonstrations be "allotment neutral," meaning the federal title XXI funds for the state's CHIP program are restricted to the state's available allotment and reallocated funds. The state is eligible to receive title XXI funds for allowable title XXI demonstration expenditures, up to the amount of its title XXI allotment. Title XXI funds must be first used to fully fund costs associated with CHIP state plan populations. The demonstration expenditures are limited to remaining funds. In requiring demonstrations to be allotment neutral, CMS is constantly striving to achieve a balance between its interest in preserving the fiscal integrity of the CHIP program and its interest in facilitating state innovation and coverage through section 1115 demonstration approvals.

Monitoring and Evaluation

The state is required to conduct systematic monitoring and robust evaluation of the demonstration amendment in accordance with the STCs. In collaboration with CMS, the state must update its demonstration Monitoring Protocol to incorporate how it will monitor the amendment components, including relevant metrics data as well as narrative details describing progress with implementing the amendment.

[18] See https://www.ihs.gov/businessoffice/reimbursement-rates/.

The state is required to incorporate the amendment into its evaluation to support a comprehensive assessment of whether the initiatives are effective in producing the desired outcomes for beneficiaries and the state's overall Medicaid program. Evaluation of the amendment is expected to assess beneficiary awareness and understanding of traditional health care practices; access to, utilization and cost of traditional health care practices; quality and experience of care; and physical and behavioral health outcomes. Additionally, the state's monitoring and evaluation efforts must facilitate understanding the extent to which the amendment might support reducing existing disparities in access to and quality of care and health outcomes.

Consideration of Public Comments

California met the requirements for public notice for the demonstration application and CMS deemed the application complete. The state's public comment period for the CalAIM traditional health care practices request was held from April 6, 2021, through May 6, 2021. The federal comment period for this request was open from July 15, 2021, through August 14, 2021. A total of 8 comments were received through the federal comment period related to the traditional health care practices request. These comments were submitted by various advocacy organizations, government agencies, and Tribal health advocacy entities. All these commenters were supportive of California's request to expand coverage for culturally defined practices and provider types offered to American Indians and Alaska Natives. Specifically, these organizations identified their support for the goal of this request of providing needed support to historically disadvantaged and underserved communities, as well as the recognition that the unique needs of this population require alternative modalities of health care. One commenter supported the proposal but indicated the need for further clarification and discussion about the definition and interpretation of valid evidence. Section 1115 demonstrations can further test the effects of providing coverage for traditional health care practices in Medicaid and CHIP. Finally, two commenters expressed interest in seeing Medicaid payment for non-traditional and community-defined practices expanded to include other ethnic and cultural communities beyond American Indians and Alaska Natives There is a unique government-to-government relationship between the federal government and Indian Tribes and the United States Department of Health and Human Services is authorized to promote traditional health care practices of American Indians and Alaska Natives.

CMS also consulted with Tribal governments consistent with Executive Order 13175 and the CMS Tribal Consultation Policy by seeking advice and input from Tribal leaders on CMS policies that have Tribal implications. CMS obtained advice and input from the CMS Tribal Technical Advisory Group on July 26, 2023, and March 6, 2024. In addition, CMS held an All Tribes Consultation Webinar on April 3, 2024, and presented on this request during the Department of Health and Human Services Annual Budget Tribal Consultation Session on April 10, 2024. CMS requested Tribal comments from March 6, 2024, through May 3, 2024. A total of 26 comments were received through these consultation efforts that related to the traditional health care practices request.

Comments received through these consultations with Tribes were supportive of Medicaid coverage of traditional health care practices. However, some commenters advised CMS to be

flexible in developing its approach to reviewing these demonstration proposals. The most prevalent themes in the comments supporting the demonstration amendments were that CMS needs to be flexible to honor Tribal sovereignty and that urban Indian organization facilities need to be included as they are a vital piece of the Indian health system and are sometimes the only facility accessible to American Indians or Alaska Natives. CMS has made efforts to be inclusive and flexible in its approach to approving traditional health care practices demonstrations and states may choose to include urban Indian organizations in these demonstrations.

During Tribal consultation, most commenters urged CMS to continue consulting with Tribes and conferring with urban Indian organizations on the design and implementation of demonstrations that would provide coverage of traditional health care practices. Commenters expressed concerns about CMS limiting coverage to only those services delivered by or through IHS or Tribal facilities because it would exclude services provided by urban Indian organization facilities. Commenters relayed during Tribal consultation that Tribal sovereignty requires CMS to let Tribal Nations decide what should be considered an appropriate traditional health care practice provided to their Tribal community. Commenters also wanted to clarify that traditional health care practices should include services provided outside of the four walls of a clinic. After receiving this feedback during the consultation process, CMS decided that urban Indian organizations could be a qualifying provider type option for states. Medicaid coverage and payment for clinic services furnished outside the four walls of a clinic is the topic of a separate CMS rulemaking and we will address comments on that topic as part of that rulemaking.[19] The services that can be covered under this approval are not "clinic services" within the meaning of section 1905(a)(9) of the Act, 42 CFR 440.90, or the pending separate CMS rulemaking; there is no requirement under this demonstration approval that, to be covered, traditional health care practices must be provided in the four walls of a qualifying facility. CMS will also permit IHS, Tribal, and urban Indian organization facilities to determine the scope of services that they provide under this amendment, based on facilities' knowledge of these services and their patient populations.

During Tribal consultation, commenters agreed that using general standards to determine who is a qualified practitioner, including using a high-level position description, is important so that each facility can tailor provider qualifications for their traditional health care practitioners. Commenters expressed interest in how the traditional health care practices approved in demonstrations would align or deviate from the IHCIA and what is currently delivered by or through IHS, Tribal, or urban Indian organization facilities. CMS has developed an approach to approving traditional health care practices demonstration proposals that is intended to be as flexible as possible to allow qualifying facilities to determine practitioner qualifications and scope of practices. Consistent with the IHCIA, IHS, Tribal, and urban Indian organization facilities currently furnish traditional health care practices consistent with the IHS "standards for the provision of health care, health promotion, and disease prevention."[20]

---

[19] https://www.federalregister.gov/documents/2024/07/22/2024-15087/medicare-and-medicaid-programs-hospital-outpatient-prospective-payment-and-ambulatory-surgical

[20] 25 U.S.C. 1680u, at https://uscode.house.gov/view.xhtml?req=(title:25%20section:1680u%20edition:prelim)%20OR%20(granuleid:USC-prelim-title25-section1680u)&f=treesort&edition=prelim&num=0&jumpTo=true.

Commenters were highly supportive of providing implementation funding for evaluation activities. However, commenters recommend having Tribes and their practitioners direct demonstration evaluation activities so that they align with the cultural protocols for sharing information for each Tribe, in addition to providing flexibility to design the performance evaluations and customer service satisfaction surveys that are culturally appropriate. With this approval, states are encouraged to consult with Tribes and qualifying facilities on the development of evaluation activities.

Consistent with the government-to-government relationship, CMS is available to continue its dialogue with Tribal governments, urban Indian organizations, and the CMS Tribal Technical Advisory Group and to provide technical assistance, as needed.

Other Information

CMS's approval of this amendment is conditioned upon compliance with the enclosed amended set of expenditure authorities and STCs defining the nature, character, and extent of anticipated federal involvement in the demonstration. The award is subject to our receiving your acknowledgement of the award and acceptance of these STCs within 30 days of the date of this letter.

Your project officer for this demonstration is Diona Kristian. She is available to answer any questions concerning this amendment. Ms. Kristian's contact information is as follows:

Centers for Medicare & Medicaid Services
Center for Medicaid and CHIP Services
Mail Stop: S2-25-26
7500 Security Boulevard
Baltimore, MD 21244-1850
Email: Diona.Kristian@cms.hhs.gov

We appreciate your state's commitment to improving the health of people in California, and we look forward to partnering with you on the CalAIM section 1115(a) demonstration. If you have questions regarding this approval, please contact Ms. Jacey Cooper, Director, State Demonstrations Group, Center for Medicaid and CHIP Services, at (410) 786-9686.

Sincerely,

Daniel Tsai

EXPENDITURE AUTHORITY

NUMBERS: **11-W-00193/9 and 21-W-00077/0**

TITLE: **California CalAIM Demonstration**

AWARDEE: **California Health and Human Services Agency**

Under the authority of section 1115(a)(2) of the Social Security Act (the Act), expenditures made by the state for the items identified below, which are not otherwise included as expenditures under section 1903 of the Act shall, for the period of this demonstration, be regarded as expenditures under the state's Medicaid title XIX and XXI plan. The expenditure authority period of this demonstration is from the effective date identified in the demonstration approval letter, or as otherwise indicated herein or in the Special Terms and Conditions (STCs), through December 31, 2026.

The following expenditure authorities shall enable California to implement the CalAIM Demonstration. All Medicaid requirements apply to expenditure authority 3, 4, 5, 7, 8, 9, 10, 11 13, 14, and 15 (except as inconsistent with those authorities or except as provided herein or as set forth in the STCs).

1. **Global Payments Program for Public Health Care Systems**. Expenditures for payments to eligible Public Health Care Systems, subject to the annual expenditure limits set forth in the STCs, to support participating Public Health Care systems providers that incur costs for uninsured care under the value-based global budget structure set forth in the STCs.

2. **Chiropractic Services Provided by Indian Health Service (IHS) and Tribal Facilities.** Expenditures for chiropractic services for which Medi-Cal coverage was eliminated by SPA 09-001 that are furnished by IHS/tribal providers to individuals enrolled in the Medi-Cal program.

3. **Expenditures Related to Community Based Adult Services (CBAS).** Expenditures for CBAS services furnished to individuals who meet the level of care or other qualifying criteria.

4. **Expenditures Related to Low Income Pregnant Women.** Expenditures to provide post-partum benefits for pregnant women with incomes between 109 percent up to and including 138 percent of the Federal Poverty Level (FPL), that includes all benefits that would otherwise be covered for women with incomes below 109 percent of the FPL. This authority will sunset on December 31, 2021.

5. **Expenditures Related to the Drug Medi-Cal Organized Delivery System (DMC- ODS) for Residential and Inpatient Treatment for Individuals with Substance Use Disorder (SUD).** Expenditures for otherwise covered Medicaid services furnished to qualified DMC-ODS beneficiaries who are primarily receiving treatment and withdrawal management services for

substance use disorder as short-term residents in facilities that meet the definition of an Institution for Mental Diseases (IMD).

6. **Expenditures Related to Providing Access and Transforming Health (PATH).** Expenditures for payments to Qualified Applicants approved under one or more PATH initiatives. Such expenditures may include payments for allowable administrative costs, services, supports, transitional non-service expenditures, infrastructure and interventions, which may not be recognized as medical assistance under Section 1905(a) or may not otherwise be reimbursable under Section 1903, to the extent such activities are authorized as part of an approved PATH program.

7. **Expenditures Related to Contingency Management.** Expenditures for Contingency Management services provided to qualifying DMC-ODS beneficiaries who reside in a DMC-ODS county that elects and is approved by DHCS to pilot the Contingency Management benefit, beginning July 1, 2022 through December 31, 2026.

8. **Expenditures Related to Health-Related Social Needs (HRSN) Services Recuperative Care and Short-Term Post Hospitalization Housing Community Supports.** Expenditures for HRSN services, specifically recuperative care and short-term post hospitalization housing services, as detailed in the service description in the STCs, for Medi-Cal managed care enrollees who meet the eligibility criteria specified in the STCs and any related requirements.

9. **Expenditures Related to Dually Eligible Enrollees in Medi-Cal Managed Care.** Expenditures under contracts with Medicaid plans that do not meet the requirements under section 1903(m)(2)(A)(vi) of the Act insofar as that provision requires compliance with requirements in section 1932(a)(4)(A)(ii)(I) of the Act and 42 CFR 438.56(c)(2)(i) to the extent necessary to allow the state to keep a beneficiary in an affiliated Medicaid plan once the beneficiary has selected a Medicare Advantage plan unless and until the beneficiary changes Medicare Advantage plans or selects Original Medicare. Beneficiaries impacted by this expenditure authority will be able to change Medicaid plans by picking a new Medicare Advantage Plan or Original Medicare once a quarter between January through September pursuant to 42 CFR 423.38(c)(4)(i) and following the annual coordination election period from October through December pursuant to 42 CFR 423.38(b)(3). A dually eligible beneficiary's Medicaid plan will be aligned with the new Medicare Advantage Plan, to the extent the Medicare Advantage Plan has an affiliated Medicaid plan. Pursuant to 438.56(e)(1) which requires a state to approve disenrollment no later than the first day of the second month following the month in which the enrollee requests disenrollment, the state will be allowed to align approval of disenrollment from a Medicaid plan with disenrollment from a Medicare Advantage plan.

10. **Expenditures Related to Out-of-State Former Foster Care Youth.** Expenditures to extend eligibility for full Medicaid State Plan benefits to former foster care youth who are under age 26, were in foster care under the responsibility of another state or tribe in such state on the date of attaining 18 years of age or such higher age as the state has elected, and were enrolled in Medicaid on that date.

11. **Expenditures for Deemed SSI Populations.** Expenditures to extend eligibility for individuals in the following Deemed SSI populations who are eligible based on (1) applying a targeted asset disregard of $130,000 for a single individual and an additional $65,000 per household member, up to a maximum of 10 household members as of July 1, 2022, and (2) no longer applying the asset test as of January 1, 2024:

    i. The Pickle Group under section 1939(a)(5)(E) of the Act and 42 CFR 435.135;
    ii. The Disabled Adult Child group under sections 1634(c) and 1939(a)(2)(D) of the Act; and
    iii. The Disabled Widow/Widower group under sections 1634(d), 1939(a)(2)(C), and 1939(a)(2)(E) of the Act and 42 CFR 435.137-138.

12. **Designated State Health Programs (DSHP).** Expenditures for designated state health programs, identified in these STCs, which are otherwise fully state-funded, and not otherwise eligible for Medicaid matching funds. These expenditures are subject to the terms and limitations and not to exceed specified amounts as set forth in these STCs.

13. **Expenditures Related to Pre-Release Services.** Expenditures for pre-release services, as described in these STCs, provided to qualifying Medicaid beneficiaries and beneficiaries who would be eligible for the Children's Health Insurance Program (CHIP) if not for their incarceration status, for up to 90 days immediately prior to the expected date of release from a participating state prison, county jail, or youth correctional facility.

14. **Expenditures Related to Managed Care Plans.** Expenditures under contracts with managed care entities that do not meet the requirements in 1903(m)(2)(A)(vi) and 1932(a)(3) of the Act in so far as implemented at 42 CFR 438.52(a) to the extent necessary to allow the state to limit the choice of managed care plans in Metro, Large Metro, and Urban counties in California as provided under STC 12 and to allow counties to participate or continue participating in County Organized Health System (COHS) and Single Plan managed care models.

15. **Traditional Health Care Practices.** Expenditures for traditional health care practices received through Indian Health Service facilities, facilities operated by Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act, or facilities operated by urban Indian organizations under Title V of the Indian Health Care Improvement Act, by Medicaid beneficiaries who are able to receive services delivered by or through these facilities.

Title XXI Expenditure Authority:

16. **Expenditures Related to Pre-Release Services.** Expenditures for pre-release services, as described in these STCs, provided to qualifying demonstration beneficiaries who would be eligible for CHIP if not for their incarceration status, for up to 90 days immediately prior to the expected date of release from a participating state prison, county jail, or youth correctional facility.

17. **Traditional Health Care Practices.** Expenditures for traditional health care practices received through Indian Health Service facilities, facilities operated by Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act, or facilities operated by urban Indian organizations under Title V of the Indian Health Care Improvement Act by Children's Health Insurance Program beneficiaries who are able to receive services delivered by or through these facilities.

Medicaid Requirements Not Applicable to these Medicaid Expenditure Authorities

1. **Statewideness** **Section 1902(a)(1)**

To enable the state to provide pre-release services, as authorized under this demonstration, to qualifying beneficiaries on a geographically limited basis, in accordance with the Reentry Demonstration Initiative Implementation Plan.

2. **Amount, Duration, and Scope of Services and Comparability** **Section 1902(a)(10)(B) and 1902(a)(17)**

To enable the state to provide only a limited set of pre-release services, as specified in these STCs, to qualifying beneficiaries that is different than the services available to all other beneficiaries outside of carceral settings in the same eligibility groups authorized under the state plan or the demonstration.

3. **Freedom of Choice** **Section 1902(a)(23)(A)**

To enable the state to require qualifying beneficiaries to receive pre-release services, as authorized under this demonstration, through only certain providers.

4. **Requirements for Providers under the State Plan** **Section 1902(a)(27) and 1902(a)(78)**

To enable the state to not require carceral providers to enroll in Medi-Cal, in order to provide, order, refer, or prescribe pre-release services as authorized under this demonstration.

5. **Comparability; Freedom of Choice; Statewideness** **Section 1902(a)(10)(B), 1902(a)(23), and 1902(a)(1)**

To the extent necessary to allow the state to offer the coverage described in Expenditure Authority 15 only if the covered traditional health care practices are received through Indian Health Service facilities, facilities operated by Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act, or facilities operated by urban Indian organizations under Title V of the Indian Health Care Improvement Act by Medicaid beneficiaries who are able to receive services delivered by or through these facilities. These

sections of the Act are also not applicable to the extent necessary to allow the state to phase in implementation of the coverage described in Expenditure Authority 15 to subsets of beneficiaries otherwise eligible for that coverage in limited regions of the state.

Title XXI Requirements Not Applicable to the Title XXI Expenditure Authority Above

1. **Requirements for Providers under the State Plan** **Section 2107(e)(1)(D)**

To enable the state to not require carceral providers to enroll in Medi-Cal, in order to provide, order, refer, or prescribe pre-release services as authorized under this demonstration.

CENTERS FOR MEDICARE & MEDICAID SERVICES
WAIVER AUTHORITY

NUMBERS: **11-W-00193/9 and 21-W-00077/0**

TITLE: **California CalAIM Demonstration**

AWARDEE: **California Health and Human Services Agency**

All requirements of the Medicaid program expressed in law, regulation, and policy statement, not expressly waived in this list, shall apply to the Demonstration from the approval date, through December 31, 2026, unless otherwise specified.

Under the authority of section 1115(a) (1) of the Social Security Act (the Act), the following waivers shall enable California to implement the CalAIM Demonstration.

1. **Freedom of Choice** **Section 1902(a)(23)(A)**

To enable the State to require participants to receive benefits through certain providers and to permit the State to require that individuals receive benefits through managed care providers who could not otherwise be required to enroll in managed care. These authorities sunset on December 31, 2021.

To enable the State to require that individuals who elect to receive Health Home Program (HHP) services (under the state plan) are restricted to the Medi-Cal Managed Care Plan offered by the HHP provider to receive covered services other than family planning services. These authorities sunset on December 31, 2021.

No waiver of freedom of choice is authorized for family planning providers.

2. **Disproportionate Share Hospital (DSH) requirements**
Section 1902(a)(13)(A) (insofar as it incorporates Section 1923)

To exempt the State from making DSH payments, in accordance with Section 1923, to a hospital which qualifies as a disproportionate share hospital during any year for which the Public Health Care System with which the disproportionate share hospital is affiliated receives payment pursuant to the Global Payment Program.

3. **Statewideness** **Section 1902(a)(1)**

To enable the State to operate the demonstration on a county-by-county basis.

To enable the State to provide CBAS services on a geographically limited basis.

To enable the State to provide DMC-ODS services to short-term residents on a geographically limited basis.

To enable the state to provide contingency management services to qualifying DMC-ODS beneficiaries only in participating DMC-ODS counties that elect and are approved by DHCS to provide contingency management.

To enable the State to authorize sustaining services under PATH to individuals on a geographically limited basis.

To enable the State to provide peer support specialist services within electing Drug Medi-Cal State Plan counties to individuals on a geographically limited basis, no sooner than July 1, 2022.

To enable the state to provide recuperative care and short-term post-hospitalization housing services only in certain geographic areas where Medi-Cal managed care plans elect to offer these services.

4. **Amount, Duration, and Scope of Services and Comparability Section 1902(a)(10)(B) and 1902(a)(17)**

To enable the State to provide different benefits for low-income pregnant women between 109 percent up to and including 138 percent of the Federal Poverty Level, as compared to other pregnant women in the same eligibility group. This authority will sunset on December 31, 2021.

To enable the State to provide DMC-ODS treatment and withdrawal management services for substance use disorder, for short term residents, in facilities that meet the definition of an Institution for Mental Diseases (IMD) that are not otherwise available to all beneficiaries in the same eligibility group.

To enable the state to provide contingency management in approved DMC-ODS counties, to eligible individuals with substance use disorders under the DMC-ODS program that are not otherwise available to all beneficiaries in the same eligibility group.

To enable the State to provide peer support specialist services within electing Drug Medi-Cal State Plan counties to individuals on a geographically limited basis, no sooner than July 1, 2022.

To enable the state to provide sustaining services under PATH that are not otherwise available to all beneficiaries in the same eligibility group.

To enable the state to provide health-related social needs services, specifically recuperative care and short-term post hospitalization housing services, that are not otherwise available to all beneficiaries in the same eligibility group.

To enable the state to provide CBAS services that are not otherwise available to all beneficiaries in the same eligibility group.

To enable the state to (1) apply targeted resource disregards of $130,000 for a single individual and an additional $65,000 per household member, up to a maximum of 10 household members as of July 1, 2022 and (2) effective January 1, 2024 no longer apply income and resource financial methodologies to the following populations, which is in a manner that is not applied consistently to all eligibility groups in the state:

ii. The Pickle Group under section 1939(a)(5)(E) of the Act and 42 CFR 435.135;
iii. The Disabled Adult Child group under sections 1634(c) and 1939(a)(2)(D) of the Act; and
iv. The Disabled Widow/Widower group under sections 1634(d), 1939(a)(2)(C), and 1939(a)(2)(E) of the Act and 42 CFR 435.137-138.

CENTERS FOR MEDICARE & MEDICAID SERVICES
SPECIAL TERMS AND CONDITIONS

NUMBERS: **11-W-00193/9 and 21-W-00077/0**

TITLE: **California CalAIM Demonstration**

AWARDEE: **California Health and Human Services Agency**

1. PREFACE

The following are the Special Terms and Conditions (STCs) for California's CalAIM, formerly Medi-Cal 2020, section 1115(a) Medicaid Demonstration (hereinafter "Demonstration"), to enable the California Health and Human Services Agency (State) to operate this Demonstration, The Centers for Medicare & Medicaid Services (CMS) has granted waivers of statutory Medicaid requirements permitting deviation from the approved State Medicaid plan, and expenditure authorities authorizing expenditures for costs not otherwise matchable. These waivers and expenditure authorities are separately enumerated. These STCs set forth conditions and limitations on those waivers and expenditure authorities, and describe in detail the nature, character, and extent of Federal involvement in the Demonstration and the State's obligations to CMS during the life of the Demonstration.

The periods for each Demonstration Year (DY) will be as follows:

- DY 18 January 1, 2022 through December 31, 2022
- DY 19 January 1, 2023 through December 31, 2023
- DY 20 January 1, 2024 through December 31, 2024
- DY 21 January 1, 2025 through December 31, 2025
- DY 22 January 1, 2026 through December 31, 2026

The STCs related to the programs for those State Plan and Demonstration Populations affected by the Demonstration are effective from the date identified in the CMS Demonstration approval letter through December 31, 2026.

The STCs have been arranged into the following subject areas:

1. Preface
2. Program Description and Historical Context
3. General Program Requirements
4. State Plan and Demonstration Populations Affected by the Demonstration
5. Demonstration Programs
    a. Community Based Adult Services
    b. PATH
    c. Duals
6. Drug Medi-Cal Organized Delivery System
7. Contingency Management
8. Community Supports

9. Reentry Demonstration Initiative
10. Designated State Health Programs
11. Provider Payment Rate Increase Requirement
12. Managed Care Entities
13. Traditional Health Care Practices
14. Negative Balance
15. Global Payment Program
16. General Reporting Requirements
17. Evaluation of the Demonstration
18. General Financial Requirements
19. Monitoring Budget Neutrality for the Demonstration
20. Monitoring Allotment Neutrality

Additional attachments have been included to provide supplementary information and guidance for specific STCs.

Attachment A: Developing the Evaluation Design
Attachment B: Preparing the Interim and Summative Evaluation Reports
Attachment C: Global Payment Program Participating Public Health Care Systems
Attachment D: Funding and Reimbursement Protocol for IHS
Attachment E: SUD Health IT Plan
Attachment F: Accounting Procedures
Attachment G: Demonstration and Program Years
Attachment H: Community-Based Adult Services (CBAS) Provider Standards of Participation
Attachment I: Drug Medi-Cal Organized Delivery System (DMC-ODS) County Certified Public Expenditures (CPE) Protocol
Attachment J: SUD Monitoring Protocol
Attachment K: Global Payment Program Funding and Mechanics Protocol
Attachment L: Global Payment Program Valuation Methodology Protocol
Attachment M: Global Payment Program Health Equity Monitoring Metrics Protocol
Attachment N: Providing Access and Transforming Health (PATH) Funding and Mechanics Protocol
Attachment O: Providing Access and Transforming Health (PATH) Operational and Monitoring Protocol
Attachment P: Historical Information-Budget Neutrality Test (Reserved)
Attachment Q: DSH Coordination Methodology
Attachment R: Negative Balance Payment Schedule (Reserved)
Attachment S: CBAS Program Integrity
Attachment T: Evaluation Design (Reserved)
Attachment U: Community Supports Appendix
Attachment V: Contingency Management Procedures and Protocols
Attachment W: Reentry Demonstration Initiative Qualifying Conditions and Services
Attachment X: Health-Related Social Needs (HRSN) Community Supports Protocol (Reserved)
Attachment Y: Approved Designated State Health Program (DSHP) List (Reserved)
Attachment Z: Designated State Health Program (DSHP) Claiming Protocol (Reserved)

Attachment AA: Designated State Health Program (DSHP) Sustainability Plan (Reserved)
Attachment BB: Designated State Health Program (DSHP) Related Provider Payment Increase Assessment Attestation Table
Attachment CC: Reentry Demonstration Initiative Implementation Plan
Attachment DD: Monitoring Protocol (Reserved)
Attachment EE: Reentry Demonstration Initiative Reinvestment Plan
Attachment FF: Time-limited Expenditure Authority and Associated Requirements for the COVID-19 Public Health Emergency (PHE) Demonstration Amendment
Attachment GG: Attachment K – Emergency Preparedness and Response; Lump Sum Incentive Payments

2. PROGRAM DESCRIPTION AND HISTORICAL CONTEXT

In November 2010, the Federal government approved California's five-year Medicaid section 1115 Bridge to Reform demonstration, through which the state received the necessary authority and corresponding Federal support to invest in its health care delivery system and prepare for the full implementation of the Affordable Care Act. The Bridge to Reform demonstration achieved the goals of simultaneously implementing an historic coverage expansion, beginning the process of transforming the health care delivery system, and reinforcing California's safety net to meet the needs of the uninsured.

In December 2015, the Federal government approved the Medi-Cal 2020 demonstration embodying the shared commitment between the state and the Federal government to support the successful realization of some of the most critical objectives for improving our health care delivery system. Bridge to Reform waiver initiatives such as the managed care delivery system for Seniors and Persons with Disabilities (SPDs) and the state's Coordinated Care Initiative (CCI) were continued in Medi-Cal 2020, and with the foundation of the successes of the Bridge to Reform Demonstration, Medi-Cal 2020 initiatives continued to improve the quality and value of care provided to California's Medi-Cal beneficiaries.

Medi-Cal 2020 initiatives included:

1. A Public Hospital Redesign and Incentives in Medi-Cal program (PRIME), which aimed to improve the quality and value of care provided by California's safety net hospitals and hospital systems;

2. A Global Payment Program (GPP) that aimed to streamline funding sources for care for California's remaining uninsured population and create a value-based mechanism to increase incentives to provide primary and preventive care services and other high-value services;

3. A Whole Person Care (WPC) Pilot program that aimed to support local and regional efforts to integrate the systems and improve the care provided to Medi-Cal's most high-risk beneficiaries; and

4. A Dental Transformation Initiative (DTI) aimed to improve access to dental care and reduce preventable dental conditions for Medi-Cal beneficiaries.

On June 15, 2016, California submitted an amendment to the Demonstration to expand the

definition of a WPC Pilot lead entity to include federally recognized tribes and tribal health programs operated under a Public Law 93-638 contract with the Federal Indian Health Services. CMS approved this amendment on December 8, 2016.

On August 15, 2016, the state submitted an amendment to the demonstration to revise the methodology for determining the baseline metrics for purposes of receiving incentive payments for new and existing dental service office locations under the DTI. California also sought authority to provide incentive payments for specified dental services delivered at provider service office locations at two levels: a 37.5 percent above the state's Schedule of Maximum Allowances (SMA) incentive payment for service office locations that meet at least a 1 percentage point increase in number of children receiving a preventive dental service, on an annual basis, above the pre-determined baseline number of children served in the previous year with a preventive dental service; and a 75 percent above the state's SMA incentive payment for service office locations that meet or exceed a 2 percentage point increase in number of children receiving a preventive dental service, on an annual basis, above the pre-determined baseline number of children receiving a preventive dental service in the previous year. CMS approved this amendment on January 6, 2017.

On August 17, 2017, CMS approved the state's request to amend the demonstration to provide coverage to former foster care youth under age 26 who were in foster care under the responsibility of another state or tribe from any state when they "aged out" of foster at age 18 (or a higher age as elected by the state) and were enrolled at Medi-Cal at the time.

California submitted an amendment on November 10, 2016, as a companion to the Health Homes Program (HHP) State Plan Amendment (SPA) 16-007, to request a waiver of freedom of choice in the non- county organized health system (COHS) counties in order to provide the HHP services through the Medi-Cal managed care delivery system to beneficiaries enrolled in managed care. Managed care plans (MCPs) will be responsible for the overall administration of the HHP, which will be structured as a HHP network with members functioning as a team to provide care coordination. Fee-For-Service (FFS) members who meet the eligibility criteria for HHP may choose to voluntarily enroll in a MCP to receive HHP services along with other state plan services provided through MCPs. HHP services will not be provided through a FFS delivery system; therefore, beneficiaries in FFS in non-COHS counties will have to enroll in a MCP to receive HHP services. CMS approved this request on December 19, 2017.

On August 3, 2020, California received CMS approval to permit the GPP to continue from July 1, 2020 to December 31, 2020 and to permit eligible Medi-Cal beneficiaries in Orange County to elect to disenroll from CalOptima (a COHS including CalOptima Program of All-Inclusive Care for the Elderly (PACE)), to be enrolled in a PACE organization not affiliated with CalOptima.

On December 30, 2020, CMS approved a temporary extension of the state's section 1115 demonstration, in order to allow the state and CMS to continue working together on approval of a longer-term renewal of this demonstration by December 31, 2021. This temporary extension continued most elements of the Medi-Cal 2020 Section 1115 demonstration unchanged pending a full renewal and included an additional authorization for the GPP program. The extension included the removal of the authority for the State's Designated State Health Programs (DSHP).

On December 29, 2021, CMS approved the California Advancing & Innovating Medi-Cal (CalAIM) demonstration. This demonstration authorized a five-year renewal of components of

the Medi-Cal 2020 section 1115 demonstration, including new authorities, to continue advancing the state's goal of improving health outcomes and reducing health disparities for Medicaid and other low-income populations in the State. Building on the successes of the Medi-Cal 2020 demonstration, California has moved to implement whole person care strategies statewide through the State's CalAIM 1915(b) managed care delivery system and is moving other aspects of the Medi-Cal 2020 demonstration into the Medi-Cal State Plan. The CalAIM section 1115 demonstration initiatives include:

- Renewing the GPP to streamline funding sources for care for California's remaining uninsured population with a renewed focus on addressing social needs and responding to the impacts of systemic racism and inequities on the uninsured populations served by California's public hospitals.
- Authorizing Community Supports services: recuperative care and short-term post-hospitalization housing.
- Authorizing the Providing Access and Transforming Health (PATH) Supports expenditure authority to (1) sustain, transition, and expand the successful WPC Pilot and HHP services initially authorized under the Medi-Cal 2020 demonstration as they transition to become Enhanced Care Management (ECM) and Community Supports, and (2) sustain reentry pre-release and post-release services provided through existing WPC pilots and support Medi-Cal pre-release application planning and IT investments.
- Continuing short-term residential treatment services to eligible individuals with a substance use disorder (SUD) in the Drug Medi-Cal Organized Delivery System (DMC-ODS).
- Authorizing Contingency Management as a DMC-ODS benefit, to offer Medi-Cal beneficiaries this evidence-based, cost-effective treatment for substance use disorder that combines motivational incentives with behavioral health treatments.

On June 29, 2022, CMS approved an amendment to the demonstration to provide parity with the asset disregard policy for populations covered under SPA 21-0053. This amendment increases the asset limit and subsequently eliminates the asset test for the populations not able to be covered under state plan authority. The resources disregard will be $130,000 for a single individual and an additional $65,000 per household member, up to a maximum of 10 household members. This disregard is effective as of July 1, 2022. The elimination of the asset test for the populations covered under the demonstration will be effective January 1, 2024.

On January 26, 2023, CMS approved an amendment to the CalAIM demonstration to allow the state to provide a targeted set of pre-release services to individuals who are Medicaid eligible or individuals who would be eligible for CHIP except for their incarceration status and who are incarcerated in state prisons, county jails, or youth correctional facilities. This set of services would be provided for up to 90 days immediately prior to the expected date of release to improve transitions (in particular, transitions of health coverage and care) back to the community and for other purposes, including to reduce emergency department visits and inpatient hospital admissions; reduce decompensation, suicide-related death, overdose, overdose-related death, and all-cause death; and lead to improved health outcomes in general. CMS also is approving the authority for Designated State Health Programs (DSHP), which California will use to support portions of the PATH program that was approved in the December 29, 2021 extension of CalAIM. CMS is approving additional PATH funding for planning and implementation of the reentry demonstration initiative. Lastly, in this amendment CMS is approving an adjustment to

the budget neutrality methodology for two previously approved community supports, short-term post-hospitalization services and recuperative care, that address Health-Related Social Needs (HRSN), consistent with current CMS policy. Since these services are considered HRSN, CMS is adjusting the state's budget neutrality calculations to conform to current CMS policy for demonstrations that address HRSN, and will be treating these two services as "capped hypothetical expenditures."

On October 16, 2024, CMS approved an amendment to provide expenditure authority for coverage of traditional health care practices received through Indian Health Service facilities, facilities operated by Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act, or facilities operated by urban Indian organizations under Title V of the Indian Health Care Improvement Act by Medicaid and CHIP beneficiaries who are able to receive services delivered by or through these facilities. California will provide this coverage only to Medicaid and CHIP beneficiaries eligible to participate in the Drug Medi-Cal Organized Delivery System (DMC-ODS). However, with this approval, California will have the authority to expand coverage to all remaining Medicaid and CHIP beneficiaries who are able to receive services delivered by an IHS, Tribal, or urban Indian organization facility, subject to STC 3.7 and 13.2(c).

3. GENERAL PROGRAM REQUIREMENTS

3.1. **Compliance with Federal Non-Discrimination Laws**. The state must comply with all applicable federal statutes relating to non-discrimination. These include, but are not limited to, the Americans with Disabilities Act of 1990 (ADA), Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973 (Section 504), the Age Discrimination Act of 1975, and Section 1557 of the Affordable Care Act (Section 1557). Such compliance includes providing reasonable modifications to individuals with disabilities under the ADA, Section 504, and Section 1557 with eligibility and documentation requirements, understanding program rules and notices, to ensure they understand program rules and notices, as well as meeting other program requirements necessary to obtain and maintain benefits.

3.2. **Compliance with Medicaid and CHIP Law, Regulation, and Policy.** All requirements of the Medicaid and CHIP programs, expressed in federal law, regulation, and written policy, not expressly waived in the waiver document (of which these terms and conditions are part), apply to the demonstration.

3.3. **Changes in Medicaid and CHIP Law, Regulation, and Policy.** The state must, within the timeframes specified in law, regulation, or policy statement, come into compliance with any changes in federal law, regulation, or policy affecting the Medicaid or CHIP programs that occur during this demonstration approval period, unless the provision being changed is expressly waived or identified as not applicable. Nothing in this demonstration absolves California from being subject to future guidance on contingency management and the state would otherwise need to come into compliance with such guidance. In addition, CMS reserves the right to amend the STCs to reflect such changes and/or changes as needed without requiring the state to submit an amendment to the demonstration under STC 3.6. CMS will notify the state 30 days in advance of the expected approval date of the amended STCs to allow the state to discuss the language changes necessary to ensure compliance with Law, Regulation, and

Policy. Changes will be considered in force upon issuance of the approval letter by CMS. The state must accept the changes in writing within 30 calendar days of receipt.

3.4. **Coordination with the Medicare Program.** The state must have processes in place to coordinate with the Medicare program for Medicare-Medicaid beneficiaries, including:

a. The state must provide contact information to Medicare-Medicaid beneficiaries on how they can obtain assistance with their Medicare coverage at any point of enrollment or disenrollment from Medi-Cal managed care or upon request by the beneficiary.

b. The state must provide accurate reports to CMS of the eligibility and enrollment of Medicare-Medicaid beneficiaries in the demonstration.

c. The state must comply with requirements for Medicaid payment of Medicare cost-sharing for Medicare-Medicaid enrollees, including ensuring any organization delegated with that responsibility adheres with the requirements.

d. The state must provide CMS with requested financial information and other demonstration aspects that have a specific impact on the Medicare-Medicaid population. Requests for information will include a reasonable timeframe for responses as agreed to by CMS and the state.

3.5. **Impact on Demonstration of Changes in Federal Law, Regulation, and Policy.**

a. To the extent that a change in federal law, regulation, or policy requires either a reduction or an increase in federal financial participation (FFP) for expenditures made under this demonstration, the state must adopt, subject to CMS approval, a modified budget neutrality agreement for the demonstration as necessary to comply with such change. Further, the state may seek an amendment to the demonstration (as per STC 3.8 of this section) as a result of the change in FFP.

b. If mandated changes in the federal law require state legislation, unless otherwise prescribed by the terms of the federal law, the changes must take effect on the day such state legislation becomes effective, or on the last day such legislation was required to be in effect under the law, whichever is sooner.

3.6. **State Plan Amendments.** The state will not be required to submit title XIX or title XXI state plan amendments for changes affecting any populations made eligible solely through the demonstration. If a population eligible through the Medicaid or CHIP state plan is affected by a change to the demonstration, a conforming amendment to the appropriate state plan may be required, except as otherwise noted in these STCs. In all such cases, the Medicaid state plan governs.

3.7. **Changes Subject to the Amendment Process.** Changes related to eligibility, enrollment, benefits, beneficiary rights, delivery systems, cost sharing, sources of non-federal share of funding, budget neutrality, and other comparable program elements must be submitted to CMS as amendments to the demonstration. Changes that expand eligibility for the coverage described

in Expenditure Authority 15 and 17 and STC 13 beyond the DMC-ODS group to which the state initially intends to provide that coverage up to the full range of beneficiaries described in STC 13.2 will not require submission of an amendment but must comply with public notice processes as specified under 42 CFR 431.408. Documentation of the state's public notice processes and tribal consultation requirements outlined in STC 3.13 must be submitted to CMS at least 60 days in advance of implementation. Any reduction in the population eligible for the coverage described in Expenditure Authority 15 and 17 below the most recently approved population will require submission of a formal amendment, as described in STC 3.8. All amendment requests are subject to approval at the discretion of the Secretary in accordance with section 1115 of the Act. The state must not implement changes to these elements without prior approval by CMS either through an approved amendment to the Medicaid state plan or amendment to the demonstration. Amendments to the demonstration are not retroactive and no FFP of any kind, including for administrative or service-based expenditures, will be available for changes to the demonstration that have not been approved through the amendment process set forth in STC 3.8, except as provided in STC 3.3.

3.8. **Amendment Process**. Requests to amend the demonstration must be submitted to CMS prior to the planned date of implementation of the change and may not be implemented until approved. CMS reserves the right to deny or delay approval of a demonstration amendment based on non-compliance with these STCs, including but not limited to failure by the state to submit required elements of a viable amendment request as found in this STC, and failure by the state to submit required reports and other deliverables according to the deadlines specified herein. Amendment requests must include, but are not limited to, the following:

a. An explanation of the public process used by the state, consistent with the requirements of STC 3.13. Such explanation must include a summary of any public feedback received and identification of how this feedback was addressed by the state in the final amendment request submitted to CMS;

b. A detailed description of the amendment including impact on beneficiaries, with sufficient supporting documentation;

c. A data analysis worksheet which identifies the specific "with waiver" impact of the proposed amendment on the current budget neutrality agreement. Such analysis shall include total computable "with waiver" and "without waiver" status on both a summary and detailed level through the current approval period using the most recent actual expenditures, as well as summary and detail projections of the change in the "with waiver" expenditure total as a result of the proposed amendment, which isolates (by Eligibility Group) the impact of the amendment;

d. An up-to-date CHIP allotment worksheet, if necessary; and

e. The state must provide updates to existing demonstration reporting, quality and evaluation plans. This includes a description of how the evaluation design and annual progress reports will be modified to incorporate the amendment provisions, as well as the oversight, monitoring and measurement of the provisions.

3.9. **Extension of the Demonstration.** States that intend to request an extension of the demonstration must submit an application to CMS from the Governor or Chief Executive Officer of the state in accordance with the requirements of 42 Code of Federal Regulations (CFR) 431.412(c). States that do not intend to request an extension of the demonstration beyond the period authorized in these STCs, must submit a transition and phase-out plan consistent with the requirements of STC 3.10.

3.10. **Demonstration Phase-Out.** The state may only suspend or terminate this demonstration in whole, or in part, consistent with the following requirements:

a. Notification of Suspension or Termination. The state must promptly notify CMS in writing of the reason(s) for the suspension or termination, together with the effective date and a transition and phase-out plan. The state must submit a notification letter and a draft transition and phase-out plan to CMS no less than six months before the effective date of the demonstration's suspension or termination. Prior to submitting the draft transition and phase-out plan to CMS, the state must publish on its website the draft transition and phase-out plan for a 30-day public comment period. In addition, the state must conduct tribal consultation in accordance with STC 3.13, if applicable. Once the 30-day public comment period has ended, the state must provide a summary of each public comment received, the state's response to the comment and how the state incorporated the received comment into the revised transition and phase-out plan.

b. Transition and Phase-out Plan Requirements. The state must include, at a minimum, in its transition and phase-out plan, the process by which it will notify affected beneficiaries, the content of said notices (including information on the beneficiary's appeal rights), the process by which the state will conduct administrative reviews of Medicaid eligibility prior to the termination of the demonstration for the affected beneficiaries, and ensure ongoing coverage for those beneficiaries whether currently enrolled or determined to be eligible individuals, as well as any community outreach activities, including community resources that are available.

c. Transition and Phase-out Plan Approval. The state must obtain CMS approval of the transition and phase-out plan prior to the implementation of transition and phase-out activities. Implementation of transition and phase-out activities must be no sooner than fourteen (14) calendar days after CMS approval of the transition and phase-out plan.

d. Transition and Phase-out Procedures. The state must comply with all notice requirements found in 42 CFR 431.206, 431.210, 431.211, and 431.213. In addition, the state must assure all applicable appeal and hearing rights afforded to demonstration beneficiaries as outlined in 42 CFR 431.220 and 431.221. If a demonstration beneficiary requests a hearing before the date of action, the state must maintain benefits as required in 42 CFR 431.230. In addition, the state must conduct administrative renewals for all affected beneficiaries in order to determine if they qualify for Medicaid eligibility under a different eligibility category prior to termination as discussed in October 1, 2010, State Health Official Letter #10-008 and

as required under 42 CFR 435.916(f)(1). For individuals determined ineligible for Medicaid, the state must determine potential eligibility for other insurance affordability programs and comply with the procedures set forth in 42 CFR 435.1200(e).

e. Exemption from Public Notice Procedures, 42 CFR Section 431.416(g). CMS may expedite the federal and state public notice requirements under circumstances described in 42 CFR 431.416(g).

f. Enrollment Limitation during Demonstration Phase-Out. If the state elects to suspend, terminate, or not extend this demonstration, during the last six months of the demonstration, enrollment of new individuals into the demonstration must be suspended. The limitation of enrollment into the demonstration does not impact the state's obligation to determine Medicaid eligibility in accordance with the approved Medicaid state plan.

g. Federal Financial Participation (FFP). FFP will be limited to normal closeout costs associated with the termination or expiration of the demonstration including services, continued benefits as a result of beneficiaries' appeals, and administrative costs of disenrolling beneficiaries.

3.11. **Withdrawal of Waiver or Expenditure Authority.** CMS reserves the right to withdraw waivers and/or expenditure authorities at any time it determines that continuing the waivers or expenditure authorities would no longer be in the public interest or promote the objectives of title XIX or title XXI. CMS will promptly notify the state in writing of the determination and the reasons for the withdrawal, together with the effective date, and afford the state an opportunity to request a hearing to challenge CMS' determination prior to the effective date. If a waiver or expenditure authority is withdrawn, FFP is limited to normal closeout costs associated with terminating the waiver or expenditure authority, including services, continued services or benefits as a result of beneficiary appeals, and administrative costs of disenrolling participants.

3.12. **Adequacy of Infrastructure.** The state must ensure the availability of adequate resources for implementation and monitoring of the demonstration, including education, outreach, and enrollment; maintaining eligibility systems; payment and reporting systems; compliance with cost sharing requirements; and reporting on financial and other demonstration components.

3.13. **Public Notice, Tribal Consultation, and Consultation with Interested Parties.** The state must comply with the state notice procedures as required in 42 CFR 431.408 prior to submitting an application to extend the demonstration. For applications to amend the demonstration, the state must comply with the state notice procedures set forth in 59 Fed. Reg. 49249 (September 27, 1994) prior to submitting such request. The state must also comply with the Public Notice Procedures set forth in 42 CFR 447.205 for changes in statewide methods and standards for setting payment rates.

The state must also comply with tribal and Indian Health Program/Urban Indian Health Organization consultation requirements at section 1902(a)(73) of the Act, 42 CFR 431.408(b),

State Medicaid Director Letter #01-024, or as contained in the state's approved Medicaid State Plan, when any program changes to the demonstration, either through amendment as set out in STC 3.8 or extension, are proposed by the state.

3.14. **Federal Financial Participation.** No federal matching for expenditures for this demonstration, including for administrative and medical assistance expenditures, will be available until the effective date identified in the demonstration approval letter, or if later, as expressly stated within these STCs.

3.15. **Federal Financial Participation (FFP) for Indian Health Services.** Supplemental payments to participating Indian Health Services and tribal facilities are limited to the costs incurred by the certifying entity in providing chiropractic services.

3.16. **Administrative Authority.** When there are multiple entities involved in the administration of the demonstration, the Single State Medicaid Agency must maintain authority, accountability, and oversight of the program. The State Medicaid Agency must exercise oversight of all delegated demonstration functions to operating agencies, managed care organizations (MCOs), and any other contracted entities. The Single State Medicaid Agency is responsible for the content and oversight of the quality strategies for the demonstration.

3.17. **Common Rule Exemption.** The state shall ensure that the only involvement of human subjects in research activities that may be authorized and/or required by this demonstration is for projects which are conducted by or subject to the approval of CMS, and that are designed to study, evaluate, or otherwise examine the Medicaid program – including procedures for obtaining Medicaid benefits or services, possible changes in or alternatives to Medicaid programs and procedures, or possible changes in methods or levels of payment for Medicaid benefits or services. The Secretary has determined that this demonstration as represented in these approved STCs meets the requirements for exemption from the human subject research provisions of the Common Rule set forth in 45 CFR 46.101(b)(5)

4. STATE PLAN AND DEMONSTRATION POPULATIONS AFFECTED BY THE DEMONSTRATION

4.1. **Eligibility.** Certain state plan eligibles are affected by the Demonstration, as described below.

State plan eligibles derive their eligibility through the Medicaid or CHIP state plans and are subject to all applicable Medicaid and CHIP laws and regulations in accordance with the Medicaid or CHIP state plans, except as expressly waived or made inapplicable and as described in these STCs. Any Medicaid State Plan Amendments to the eligibility standards and methodologies for these eligibility groups, including the conversion to a modified adjusted gross income standard January 1, 2014, will apply to this demonstration.

The following population groups are affected by the Demonstration:

a. Out-of-State Former Foster Care Youth, defined as youth under age 26, who were in foster care under the responsibility of a state other than California or a tribe in such other state when they turned age 18 or such higher age as the state elected for termination of federal foster care assistance under title IV-E of the Act, were enrolled in Medicaid at that

time; and are now applying for Medicaid in California. Out-of-state former foster care youth will receive the same Medicaid State Plan benefits and be subject to the same cost-sharing requirements effectuated by the state for the mandatory Title IV-E foster care youth eligibility category enacted by the Adoption Assistance and Child Welfare Act of 1980 (Pub. L. 96-272).

b. Community Based Adult Services (CBAS) Populations are persons who are age 18 or older and meet CBAS eligibility under STC 5.1(a) and (d).

c. DMC-ODS populations are persons receiving residential services pursuant to DMC-ODS, regardless of the length of stay, as described in STC 6.1 and individuals receiving contingency management services, as described in STC 7.1.

d. Deemed SSI Populations.

i. The resource disregard described in section (ii) below, will be applied in determining eligibility for the following groups, subject to section (iii) below:

1. The Pickle Group under section 1939(a)(5)(E) of the Act and 42 CFR 435.135;

2. The Disabled Adult Child group under sections 1634(c) and 1939(a)(2)(D) of the Act; and

3. The Disabled Widow/Widower group under sections 1634(d), 1939(a)(2)(C), and 1939(a)(2)(E) of the Act and 42 CFR 435.137-138.

ii. The resource disregard to be applied to individuals described in section (i) above will be as follows:

1. Effective July 1, 2022, the resource disregard will be $130,000 for each individual and an additional $65,000 for each additional household member of the individual, up to a maximum of 10 household members; and
2. Effective January 1, 2024, all resources will be disregarded for each individual.

iii. The resource disregard described in section (ii) above, will not apply to the following individuals who are otherwise eligible under the state plan in:

1. A categorically needy eligibility group to which there is available:

a. The minimum mandatory medical assistance described in section 1902(a)(10)(A) of the Act, as implemented at 42 CFR § 441.210; or

b. Benchmark benefits described in section 1937 of the Act, as implemented at 42 CFR § 440.300 et seq; or

2. A medically needy group covered under the state plan without a spenddown.

e. Reentry Demonstration Initiative Populations are defined as persons who are enrolled in Medicaid or who would be eligible for CHIP except for their incarcerated status, and

who are incarcerated in a state prison, county jail, or youth correctional facility and who meet the eligibility criteria under STC 9.2.

5. DEMONSTRATION PROGRAMS

A. Community-Based Adult Services (CBAS) for Medi-Cal State Plan Populations

5.1. **CBAS Eligibility and Delivery System.** CBAS is an outpatient, facility-based program that delivers skilled nursing care, social services, therapies, personal care, family/caregiver training and support, nutrition services, care coordination, and transportation to eligible State Plan beneficiaries.

a. CBAS Recipients are those persons who:

i. Are age 18 years and older;

ii. Derive their Medicaid eligibility from the State Plan and are either aged, blind, or disabled; including those who are recipients of Medicare;

iii. Are Medi-Cal managed care plan members or are exempt from enrollment in Medi-Cal managed care; and

iv. Reside within a geographic services area in which the CBAS benefit was available as of April 1, 2012, as more fully described in STC 5.1(b), or are determined eligible for the CBAS benefit by managed care plans that contract with CBAS providers pursuant to STC 5.1(d) and STC 5.1(e).

b. Delivery System.

i. CBAS is a Medi-Cal managed care benefit in counties where CBAS existed on April 1, 2012. To the extent that the provision of CBAS is determined by DHCS to be both cost-effective and necessary to prevent avoidable institutionalization of plan enrollees within a plan's service area in which CBAS was not available as of April 1, 2012, CBAS may be a Medi-Cal managed care benefit pursuant to STC 5.1(a) available to that plan's enrollees at the discretion of the plan when it contracts with a CBAS provider that has been certified as such by DHCS. A Medi-Cal managed care plan shall ensure that every CBAS provider within their service area, that has been approved by the California Department of Aging as a CBAS provider, is included in the plan's network, to the extent that the CBAS provider remains licensed as an Adult Day Health Care Center, certified and enrolled as a Medi-Cal provider, and is willing to enter into a network provider agreement with the plan on mutually agreeable terms and meets the plan's credentialing and quality standards.

ii. CBAS shall be available as a Medi-Cal fee-for-service benefit delivered through licensed Adult Day Health Care Centers approved by the California Department of Aging as a CBAS provider, that are certified and enrolled as a Medi-Cal provider, for individuals who do not qualify for, or are exempt from

enrollment in, Medi-Cal managed care as long as the individual resides within the geographic service area where CBAS is provided.

iii. If there is insufficient CBAS Center capacity due to Center closure(s) to satisfy demand in counties where CBAS centers existed as of April 1, 2012, the Department of Health Care Services must assure that eligible CBAS beneficiaries that had received CBAS at the closed Center(s) have access to unbundled CBAS as needed for continuity of care and subject to the following general procedures:

i. Managed care beneficiaries: For managed care beneficiaries who are eligible for CBAS and there is a 5% change from County capacity as of April 1, 2012, in the area, the Medi-Cal managed care plan will authorize unbundled services and facilitate utilization through care coordination.

ii. Fee-for-Service beneficiaries: For FFS beneficiaries who are eligible for CBAS and there a 5% change from County capacity as of April 1, 2012, in the area, the following procedures will apply:

a. DHCS will work with the local CBAS Center network and beneficiary's physician to identify other available CBAS Centers, and the type, scope and duration of the CBAS benefits that are medically necessary for the beneficiary.

b. DHCS will work with the beneficiary's physician to arrange for needed nursing services, or referral to, or reassessment of, In-Home Supportive Services (IHSS) as needed for personal care services (or authorization of waiver personal care services needed in excess of the IHSS cap).

c. If the beneficiary needs therapeutic services, DHCS will work with the beneficiary's physician to coordinate the authorization of needed services.

d. If the beneficiary needs mental health and/or substance use disorder services, DHCS will work with the beneficiary's physician to refer the beneficiary to the local behavioral health services department or appropriate behavioral health professionals or services.

iv. In the event of a negative change in capacity of 5% or greater in any county for any reason, DHCS shall identify in the quarterly report for the same quarter as the negative change the provider capacity in that county for providing all core and additional CBAS services (as listed in STCs 5.1(a) and 5.1(b)) on an unbundled basis.

c. Home and Community-Based Settings. The state must ensure that home and community-based settings have all of the qualities required by 42 CFR 441.301(c)(4), and other such qualities as the secretary determines to be appropriate based on the needs of the individual as indicated in their person-centered plan. In a provider owned

or controlled setting, the additional qualities required by CFR 441.301(c)(4)(vi) must be met. The state engaged in a CBAS stakeholder process to amend the HCB settings statewide transition plan to ensure that all home and community-based settings found in the 1115 Demonstration have all of the qualities required by 42 CFR 441.301(c)(4). The state will amend the statewide transition plan to include all HCBS settings used by individuals in the section 1115 demonstration, to ensure complete compliance with HCBS settings by March 17, 2023.

d. CBAS Program Eligibility Criteria. The CBAS benefit shall be available to all beneficiaries who meet the requirements of STC 5.1(a) and for whom CBAS is available based on STC 5.1(b) who meet medical necessity criteria as established in state law and who qualify based on at least one of the medical criteria in (i) through (v) below:

    i. Meet or exceed the "Nursing Facility Level of Care A" (NF-A) criteria as set forth in the California Code of Regulations; OR

    ii. Have a diagnosed organic, acquired or traumatic brain injury, and/or chronic mental disorder. "Chronic mental disorder" means the enrollee shall have one or more of the following diagnoses or its successor diagnoses included in the most recent version of the Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association: (a) Pervasive Developmental Disorders, (b) Attention Deficit and Disruptive Behavior Disorders, (c) Feeding and Eating Disorder of Infancy, Childhood, or Adolescence, (d) Elimination Disorders, (e) Schizophrenia and Other Psychiatric Disorders, (f) Mood Disorders, (g) Anxiety Disorders, (h) Somatoform Disorders, (i) Factitious Disorders, (j) Dissociative Disorders, (k) Paraphilia, (l) Eating Disorders, (m) Impulse Control Disorders Not Elsewhere Classified, (n) Adjustment Disorders, (o) Personality Disorders, or (p) Medication-Induced Movement Disorders. In addition to the presence of a chronic mental disorder or acquired, organic, or traumatic brain injury, the enrollee shall need assistance or supervision with either:

        i. Two of the following: bathing, dressing, self-feeding, toileting, ambulation, transferring, medication management, or hygiene; or

        ii. One need from the above list and one of the following: money management; accessing community and health resources; meal preparation, or transportation; or

        iii. Have moderate to severe Alzheimer's disease or other dementia characterized by the descriptors of, or equivalent to, Stages 5, 6, or 7 Alzheimer's disease; or

        iv. Have a mild cognitive impairment including Alzheimer's disease or other dementias, characterized by the descriptors of, or equivalent to, Stage 4 Alzheimer's disease, defined as mild or early-stage Alzheimer's disease AND need assistance or supervision with two of the following:

bathing, dressing, self-feeding, toileting, ambulation, transferring, medication management, or hygiene; or

v. Have a developmental disability. "Developmental disability" means a disability, which originates before the individual attains age 18, continues, or can be expected to continue indefinitely, and constitutes a substantial disability for that individual as defined in the California Code of Regulations.

e. CBAS Eligibility Determination. Eligibility determinations for the CBAS benefit will be performed as follows:

i. The initial eligibility determination for the CBAS benefit will be performed through a face-to-face review by a registered nurse with level of care determination experience, using a standardized tool and protocol approved by the Department of Health Care Services unless criteria under STC 5.1(e)(ii) are met. The eligibility determination shall be performed by the beneficiary's managed care plan, or by the Department of Health Care Services or its contractor(s) for beneficiaries exempt from managed care.

ii. An initial face-to-face review is not required when a managed care plan or the Department of Health Care Services or its contractor(s) determine that an individual is eligible to receive CBAS and that the receipt of CBAS is clinically appropriate based on information that the plan possesses.

iii. Eligibility for ongoing receipt of CBAS is determined at least every six months through the reauthorization process or up to every twelve months for individuals determined by the managed care plan to be clinically appropriate.

f. Grievances and Appeals

i. A beneficiary who receives a written notice of action has the right to file an appeal and/or grievance under State and Federal Law.

ii. A CBAS participant may file a grievance with their Medi-Cal managed care plan as a written or oral complaint. The participant or their authorized representative may file a grievance with the participant's Medi-Cal managed care plan at any time they experience dissatisfaction with the services or quality of care provided to them, and as further instructed by the plan.

5.2. **CBAS Benefit and Individual Plan of Care (IPC).**

a. Core Services: Professional nursing care, personal care and/ or social services, therapeutic activities, and a meal shall be provided to all eligible CBAS beneficiaries on each day of service as follows. CBAS benefits include the following:

i. Professional nursing services provided by an RN or LVN, which includes one or more of the following, consistent with scope of practice: observation, assessment, and monitoring of the beneficiary's general health status; monitoring and assessment of the participant's medication regimen;

communication with the beneficiary's personal health care provider; supervision of personal care services; and provision of skilled nursing care and interventions.

ii. Personal care services provided primarily by program aides which include one or more of the following: supervision or assistance with Activities of Daily Living (ADLs) and Instrumental Activities of Daily Living (IADLs); protective group supervision and interventions to assure participant safety and to minimize risk of injury, accident, inappropriate behavior, or wandering.

iii. Social services provided by social work staff, which include one or more of the following: observation, assessment, and monitoring of the participant's psychosocial status; group work to address psychosocial issues; care coordination.

iv. Therapeutic activities organized by the CBAS center activity coordinator, which include group or individual activities to enhance social, physical, or cognitive functioning; facilitated participation in group or individual activities for CBAS beneficiaries whose physical frailty or cognitive function precludes them from independent participation in activities. The CBAS physical therapy and occupational therapy maintenance programs are considered part of Therapeutic Activities.

v. A meal offered each day of attendance that is balanced, safe, and appetizing, and meets the nutritional needs of the individual, including a beverage and/or other hydration. Special meals will be provided when prescribed by the participant's personal health care provider.

b. Additional Services. The following additional services shall be provided to all eligible CBAS beneficiaries as needed and as specified on the person's IPC:

i. Restorative physical therapy provided by a licensed, certified, or recognized physical therapist within his/her scope of practice. Pursuant to Section 1570.7(n) of the Health and Safety Code (H&S Code), physical therapy "may also be provided by an assistant or aide under the appropriate supervision of a licensed therapist, as determined by the licensed therapist. The therapy and services are provided to restore function when there is an expectation that the condition will improve significantly in a reasonable period of time, as determined by the multidisciplinary assessment team.

ii. Restorative occupational therapy provided by a licensed, certified, or recognized occupational therapist within his/her scope of practice. Pursuant to Section 1570.7(n) of the H&S Code, occupational therapy "may also be provided by an assistant or aide under the appropriate supervision of a licensed therapist, as determined by the licensed therapist. The therapy and services are provided to restore function, when there is an expectation that the condition will improve significantly in a reasonable period of time, as determined by the multidisciplinary assessment team.

iii. Speech therapy provided by a licensed, certified, or recognized speech therapist or speech therapy assistant within their scope of practice to restore function when there is an expectation that the participant's condition will improve significantly in a reasonable period of time as determined by the multidisciplinary assessment team.

iv. Behavioral health services for treatment or stabilization of a diagnosed mental disorder provided by a licensed, certified, or recognized mental health professional within his/her scope of practice. Individuals experiencing symptoms that are particularly severe or whose symptoms result in marked impairment in social functioning shall be referred by CBAS staff to the identified managed care plan, County Mental Health programs, or appropriate behavioral health professionals or services.

v. Registered dietician services provided by a registered dietician for the purpose of assisting the CBAS beneficiary and caregivers with proper nutrition and good nutritional habits, nutrition assessment, and dietary counseling and education if needed.

vi. Transportation, provided or arranged, to and from the CBAS beneficiary's place of residence and the CBAS center, when needed.

c. Individual Plan of Care (IPC).

The IPC is a written plan designed to provide the CBAS beneficiary with appropriate treatment in accordance with the assessed needs of the individual, as determined by the CBAS center and as specified in State law. The IPC is submitted as supporting documentation for level of service determination with the treatment authorization request.

The planning process and the development and review of the IPC will comply with the requirements at 42 CFR 441.301(c)(1) through (3) including specifying: 1) How the IPC will identify each enrollee's preferences, choices and abilities and the strategies to address those preferences, choices and abilities; 2) How the IPC will allow the enrollee to participate fully in any treatment or service planning discussion or meeting, including the opportunity to involve family, friends and professionals of the enrollee's choosing; 3) How the IPC will ensure that the enrollee has informed choices about treatment and service decisions; and 4) How the IPC process will be collaborative, recurring and involve an ongoing commitment to the enrollee.

The IPC is prepared by the CBAS center's multidisciplinary team based on the team's assessment of the beneficiary's medical, functional, and psychosocial status, and includes standardized components approved by the Department of Health Care Services.

Development of the IPC is based on principles of Person-Centered Planning, which is an individualized and ongoing process to develop individualized care plans that focus on a person's abilities and preferences for the delivery of services and supports.

Person- Centered Planning includes consideration of the current and unique bio-psycho-social- cultural and medical needs and history of the individual, as well as the person's functional level, support systems, and continuum of care needs. CBAS center staff, the beneficiary, and his/her support team shall review and update the beneficiary's IPC at least every six months or when there is a change in circumstance that may require a change in benefits. Such review and updates must include an evaluation of progress toward treatment goals and objectives, and reflect changes in the beneficiary's status or needs. The IPC shall include at a minimum:

i. Medical diagnoses

ii. Prescribed medications.

iii. Scheduled days at the CBAS center.

iv. Specific type, number of service units, and frequency of individual services to be rendered on a monthly basis.

v. Elements of the services that need to be linked to individual objectives, therapeutic goals, and duration of service(s).

vi. An individualized activity plan designed to meet the needs of the enrollee for social and therapeutic recreational activities.

vii. Participation in specific group activities.

viii. Transportation needs, provided or arranged, to and from CBAS participants' place of residence and the CBAS center, when needed, including special transportation.

ix. Special diet requirements, dietary counseling and education, if needed.

x. A plan for any other necessary services that the CBAS center will coordinate.

xi. IPCs will be reviewed and updated no less than every six months by the CBAS staff, the enrollee, and his/her support team. Such review must include a review of the participant's progress, goals, and objectives, as well as the IPC itself.

5.3. **Remote CBAS Services- Emergency Remote Services (ERS).** Under certain unique circumstances, CBAS ERS may be provided in response to the individual's person-centered needs. CBAS ERS (i.e., professional nursing care; personal care services; social services; behavioral health services; speech therapy; therapeutic activities; registered dietician-nutrition counseling; physical therapy; occupational therapy; meals) shall be provided in alternative service locations (e.g., community setting or participant's home) and/or, as appropriate, telephonically, via telehealth, live virtual video conferencing, as clinically appropriate.

a. These unique circumstances are limited to the following:

i. Qualified emergencies - state or local disasters such as wildfires and power outages (to allow for services prior to the official declaration of a formal public

health emergency (PHE)) as determined by the Department of Health Care Services or its contractor(s)); and,

ii. Personal emergencies - time-limited illness/injury, crises, or care transitions that temporarily, on a time-limited basis, prevent or restrict enrolled CBAS participants from receiving services, in-person, at the CBAS center (subject to approval by the beneficiary's managed care plan, or by the Department of Health Care Services or its contractor(s) for beneficiaries exempt from managed care).

b. These special circumstances are time-limited and vary based on the unique circumstances and identified needs of the participant as documented in the participant's individual care plan. Participants will be assessed at least every three months as part of the reauthorization of the individual's care plan and a review for a continued need for remote/telehealth delivery of CBAS services.

5.4. **CBAS Provider Specifications.** CBAS center staff shall include licensed and registered nurses; licensed physical, occupational, and speech therapists; licensed behavioral health specialists; registered dieticians; social workers; activity coordinators; and a variety of other non-licensed staff such as program aides who assist in providing services.

a. Licensed, registered, certified, or recognized staff under California State scope of practice statutes shall provide services within their individual scope of practice and receive supervision required under their scope of practice laws.

b. All staff shall have necessary experience and receive appropriate on-site orientation and training prior to performing assigned duties. All staff will be supervised by CBAS center or administrative staff.

c. The Department of Health Care Services maintains Standards of Participation for all CBAS providers which are found in Attachment H to these STCs. These Standards of Participation are hereby incorporated by reference and can be found on the Department of Health Care Services and California Department of Aging (CDA) websites. Any changes in the CBAS Provider Standards of Participation must be approved by CMS.

d. CBAS providers approved for provision of CBAS Emergency Remote Services must:

i. Maintain regular communication with the participant via phone, email, other electronic device, or in-person visits in order to assess need related to known health status and conditions, as well as emerging needs that the participant or caregiver is reporting.

ii. Maintain phone and email access for participant and family support, to be staffed a minimum of six hours daily, during provider-defined hours of services, Monday through Friday.

iii. Assess participants' and caregivers' current needs related to known health status and conditions, as well as emerging needs that the participant or caregiver is reporting.

iv. Respond to needs and outcomes through targeted interventions and evaluate outcomes.

v. Communicate and coordinate with participants' networks of care supports based on identified and assessed need.

vi. CBAS providers will work with individual participants to ensure they have the proper support they need in the event of equipment/technology failure including, but not limited to, arranging for alternative tools/equipment, evaluation of the existence or availability of back-up power sources, alarms, additional person(s) to assist, etc.

vii. The CBAS provider will be required to identify back-up telehealth modality service delivery options or in-person/in-home visits in the instance that equipment/technology failure prevents the provision of services through telehealth.

viii. Arrange for delivery or deliver supplies based on assessed need, including, but not limited to, food items, hygiene products, and medical supplies. If needs cannot be addressed, staff will document efforts and reasons why needs could not be addressed. Note: Meals are limited to no more than two meals per day.

e. Medi-Cal certification requires that a CBAS provider adhere to federal and state laws and regulations regarding the confidentiality, security, and unauthorized disclosure of protected health information. The role of the provider in remote service delivery is to:

i. Explain privacy requirements and appropriately document in the individual's clinical records that the individual and/or the legal representative, when appropriate, has consented to receive CBAS services via telehealth.

ii. Confirm that the provider and the individual will use two-way, real-time communication technology that meets the requirements of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), and that the equipment is adequately suited for the individual's needs in order for remote service delivery.

5.5. **Responsibilities of Managed Care Plans for CBAS Benefits.** The responsibilities of managed care plans for the CBAS benefit shall be consistent with each individual managed care plan's contract with DHCS and with these STCs and shall include that plans do the following.

a. Contract Requirements for Managed Care Plans:

i. Contract with sufficient available CBAS providers in the managed care plans covered geographic service areas to address in a timely way the needs of their members who meet the CBAS eligibility criteria in STC 5.1(d). Sufficient means: providers that are adequate in number to meet the expected utilization of the enrolled population without a waitlist; geographically located within one hour's transportation time and appropriate for and proficient in addressing

enrollees' specialized health needs and acuity, communication, cultural and language needs and preferences.

ii. Plans may, but are not obligated to, contract for CBAS with providers licensed as ADHCs and authorized by the Department to provide CBAS on or after April 1, 2012. Plans are not obligated to develop new CBAS networks or capacity in geographical areas where CBAS capacity is limited or where ADHC was not available prior to April 1, 2012:

iii. Plans must ensure that telehealth delivery of the service will meet HIPAA requirements and the methodology is accepted by the HIPAA compliance officer.

iv. Where there is insufficient or non-existent CBAS capacity in the plan's covered geographic service area and ADHC had been available prior to April 1, 2012, the plan shall arrange for the delivery of appropriate plan-covered benefits and coordinate with community resources to assist members, who have similar clinical conditions as CBAS recipients, to remain in the community.

v. Confirm that every contracted CBAS provider is licensed, certified, enrolled in Medi-Cal, operating, and meets the managed care plan's credentialing and quality standards, including required Medi-Cal enrollment of staff.

i. The managed care plan may exclude any CBAS provider, to the extent that the managed care plan and CBAS provider cannot agree to terms, the CBAS provider does not meet the plan's credentialing, Medi-Cal enrollment, or quality standards, is terminated pursuant to the terms of the CBAS provider's contract with the managed care plan, or otherwise ceases its operations as a CBAS provider.

ii. The managed care plan shall provide the Department of Health Care Services a list of its contracted CBAS providers and its CBAS accessibility standards on an annual basis.

b. Eligibility and Authorization: Develop and implement policies and procedures for CBAS eligibility determination and authorization that address the eligibility criteria set forth in STC 5.1, the processes and timelines in State law, and all of the following:

i. Face-to-face eligibility determination (F2F) review requirements: the minimum standard is that the managed care plan will conduct an F2F eligibility determination for those beneficiaries who have not previously received CBAS through the plan, provided that the managed care plan has not already determined through another process that the member is clinically eligible for CBAS and in need for the start of CBAS to be expedited.

ii. Timeline for eligibility determination: the plan shall complete the F2F eligibility determination using the standard State-approved tool, as soon as feasible but no more than 30 calendar days from the initial eligibility inquiry request.

iii. The plan shall send approval or denial of eligibility for CBAS to the CBAS provider within one business day of the decision and notify the member in writing of his/her CBAS eligibility determination within two business days of the decision.

iv. Timeline for service authorization: After the CBAS eligibility determination and upon receipt of the CBAS treatment authorization request and individual plan of care (IPC), the plan shall:

i. Approve, modify or deny the authorization request within five business days of receipt of the authorization request, in accordance with State law.

ii. Determine level of service authorization (i.e., days per week authorized) based on the plan's review of the IPC submitted by the CBAS provider, consideration of the days per week recommended by the CBAS multidisciplinary team, and the medical necessity of the member.

iii. Notify the provider within one business day of the authorization decision. Notify the member within two business days of the authorization decision, including informing the member of his/her right to appeal and grievance processes in accordance with STC 5.1(f).

v. Timeline, process, and criteria for expedited eligibility determination and authorization for CBAS such that an F2F will not be performed. At a minimum, expedited authorization shall occur within 72 hours of receipt of a CBAS authorization request for individuals in a hospital or nursing facility whose discharge plan includes CBAS, or when the individual faces imminent and serious threat to his or her health.

vi. Written notices to the beneficiary shall include procedures and contacts for grievances and appeals.

vii. Guidelines for level of service authorization, including for the number of days per week and duration of authorization up to 12 months.

viii. Continuity of care: The managed care plan shall ensure continuity of care when members switch health plans and/or transfer from one CBAS center to another.

c. Coordination with CBAS Providers: Coordinate member care with CBAS providers to ensure the following:

i. CBAS IPCs are consistent with members' overall care plans and goals developed by the managed care plan.

ii. Exchange of participant discharge plan information, reports of incidents that threaten the welfare, health and safety of the participant, and significant changes in participant condition are conducted in a timely manner and facilitate care coordination.

iii. Clear communication pathways to appropriate plan personnel having responsibility for member eligibility determination, authorization, care planning, including identification of the lead care coordinator for members who have a care team, and utilization management.

iv. Written notification of plan policy and procedure changes, and a process to provide education and training for providers regarding any substantive changes that may be implemented, prior to the policy and procedure changes taking effect.

5.6. **CBAS Center Provider Oversight, Monitoring, and Reporting.** The state shall maintain a plan for oversight and monitoring of CBAS providers to ensure compliance and corrective action with provider standards, access, and delivery of quality care and services. Reporting of activity associated with the plan must be consistent with the Quarterly and Annual Progress Reports as set forth in this Waiver, Section XI, General Reporting Requirements and reported to CMS on a quarterly basis. Such oversight, monitoring and reporting shall include all of the following:

a. Enrollment Information: to include the number of CBAS FFS and managed care beneficiaries in each county, the capacity of each county, total determined eligible and ineligible beneficiaries per county quarterly, and explanation of probable cause of any negative change from quarter to quarter of more than five percent and description of any steps taken to address such variances.

b. The quarterly CBAS provider-reported data submitted to the CDA, identifying participant statistics, average daily attendance utilization at Centers, and capacity data.

c. Summary of operational/policy development/issues, including complaints, grievances and appeals. The State shall also include any trends discovered, the resolution of complaints and any actions taken or to be taken to prevent such issues, as appropriate.

d. Summary of all quality assurance/monitoring activity undertaken in compliance with STC 5.9, inclusive of all amendments.

e. CBAS FFS and Managed Care Access Monitoring. The Department of Health Care Services will assure sufficient CBAS access/capacity, through the mechanisms listed below, in every county where CBAS existed as of April 1, 2012.

i. Review the total number of individuals receiving a new assessment for CBAS vs. the total number of individuals obtaining ongoing CBAS and the number of participants obtaining unbundled services. CMS requires the State to report and review these metrics quarterly and upon a negative change from quarter to quarter of more than 5%, the State must provide a probable cause for the negative change as well as an analysis that addresses such variances.

ii. Review of overall utilization of CBAS, including newly opened or closed Centers. CMS requires the State to report and review these metrics quarterly and upon a negative change from quarter to quarter of more than 5%, the State

must provide a probable cause for the negative change as well as an analysis that addresses such variances.

iii. Review of FFS and managed care grievances and appeals by CBAS enrollees for areas including but not limited to: appeals related to requesting services and not able to receive services or receiving more limited services than requested, excessive drive/ride times to access CBAS, grievances around CBAS providers, grievances around FFS or managed care plan staff in assessment, any reports pertaining to health and welfare of individuals utilizing CBAS, and any reports pertaining to requesting a particular CBAS provider and unable to access that provider. CMS requires the State to report and review these metrics quarterly and upon a negative change from quarter to quarter of more than 5%, the State must provide a probable cause for the negative change as well as a corrective action plan that addresses such variances.

iv. A review of any other beneficiary or provider call center/line for complaints surrounding the provision of CBAS benefits through FFS or the managed care plans.

v. CMS requires the state to report and review these metrics quarterly and upon a negative change from quarter to quarter of more than 5%, the State must provide a probable cause for the negative change as well as a corrective action plan that addresses such variances.

vi. Review the CBAS provider capacity per county vs. the total number of beneficiaries enrolled for CBAS each quarter. CMS requires the State to report and review these metrics quarterly and upon a negative change from quarter to quarter of more than 5%, the State must provide a probable cause for the negative change as well as an analysis that addresses such variances. Evidence of sufficient access monitoring and a corrective action plan must be provided to the regional office annually and at any other time a significant impact to the Medi-Cal managed care plan's operations are administered.

vii. If it is found that the State did not meet the monitoring mechanisms listed above, CMS reserves the right to withhold a portion or all of FFP related to CBAS until which time the State provides adequate documentation assuring sufficient access.

5.7. **HCBS Electronic Visit Verification System**. For any in-home services provided to CBAS beneficiaries under the CBAS Emergency Remote Services, the state will demonstrate compliance with the Electronic Visit Verification System (EVV) requirements for personal care services (PCS) and home health services in accordance with section 12006 of the 21st Century CURES Act.

5.8. **Quality Improvement Strategy for 1915(c) or 1915(i) Approvable HCBS Services:** For services that could have been authorized to individuals under a 1915(c) waiver or under a 1915(i) HCBS State plan, the state's Quality Assessment and Performance Improvement Plan must encompass long-term services and supports (LTSS) specific measures set forth in the federal managed care rule at 42 CFR 438.330 and should also reflect how the state will assess

and improve performance to demonstrate compliance with applicable federal waiver assurances set forth in 42 CFR 441.301 and 441.302. The state will work on establishing the performance measures with CMS to ensure there is no duplication of effort and will report on the initial series within one year of finalization and from that point will report annually. The performance measures shall include the following components:

a. Administrative Authority: A performance measure should be developed and tracked for any authority that the Department of Healthcare Services delegates to another agency, unless already captured in another performance measure.

b. Level of Care or Eligibility based on 1115 Requirements: Performance measures are required for the following: applicants with a reasonable likelihood of needing services receive a level of care determination or an evaluation for HCBS eligibility, and the processes for determining level of care or eligibility for HCBS are followed as documented. While a performance measure for annual levels of care/eligibility is not required to be reported, the state is expected to be sure that annual levels of care/eligibility are determined.

c. Qualified Providers: The state must have performance measures that track that providers meet licensure/certification standards, that non-certified providers are monitored to assure adherence to demonstration requirements, and that the state verifies that training is given to providers in accordance with the demonstration.

d. Service Plan: The state must demonstrate it has designed and implemented an effective system for reviewing the adequacy of service plans for HCBS participants. Performance measures are required for choice of waiver services and providers, service plans address all assessed needs and personal goals, and services are delivered in accordance with the service plan including the type, scope, amount, duration, and frequency specified in the service plan.

e. Health and Welfare: The state must demonstrate it has designed and implemented an effective system for assuring HCBS participants health and welfare. The state must have performance measures that track that on an ongoing basis it identifies, addresses and seeks to prevent instances of abuse, neglect, exploitation and unexplained death; that an incident management system is in place that effectively resolves incidents and prevents further singular incidents to the extent possible; that state policies and procedures for the use or prohibition of restrictive interventions are followed; and, that the state establishes overall health care standards and monitors those standards based on the responsibility of the service provider as stated in the approved demonstration.

f. Financial Accountability: The state must demonstrate that it has designed and implemented an adequate system for ensuring financial accountability of the HCBS program. The state must demonstrate actuarial soundness on an annual basis pursuant to 42 CFR 438.

5.9. **Monitoring and Reporting of HCBS Quality Assurance:** The state will submit a report to CMS which includes evidence on the status of the HCBS quality assurances and measures that

adheres to the requirements outlined in the March 12, 2014, CMS Informational Bulletin, Modifications to Quality Measures and Reporting in 1915(c) Home and Community-Based Waivers as an attachment to its Annual Monitoring Report described in STC 14.5.

The state must report, as an attachment to its Annual Monitoring Reports (refer to STC 14.5) identified issues and gaps found during the oversight and monitoring of the HCBS demonstration assurances, an explanation of how these deficiencies have been or are being corrected, as well as the steps that have been taken to ensure that these deficiencies do not reoccur. The state must also report on the number of substantiated instances of abuse, neglect, exploitation and/or death, the actions taken regarding the incidents and how they were resolved. The state will work on establishing the performance measures with CMS to ensure there is no duplication of effort and will report on the initial series within one year of finalization and from that point will report annually.

5.10. **Beneficiary Protections**:

a. Person-centered planning. The state assures there is a person-centered service plan for each individual determined to be eligible for HCBS. The person-centered service plan is developed using a person-centered service planning process in accordance with 42 CFR 441.301(c)(1) (1915(c)) or 42 CFR 441.725(c) (1915(i)), and the written person-centered service plan meets federal requirements at 42 CFR 441.301(c)(2) (1915(c)) or 42 CFR 441.725(b) (1915(i)). The person-centered service plan is reviewed and revised upon reassessment of functional need as required by 42 CFR 441.301(c)(3) or 42 CFR 441.365(e), at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual.

b. Conflict of Interest. The state agrees that the entity that authorizes the services is external to the agency or agencies that provide the HCB services. The state also agrees that appropriate separation of assessment, treatment planning and service provision functions are incorporated into the state's conflict of interest policies.

c. Each beneficiary eligible for long term services and supports will have informed choice on their option to self-direct LTSS, have a designated representative direct LTSS on their behalf, or select traditional agency-based service delivery. Both level of care assessment and person-centered service planning personnel will receive training on these options (for use in MLTSS programs with self-direction).

d. The state, either directly or through its managed care plan contracts, must ensure that participants' engagement and community participation is supported to the fullest extent desired by each participant.

5.11. **CBAS Provider Reimbursement**.

a. DHCS shall reimburse CBAS providers serving eligible Medi-Cal beneficiaries who are not enrolled in Medi-Cal managed care at an all-inclusive rate per day of attendance per beneficiary. DHCS shall publish such rates.

b. Managed care plans shall reimburse contracted CBAS providers pursuant to a reimbursement structure that shall include an all-inclusive rate per day of attendance per plan beneficiary, or be otherwise reflective of the acuity and/or level of care of the plan beneficiary population served by the CBAS providers. Per Welfare and Institutions Code section 14184.201(d)(4), managed care plans shall reimburse contracted CBAS providers at the rate the CBAS provider would have been paid by DHCS for CBAS services under the fee-for-service delivery system (described in 19(b)(iii) above), unless the plan and contracted CBAS provider mutually agree to a different reimbursement amount. Managed care plans may include incentive payment adjustments and performance and/or quality standards in their reimbursement structure in paying CBAS providers.

5.12. **CBAS Program Integrity.**

a. Following a determination that a credible allegation of fraud exists involving a CBAS provider, the state shall notify managed care plans promptly of the finding. The state must require managed care plans to report, in a timeframe and manner as specified by the state, but no less frequently than quarterly, to the state all payments made to the applicable CBAS provider for CBAS services provided after the date of notification; the state must disclose this information to CMS beginning with payments made on or after April 1, 2016.

b. If the credible allegation of fraud is proven:

i. For purposes of claiming FFP, the state must adjust its claiming associated with payments to a managed care plan to account for an amount equal to what the managed care plan has paid to an applicable CBAS provider for dates of services occurring after the state has notified the managed care plan that the CBAS provider has been referred for investigation. The state shall refund the federal share associated with such payments in accordance with Attachment S.

ii. The state may recoup from its payment to a managed care plan an amount equal to what the managed care plan has paid to the applicable CBAS provider for dates of service after the state has notified the managed care plan that the CBAS provider has been referred for investigation.

iii. Additional specifications pertaining to these requirements including information about how payments and claiming will be adjusted and MCPs will be notified are set forth in Attachment S in accordance with the Medicaid Managed Care rule at 80 FR 31097 or the finalized 42 CFR 438

B. Providing Access and Transforming Health

5.13. **Providing Access and Transforming Health (PATH) Overview.** The state is authorized up to $1.85 billion (total computable) in expenditure authority for PATH, subject to the provisions in STC 5.16. PATH is one-time transitional funding that will support the state's efforts to maintain, build, and scale the capacity necessary to transition the Whole Person Care (WPC) and Health Home Pilots approved in the Medi-Cal 2020 demonstration to the CalAIM initiative.

PATH funding will ensure Medi-Cal beneficiaries have continuous access to benefits and services previously covered by WPC Pilots as these activities are integrated into Medi-Cal managed care plans (MCPs). It will also support planning and information technology (IT) investments for pre-release services and reentry activities. Examples of pre-release services and reentry activities include pre-release application and suspension/unsuspension processes, assessment of qualification for reentry demonstration initiative services, the provision of pre-release services for up to 90 days immediately prior to the expected date of release, and care coordination to support reentry planning. Unless otherwise specified, this expenditure authority is authorized over the five years of the demonstration from January 1, 2022 through December 31, 2026. This funding will be administered by DHCS or a Third Party Administrator (TPA). All of PATH funding, except for sustaining services below, will be considered an administrative cost and will be paid at the 50 percent regular administrative expenditure matching rate. Funding for Sustaining Services Through the Transition to Managed Care will be matched at the medical assistance payment (MAP) matching rate.

a. The state shall select Qualified Applicants, described in STC 5.19, to receive payments under PATH, as outlined in STC 5.13(d) below, to support counties, providers, and MCPs as they sustain, transition, and expand WPC and Health Home Pilot services and interventions initially authorized under the Medi-Cal 2020 demonstration to statewide services available through the Medi-Cal managed care delivery system. PATH funding will support the development of capacity, transitional non-service expenditures, infrastructure, and systems across the state, including in those counties that did not participate in WPC.

b. The state and Qualified Applicants as defined in STC 5.19 will be subject to requirements around eligibility for funding, program integrity, and evaluation, as outlined in the PATH STCs, PATH Monitoring Protocol, CalAIM demonstration reporting, and the CalAIM demonstration evaluation approach in STC 15.4.

c. A former "WPC Lead Entity" refers to the cities, county agencies, designated public hospitals, district municipal public hospitals, or federally recognized tribes and tribal health programs that participated in the Whole Person Care Pilots as authorized and defined under the Medi-Cal 2020 demonstration.

d. For applicable initiatives, Qualified Applicants must provide DHCS or the TPA with a specific request and justification as part of an application for funding. DHCS will determine a target amount of funding to be allocated within each county as part of the Ensuring Access to Services During Transition and Delivery System and Innovation Program to promote appropriate distribution of funding across the state. Target funding amounts will likely be adjusted over time to meet varying demand and will be determined based on a combination of factors including, for example, enrollment, access/affordability and other indicators.

e. PATH funding must not supplant funding provided by other Federal, state or local funding sources. The PATH payments do not offset payment amounts otherwise payable to and by MCPs for Medi-Cal beneficiaries, or replace provider payments from MCPs. The PATH funding must not supplant funding provided for the state's

Department of Corrections (DOC) for the purchase of technology for state prisons, county jails, and youth correction facilities.

5.14. **PATH Programs Description**. Ensuring Access to Services During Transition and Delivery System Transformation and Innovation Program, which is comprised of five initiatives:

a. **Support for Sustaining Services Through the Transition to Managed Care.** PATH funding is available for the Support for Sustaining Services Through the Transition to Managed Care Initiative for former WPC Pilot Lead Entities to sustain existing WPC Pilot services that will continue under CalAIM as Community Supports, as defined in Section VIII and the 1915(b) waiver. This funding is intended to ensure continuity of services for individuals when a Community Support is not adopted by the MCP on January 1, 2022, but there is a commitment from the MCP that it will elect to offer the Community Support before January 1, 2024. Funding for services will be matched at MAP for these specific services under PATH expenditures. Allowable Services may assist in the continuity of access to WPC services that are transitioning to CalAIM and may not be covered on "day one." For example:

i. Housing transition navigation services, housing tenancy and sustaining services, or asthma remediation;

ii. Sobering center services;

iii. Recuperative care services.

b. **The funding may not be used to initiate new services.** WPC services and infrastructure that will not continue under CalAIM (i.e., where there is no corresponding CalAIM Community Support) would not be eligible for this funding. Funding may not be used to fund WPC services indefinitely and may only be used to continue services until the services are picked up by MCPs no later than January 1, 2024. The payments do not offset payment amounts otherwise payable to and by MCPs for Medi-Cal beneficiaries, or supplant provider payments from MCPs.

c. **Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care.** PATH will make funding available to former WPC Pilot Lead Entities to maintain reentry services currently provided through former WPC Pilots that do not transition to managed care until January 1, 2023, or later. Direct funding is available for WPC Pilot Lead Entities, as well as ECM / Community Supports providers which work with jails, prisons, and youth correctional facilities to sustain existing WPC Pilot pre-release and reentry services that map to required ECM and MCP-offered Community Supports. Funding may be used only to pay former WPC Lead Entities for services provided. Some WPC services will not be covered by MCPs until mid-2022 or 2023; this funding may be used to sustain these services until they are transitioned to and paid for by MCPs. This funding will be matched at ADM for these specific PATH expenditures. The funding may not be used to initiate new services, sustain services that were provided in WPC but are not transitioning to CalAIM, or sustain services indefinitely without a plan to transition them to the

consolidated CalAIM Section 1915(b) waiver delivery system and other related authorities.

d. **Technical Assistance Marketplace.** PATH will make funding available for the provision of technical assistance (TA) to Qualified Applicants that are contracted with or that intend to contract with one or more MCPs as an ECM or Community Supports provider. This funding will be matched at ADM for these specific PATH expenditures. Qualified Applicants, as described in STC 5.19, can apply to the TPA for TA support. Allowable expenditures include, but are not limited to, the following, and once finalized will be included as an Operational Protocol at Attachment O within the STCs:

    i. Workforce training to support expansion of services to newly eligible populations or vulnerable populations (e.g., individuals who are experiencing homeless);

    ii. Technical assistance (e.g., through trainings, one-on-one consultations) mining EHR data to identify individuals newly eligible for ECM/Community Support (ILOS) services;

    iii. Developing and distributing in-depth guidance for implementing data sharing processes between providers and housing services organizations to connect members to housing community support services;

    iv. Providing specific training to support the development, coordination, and implementation for regional learning collaboratives/learning networks; and

    v. Detailed training on how to connect justice-involved individuals to housing services.

e. **Collaborative Planning and Implementation for ECM and Community Supports.** Expenditure authority will make funding available to establish and facilitate regional collaborative planning efforts to support readiness for CalAIM implementation. Regional collaborative planning efforts will be organized and facilitated by a TPA or Vendor, and should include at a minimum: MCPs, city, county, and other government agencies, county and community-based providers (including but not limited to public hospitals), CBOs, and Medi-Cal Tribal and Designees of Indian Health Programs contracted with or that intend to contract with MCPs as ECM or Community Supports providers. As the implementers of ECM and Community Supports, MCPs will not be eligible to receive funding through this initiative but are expected to participate in Collaborative Planning and Implementation initiatives ongoing in their service areas. This funding will be matched at ADM for these specific PATH expenditures. Allowable expenditures include, but are not limited to, the following, and once finalized, will be included as an Operational Protocol at Attachment O in the STCs.

    i. Support collaborative planning between MCPs and local stakeholders to identify and address gaps that may hinder implementation of ECM / Community Support services;

ii. Development of implementation plans to operationalize CalAIM and address ECM/Community Support service gaps using PATH funding;

iii. Identify and resolve ongoing ECM/Community Supports service delivery challenges through regular meetings and collaboration throughout the five-year CalAIM demonstration period; and

iv. Support development, coordination and implementation of virtual or in-person meetings to support ECM/Community Supports quality improvement efforts to ensure the delivery of high-quality services.

f. **Support for Expanding Access to Services.** Expenditure authority will make funding available to enable the transition, expansion and development of capacity and infrastructure necessary for city, county, and other government agencies, county and community-based providers (including but not limited to public hospitals), CBOs, and Medi-Cal Tribal and designees of Indian Health Programs contracted with or that intend to contract with MCPs as ECM or Community Supports providers. Allowable expenditures include, but are not limited to:

i. Hiring staff that will have a direct role in the execution and expansion of ECM/Community Supports services to boost capacity to assure access to these services;

ii. Supporting implementation of a closed-loop referral system to ensure individuals referred to needed services were able to access those services;

iii. Purchasing billing systems for newly available services; and

iv. Providing up front funding needed by providers/community-based organizations to deliver ECM/Community Supports services (e.g., purchasing infrastructure that refrigerates fresh food).

g. Eligible entities include, at a minimum, city, county and other government agencies, county and community-based providers (including but not limited to public hospitals), CBOs, and Medi-Cal Tribal and designees of Indian Health Programs.

a. Qualified Applicants must provide the TPA with a specific request and justification as part of an application for funding. DHCS will determine a target amount of funding to be allocated within each county as part of the Ensuring Access to Services During Transition and Delivery System Transformation and Innovation PATH Program to promote equitable distribution of funding across the state. Target funding amounts will likely be adjusted over time to meet varying demand and will be determined based on a combination of factors including, for example: MCP revenue, enrollment, access/affordability and other indicators.

5.15. **The PATH Reentry Demonstration Initiative Planning and Implementation Program** will provide expenditure authority to fund supports needed for Medi-Cal pre-release application and suspension/unsuspension planning and purchase of certified electronic health record technology to support Medi-Cal pre-release applications. PATH reentry demonstration initiative planning and implementation funds will also provide funding over the remaining four years of the

demonstration (beginning January 26, 2023) to support planning and IT investments that will enable implementation of the reentry demonstration initiative services covered in a period for up to 90 days immediately prior to the expected date of release, and for care coordination to support reentry. These investments will support collaboration and planning between DHCS, carceral facilities participating in the reentry demonstration initiative (e.g., state prisons, county jails, youth correctional facilities), county behavioral health agencies, community-based providers, probation offices, community health workers, managed care plans, sheriff's offices, local county social services departments, and others. The specific use of this funding will be proposed by the Qualified Applicant submitting the application, as the extent of approved funding will be determined according to the needs of the entity. Allowable expenditures are limited to only those that support Medicaid-related expenditures and/or demonstration-related expenditures (and not other activities or staff in the carceral facility) and must be properly cost-allocated to Medicaid or CHIP, as necessary, and once finalized will be included in the PATH Operational and Monitoring Protocol at Attachment O within the STCs. These allowable expenditures may include the following:

a. **Technology and IT Services.** Expenditures for the purchase of technology for Qualified Applicants which are to be used for assisting the reentry demonstration initiative population with Medicaid and CHIP application and enrollment for demonstration coverage (e.g., for inmates who would be eligible for CHIP but for their incarceration status) and coordinating pre-release and post-release services for enrollees. This includes the development of electronic interfaces for prisons, jails, and youth correctional facilities to communicate with Medicaid IT systems to support Medicaid enrollment and suspension/unsuspension and modifications. This also includes support to modify and enhance existing IT systems to create and improve data exchange and linkages with correctional facilities, local county social services departments, county behavioral health agencies, and others, such as managed care plans and community-based providers, in order to support the provision of pre-release services delivered in the period up to 90 days immediately prior to the expected date of release and reentry planning.

b. **Hiring of Staff and Training.** Expenditures for Qualified Applicants to recruit, hire, onboard, and train additional and newly assigned staff to assist with the coordination of Medi-Cal enrollment and suspension/unsuspension, as well as the provision of pre-release services in a period for up to 90 days immediately prior to the expected date of release and for care coordination to support reentry for justice-involved individuals. Qualified Applicants may also require training for staff focused on working effectively and appropriately with justice-involved individuals.

c. **Adoption of Certified Electronic Health Record Technology.** Expenditures for providers' purchase or necessary upgrades of certified electronic health record (EHR) technology and training for the staff that will use the EHR.

d. **Purchase of Billing Systems.** Expenditures for the purchase of billing systems for Qualified Applicants.

e. **Development of Protocols and Procedures.** Expenditures to support the specification of steps to be taken in preparation for and execution of the Medi-Cal enrollment process and suspension/unsuspension process for eligible individuals and coordination of a period for up to 90 days immediately prior to the expected date of release and reentry planning services for individuals qualifying for reentry demonstration initiative services.

f. **Additional Activities to Promote Collaboration.** Expenditures for additional activities that will advance collaboration between California's correctional institutions (county jails, youth correctional facilities, and state prisons), correctional agencies (e.g., California Department of Corrections and Rehabilitation, Sheriff's Offices, Probation Offices, etc.), local county social services departments, county behavioral health agencies, managed care plans, community-based providers and others involved in supporting and planning for the reentry demonstration initiative. This may include conferences and meetings convened with the agencies, organizations, and stakeholders involved in the initiative.

g. **Planning.** Expenditures for planning to focus on developing processes and information sharing protocols to: (1) identifying uninsured who are potentially eligible for Medi-Cal; (2) assisting with the completion of an application; (3) submitting an application to the county social services department or coordinating suspension/unsuspension; (4) screening for eligibility for pre-release services and reentry planning in a period for up to 90 days immediately prior to the expected date of release; (5) delivering necessary services to eligible individuals in a period for up to 90 days immediately prior to the expected date of release and care coordination to support reentry; and (6) establishing on-going oversight and monitoring process upon implementation.

h. **Other activities to support a milieu appropriate for provision of pre-release services.** Expenditures to provide a milieu appropriate for pre-release services in a period for up to 90 days immediately prior to the expected date of release, including accommodations for private space such as movable screen walls, desks, and chairs, to conduct assessments and interviews within correctional institutions, and support for installation of audio-visual equipment or other technology to support provision of pre-release services delivered via telehealth in a period for up to 90 days immediately prior to the expected date of release and care coordination to support reentry.

5.16. **PATH Funding Amounts.** PATH will be funded at the amounts described in the table below for each of the five (5) years of the CalAIM demonstration renewal, with funding phasing down over time as the CalAIM delivery system matures, totaling a maximum of $1.85 billion over five years. To the extent any of the funds associated with PATH are not fully expended or fully allocated in a given demonstration year, PATH funds may be reallocated across other PATH initiatives or years, subject to overall PATH expenditure limits. DHCS will detail within quarterly and annual reports when it reallocates PATH funding to a future DY and/or from one PATH initiative to another.

Table 1. Annual Total Computable PATH Funding by Initiative (Amounts in Millions)

Program	PY 1 (2022)	PY 2 (2023)	PY 3 (2024)	PY 4 (2025)	PY 5 (2026)	Total
Ensuring Access to Services During Transition and Delivery System Transformation and Innovation	$554	$430	$230	$70	$5	$1,289
Reentry Demonstration Initiative Planning and Implementation	$10	$350	$201	$0	$0	$561
Total	**$564**	**$780**	**$431**	**$70**	**$5**	**$1,850**

5.17. **PATH Funding Administration.** Subject to the funding limits in Table 1, DHCS will review, approve, and make payments for PATH funding in accordance with the requirements in these PATH STCs. DHCS will make payments directly to awarded Qualified Applicants or via the TPA to Qualified Applicants. DHCS will monitor payments to ensure compliance with PATH program requirements, applicable statutory and regulatory requirements, and to prevent fraud, waste and abuse. DHCS will ensure that it has appropriate mechanisms and methodologies in place to ensure the appropriate amount of FFP is claimed for each PATH program and initiative.

5.18. **Payment to Qualified Applicants and the TPA is limited to the overall PATH funding limit stipulated in Table 1.** Qualified Applicants and the TPA must attest to DHCS that they have appropriate funds controls between PATH funding and billing for Medi-Cal applicable state plan covered services.

a. DHCS will approve applicants, and administer and monitor funds for the Support for Sustaining Services Through the Transition to Managed Care, and Support for Sustaining Reentry Services Through the Transition to Managed Care initiatives. A TPA may administer and oversee funding for the other PATH initiatives, including the Reentry Demonstration Initiative Planning and Implementation Program.

b. For the Technical Assistance Marketplace, Collaborative Planning and Implementation of ECM and Community Supports, and Support for Expanding Access to Services initiatives, the TPA will be responsible for monitoring PATH payments to identify duplicate funding received by Qualified Applicants for covered Medi-Cal services or other payment programs, such as incentives. The TPA may also administer the Reentry Demonstration Initiative Planning and Implementation Program.

c. To the extent that the intensity of needs shift, PATH funds may be reallocated across PATH initiatives or future demonstration years, subject to overall PATH expenditure limits.

5.19. **Qualified Applicants.** Criteria for Qualified Applicants will vary by PATH initiative.

a. Qualified Applicants for the PATH Ensuring Access to Services During Transition and Delivery System Transformation and Innovation Program will also vary by initiative.

i. For the Support for Sustaining Services Through the Transition to Managed Care Initiative, former WPC Lead Entities, as defined under the Medi-Cal 2020

demonstration, will be eligible to become a Qualified Applicant to receive Support for Sustaining Services Through the Transition to Managed Care Initiative funding. Qualified Applicants may use funding from this initiative to sustain allowable WPC services until they transition to CalAIM.

ii. For the Support for Sustaining Reentry Services Through the Transition to Managed Care Initiative, former WPC Lead Entities, as defined under the Medi-Cal 2020 demonstration that have previously offered pre-release services as part of the WPC Pilots will be eligible to become a Qualified Applicant. Qualified Applicants may use funding from this initiative to sustain previously offered pre-release services until they transition to CalAIM.

iii. For the Technical Assistance Marketplace Initiative, Collaborative Planning and Implementation of ECM and Community Supports Initiative and Support for Expanding Access to Services, the following entities, at a minimum, will be eligible to become a Qualified Applicant to receive TA support: city, county, and other government agencies; county and community-based providers including but not limited to public hospitals, CBOs, and Medi-Cal Tribal and designees of Indian Health Programs contracted with or that intend to contract with MCPs as ECM or Community Supports providers; and other entities as approved by DHCS or the TPA.

b. Qualified Applicants for the Reentry Demonstration Initiative Planning and Implementation Program will include correctional institutions (county jails, youth correctional facilities, and state prisons), the California Department of Corrections and Rehabilitation, Probation Offices, Sheriff's Offices, county behavioral health agencies, county departments of social services, county departments of public health, and other entities as relevant to the needs of justice-involved individuals as approved by DHCS.

5.20. **Invoice and Application Process for Qualified Applicants**. Qualified Applicants will be required to submit invoices and/or applications, to be processed and evaluated by DHCS or the TPA, in order to receive PATH dollars. Funding will vary by initiative and by Qualified Applicant. If a selected applicant fails to substantially comply with any of the terms of the approved application, DHCS will take corrective action and may terminate agreement and redirect applicable funds to other selected applicants who qualify for additional PATH funds or to other Qualified Applicants whose programs were not previously selected for funding, in that same demonstration year or a future demonstration year, as applicable.

a. The invoice and/or application process for Qualified Applicants under the PATH "Ensuring Access to Services During Transition and Delivery System Transformation and Innovation" program will vary by initiative.

i. For the Support for Sustaining Services Through the Transition to Managed Care Initiative, Qualified Applicants must submit a standardized invoice for spending on permissible services.

ii. For the Support for Sustaining Reentry Services Through the Transition to Managed Care Initiative, Qualified Applicants must submit a standardized invoice for spending on permissible services.

iii. For the Technical Assistance Marketplace Initiative, Qualified Applicants must submit a standardized application to the TPA that outlines the request for TA or supporting resources, and other relevant information to be determined by DHCS.

iv. For the Collaborative Planning and Implementation Initiative, Qualified Applicants must submit a standardized application to the TPA outlining their interest and intent to establish and support local collaborative planning in the region and in collaboration with other entities, along with other relevant information to be determined by DHCS.

v. For the Support for Expanding Access to Services Initiative, the Qualified Applicant must submit a standardized application to the TPA outlining the intended purpose of the PATH funds, along with other relevant information to be determined by DHCS.

b. For the Reentry Demonstration Initiative Planning and Implementation Program, Qualified Applicants must submit a standardized application for participation and/or invoices in the format specified by DHCS for spending on permissible activities.

5.21. **Treatment of PATH Funds.** PATH payments are available to Qualified Applicants. PATH Payments shall not be considered direct reimbursement for expenditures or payments for new services. PATH payments are intended to support transitional non-service expenditures, interventions and non-Medicaid covered transitional services that support the transition from WPC Pilots and Health Home Program to CalAIM, expand access to needed services, and enable community-based providers to provide Community Supports.

PATH payments are not direct reimbursement for expenditures incurred by participating entities. PATH payments shall not be considered payments for services otherwise reimbursable under the Medi-Cal program, and therefore providers may continue to bill Medi-Cal and/or the Medi-Cal managed care plan for all applicable state plan covered services. PATH payments are not reimbursement for health care services that are recognized under these STCs or under the state plan. PATH payments should not be considered patient care revenue and should not be offset against the certified public expenditures incurred by government-operated health care systems and their affiliated government entity providers for health care services, disproportionate share hospital payments or administrative activities as defined under these STCs and/or under the state plan. The payments do not offset payment amounts otherwise payable to and by MCPs for Medi-Cal beneficiaries, or supplant provider payments from MCPs.

5.22. **PATH Progress Reports.** Qualified Applicants and the TPA receiving PATH funding shall submit progress reports in a manner and frequency specified by DHCS. Progress reports will include reporting on performance metrics that are standardized by PATH program and initiative. The state will work with the TPA to develop such performance metrics across PATH programs and initiatives. Qualified Applicants will also be responsible for determining entity-specific

milestones related to their need for and use of PATH funding. These proposed milestones may be reviewed and approved by the state or the TPA, as appropriate, as a condition of funding receipt. In these cases, the Qualified Applicant will be expected to provide narrative reports in a frequency and manner established by the state and the TPA. Ongoing funding may be based on progress towards or achievement of those milestones and performance metrics, as determined by the state. Failure to adequately meet or report on milestones and performance metrics may preclude a Qualified Applicant from receiving future PATH funding.

Wherever possible, with respect to the two Support for Sustaining Services Initiatives, progress reports will seek to collect information that may be used to understand race, ethnicity, geographic location, and other characteristics of individuals who receive services associated with these two initiatives. For other PATH initiatives, the state will work to prioritize support for Qualified Applicants that have been historically underutilized and/or under-resourced, and/or that serve the diverse needs of the state's population.

5.23. **PATH Funding and Mechanics Protocol.** Within one hundred and twenty (120) days of CMS approval of the terms and conditions for the CalAIM renewal, CMS and the state will develop and finalize a PATH Funding and Mechanics Protocol that will outline additional detail on the milestones and award criteria for the Qualified Applicants. As needed, the PATH Funding and Mechanics Protocol will be updated within 180 days following approval of the reentry demonstration and DSHP initiatives to address these components outlined in these STCs.

5.24. **PATH Program Integrity.** DHCS will ensure that all PATH payments are made consistent with these STCs. Within one hundred and twenty (120) days of CMS approval of the STCs for the CalAIM renewal, CMS and the state will develop and finalize a PATH Operational and Monitoring Protocol that will outline DHCS' approach to PATH program integrity, oversight, monitoring, and performance metrics, including any required reporting to CMS. As needed, the PATH Operational and Monitoring Protocol will be updated within 180 days following approval of the reentry and DSHP initiatives to address these components outlined in these STCs. The state will ensure that PATH funding is subject to program integrity standards. Program integrity activities will include, at a minimum:

a. **Completing progress reporting on PATH-funded activities.** All PATH funding recipients will be expected to submit progress reports that document PATH-funded activities. Recipients will be required to attest to non-duplication of funding with other federal, state and local funds. The state or its contracted TPA will monitor for funding irregularities and potential duplication across all PATH programs and initiatives.

b. **Participating in audit processes.** The state or its contracted TPA will conduct spot-audits to ensure that PATH funds are being spent on permissible uses and are being documented and reported on appropriately.

c. **Ensuring action is taken to address noncompliance.** The state or its contracted TPA will ensure that action is taken to address any identified non-compliance with PATH funding parameters. If the state determines that a funding recipient has failed to demonstrate appropriate performance, DHCS may impose corrective actions which

may include caps on funding, recoupment of funding, or discontinuation of PATH funding. The state may also impose corrective actions for a Qualified Applicant if it is determined that it is out of compliance with requirements as set forth in the STCs and attachments, the agreement between the Qualified Applicant and the state, and/or policy letters or guidance set forth by the state. Prior to initiating any corrective action on Qualified Applicants, the state shall provide the Qualified Applicants notice and an opportunity to comment regarding the identified area of non-compliance. CMS reserves the right to require DHCS to return FFP associated with recoupment of funding for Qualified Applicant and TPA noncompliance.

5.25. **Sources of Non-Federal Share Funding for PATH Expenditures.** The state must have permissible sources for the non-federal share of all PATH expenditures, which may include, as applicable to a specific PATH initiative or program, permissible intergovernmental transfers (IGTs) from qualifying governmental entities, or state funds. Sources of non-federal share funding shall not include impermissible provider taxes or non-bona fide provider-related donations under Section 1903(w), impermissible IGTs from providers, or federal funds received from federal programs other than Medicaid (unless expressly authorized by federal law to be used for claiming purposes, and the federal Medicaid funding is credited to the other federal funding source). For this purpose, federal funds do not include GPP payments, PATH payments, or patient care revenue received as payment for services rendered under programs such as Medicare or Medicaid.

For PATH expenditures derived from IGTs, the qualified funding entity shall certify that the funds transferred qualify for federal financial participation pursuant to 42 CFR part 433, subpart B, and not derived from the impermissible sources listed above.

C. Dually Eligible Enrollees in Medi-Cal Managed Care

5.26. Under the expenditure authority for the Duals Eligible Program, the state will align a dually eligible beneficiary's Medicaid plan with their Medicare Advantage (MA) Plan choice, to the extent the Medicare Advantage plan has an affiliated Medicaid plan. In counties where the state is authorizing exclusively aligned enrollment Dual Eligible Special Needs Plans (D-SNPs), the state will limit enrollment into D-SNPs without Medicaid managed care plans, further simplifying the health plan market for dually eligible individuals. The state is committed to implementing valuable aspects of integration, including integrated appeals and grievances, continuation of Medicare benefits pending appeal, integrated member materials, and care coordination that extends across Medicare and Medicaid benefits in counties where the state is authorizing the exclusively aligned enrollment D-SNP model. Aligned Medicare/Medicaid plans may also reduce inappropriate billing, improve alignment of Medicare and Medicaid networks, and improve access to care. This will include:

a. The state will develop a process by which the enrollment broker can directly facilitate immediate Medicaid plan disenrollment should the beneficiary need be urgent/medically necessary, particularly during the last quarter of the calendar year. In addition, the Cal MediConnect Ombudsman, and any successor program, can make a warm handoff to the enrollment broker to facilitate immediate Medicaid plan disenrollment in the circumstances described above.

b. With the consultation of stakeholders through the Duals & LTSS Workgroup, the state will implement continuity of care requirements to support beneficiary access to prior providers until, at a minimum, the beneficiary has the opportunity to change Medicaid plans.

c. The state will ensure that beneficiary communications from the state and from plans in counties with exclusively aligned enrollment D-SNPs explain the benefits of enrollment in integrated care, and in all counties with Medicaid plan and MA alignment the beneficiary communications explain the opportunities, process, and timing for changing Medicaid plans. Beneficiary communications will include contact information for Health Insurance Counseling and Advisory Program (HICAP) and ombudsman services.

d. DHCS will develop and implement the necessary system changes to effectuate exclusively aligned enrollment for D-SNPs aligned with the Medicaid managed care plans. The state will work collaboratively with advocates, health plans, and CMS to develop and implement a long-term system.

6. DRUG MEDI-CAL ORGANIZED DELIVERY SYSTEM

6.1. **Drug Medi-Cal Organized Delivery System.** The Drug Medi-Cal Organized Delivery System (DMC-ODS) is a program for the organized delivery of substance use disorder (SUD) services to Medi-Cal-eligible individuals with SUD that reside in a county that elects to participate in the DMC-ODS (previously and hereafter referred to as DMC-ODS beneficiaries). Since the DMC-ODS pilot program began in 2015, all California counties had the option to participate in the program to provide their resident Medi-Cal beneficiaries with a range of evidence-based SUD treatment services in addition to those available under the Medi-Cal State Plan. Originally authorized by the Medi-Cal 2020 demonstration, most components of DMC-ODS are authorized under California's Section 1915(b) waiver (for service delivery within a regional managed care environment) and California's Medicaid State Plan (for benefits coverage), as of January 1, 2022. This CalAIM demonstration will continue to provide the state with authority to claim federal financial participation (FFP) for high quality, clinically appropriate SUD treatment services for DMC-ODS beneficiaries who are short-term residents in residential and inpatient treatment settings that qualify as an IMD. The CalAIM demonstration will continue to test whether this authority will increase access to evidence-based treatment services and improve overall health and long-term outcomes for those with SUD when a full continuum of care is provided. Critical elements of the DMC-ODS Program continue to include providing a continuum of care and patient assessment and placement tools modeled after the American Society of Addiction Medicine (ASAM) Criteria.

During the demonstration period, the state seeks to continue achieving the following goals:

a. Increased rates of identification, initiation, and engagement in treatment;

b. Increased adherence to and retention in treatment;

c. Reductions in overdose deaths, particularly those due to opioids;

d. Reduced utilization of emergency departments and inpatient hospital settings for treatment where the utilization is preventable or medically inappropriate through improved access to other continuum of care services;

e. Fewer readmissions to the same or higher level of care where the readmission is preventable or medically inappropriate; and

f. Improved access to care for physical health conditions among beneficiaries.

DMC-ODS Program. Under this demonstration, DMC-ODS beneficiaries will continue to have access to high-quality, evidence-based SUD treatment services including services provided in residential and inpatient treatment settings that qualify as an IMD, which are not otherwise reimbursable expenditures under section 1903 of the Act in the absence of the expenditure authority granted herein. The state will continue to be eligible to receive FFP for DMC-ODS beneficiaries residing in IMDs under the terms of this demonstration for coverage of medical assistance, including SUD benefits that would otherwise be reimbursable if the beneficiary were not residing in an IMD. California will continue to aim for a statewide average length of stay of 30 days or less in residential treatment settings, to be monitored pursuant to the SUD Monitoring Protocol as outlined in STC 6.5 below. The ASAM Criteria assessment shall continue to be used for all DMC-ODS beneficiaries to determine placement into the appropriate level of care.

In counties that do not opt into the DMC-ODS Program, beneficiaries receive only the "Substance Use Disorder Treatment Services" covered under California's Medicaid State Plan, they are not eligible to receive the "Expanded SUD Treatment Services" covered under the State Plan which are limited to beneficiaries residing in DMC-ODS counties.

Beneficiaries under the age of 21 are eligible to receive coverable Medicaid services pursuant to the Early and Periodic Screening, Diagnostic and Treatment (EPSDT) mandate. Under the EPSDT mandate, beneficiaries under the age of 21 are eligible to receive all appropriate and medically necessary services needed to correct and ameliorate health conditions that are coverable under section 1905(a) of the Act. Nothing in the DMC-ODS overrides any EPSDT requirements. Counties remain responsible for the provision of medically necessary DMC-ODS services pursuant to the EPSDT mandate.

As outlined in Table 2 below, DMC-ODS benefits reflect a continuum of care that ensures that beneficiaries can enter SUD treatment at a level appropriate to their needs and step up or down to a different intensity of treatment based on their responses. The ASAM Criteria Assessment shall be used for all beneficiaries to determine placement into the appropriate level of care. DMC-ODS counties must provide independent review for residential services within 24 hours of the submission of the request by the provider. Room and board costs are not considered allowable costs for residential treatment service providers unless they qualify as inpatient facilities under section 1905(a) of the Act.

Table 2: ASAM Criteria Continuum of Care Services and the DMC-ODS System		
Benefit	**Medicaid authorities**	**Required or Optional for DMC-ODS Counties**
Screening, Assessment, Brief Intervention, and Referral to Treatment (SABIRT) and Early Intervention	State plan (individual services covered) SABIRT is delivered through fee-for-service (FFS) and Managed Care Plan (MCPs) delivery systems for beneficiaries aged 11 years and older Early intervention services (excluding to SABIRT) are available in DMC-ODS and Drug Medi-Cal for beneficiaries under age 21	Required • Coordination with SABIRT delivered through FFS/MCPs • Additional early intervention services for beneficiaries under age 21
Outpatient services (also known as Outpatient Drug Free)	State plan (individual services covered)	Required
Intensive outpatient services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Required
Partial hospitalization services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Optional
Residential/inpatient services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Required • At least one ASAM level of care initially • ASAM Levels 3.5 available within two years • ASAM Levels 3.1 and 3.3 available within three years • Coordination with ASAM Levels 3.7 and

Table 2: ASAM Criteria Continuum of Care Services and the DMC-ODS System		
Benefit	**Medicaid authorities**	**Required or Optional for DMC-ODS Counties**
		4.0 delivered through FFS/MCPs Optional • ASAM Levels 3.7 and 4.0
Withdrawal management services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Required • Coordination with ASAM Levels 3.7-WM and 4.0-WM delivered through FFS/MCPs • At least one level of withdrawal management (ASAM Levels 1-WM, 2-WM, 3.2-WM, 3.7-WM, or 4-WM) Optional • Additional levels of withdrawal management
Narcotic Treatment Program services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Required
Medications for Addiction Treatment for Alcohol Use Disorders and Other Non-Opioid Substance Use Disorders	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Required
Medications for Addiction Treatment for Opioid Use Disorders	State plan (individual services covered)	Required

Table 2: ASAM Criteria Continuum of Care Services and the DMC-ODS System		
Benefit	**Medicaid authorities**	**Required or Optional for DMC-ODS Counties**
	1115 expenditure authorityfor services provided to individuals in IMDs	
Recovery Services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Required
Peer Support Services	State plan (individual services covered) 1115 expenditure authority for services provided to individuals in IMDs	Optional
Contingency management services	1115 expenditure authority (individual services covered)	Optional
Care Coordination services	State plan 1115 expenditure authority for services provided to individuals in IMDs	Required
Clinician consultation services	State plan (reimbursable activity; not a distinct service) 1115 expenditure authority for services provided to individuals in IMDs	Required
Traditional health care practices	1115 expenditure authority (individual services covered)	Required

6.2. **DMC-ODS County Requirements.** The following requirements apply to counties that participated in DMC-ODS as part of the Medi-Cal 2020 demonstration and new DMC-ODS counties as outlined in their approved County Implementation Plan and managed care contract.

a. **Access to Critical Levels of Care.** DMC-ODS counties are required to cover all mandatory DMC-ODS benefits and optional DMC-ODS it has elected to provide, as outlined in Table 2 above.

b. **Use of Evidence-based SUD-specific Patient Placement Criteria.** DMC-ODS counties are required to ensure the ASAM Criteria is used for all beneficiaries to determine placement into the appropriate level of care.

c. **Patient Placement.** DMC-ODS counties are required to implement a utilization management approach such that beneficiaries have access to SUD services at the appropriate level of care and that the interventions are appropriate for the diagnosis and level of care, including an independent process for reviewing placement in residential treatment settings.

d. **Use of Nationally Recognized SUD-specific Program Standards to set Provider Qualifications for Residential Treatment Facilities.** DMC-ODS counties are required to contract with residential SUD treatment providers that are licensed by DHCS, the California Department of Social Services (CDSS), or the California Department of Public Health (CDPH), as applicable. Residential providers licensed by DHCS offering ASAM levels 3.1, 3.3, 3.5, and 3.2-WM must also have a DHCS Level of Care (LOC) Designation and/or an ASAM LOC Certification that indicates that the program is capable of delivering care consistent with the ASAM criteria. Residential providers are issued licenses and a DHCS LOC Designation for a two-year period that may be extended for subsequent two-year periods. During the licensure and designation period, DHCS shall conduct at least one onsite program visit for compliance and may conduct announced or unannounced site visits throughout the period. Residential providers must furnish MAT directly or facilitate access to MAT offsite. Residential providers licensed by CDPH or CDSS offering ASAM Levels of Care 3.1, 3.3, or 3.5 without a DHCS Level of Care Designation will be required to obtain an ASAM LOC Certification by January 1, 2024.

e. **Sufficient Provider Capacity.** DMC-ODS counties are required to maintain and monitor a network of contracted, DMC-certified providers and that is sufficient to provide adequate access to all covered DMC-ODS services. Access for this purpose is defined as timeliness to care as specified below. In establishing and monitoring the network, each DMC-ODS county must consider the following:

    i. Require its providers to meet State Department standards for timely access to care and services as specified in the county implementation plan and state-county intergovernmental agreements (managed care contracts per federal definition). Medical attention for emergency and crisis medical conditions must be provided immediately.

    ii. The anticipated number of Medi-Cal eligible beneficiaries.

    iii. The expected utilization of services, taking into account the characteristics and substance use disorder needs of beneficiaries.

    iv. The expected number and types of providers in terms of training and experience needed to meet expected utilization.

    v. The number of network providers who are not accepting new beneficiaries.

vi. The geographic location of providers and their accessibility to beneficiaries, considering distance, travel time, means of transportation ordinarily used by Medi-Cal beneficiaries, and physical access for beneficiaries with disabilities

f. **Implementation of Comprehensive Treatment and Prevention Strategies to Address Opioid Abuse and SUD/OUD.** To the extent applicable, DMC-ODS counties are required to comply with opioid prescribing guidelines, overdose prevention initiative, and other interventions to prevent prescription drug misuse and coverage of and access to naloxone for overdose reversal, including but not limited to those developed by DHCS and CDPH.

g. **Improved Care Coordination and Transitions Between Levels of Care.** DMC-ODS counties are required to implement a care coordination plan to ensure that beneficiaries successfully transition between levels of SUD care (i.e. withdrawal management, residential, outpatient) without disruptions to services. In addition to specifying how beneficiaries will transition across levels of acute and short-term SUD care without gaps in treatment, DMC-ODS counties will describe how beneficiaries will access recovery supports and services immediately after discharge or upon completion of an acute care stay, with the goal of sustained engagement and long-term retention in SUD and behavioral health treatment.

h. **SUD Health IT Plan.** Implementation of the milestones and Metrics as detailed in STC 6.3 or Attachment E.

6.3. **SUD Health Information Technology Plan ("Health IT Plan").** The Health IT Plan applies to all states where the Health IT functionalities are expected to impact beneficiaries within the demonstration. As outlined in SMDL #18-011 and #17-003, respectively, states must submit to CMS the applicable Health IT Plan, to be included as Attachment E to the STCs, to develop infrastructure and capabilities consistent with the requirements outlined in the SUD demonstration-type.

The Health IT Plan must detail the necessary health IT capabilities in place to support beneficiary health outcomes to address the SUD goals of the demonstration. The plan will also be used to identify areas of health IT ecosystem improvement. The plan must include implementation milestones and projected dates for achieving them (see Attachment E), and must be aligned with the state's broader State Medicaid Health IT Plan (SMHP) and, if applicable, the state's Behavioral Health (BH) IT Health Plan.

a. The state must include in its Monitoring Protocol an approach to monitoring its SUD Health IT Plan which will include performance metrics to be approved in advance by CMS.

b. The state must monitor progress, each DY, on the implementation of its SUD Health IT Plan in relationship to its milestones and timelines—and report on its progress to CMS in in an addendum to its Annual Report.

c. As applicable, the state should advance the standards identified in the 'Interoperability Standards Advisory—Best Available Standards and Implementation Specifications'

(ISA) in developing and implementing the state's SUD Health IT policies and in all related applicable State procurements (e.g., including managed care contracts) that are associated with this demonstration.

d. Where there are opportunities at the state- and provider-level (up to and including usage in MCO or ACO participation agreements) to leverage federal funds associated with a standard referenced in 45 CFR 170 Subpart B, the state should use the federally-recognized standards, barring another compelling state interest.

e. Where there are opportunities at the state- and provider-level to leverage federal funds associated with a standard not already referenced in 45 CFR 170 but included in the ISA, the state should use the federally-recognized ISA standards, barring no other compelling state interest.

f. Components of the Health IT Plan include:

    i. The Health IT Plan must describe the state's goals, each DY, to enhance the state's prescription drug monitoring program (PDMP).

    ii. The Health IT Plan must address how the state's PDMP will enhance ease of use for prescribers and other state and federal stakeholders. · This must also include plans to include PDMP interoperability with a statewide, regional or local Health Information Exchange. Additionally, the SUD Health IT Plan must describe ways in which the state will support clinicians in consulting the PDMP prior to prescribing a controlled substance—and reviewing the patients' history of controlled substance prescriptions—prior to the issuance of a Controlled Substance Schedule II (CSII) opioid prescription.

    iii. The Health IT Plan will, as applicable, describe the state's capabilities to leverage a master patient index (or master data management service, etc.) in support of SUD care delivery. Additionally, the Health IT Plan must describe current and future capabilities regarding PDMP queries—and the state's ability to properly match patients receiving opioid prescriptions with patients in the PDMP. The state will also indicate current efforts or plans to develop and/or utilize current patient index capability that supports the programmatic objectives of the demonstration.

    iv. The Health IT Plan will describe how the activities described in (i), (ii) and (iii) above will support broader state and federal efforts to diminish the likelihood of long-term opioid use directly correlated to clinician prescribing patterns.

    v. The Health IT Plan will describe the state's current and future capabilities to support providers implementing or expanding Health IT functionality in the following areas: 1) Referrals, 2) Electronic care plans and medical records, 3) Consent, 4) Interoperability, 5) Telehealth, 6) Alerting/analytics, and 7) Identity management.

    vi. In developing the Health IT Plan, states should use the following resources:

i. States may use federal resources available on Health IT.Gov (https://www.healthit.gov/topic/behavioral-health) including but not limited to "Behavioral Health and Physical Health Integration" and "Section 34: Opioid Epidemic and Health IT" (https://www.healthit.gov/playbook/health-information-exchange/).

ii. States may also use the CMS 1115 Health IT resources available on "Medicaid Program Alignment with State Systems to Advance HIT, HIE and Interoperability" at https://www.medicaid.gov/medicaid/data-and-systems/hie/index.html. States should review the "1115 Health IT Toolkit" for health IT considerations in conducting an assessment and developing their Health IT Plans.

iii. States may request from CMS technical assistance to conduct an assessment and develop plans to ensure they have the specific health IT infrastructure with regards to PDMP interoperability, electronic care plan sharing, care coordination, and behavioral health-physical health integration, to meet the goals of the demonstration.

6.4. **DMC-ODS Financing.** For claiming federal financial participation (FFP), Counties will certify the total allowable expenditures incurred in providing the DMC-ODS waiver services provided either through county-operated providers (based on actual costs, consistent with a cost allocation methodology if warranted), contracted fee-for-service providers or contracted managed care plans (based on actual expenditures). For contracted FFS providers, counties will propose county-specific rates except for the NTP/OTP modality and the State will approve or disapprove those rates. NTP/OTP reimbursement shall be set pursuant to the process set forth in Welfare and Institutions Code Section 14021.51. All NTP/OTP providers contracting with counties shall provide the state with financial data on an annual basis in a form and manner specified by the State. This data is to be collected for the purpose of setting the rates for NTP services. The provision in the Welfare and Institutions Code, Section 14124.24(h)) remains in effect and NTPs/OTPs will not be required to submit cost reports to the counties for the purpose of cost settlement.

a. If during the State review process, the State denies the proposed rates, the county will be provided the opportunity to adjust the rates and resubmit to the State. The State will retain all approval of the rates in order to assess that the rates are sufficient to ensure access to available DMC-ODS waiver services. Rates will be set in the State and County intergovernmental agreement. For contracted managed care plans, counties will reimburse the managed care organizations the contracted capitation rate. A CMS-approved CPE protocol, based on actual allowable costs, is required before FFP associated with waiver services is made available to the state. This approved CPE protocol (Attachment I) must explain the process the state will use to determine costs incurred by the counties under this demonstration.

b. Only state plan DMC services will be provided prior to the DHCS approval of the State/County intergovernmental agreement (managed care contract per federal definition) and executed by the County Board of Supervisors. State plan DMC services

will be reimbursed pursuant to the state plan reimbursement methodologies until a county is approved to begin DMC- ODS services.

c. SB 1020 (Statutes of 2012) created the permanent structure for 2011 Realignment. It codified the Behavioral Health Subaccount which funds programs including Drug Medi-Cal. Allocations of Realignment funds run on a fiscal year of October 1-September 30. The monthly allocations are dispersed to counties from the State Controller's Office. The Department of Finance develops schedules, in consultation with appropriate state agencies and the California State Association of Counties (CSAC), for the allocation of Behavioral Health Subaccount funds to the counties. The base has not yet been set, as the State assesses the expenditures by county for these programs. The state will continue to monitor the BH subaccount and counties to ensure that SUD is not artificially underspent.

d. Subject to the participation standards and process to be established by the State, counties may also pilot an alternative reimbursement structure for a DMC-ODS modality if both the provider of that modality and the county mutually and contractually agree to participate. This may include use of case rates. The State and CMS will have the final approval of any alternative reimbursement structure pilot proposed by the county, and such pilot structure must continue to meet the terms and conditions expressed herein, including but not limited to, the rate approval process described above.

e. This STC will remain operative until the effective date for the State's implementation of behavioral health payment reform no sooner than July 1, 2023, which will include a shift from the CPE-based framework to a prospective reimbursement rate methodology. The state will provide CMS with at least 30 days written notice prior to the effective date for behavioral health payment reform and the sunset of CPE-based payments for DMC-ODS, but the State will not be required to seek a formal demonstration amendment.

6.5. **SUD Monitoring Protocol.** The state must submit a Monitoring Protocol for the SUD programs authorized by this demonstration within one hundred fifty (150) calendar days after approval of the demonstration. The Monitoring Protocol must be developed in cooperation with CMS and is subject to CMS approval. The state must submit a revised Monitoring Protocol within sixty (60) calendar days after receipt of CMS's comments. Once approved, the SUD Monitoring Protocol will be incorporated into the STCs, as Attachment J. Progress on the performance measures identified in the Monitoring Protocol must be reported via the Quarterly and Annual Monitoring Reports. Components of the Monitoring Protocol include:

a. An assurance of the state's commitment and ability to report information relevant to each of the program implementation areas listed in these STCs;

b. A description of the methods of data collection and timeframes for reporting on the state's progress on required measures as part of the General Reporting Requirements described in Section XII of the demonstration; and

c. A description of baselines and targets to be achieved by the end of the demonstration. Where possible, baselines will be informed by state data, and targets will be benchmarked against performance in best practice settings.

6.6. **SUD Mid-Point Assessment.** The state must conduct an independent Mid-Point Assessment by December 31, 2024. This timeline will allow for the Mid-Point Assessment Report to capture approximately the first two-and-a-half years of program data during the CalAIM approval period, accounting for data run-out and data completeness. In the design, planning and conduction of the Mid-Point Assessment, the state will require that the independent assessor consult with key stakeholders including, but not limited to: representatives of DMC-ODS counties, SUD treatment providers, beneficiaries, and other key partners.

The state must require that the assessor provide a Mid-Point Assessment Report to the state that includes the methodologies used for examining progress and assessing risks, the limitations of the methodologies, its determinations and any recommendations. The state must provide a copy of the Mid-Point Assessment Report to CMS no later than sixty (60) days after December 31, 2024 and the state must brief CMS on the report, if requested. The state must submit a revised Mid-Point Assessment Report within sixty (60) calendar days after receipt of CMS's comments, if any.

Elements of the Mid-Point Assessment Report include:

a. A brief overview of how the state met each milestone outlined in the State Medicaid Director letter, SMD # 17-003 RE: Strategies to Address the Opioid Epidemic, dated November 1, 2017, through the implementation of California's DMC-ODC program under the Medi-Cal 2020 demonstration approval period, including any lessons learned for best practices and challenges in achieving the milestones. In addition, the Assessment must include an examination of progress toward meeting the targets for performance measures as approved in the SUD Monitoring Protocol;

b. A determination of factors that affected progress in achieving desired targets and goals in performance measures, to date;

c. A determination of factors likely to affect future performance on measure targets not yet met and an assessment about the risk of possibly missing those performance targets;

a. For measure targets at medium to high risk of not being met, recommendations for adjustments to the state's DMC-ODS implementation and operational approaches or to pertinent factors that the state can influence that will help ameliorate those risks and support improvement; and

d. An assessment of whether the state is on track to meet the budget neutrality requirements.

6.7. **Deferral of Federal Financial Participation (FFP) from IMD Claiming for Insufficient Progress Toward Performance Measure Targets and Failure to Report Measurement Data.** Up to $5,000,000 in FFP for DMC-ODS services in IMDs may be deferred if the state is

not making adequate progress in the required performance measures in the Monitoring Protocol agreed upon by the state and CMS. Once CMS determines the state has not made adequate progress, up to $5,000,000 will be deferred in the next calendar quarter and each calendar quarter thereafter until CMS has determined sufficient progress has been made.

7. CONTINGENCY MANAGEMENT SERVICES

7.1. Contingency Management Overview

a. Beginning no earlier than July 1, 2022, DHCS will implement a new contingency management benefit for eligible DMC-ODS beneficiaries with a substance use disorder in DMC-ODS counties that elect and are approved by DHCS to pilot the benefit. The pilots will allow California to evaluate and assess the effectiveness of a contingency management benefit before determining whether it should be available statewide.

b. Under the pilot, the contingency management benefit will be available in participating DMC-ODS counties, that opt and are approved by DHCS to provide this benefit, to qualified beneficiaries who meet the eligibility requirements described below and receive services from a non-residential DMC-ODS provider.

7.2. **Eligibility.** To qualify for the contingency management benefit, a Medi-Cal beneficiary must meet the following conditions:

a. Be enrolled in a comprehensive treatment program that offers other services (e.g., group or individual therapy) delivered in person or via telehealth;

b. Be assessed and determined to have a substance use disorder for which the contingency management benefit is medically necessary and appropriate based on the fidelity of treatment to the evidence-based practice. The presence of additional substance use disorders and/or diagnoses does not disqualify an individual from receiving the contingency management benefit;

c. Reside in a participating DMC-ODS county that elects and is approved by DHCS to pilot the Contingency Management benefit;

a. Not be enrolled in another contingency management program for substance use disorder;

d. Receive services from a non-residential DMC-ODS provider that offers the contingency management benefit in accordance with DHCS policies and procedures; and

e. Contingency management should never be used in place of medication treatment for addiction treatment (e.g., for opioid use disorder or alcohol use).

7.3. Service Description

a. The contingency management benefit consists of a series of motivational incentives for meeting treatment goals. The motivational incentives may consist of cash or cash equivalents, e.g., gift cards of low retail value, consistent with evidence-based clinical research for treating a substance use disorder and as described below. These motivational incentives are central to contingency management, based on the best available scientific evidence for treating a substance use disorder and not as an inducement to use other medical services.

b. The contingency management benefit utilizes an evidence-based approach that recognizes and reinforces individual positive behavior change consistent with substance non-use or treatment/medication adherence. The contingency management benefit provides motivational incentives for treatment/medication adherence or non-use of substances as evidenced by, for example, negative drug tests.

c. Contingency management is offered along with other therapeutic interventions, such as cognitive behavioral therapy, that meet the definition of rehabilitative services as defined by 1905(a) of the Social Security Act and 42 CFR 440.130(d).

d. For purposes of this demonstration, these motivational incentives are considered a Medicaid-covered item or service and are used to reinforce objectively verified, recovery behaviors using a clinically appropriate contingency management protocol consistent with evidence-based research. Consequently, neither the Federal anti-kickback statute (42 U.S.C. § 1320a-7b(b), "AKS") nor the civil monetary penalty provision prohibiting inducements to beneficiaries (42 U.S.C. 1320a-7a(a)(5), "Beneficiary Inducements CMP") would be implicated.

e. The contingency management benefit consists of a set of modest motivational incentives available for beneficiaries that meet treatment goals. Under the benefit, a beneficiary will be limited in motivational incentives during the course of a contingency management treatment episode as detailed in in the Procedures and Protocols in Attachment V, which will be submitted to CMS for review and approval before the program can be implemented.

    i. To qualify for a contingency management motivational incentive, a beneficiary must demonstrate treatment/medication adherence or non-use of substances.

    ii. The size, nature and distribution of all contingency management motivational incentives shall be determined in strict accordance with DHCS procedures and protocols, listed in Attachment V. These procedures and protocols will be based on established clinical research for contingency management. The following guardrails shall ensure the integrity of the contingency management benefit and mitigate the risk of fraud, waste or abuse associated with the motivational incentive:

        i. Providers have no discretion to determine the size or distribution of motivational incentives which will be determined by DHCS.

        ii. Motivational incentives may be managed and disbursed through a mobile or web-based incentive management software program that

includes strict safeguards against fraud and abuse that will be detailed in DHCS guidance and listed in the Procedures and Protocols Attachment V (as listed above).

iii. To calculate and generate the motivational incentives in accordance with the schedule in Attachment V, providers shall enter the evidence of the Medi-Cal beneficiary receiving the contingency management benefit into a mobile or web-based incentive management software program.

7.4. **DMC-ODS County Participation.** To participate in the contingency management pilot, a county must participate in DMC-ODS, submit an application, and be selected by DHCS.

a. The application process shall identify counties that meet at least the following standards:

i. Participating counties shall establish a network of providers that can provide contingency management in accordance with DHCS requirements.

ii. Participating counties shall monitor the ongoing performance, including fidelity of treatment to the evidence-based practice, of contingency management providers and work with DHCS to identify and support providers requiring further training or technical assistance in accordance with DHCS set standards, to be outlined in DHCS guidance.

b. DHCS will provide training, technical assistance and monitoring to counties throughout the implementation process. The training and technical assistance will be provided through a qualified contractor designated by DHCS, and will include staff training, provider readiness reviews, and ongoing technical assistance during the first phase of the pilot.

c. Participating counties and providers shall comply with any billing and data reporting requirements established by DHCS to support research, evaluation, and performance monitoring efforts, including but not limited to satisfactory claims submission, data and quality reporting, and survey participation.

7.5. **Eligible Contingency Management Providers**

a. The contingency management benefit will be delivered by DMC-ODS providers that meet specified programmatic standards and agree to deliver the contingency management benefit in strict accordance with standardized procedures and protocols that will be detailed in DHCS guidance and listed in the Procedures and Protocols Attachment V (as listed above).

b. To be eligible to offer the contingency management benefit, a provider shall offer the benefit in strict accordance with DHCS standards that will be outlined in DHCS guidance included in Attachment V and shall meet the following requirements:

i. Must serve beneficiaries residing in DMC-ODS counties that have been approved by DHCS for participation in the contingency management pilot;

ii. Must be enrolled in Medi-Cal, and certified to provide Medi-Cal and DMC-ODS services, and offer outpatient, intensive outpatient, narcotic treatment program, and/or partial hospitalization services;

iii. Require the staff providing or overseeing the contingency management benefit to participate in contingency management-specific training developed and offered by a qualified contractor designated by DHCS;

iv. Undergo a readiness review by DHCS and a qualified contractor designated by DHCS to ensure that they are capable to offer the contingency management benefit in accordance with DHCS standards that will be detailed in DHCS guidance; and

v. Participate in ongoing training and technical assistance as requested or identified by DMC-ODS counties or DHCS through ongoing monitoring to meet DHCS standards.

c. The following practitioners delivering care at qualified DMC-ODS providers can deliver the contingency management benefit through activities, such as administering point-of-care urine drug tests, informing beneficiaries of the results of the evidence/urine drug test, entering the results into the mobile or web-based application, providing educational information, and distributing motivational incentives, as part of the contingency management benefit:

i. Licensed Practitioner of the Healing Arts (LPHAs);

ii. SUD counselors that are either certified or registered by an organization that is recognized by DHCS and accredited with the National Commission for Certifying Agencies;

iii. Certified peer support specialists; and

iv. Other trained staff under supervision of an LPHA.

d. SUD providers will be required to offer accompanying DMC-ODS SUD treatment services and evidence-based practices for a substance use disorder and any other co-occurring substance use disorder in addition to contingency management services. These services may include individual, group and/or family counseling using a range of applicable evidence-based modalities and techniques, including but not limited to cognitive behavioral therapy, community reinforcement, motivational interviewing, care coordination, peer support services, medications for addiction treatment, recovery supports, withdrawal management, medication services, and patient education.

e. Pilot Evaluation. In alignment with the CalAIM demonstration evaluation requirements outlined in Section XII of these STCs, CA will conduct an evaluation of the effectiveness of the Contingency Management program to assess its overall effectiveness, including cost-effectiveness of these services, and its effects on beneficiary health and recovery outcomes. To the extent feasible, the state will conduct the evaluation to support assessment stratified by stimulant use disorder and other types of SUD.

8. COMMUNITY SUPPORTS

8.1. Community Supports Overview.

The state is authorized to use expenditure authority to provide Health-Related Social Needs (HRSN) services, specifically recuperative care and short-term post-hospitalization housing, through electing Medi-Cal managed care plans as part of an array of evidence-based, cost-effective, health-related "Community Supports" under the California Advancing and Innovating Medi-Cal (CalAIM) initiative, and must comply with the requirements of STC 8.6. Under the section 1115 demonstration, recuperative care and short-term post-hospitalization housing will be referred to as "Community Supports." The remaining other twelve (12) Community Supports are authorized, subject to the conditions enumerated in the 1915(b) waiver, via the Medi-Cal managed care plan contracts as in lieu of services (ILOS) pursuant to 42 CFR 438.3(e)(2) as part of CMS's review and consideration for approval of the managed care plan contracts for federal financial participation. By authorizing recuperative care and short-term post-hospitalization housing under the CalAIM demonstration, the state will be subject to the requirements detailed in the 1115 demonstration, outlined below, and will include such requirements in contracts between the state and managed care plans, as the operational construct for these two services. HRSN services must be clinically appropriate for the beneficiary and based on medical appropriateness using clinical and other health-related social needs criteria. The state is required to align clinical and social risk criteria across services and with other non-Medicaid social support agencies, to the extent possible.

Recuperative care and short-term post-hospitalization housing authorized under the CalAIM demonstration must be administered in a manner that is: (1) cost effective and medically appropriate; (2) voluntary for the Medi-Cal managed care plans to offer and the beneficiary to use; and (3) offered exclusively through managed care plans and incorporated into the development of capitation rates for electing managed care plans. These services will be consistent with STC 8.6 and STC 8.8 as demonstration-authorized services regarded as qualifying for Title XIX matching funds for populations who meet the eligibility criteria described in STC 8.5 and Attachment U.

8.2. **Service Delivery.** Consistent with the Medi-Cal managed care contract and DHCS guidance applicable to all Community Supports:

a. Recuperative care and short-term post-hospitalization services authorized under the CalAIM demonstration will only be available from electing Medi-Cal managed care plans.

b. Medi-Cal managed care plans have the option to provide one or both Community Supports authorized under this demonstration on a voluntary basis through contracted network providers, as further described in STC 8.3.

c. Medi-Cal managed care plans that elect to offer these demonstration-based Community Supports do not need to offer the services or settings statewide or in all counties in which the Medi-Cal managed care plan operates.

d. The state must require that each Medi-Cal managed care plan must report to DHCS the counties in which it intends to offer the Community Supports and any sub-county limitations on the availability of the service. Managed care plans must receive state approval and provide public notice of any such limitations on each Community Support, including specifying such limitations in the enrollee handbook.

e. Medi-Cal managed care plans will have the option to newly offer these services or change their election to offer these services every six (6) months.

f. Medi-Cal managed care plans may discontinue offering Community Supports annually with notice to DHCS and beneficiaries, as described in the Medi-Cal managed care plan contract.

8.3. **Contracted Providers.** Consistent with the Medi-Cal managed care contract and DHCS guidance and applicable to all Community Supports:

a. Electing Medi-Cal plans will contract with Community Supports providers ("Contracted Providers") to deliver the elected Community Supports authorized under the demonstration.

b. Electing Medi-Cal plans must establish a network of providers and ensure the Contracted Providers have sufficient experience and training in the provision of the Community Supports being offered. Contracted Providers do not need to be licensed, however, staff offering services through Contracted Providers must be licensed when appropriate and applicable.

c. The Medi-Cal managed care plan and Contracted Provider must agree to a rate for the provision of applicable Community Supports, consistent with DHCS guidance for these services, and in compliance with all related federal requirements.

d. Eligible settings for recuperative care and short-term post-hospitalization housing must have appropriate clinicians who can provide medical and/or behavioral health care. The facility cannot be primarily used for room and board without the necessary additional recuperative support services. For example, a hotel room in a commercial hotel, where there are no medical or behavioral health supports provided onsite appropriate to the level of need, would not be considered an appropriate setting, but if a hotel had been converted to a recuperative care facility with appropriate clinical supports, then it would be an eligible setting.

8.4. **Provider Network Capacity.** Electing Medi-Cal managed care plans must ensure the two Community Supports authorized under the demonstration are provided to eligible beneficiaries in a timely manner, and shall develop policies and procedures outlining its approach to managing provider shortages or other barriers to timely provision of the Community Supports, in accordance with the Medi-Cal managed care plan contracts and other DHCS guidance.

8.5. **Eligibility Criteria for Community Supports.** In accordance with the Medi-Cal managed care plan contracts and DHCS guidance, these Community Supports services are available to people experiencing homelessness or who are at risk of homelessness, and who have been determined

by a provider (at the plan or network level) to have medical needs significant enough to result in emergency department visits, hospital admissions or other institutional care.

a. For this purpose, California is using the U.S. Department of Housing and Urban Development's (HUD) current definition of homeless and individuals who are at-risk of homelessness as codified at 24 CFR 91.5, with two modifications: (1) if exiting an institution, individuals are considered homeless if they were homeless immediately prior to entering that institutional stay, regardless of the length of the institutionalization, and (2) the timeframe for an individual or family who will imminently lose housing is extended from fourteen (14) days for individuals considered homeless and 21 days for individuals considered at-risk of homelessness under the HUD definition to thirty (30) days. Additional detail on eligibility for these services are outlined in Attachment U.

b. An electing Medi-Cal managed care plan will identify enrollees who may benefit from the Community Supports authorized under the demonstration, who meet these eligibility criteria, and for whom the Community Supports services will be medically appropriate as determined by a provider (at the plan or network level) and allow an individual to avoid institutionalization.

c. Medi-Cal managed care plans must accept requests and referrals for the Community Supports from enrollees and on behalf of enrollees from providers and organizations that serve them, including community-based organizations.

d. Community Supports shall supplement and not supplant services received by the Medi-Cal enrollee through other state, local, or federally-funded programs, in accordance with the CalAIM STCs and federal and DHCS guidance.

8.6. **Allowable HRSN Services and Definitions.** Recuperative care and short-term post-hospitalization housing settings provide a safe and stable place for eligible individuals transitioning out of institutions, and who are at risk of incurring other Medicaid state plan services, such as inpatient hospitalizations or emergency department visits (as determined by a provider at the plan or network level), to receive treatment on a short-term basis. Eligible settings for recuperative care and short-term post hospitalization housing must have clinicians who can provide appropriate medical and/or behavioral health care. Short-term post-hospitalization housing settings must also offer transitional supports to help enrollees secure stable housing and avoid future readmissions. Recuperative care may be offered for up to ninety (90) days in duration, and short-term post-hospitalization housing may be offered once during the demonstration period for no more than six (6) months in duration. Electing Medi-Cal managed care plans will implement recuperative care and short-term post-hospitalization housing in accordance with the detailed service definitions, standards and requirements in Attachment U.

Requirements and limitations:

a. Recuperative care and short-term post-hospitalization services must be medically appropriate and cost-effective such that the aggregate cost of providing the service

does not exceed the aggregate cost of institutional care in a nursing or inpatient facility.

b. Provision of these services will be optional both for the MCP to offer and the individual to receive the service.

c. Provision of either service does not make an enrollee ineligible for allowable services under the state plan, including institutional care.

8.7. **Excluded HRSN Services.** Excluded items, services, and activities that are not covered as HRSN services include, but are not limited to:

a. Construction costs (including building modification and building rehabilitation);

b. Capital investments;

c. Room and board, except as described in STC 8.6 and Attachment U;

d. Research grants and expenditures not related to monitoring and evaluation;

e. Costs for services in prisons, correctional facilities or services for people who are civilly committed and unable to leave an institutional setting;

f. Services provided to individuals who are not lawfully present in the United States or are undocumented;

g. Expenditures that supplant services and activities funded by other state and federal governmental entities;

h. School-based programs for children that supplant Medicaid state plan programs;

i. General workforce activities, not specifically linked to Medicaid or Medicaid beneficiaries; and

j. Any other projects or activities not specifically approved by CMS as qualifying for coverage as HRSN services under this demonstration.

8.8. **General Guardrails and Reporting Requirements for Recuperative Care and Short-Term Post Hospitalization Housing Community Supports.** While recuperative care and short-term post-hospitalization services are not ILOS authorized under the 1915(b) waiver authority, to reduce administrative burden, the state may coordinate reporting, monitoring, and evaluation efforts of the HRSN services, recuperative care and short-term post hospitalization services, in alignment with corresponding expectations stipulated in California's 1915(b)(1)/(4) CalAIM waiver, while also recognizing that there are additional expectations for monitoring and evaluation for recuperative care and short-term post hospitalization services as provided in these STCs that must also be met. To the extent appropriate, the state and CMS will work collaboratively to assure there is no redundancy in reporting efforts under the section 1115 and 1915(b) authorities.

8.9. **Compliance with Federal Requirements.** The state shall ensure recuperative care and short-term post-hospitalization housing Community Supports are delivered in accordance with all applicable federal statute, regulation or guidance.

8.10. **HRSN Community Supports Protocol.** The state must submit, for CMS review and approval, the HRSN Community Supports Protocol covering the HRSN services authorized in this demonstration. Once approved, the Protocol will be affixed as Attachment X to these STCs. The state may stagger the submission of this Protocol, with the Maintenance of Effort (MOE; see STC 8.14) information submitted no later than 90 days after the inclusion of this STC in the demonstration approval. The remaining content of the Protocol must be submitted to CMS no later than nine months after this STC is effective.

a. A description of the process for identifying beneficiaries with HRSN, including outlining beneficiary qualification criteria for services.

b. A description of the process by which clinical criteria will be applied, including a description of the documented process wherein a provider, using their professional judgment and based on clinical and social risk factors, as applicable, may deem the service to be medically appropriate.

c. A description of the process for developing care plans based on assessment of need that is also culturally responsive and trauma informed.

d. A plan for establishing and/or improving information technology (IT) infrastructure, data sharing and partnerships with an array of health system and social services stakeholders, to the extent those entities are vital, to provide needed administrative and HRSN-related data on beneficiary characteristics, eligibility, screenings, referrals, and provision of services, which are critical for understanding program implementation and conducting demonstration monitoring and evaluation.

e. A plan for tracking and improving the share of Medicaid beneficiaries who are eligible for the Supplemental Nutrition Assistance Program (SNAP) who are enrolled in that program, the Special Supplemental Nutrition Program for Women, Infants and Children (WIC), and federal and state housing assistance programs, relative to the number of total eligible beneficiaries, including establishing a timeline for reporting.

f. Information as required per STC 8.14 (MOE).

g. Information as required per STC 8.15 (Partnerships with State and Local Entities).

8.11. **Conflict of Interest**. The state shall ensure appropriate protections against conflicts of interest in the service planning and delivery of HRSN services. The state also agrees that appropriate separation of service planning and service provision functions are incorporated into the state's conflict of interest policies.

8.12. **CMS Approval of Managed Care Contracts.**

a. As part of the state's submission of associated Medicaid managed care plan contracts to implement CalAIM, the state must provide documentation including, but not limited to:

    i. Beneficiary and plan protections, including but not limited to:

        i. Recuperative Care and Short-Term Post Hospitalization Housing Community Supports must not be used to reduce, discourage, or jeopardize Medicaid beneficiaries' access to Medicaid state plan covered services.

        ii. Medicaid beneficiaries always retain their right to receive the Medicaid state plan covered service on the same terms as would apply if Recuperative Care and Short-Term Post Hospitalization Housing Community Supports were not an option.

        iii. Medicaid beneficiaries always retain the right to file appeals and/or grievances if they request Recuperative Care and Short-Term Post Hospitalization Housing Community Supports offered by their Medicaid managed care plan, but were not authorized to receive the requested Recuperative Care and Short-Term Post Hospitalization Housing Community Supports services because of a determination that it was not medically appropriate or cost effective.

        iv. Managed care plans are not permitted to deny a beneficiary a medically appropriate Medicaid covered service on the basis that they are currently receiving Recuperative Care and Short-Term Post Hospitalization Housing Community Supports or have received these services in the past.

        v. Managed care plans are prohibited from requiring a beneficiary to utilize Recuperative Care and Short-Term Post Hospitalization Housing Community Supports.

        vi. Managed care plans must timely submit any related data requested by the state or CMS, including, but not limited to:

            a. Data to evaluate the utilization and effectiveness of the Recuperative Care and Short-Term Post Hospitalization Housing Community Supports.

            b. Any data necessary to monitor health outcomes and quality metrics at the local and aggregate level through encounter data and supplemental reporting on health outcomes and equity of care. When possible, metrics must be stratified by age, sex, race, ethnicity, and language spoken to inform health equity efforts and efforts to mitigate health disparities.

            c. Any data necessary to monitor appeals and grievances for beneficiaries.

                i. Documentation to ensure appropriate clinical support for the medical appropriateness of Recuperative Care and Short-Term Post Hospitalization Housing Community Supports, including but not limited to:

1. A documented process to authorize Recuperative Care and Short-Term Post Hospitalization Housing Community Supports for beneficiaries for whom there is an assessed risk of a need for other Medicaid state plan services, such as inpatient hospitalizations or emergency department visits. This process must document that a provider using their professional judgment has determined it to be medically appropriate for the specific beneficiary as provision of the Recuperative Care and Short-Term Post Hospitalization Housing Community Supports is likely to reduce or prevent the need for acute care or other Medicaid services. This documentation could be included in a care plan developed for the beneficiary. In addition to this clinical documentation requirement, states may also impose additional provider qualifications or other limitations and protocols and these must be documented within the managed care plan contracts.
2. Any data determined necessary by the state or CMS to monitor and oversee the Recuperative Care and Short-Term Post Hospitalization Housing Community Supports.

ii. All data and related documentation necessary to monitor and evaluate cost effectiveness, including but not limited to:

1. The managed care plans must submit timely and accurate encounter data to the state on Recuperative Care and Short-Term Post Hospitalization Housing Community Supports provided to members. The state must seek CMS approval on what is considered and appropriate and reasonable timeframe for plan submission of encounter data. This encounter data must include data necessary for the state to stratify services by age, sex, race, ethnicity, and language spoken to inform health equity efforts and efforts to mitigate health disparities undertaken by the state.
2. Any additional information requested by CMS, the state or oversight body to aid in on-going evaluation of the cost effectiveness of the Recuperative Care and Short-Term Post Hospitalization Housing Community Supports or any independent assessment or analysis conducted by the state, CMS, or an independent entity.

iii. Any additional information determined reasonable, appropriate and necessary by CMS.

8.13. **Rate Methodologies.** All new or modified payment rates, methodologies and/or associated data for authorized HRSN services outlined in these STCs must be submitted to CMS for review and approval following the normal managed care rate setting process, including via standard managed care rate certifications and, when applicable, through the state directed payments submission process and in accordance with 42 CFR 438.6(c).

8.14. **Maintenance of Effort (MOE).** The state must maintain a baseline level of state funding, which the state will submit to CMS for CMS approval, for ongoing social services related to housing transition supports for the duration of the demonstration, not including one time or non-recurring funding. Within 90 days of the approval of the demonstration amendment to integrate the community supports in the HRSN framework, as part of the HRSN Community Supports Protocol, the state will submit a plan to CMS for CMS approval that specifies how the state will determine baseline spending on these services. The annual MOE will be reported and monitored as part of the Annual Monitoring Report described in STC 14.5, with any justifications, including declines in available state resources, necessary to describe the findings.

8.15. **Partnerships with State and Local Entities.** The state must have in place partnerships with other state and local entities (e.g., HUD Continuum of Care Program, local housing authority, SNAP state agency) to assist beneficiaries in obtaining non-Medicaid funded housing and nutrition supports, if available, upon the conclusion of temporary Medicaid payment for such supports, in alignment with beneficiary needs identified in the person-centered plans as appropriate. The state will submit a plan to CMS as part of the HRSN Community Supports Protocol that outlines how it will put into place the necessary arrangements with other state and local entities and also work with those entities to assist beneficiaries in obtaining available non-Medicaid funded housing upon conclusion of temporary Medicaid payment, as stated above. The plan must provide a timeline for the activities outlined. As part of the Quarterly and Annual Monitoring Reports described in STC 14.5, the state will provide the status of the state's fulfillment of its plan and progress relative to the timeline, and whether and to what extent the non-Medicaid funded supports are being accessed by beneficiaries as planned. Once the state's plan is fully implemented, the state may conclude its status updates in the Quarterly and Annual Monitoring Reports.

9. REENTRY DEMONSTRATION INITIATIVE

9.1. **Overview of Pre-Release Services and Program Objectives.** This component of the demonstration will provide for pre-release services up to 90 days immediately prior to the expected date of release to qualifying Medi-Cal beneficiaries and demonstration beneficiaries who would be eligible for CHIP except for their incarceration status, who are residing in state prisons, county jails, or youth correctional facilities, as specified by the implementation timeline in STC 9.8 and the implementation plan in STC 9.9. The objective of this component of the demonstration is to facilitate beneficiaries' access to certain healthcare services and case management, provided by Medicaid participating providers, CHIP participating providers, or by carceral providers who are not participating in Medicaid or CHIP, while beneficiaries are incarcerated and allow them to establish relationships with community-based providers from whom they can receive services upon reentry to communities. This bridge to coverage begins prior to release and is expected to promote continuity of care and improve health outcomes for justice-involved individuals. Further, coverage beyond 30 days (for up to 90 days immediately before the expected date of release) is expected to provide a longer runway for enrollees to identify and begin to receive needed services, contribute to a reduction in post-release acute care utilization, and lead to a reduction in health crises, overdoses, and overdose-related deaths. The purpose of this reentry demonstration initiative is to provide short-term Medicaid enrollment assistance and pre-release coverage for certain services to facilitate successful care transitions, as well as improve the identification and treatment of certain chronic and other serious

conditions to reduce acute care utilization in the period soon after release, and test whether it improves uptake and continuity of medication-assisted treatment (MAT) and other SUD and behavioral health treatment, as appropriate for the individual, to reduce decompensation, suicide-related death, overdose, overdose-related death, and all-cause death in the near-term post-release.

During the demonstration, the state seeks to achieve the following goals:

a. Increase coverage, continuity of care, and appropriate service uptake through assessment of eligibility and availability of coverage for benefits in carceral settings just prior to release;

b. Improve access to services prior to release and improve transitions and continuity of care into the community upon release;

c. Improve coordination and communication between correctional systems, Medicaid and CHIP systems, managed care plans, and community-based providers;

d. Increase additional investments in health care and related services, aimed at improving the quality of care for beneficiaries in carceral settings, and in the community to maximize successful reentry post-release;

e. Improve connections between carceral settings and community services upon release to address physical health, behavioral health, and health-related social needs;

f. Provide intervention for certain behavioral health conditions and use stabilizing medications like long-acting injectable antipsychotics and medications for addiction treatment for SUDs, with the goal of reducing decompensation, suicide-related death, overdose, and overdose-related death in the near-term post-release; and

g. Reduce post-release acute care utilization such as emergency department visits, inpatient hospitalizations, and all-cause deaths among recently incarcerated Medicaid beneficiaries and individuals otherwise eligible for CHIP if not for their incarceration status through robust pre-release identification, stabilization, and management of certain serious physical and behavioral health conditions that may respond to ambulatory care and treatment (e.g., diabetes, heart failure, hypertension, schizophrenia, SUDs) as well as increased receipt of preventive and routine physical and behavioral health care.

9.2. **Qualifying Criteria for Pre-Release Services.** In order to qualify to receive services under this component of the demonstration, a beneficiary must meet the following qualifying criteria:

a. Meet the definition of an inmate of a public institution, as specified in 42 CFR 435.1010, and be incarcerated in a state prison, county jail, or youth correctional facility as defined in STC 9.4;

b. Be enrolled in Medicaid or otherwise eligible for CHIP if not for their incarceration status; and

c. Meet one of the following site-specific requirements:

i. Is an individual residing in a state prison or county jail who meets at least one of the health-related criteria described below and further defined in Attachment W. Meeting such health-related criteria may be indicated by a beneficiary, found at an initial screening conducted by the correctional facility upon intake, determined during a beneficiary's incarceration, or found during assessment in the process of pre-release planning.

a. Mental illness, defined as confirmed or suspected mental health diagnosis based on specified criteria as defined in Attachment W;

b. Substance use disorder, defined as confirmed or suspected diagnoses based on specified criteria as defined in Attachment W;

c. Chronic condition or significant non-chronic clinical condition, defined as confirmed or suspected diagnoses based on specified criteria as defined in Attachment W;

d. Intellectual or developmental disability (I/DD), defined as a disability that begins before an individual has turned 18 years of age and that is expected to continue indefinitely and present a substantial disability as defined in Attachment W;

e. Traumatic brain injury or other condition that has caused significant cognitive, behavioral and/or functional impairment;

f. Positive test or diagnosis of human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS); or

g. Currently pregnant or within a 12-month postpartum period, as defined in Attachment W.

ii. Is an individual incarcerated in a youth correctional facility.

a. Has been identified as expected to be released in the next 90 days and identified for participation in the demonstration.

9.3. **Scope of Pre-Release Services**. The pre-release services authorized under the reentry demonstration initiative include the following services currently covered under the California Medicaid and CHIP State Plans, and further described in Attachment W. Contingent upon CMS's approval of the state's Reentry Demonstration Initiative Implementation Plan (see STC 9.9), the state may begin claiming FFP for services covered through the initiative at the time of inclusion of this STC, expected to begin April 1, 2024.

a. The pre-release services are:

i. Reentry case management services;

ii. Physical and behavioral health clinical consultation services provided through telehealth or in-person, as needed, to diagnose health conditions, provide treatment, as appropriate, and support pre-release case managers' development of a post-release treatment plan and discharge planning;

iii. Laboratory and radiology services;

iv. Medications and medication administration;

v. MAT, for all Food and Drug Administration-approved medications, including coverage for counseling; and

vi. Services provided by community health workers with lived experience.

b. In addition to the pre-release services specified in STC 9.3(a), qualifying beneficiaries will also receive covered outpatient prescribed medications and over-the-counter drugs (a minimum 30-day supply as clinically appropriate, consistent with the approved Medicaid State Plan) and durable medical equipment (DME) upon release, consistent with approved state plan coverage authority and policy.

c. The expenditure authority for pre-release services through this initiative comprises a limited exception to the federal claiming prohibition for medical assistance furnished to inmates of a public institution at clause (A) following section 1905(a) of the Act ("inmate exclusion rule"). Benefits and services for inmates of a public institution that are not approved in the reentry demonstration initiative as described in these STCs and accompanying protocols, and not otherwise covered under the inpatient exception to the inmate exclusion rule, remain subject to the inmate exclusion rule. Accordingly, other benefits and services covered under the California Medicaid or CHIP State Plans, as relevant, that are not included in the above-described pre-release services (e.g., EPSDT benefit for qualifying Medicaid beneficiaries under age 21) are not available to qualifying beneficiaries through the reentry demonstration initiative.

9.4. **Participating Facilities**. The pre-release services will be provided at state prisons, county jails, and youth correctional facilities, or outside of the correctional facility with appropriate transportation and security oversight provided by the carceral facility, subject to DHCS approval of a facility's readiness, according to the phase-in schedule described in STC 9.8.

9.5. **Participating Providers**.

a. Licensed, registered, certified, or otherwise appropriately credentialed or recognized practitioners under California state scope of practice statutes shall provide services within their individual scope of practice and, as applicable, receive supervision required under their scope of practice laws.

b. Participating providers eligible to deliver services under the reentry demonstration initiative may be either community-based or correctional-facility based providers.

c. All participating providers and provider staff, including carceral providers, shall have necessary experience and receive appropriate training, as applicable to a given carceral facility, prior to furnishing demonstration-covered pre-release services under the reentry demonstration initiative.

d. Participating providers of reentry case management services may be community-based or carceral providers who have expertise working with justice-involved individuals.

9.6. **Suspension of Coverage**. Upon entry of a Medicaid beneficiary into a participating correctional facility, DHCS must not terminate and generally shall suspend their Medicaid coverage, as described in the Reentry Demonstration Initiative Implementation Plan.

a. If an individual is not enrolled in Medicaid when entering a correctional facility, the state must ensure that such an individual receives assistance with completing an application for Medi-Cal and with submitting an application to the county departments of social services, unless the individual declines such assistance or wants to decline enrollment.

9.7. **Coverage of Individuals Otherwise Eligible for CHIP During Incarceration.** If an individual who is incarcerated would be eligible for CHIP if not for their incarceration status, and they qualify to receive pre-release services per STC 9.2, pre-release services will be covered under this demonstration's expenditure authority.

9.8. **Reentry Demonstration Initiative Implementation Timeline**. Delivery of pre-release services under this demonstration will be implemented on a phased-in approach, as described below. All participating state prisons, county jails, and youth correctional facilities must demonstrate readiness, as specified below, prior to participating in this initiative (FFP will not be available in expenditures for services furnished to qualifying beneficiaries who are inmates in a facility before the facility meets the below readiness criteria for participation in this initiative). DHCS will determine that each applicable facility is ready to participate in the reentry demonstration initiative under this demonstration based on a facility-submitted assessment (and appropriate supporting documentation) of the facility's readiness to implement:

a. Pre-release Medi-Cal and CHIP application and enrollment processes for individuals who are not enrolled in Medi-Cal or CHIP prior to incarceration and who do not otherwise become enrolled during incarceration;

b. The screening process to determine a beneficiary's qualification for pre-release services;

c. The provision or facilitation of pre-release services for a period of up to 90 days immediately prior to the expected date of release, including the facility's ability to support the delivery of services furnished by providers in the community that are delivered via telehealth. If a facility is not equipped to provide or facilitate the full set of the pre-release services, as listed in STC 9.3, the facility must provide a timeline of when it will be equipped to do so, including concrete steps and their anticipated completion dates that will be necessary to ensure that qualifying beneficiaries are able to receive timely any needed pre-release services;

d. Coordination amongst partners with a role in furnishing health care and HRSN services to beneficiaries, including, but not limited to, social service departments, managed care plans, county behavioral health agencies, county departments of health, and community-based providers;

e. Appropriate reentry planning, pre-release care management, and assistance with care transitions to the community, including connecting beneficiaries to physical and behavioral health providers and their managed care plan, and making referrals to care management and community supports providers that take place throughout the 90-day pre-release period, and providing beneficiaries with covered outpatient prescribed medications and over-the-counter drugs (a minimum 30-day supply as clinically appropriate, consistent with approved Medicaid State Plan) and DME upon release, consistent with approved state plan coverage authority and policy;

f. Operational approaches related to implementing certain Medicaid and CHIP requirements, including but not limited to applications, suspensions, notices, fair hearings, reasonable promptness for coverage of services, and any other requirements specific to receipt of pre-release services by qualifying individuals under the reentry demonstration initiative;

g. A data exchange process to support the care coordination and transition activities described in (d) and (e) of this subsection;

h. Reporting of requested data from DHCS to support program monitoring, evaluation, and oversight; and

i. A staffing and project management approach for supporting all aspects of the facility's participation in the reentry demonstration initiative, including information on qualifications of the providers that the correctional facilities will partner with for the provision of pre-release services.

9.9. **Reentry Demonstration Initiative Implementation Plan**. The state is required to submit a Reentry Demonstration Initiative Implementation Plan to describe, at a minimum, the state's approach to implementing the reentry demonstration initiative, including timelines for meeting critical implementation stages or milestones, as applicable, to support successful implementation. The state must submit the draft Implementation Plan to CMS for review no later than 120 calendar days after approval of the reentry demonstration initiative. The state must submit any required clarifications or revisions to their draft Implementation Plan no later than 60 calendar days after receipt of CMS feedback. Once approved, the finalized Implementation Plan will be incorporated into the STCs as Attachment CC, and may be further altered only with CMS approval.

In the Implementation Plan, the state is expected only to provide additional details regarding the implementation of the reentry demonstration initiative that are not already captured in the STCs (including any other attachments). CMS will provide the state with a template to support developing and obtaining approval of the Implementation Plan. Contingent upon CMS's approval of the state's Implementation Plan, the state may begin claiming FFP for services

provided through the reentry demonstration initiative at the time of inclusion of this STC, expected to begin April 1, 2024.

The Reentry Demonstration Initiative Implementation Plan must describe the implementation settings, the time period that pre-release services are available, and phase-in approach to implementation, as applicable. Other than providing such contextual information, the core requirement of the Implementation Plan is for the state to describe the specific processes, including timelines and programmatic content where applicable, for meeting the below milestones, such as to remain on track to achieve the key goals and objectives of the program. For each milestone—and specifically for any associated actions that are integral aspects for attaining the milestone—the Implementation Plan must document the current state of affairs, the intended end state to meet the milestone, the date by which the milestone is expected to be achieved, and the activities that must be executed by that date for the milestone to be achieved. Furthermore, for each milestone, the Implementation Plan must identify the main anticipated implementation challenges and the state's specific plans to address these challenges. The Implementation Plan is also required to document the state's strategies to drive positive changes in health care quality for all beneficiaries, thereby reducing disparities and improving health equity. The state will be required to provide the following information related to, but not limited to, the following milestones and actions.

a. **Milestone 1: Increasing coverage and ensuring continuity of coverage for individuals who are incarcerated**. The state must describe its plans to fully effectuate, no later than two years from approval of the expenditure authority, a state policy to identify Medicaid eligible individuals or individuals who would be eligible for CHIP, except for their incarceration status, and suspend a beneficiary's eligibility or benefits during incarceration. It must describe its processes to undertake robust outreach to ensure beneficiary and applicant awareness of the policy and assist individuals with Medicaid application, enrollment, and renewal processes. Other aspects to be included in the Implementation Plan related to this milestone include the state's plan to make available a Medicaid and/or managed care plan identification number or card to an individual, as applicable, upon release; and establish processes to allow and assist all individuals who are incarcerated at a participating facility to access and complete a Medicaid application, including providing information about where to complete the Medicaid application for another state, e.g., relevant state Medicaid agency website, if the individual will be moving to a different state upon release.

b. **Milestone 2: Covering and ensuring access to the expected minimum set of pre-release services for individuals who are incarcerated, to improve care transitions upon return to the community.** The state must describe its plan to implement a screening process to identify individuals who qualify for pre-release services, consistent with the qualifying criteria outlined in these STCs. The state must detail how the facilities will ensure that beneficiaries can access the demonstration benefit package, as clinically appropriate. The state must describe its approach and plans for implementing processes to assure that all pre-release service providers, as appropriate for the provider type, have the necessary experience and training, and case managers have knowledge of (or means to obtain information about) community-based providers in the communities where individuals will be returning upon release. Further, as

applicable, the state must establish state requirements for carceral health providers who are not participating in Medicaid or CHIP that are similar to Medicaid provider standards, as well as program integrity standards to ensure appropriate billing.

c. **Milestone 3: Promoting continuity of care.** The state must describe its process to ensure that beneficiaries receive a person-centered plan for coordination post-release to address health needs, as well as HRSN and LTSS, as applicable. The state must detail its plans and timeline for implementing state policies to provide or facilitate timely access to post-release medical supplies, equipment, medication, additional exams, or other post-release services to address the physical and behavioral health care needs identified during the case management assessment and the development of the person-centered care plan. The state must describe its processes for promoting and ensuring collaboration between case managers, providers of pre-release services and providers of post-release services, to ensure that appropriate care coordination is taking place. As applicable, the state must also describe the planning or projected activities to ensure that Medicaid managed care plan and county behavioral health plan contracts include requirements and processes for transfer of relevant health information from the carceral facility, community-based providers, and/or state Medicaid agency to the managed care plan to support continuity and coordination of care post-release.

d. **Milestone 4: Connecting to services available post-release to meet the needs of the reentering population.** The state must describe how it will develop and implement a system to monitor the delivery of post-release services and ensure that such services are delivered within the appropriate timeframe, per the guidelines in the forthcoming SMDL. The Implementation Plan must also capture how the state will monitor and adjust, as needed, ongoing post-release case management and describe its process to help ensure the scheduling and receipt of needed services, as well as other services needed to address HRSN and LTSS. Additionally, the state must describe how they will ensure that case managers are able to effectively serve demonstration beneficiaries transitioning into the community and recently released beneficiaries who are no longer demonstration beneficiaries.

e. **Milestone 5: Ensuring cross-system collaboration.** The state must describe how correctional facilities will facilitate access to incarcerated beneficiaries for community health care providers, including case managers, either in person or via telehealth. The state must also document its plans for establishing communication and engagement between corrections systems, community supervision entities, health care organizations, the state Medicaid agency, and supported employment and housing organizations. The state must also develop a system (for example, a data exchange, with requisite data-sharing agreements) and establish processes to monitor individuals' health care needs, HRSN, and their access to and receipt of health care services pre- and post-release, and identify anticipated challenges and potential solutions. Further, the state must develop and share its strategies to improve awareness about Medicaid coverage and access among stakeholders, including those who are incarcerated.

9.10. **Reentry Demonstration Initiative Mid-Point Assessment.** The state must contract with an independent entity to conduct a mid-point assessment of the reentry demonstration initiative and complete a Reentry Demonstration Initiative Mid-Point Assessment Report.

The Mid-Point Assessment Report must integrate all applicable implementation and performance data from the first 2.5 years of implementation of the reentry demonstration initiative. The report must be completed by the end of the third year of demonstration implementation. In the event that the reentry demonstration initiative is implemented at a timeline within the demonstration approval period, such as not to provide adequate implementation period to contribute toward a meaningful mid-point assessment, the report may be completed during a future extension of the demonstration, assuming it would also extend the authority for the reentry demonstration initiative. In the event that CMS and the state do not extend the reentry demonstration initiative beyond the demonstration's approval period ending in December 31, 2026, the mid-point assessment must be completed and the report submitted to CMS no later than when the demonstration's Summative Evaluation Report is due to CMS, which is 18 months after the end of the demonstration approval period (STC 17.8). If requested, the state must brief CMS on the report. The state must submit a revised Mid-Point Assessment Report within 60 calendar days after receipt of CMS's comments, if any.

The state must require the independent assessor to provide a draft of the Mid-Point Assessment Report to the state that includes the methodologies used for examining progress and assessing risk, the limitations of the methodologies used, the findings on demonstration progress and performance, including identifying any risks of not meeting milestones and other operational vulnerabilities, and recommendations for overcoming those challenges and vulnerabilities. In the design, planning, and execution of the mid-point assessment, the state must require that the independent assessor consult with key stakeholders including, but not limited to: pre- and post-release providers participating in the state's reentry demonstration initiative, eligible and participating beneficiaries, and other key partners in carceral and community settings.

For milestones and measure targets at medium to high risk of not being achieved, the state must submit to CMS modifications to the Reentry Demonstration Initiative Implementation Plan and the Monitoring Protocol for ameliorating these risks subject to CMS approval.

Elements of the Mid-Point Assessment Report must include, but not be limited to:

a. An examination of progress toward meeting each milestone and timeframe approved in the Reentry Demonstration Initiative Implementation Plan and toward meeting the targets for performance metrics as approved in the Monitoring Protocol;

b. A determination of factors that affected achievement on the milestones and progress toward performance metrics targets to date;

c. A determination of factors likely to affect future performance in meeting milestones and targets not yet met and information about the risk of possibly missing those milestones and performance targets;

d. For milestones or targets at medium to high risk of not being met, recommendations for adjustments in the state's Reentry Demonstration Initiative Implementation Plan or to pertinent factors that the state can influence that will support improvement.

CMS will provide additional guidance for developing the state's Reentry Initiative Mid-Point Assessment Report.

9.11. **Reentry Initiative Reinvestment Plan**. To the extent that the reentry demonstration initiative covers services that are the responsibility of and were previously provided or paid by the carceral facility or carceral authority with custody of qualifying beneficiaries, the state must reinvest all new federal dollars, equivalent to the amount of FFP projected to be expended for such services, as further defined in the Reentry Demonstration Initiative Reinvestment Plan. The Reinvestment Plan will define the amount of reinvestment required over the term of the demonstration, based on an assessment of the amount of projected expenditures for which reinvestment is required pursuant to this STC. FFP projected to be expended for new services covered under the reentry demonstration initiative, defined as services not previously provided or paid by the carceral facility or carceral authority with custody of qualifying beneficiaries prior to the individual facility's implementation of the reentry demonstration initiative (including services that are expanded, augmented, or enhanced to meet the requirements of the reentry demonstration initiative, with respect to the relevant increase in expenditures, as described in the Reentry Demonstration Initiative Reinvestment Plan), is not required to be reinvested pursuant to this STC.

a. Reinvestments in the form of non-federal expenditures totaling the amount of new federal dollars, as described above, must be made over the course of the CalAIM demonstration period. Allowable reinvestments include, but are not limited to:

i. The state share of funding associated with new services covered under the reentry demonstration initiative, as specified in this STC;

ii. Improved access to behavioral and physical community-based health care services and capacity focused on meeting the health care needs and addressing the HRSN of individuals who are incarcerated (including those who are soon-to-be released), those who have recently been released, and those who may be at higher risk of criminal justice involvement, particularly due to untreated behavioral health conditions;

iii. Improved access to and/or quality of carceral health care services, including by covering new, enhanced, or expanded pre-release services authorized via the reentry demonstration initiative opportunity;

iv. Improved health information technology and data sharing;

v. Increased community-based provider capacity that is particularly attuned to the specific needs of, and able to serve, justice-involved individuals or individuals at risk of justice involvement;

vi. Expanded or enhanced community-based services and supports, including services and supports to meet the HRSN of the justice-involved population and,

vii. Any other investments that aim to support reentry, smooth transitions into the community, divert individuals from incarceration or re-incarceration, or better the health of the justice-involved population, including investments that are aimed at interventions occurring both prior to and following release from incarceration into the community.

b. Within one hundred and twenty (120) days of approval, the state will submit a Reentry Demonstration Initiative Reinvestment Plan as part of the implementation plan referred to in STC 9.9 for CMS approval that memorializes the state's reinvestment approach. The Reinvestment Plan will also identify the types of expected reinvestments that will be made over the demonstration period. Actual reinvestments will be reported to CMS in Attachment EE.

10. DESIGNATED STATE HEALTH PROGRAMS

10.1. **Designated State Health Programs (DSHP).** The state may claim FFP for designated state health programs subject to the limits described below. This DSHP authority will allow the state to support DSHP-funded initiatives, as described in STC 10.3. This DSHP authority will be available from DY19 - DY22.

a. The DSHP will have an established limit in the amount of $1,292,850,000 total computable expenditures, in aggregate, for DY19 - DY22.

b. The state may claim FFP for up to the annual amounts outlined in Table 3, plus any unspent amounts from prior years. In the event that the state does not claim the full amount of FFP for a given demonstration year, the unspent amounts will roll over to one or more demonstration years not to exceed this demonstration period, and the state may claim the remaining amount in a subsequent demonstration year. The total amount of DSHP FFP that the state may claim in DY 19 through 22 combined may not exceed the non-federal share of amounts actually expended by the state for the DSHP-funded initiatives

Table 3. Annual Limits in Total Computable Expenditures for DSHP.

	DY19	DY20	DY21	DY22
Total Computable Expenditures	**$323,212,500**	**$323,212,500**	**$323,212,500**	**$323,212,500**

c. The state must contribute $114,075,000 in original, non-freed up DSHP funds, over the 5-year demonstration period towards its initiatives described in STC 5(b). These funds may only derive from other allowable sources of non-federal share and must otherwise meet all applicable requirements of these STCs and the Medicaid statute and regulations.

d. The state attests, as a condition of receipt of FFP under the DSHP expenditure authority, that all non-federal share for the DSHP is allowable under all applicable

statutory and regulatory requirements, including section 1903(w) of the Act and its implementing regulations. The state acknowledges that approval of the DSHP expenditure authority does not constitute approval of the underlying sources of non-federal share, which may be subject to CMS financial review.

e. As a post-approval protocol, the state shall submit an Approved DSHP List identifying the specific state programs for which FFP in expenditures can be claimed within 90 days of the amendment approval date. The Approved DSHP List will be subject to CMS approval and will be limited to programs that are population- or public heath-focused, aligned with the objectives of the Medicaid program with no likelihood that the program will frustrate or impede the primary objective of Medicaid to provide coverage for services for low-income and vulnerable populations, and serve a community largely made up of low-income individuals. The state is not eligible to claim FFP for DSHP expenditures until the list is approved by CMS, and upon approval, the state may only claim FFP for DSHP retrospectively to the effective date of the demonstration amendment that added this STC. The Approved DSHP List will be appended to the STCs as Attachment Y and thereafter may be changed or updated only with CMS approval.

10.2. **Prohibited DSHP Expenditures.**

a. Allowable DSHP expenditures do not include any expenditures that are funded by federal grants or other federal sources (for example, American Rescue Plan Act funding, grants from the Health Resources and Services Administration, the Centers for Disease Control and Prevention, etc.) or that are included as part of any maintenance of effort or non-federal share expenditure requirements of any federal grant.

b. Additionally, allowable DSHP expenditures do not include expenditures associated with the provision of non-emergency care to individuals who do not meet citizenship or immigration status requirements to be eligible for Medicaid. To implement this limitation, 5 percent of total provider expenditures or claims through DSHP identified as described in STC 10.1 will be treated as expended for non-emergency care to individuals who do not meet citizenship or immigration status requirements, and thus not matchable. This adjustment is reflected in the total computable amounts of DSHP described in STC 10.1.

c. The following types of expenditures are not permissible DSHP expenditures: expenditures that are already eligible for federal Medicaid matching funds or other sources of federal funding, that are generally part of normal operating costs that would be included in provider payment rates, that are not likely to promote the objectives of Medicaid, or are otherwise prohibited by federal law. Exclusions that have historically fallen into these categories include, but are not limited to:

    i. Bricks and mortar;

    ii. Shelters, vaccines, and medications for animals;

iii. Coverage/services specifically for individuals who are not lawfully present or are undocumented;

iv. Revolving capital funds; and

v. Non-specific projects for which CMS lacks sufficient information to ascertain the nature and character of the project and whether it is consistent with these STCs.

10.3. **DSHP-Funded Initiatives.**

a. **Definition.** DSHP-funded initiatives are Medicaid or CHIP section 1115 demonstration activities supported by DSHPs.

b. **Requirements.** Expenditures for DSHP-funded initiatives are limited to costs not otherwise matchable under the state plan. CMS will only approve those DSHP-funded initiatives that it determines to be consistent with the objectives of the Medicaid statute; specifically, to expand coverage (e.g., new eligibility groups or benefits), improve access to covered services including home- and community-based services and behavioral health services, improve quality by reducing health disparities, or increase the efficiency and quality of care. DSHP-funded initiatives specifically associated with transitional non-service expenditures start-up costs for new initiatives is time limited to the current demonstration period and will not be renewed.

c. **Approved DSHP-Funded Initiatives.** The initiatives listed below are approved DSHP-funded initiatives for this demonstration. Any new DSHP-funded initiative requires approval from CMS via an amendment to the demonstration that meets the applicable transparency requirements.

i. All PATH initiatives and programs described in STC 5.14 and 5.15, excluding expenditures on Support for Sustaining Services Through the Transition to Managed Care, as described in STC 5.14.a.

10.4. **DSHP Claiming Protocol.** The state will develop and submit to CMS within 150 calendar days of the approval of this amendment, a DSHP Claiming Protocol subject to CMS approval with which the state will be required to comply in order to receive FFP in DSHP expenditures. State expenditures for the DSHP must be documented in accordance with the protocol. The state is not eligible to claim FFP for DSHP expenditures until the protocol is approved by CMS, and upon approval, the state may only claim FFP for DSHP retrospectively to the effective date of the demonstration amendment that added this STC. Once approved by CMS, the protocol becomes Attachment Z to these STCs, and thereafter may be changed or updated only with CMS approval. Changes and updates are to be applied prospectively. In order to claim FFP for DSHP expenditures, the state will provide CMS a summary worksheet that identifies DSHP expenditures by program each quarter.

a. For all eligible DSHP expenditures, the state will maintain and make available to CMS upon request:

i. Certification or attestation of expenditures.

ii. Actual expenditure data from state financial information system or state client sub-system. The Claiming Protocol will describe the procedures used that ensure that FFP is not claimed for the non-permissible expenditures listed in STC 10.2.

b. The state will claim FFP for DSHP quarterly based on actual expenditures.

10.5. **DSHP Claiming Process.** Documentation of all DSHP expenditures must be clearly outlined in the state's supporting work papers and be made available to CMS. Federal funds must be claimed within two years after the calendar quarter in which the state disburses expenditures for the DSHPs.

a. Sources of non-federal funding must be compliant with section 1903(w) of the Act and applicable implementing regulations. To the extent that DSHPs receive federal funds from any other federal programs, such funds shall not be used as a source of non-federal share to support expenditures for DSHPs or DSHP-funded initiatives under this demonstration.

b. The administrative costs associated with DSHPs (that are not generally part of normal operating costs for service delivery) shall not be included in any way as demonstration and/or other Medicaid expenditures.

c. DSHP will be claimed at the administrative matching rate of 50 percent.

d. Expenditures will be claimed in accordance with the CMS-approved DSHP Claiming Protocol in Attachment Z.

10.6. **Sustainability Plan.** The DSHP Sustainability Plan will describe the scope of DSHP-funded initiatives the state wants to maintain and the strategy to secure resources to maintain these initiatives beyond the current approval period. The state shall submit the DSHP Sustainability Plan to CMS no later than the end of December 31, 2024, after the approval of this authority. Upon CMS approval, the plan will become Attachment AA to these STCs. Any future modifications for the DSHP Sustainability Plan will require CMS approval.

11. Provider Rate Increase Requirement

11.1. The provider payment rate increase requirements, in California, described hereafter, are a condition for expenditure authorities as referenced in Expenditure Authority 12.

11.2. As a condition of approval and ongoing provision of FFP for DSHP and related expenditures over this demonstration period of performance, DY 19 through DY 22, the state will in accordance with these STCs increase and (at least) subsequently sustain, through DY 22, Medicaid fee-for-service provider base rates, and require any relevant Medicaid managed care plan to increase for DY 20 and (at least) subsequently sustain through DY 22, network provider payment rates by at least two percentage points in the ratio of Medicaid to Medicare provider rates for each of the services that comprise the state's definition of primary care, behavioral

health care, or obstetric care, as relevant, if the average Medicaid to Medicare provider payment rate ratio, as determined by STC 11.5 for a representative sample of these services for any of these three categories of services, is below 80 percent. The state will further increase the rate for these same services in service categories in the delivery systems with ratios below 80 percent. The total annual state cost for these rate increases for all categories of service combined shall be no less than $21.76 million. If the average Medicaid to Medicare provider rate ratio for a representative sample of these services under each of the state's Medicaid fee-for-service program and Medicaid managed care delivery system for any of these three categories of services is below 80 percent, the state shall only be required to increase provider payments for the delivery system for that category of service for which the ratio is below 80 percent.

11.3. State funds available as a result of receiving FFP in DSHP expenditures cannot be used to finance provider rate increases required under this section. Additionally, the state may not decrease provider payment rates for other Medicaid- or demonstration-covered services for the purpose of making state funds available to finance provider rate increases required under this section (i.e., cost-shifting).

11.4. The state will, for the purposes of complying with these requirements to derive the Medicaid to Medicare provider payment rate ratio and to apply the rate increase as may be required under this section, identify the applicable service codes and provider types for each of the primary care, behavioral health, and obstetric care services, as relevant, in a manner consistent with other state and federal Medicaid program requirements, except that inpatient behavioral health services may be excluded from the state's definition of behavioral health services.

11.5. Within 90 days of the approval of the demonstration amendment, and if the state makes fee-for-service payments, the state must establish and report to CMS the state's average Medicaid to Medicare fee-for-service provider rate ratio for each of the three service categories – primary care, behavioral health and obstetric care, using either of the methodologies below:

a. Provide to CMS the average Medicaid to Medicare provider rate ratios if applicable for each of the three categories of services as these ratios are calculated for the state and service category as noted in the following sources:

i. For primary care and obstetric care services, in Zuckerman, et al. 2021. "Medicaid Physician Fees Remained Substantially Below Fees Paid by Medicare in 2019." *Health Affairs* 40(2): 343–348 (Exhibit 3); and

ii. For behavioral health services, the category called, 'Psychotherapy' in Clemans-Cope, et al. 2022. "Medicaid Professional Fees for Treatment of Opioid Use Disorder Varied Widely Across States and Were Substantially Below Fees Paid by Medicare in 2021." *Substance Abuse Treatment, Prevention, and Policy* (2022) 17:49 (Table 3); OR

b. Provide to CMS for approval for any of the three service categories the average ratio, as well as the code sets, code level Medicaid utilization, Medicaid and Medicare rates, and other data used to calculate the ratio, and the methodology for the calculation of the ratio under this alternative approach as specified below:

i. Service codes must be representative of each service category as defined in STC 11.4;

ii. Medicaid and Medicare data must be from the same year and not older than 2019; and

iii. The state's methodology for determining the year of data, the Medicaid code-level utilization, the service codes within the category, the geographic rate differentials for Medicaid and/or Medicare services and their incorporation into the determination of the category average rate, the selection of the same or similar Medicare service codes for comparison, and the timeframes of data and how alignment is ensured should be comprehensively discussed in the methodology as provided to CMS for approval.

11.6. To establish the state's ratio for each service category identified in STC 11.4 as it pertains to managed care plans' provider payment rates in the state, the state must provide to CMS either:

a. The average fee-for-service ratio as provided in STC 11.5(a), if the state and CMS determine it to be a reasonable and appropriate estimate of, or proxy for, the average provider rates paid by managed care plans (e.g., where managed care plans in the state pay providers based on state plan fee-for-service payment rate schedules); or

b. The data and methodology for any or all of the service categories as provided in STC 11.5(b) using Medicaid managed care provider payment rate and utilization data.

11.7. In determining the ratios required under STC 11.5 and 11.6, the state may not incorporate fee-for-service supplemental payments that the state made or plans to make to providers, with the exception of any state plan payments made using revenue derived by The California Healthcare, Research, and Prevention Tobacco Tax Act (Proposition 56, 2016), and may not incorporate Medicaid managed care pass-through payments in accordance with 42 CFR 438.6(a), and 438.6(d).

11.8. If the state is required to increase provider payment rates for managed care plans per STC 11.2 and 11.6, the state must:

a. Comply with the requirements for state-directed payments in accordance with 42 CFR 438.6(c), as applicable; and

b. Ensure that the entirety of the percentage increase applied to the provider payment rates in the service category whose Medicaid to Medicare average payment rate ratio is below 80 percent is paid to providers, and none of such payment rate increase is retained by managed care plans.

11.9. For the entirety of DY 20 through DY 22, the provider payment rate increase for each service in a service category and delivery system for which the average ratio is less than 80 percent will be an amount necessary so that the Medicaid to Medicare ratio increases by two percentage points over the highest rate for each service in DY 19, and such rate will be in effect on the first day of

DY 20. A required payment rate increase for a delivery system shall apply to all services in a service category as defined under STC 11.4.

11.10. If the state uses a managed care delivery system for any of the service categories defined in STC 11.4, for the beginning of the first rating period as defined in 42 CFR 438.2(a) that starts in each demonstration year from DY 20 through DY 22, the managed care plans' provider payment rate increase for each service in the affected categories will be no lower than the highest rate in DY 19 plus an amount necessary so that the Medicaid to Medicare ratio for that service increases by two percentage points. The payment rate increase shall apply to all services in a service category as defined under STC 11.4.

11.11. The state will provide the information to document the payment rate ratio required under STC 11.5 and 11.6, via submission to the Performance Metrics Database and Analytics (PMDA) portal for CMS review and approval.

11.12. For demonstration years following the first year of provider payment rate increases, the state will provide an annual attestation within the state's annual demonstration monitoring report that the provider payment rate increases subject to these STCs were at least sustained from, if not higher than, the previous year.

11.13. Within 90 days of the approval of the demonstration amendment, the state will provide to CMS the following information and Attestation Table signed by the State Medicaid Director, or by the Director's Chief Financial Officer (or equivalent position), to PMDA, along with a description of the state's methodology and the state's supporting data for establishing ratios for each of the three service categories in accordance with STC 11.5 and 11.6 for CMS review and approval, at which time the Attestation Table will be appended to the STCs as Attachment BB:

California DSHP Related Provider Payment Increase Assessment – Attestation Table		
The reported data and attestations pertain to DSHP related provider payment increase requirements for the demonstration period of performance DY 19 thru DY 22		
Category of Service	**Medicaid Fee-for-Service to Medicare Fee-for-service Ratio**	**Medicaid Managed Care to Medicare Fee-for-service Ratio**
Primary Care Services	[*insert percent, or N/A if state does not make Medicaid fee-for-service payments*]	[*insert percent, or N/A if state does not utilize a Medicaid managed care delivery system for applicable covered service categories*]
	[*insert approach, either ratio derived under STC 11.5(a) or STC 11.5(b)*	[*insert approach, either ratio derived under STC 11.6(a) or STC 11.6(b) insert data source and time period (e.g., applicable 12-month rating period) for each of Medicaid*

		and Medicare to derive the ratio]
Obstetric Care Services	[*insert percent, or N/A if state does not make fee-for-service payments*]	[*insert percent, or N/A if state does not utilize a Medicaid managed care delivery system for providers for covered service categories*]
	[*insert approach, either ratio derived under STC 11.5(a) or STC 11.5(b)*	[*insert approach, either ratio derived under STC 11.6(a) or STC 11.6(b) insert data source and time period (e.g., applicable 12-month rating period) for each of Medicaid and Medicare to derive the ratio*]
Behavioral Health Services	[*insert percent, or N/A if state does not make fee-for-service payments*]	[*insert percent, or N/A if state does not utilize a Medicaid managed care delivery system for applicable covered service categories]*
	[*insert approach, either ratio derived under STC 11.5(a) or STC 11.5(b)*	[*insert approach, either ratio derived under STC 11.6(a) or STC 11.6(b); insert data source and time period (e.g., applicable 12-month rating period) for each of Medicaid and Medicare to derive the ratio]*
In accordance with STCs 11.1 through 11.12, including that the Medicaid provider payment rates used to establish the ratios do not reflect fee-for-service supplemental payments, with the exception of any state plan payments made using revenue derived by The California Healthcare, Research, and Prevention Tobacco Tax Act (Proposition 56, 2016), and do not incorporate Medicaid managed care pass-through payments in accordance with 42 CFR § 438.6(a) and 438.6(d), I attest that at least a two percentage point payment increase will be applied to all the services in each of the three categories in each of the fee-for-service or managed care delivery systems with a ratio below 80 percent if these systems apply to the state's Medicaid program listed herein. Such provider payment increases for each service will be effective beginning on [*insert date*] and will not be lower than the highest rate for that service code in DY 19 plus at least a two percentage point increase relative to the rate for the same or similar Medicare billing code through at least [*insert date*], in the total amount of state expenditure of at least $21.76 million across affected delivery systems. For the purpose of deriving the Medicaid to Medicare provider payment rate ratio, and to apply the rate increase as may be required under a fee-for-service delivery system and under a		

managed care delivery system, the state agrees to define primary care, behavioral health and obstetric care, including identify applicable service codes and providers types for each of primary care, behavioral health and obstetric care in a manner consistent with other state and federal Medicaid program requirements, except that inpatient behavioral health services may be excluded.

The services that comprise each service category to which the rate increase must be applied will include all service codes that fit under the state's definition of the category, except the behavioral health codes do not have to include inpatient care services.

For provider payment rates paid under managed care delivery system, the data and methodology for any one of the service categories as provided in STC 11.6(b) will be based on Medicaid managed care provider payment rate and utilization data.

The effective date of the rate increases is the first day of DY 20 and will be at least sustained, if not higher, through DY 22.

The additional payment increases required under STC 11.2 will also be made in the total amount of state expenditure of at least $21.76 million across the affected delivery systems.

California [*insert does or does not*] make Medicaid state plan fee-for-service payments for the following categories of service for at least some populations: primary care, behavioral health, and / or obstetric care.

For any such payments, as necessary to comply with the DSHP STCs, I agree to submit by no later than [*insert date*] for CMS review and approval the Medicaid state plan fee-for-service payment increase methodology, including the Medicaid code set to which the payment rate increases are to be applied, code level utilization, Medicaid and Medicare rates for the same or similar Medicare billing codes, and other data used to calculate the ratio, and the methodology, as well as other documents and supporting information (e.g., state responses to Medicaid funding questions) as required by statutes, regulations and CMS policy, through the submission of a new state plan amendment, following the normal SPA process including publishing timely tribal and public notice and submitting to CMS all required SPA forms (e.g., SPA transmittal letter, CMS-179, Attachment 4.19-B pages from the state), by no later than [*insert date*].

The state will also provide similar documentation for the additional payment increases required under STC 11.2.

California [*insert does or does not*] include the following service categories within a Medicaid managed care delivery system for which the managed care plans make payments to applicable providers for at least some populations: primary care, behavioral health, and or obstetric care.

For any such payments, I agree to submit the Medicaid managed care plans' provider payment increase methodology, including the information listed in STC 11.7 through the state directed payments submission process and in accordance with 42 CFR 438.6(c), as applicable, by no later than *[insert date*].

The state will also provide similar documentation for the additional payment increases required under STC 11.2.

If the state utilizes a managed care delivery system for the applicable service categories, then in accordance with STC 11.8, I attest that necessary arrangements will be made to assure that 100 percent of the amount necessary, so that the Medicaid to Medicare ratio increases by two percentage points, will be paid by managed care plans to the providers of those service categories and none of this payment rate increase is retained by the managed care plans. The state will also assure that 100 percent of the additional payment increases under STC 11.2 will be paid to providers of the applicable services.
California agrees not to use DSHP funding to finance any provider payment rate increase required under Section 11. California further agrees not to decrease provider payment rates for other Medicaid- or demonstration-covered services to make state funds available to finance provider rate increases required under STC 11.
I, *[insert name of SMD or CFO (or equivalent position)*] [*insert title*], attest that the above information is complete and accurate. [*Provide signature*_____] *[Provide printed name of signatory* _____] [*Provide date*_____]

12. Managed Care Entities

12.1 **Managed Care Readiness.** The state must assess readiness pursuant to 438.66(d). Assignment into an MCO may only begin when each MCO has been determined by the state to meet certain readiness and network requirements.

12.2 **Continuity of Care during the Transition Period for Managed Care Plans impacted by this demonstration.**

a. The state's contracts with all managed care plans must require a transition of care protocol to ensure continuity of care for members. In the 12 counties which will expand Whole Child Model no sooner than January 1, 2025, this protocol must include a plan to identify child members served by the California Children's Services (CCS) program and to assure they receive enhanced care coordination in accordance with state statute.
b. Managed care plans must continue medically necessary services for members in an ongoing course of treatment without any form of prior approval and without regard to whether such services are provided by in-network or out-of-network providers with a single case or letter of agreement for at least six months, unless the member/family has opted to discontinue such services or selects a provider that is in network. To ensure continuity of care and allow the member to keep their current primary care provider (PCP), if the managed care plan does not have a member's PCP in its network on the date when the member is assigned a PCP prior to the launch of the managed care

program, the managed care plan is required to offer to execute a contract or a single case or letter of agreement to that PCP upon request.

c. Upon County Organized Health System (COHS) expansion and Single Plan models launch and monthly for six months following the expansion of the COHS model and launch of the Single Plan model, the state must submit a report detailing the total percentage of members who experienced a disruption in primary care across all primary care providers, meaning that their historical primary care provider is not in-network for their COHS and Single Plan models. If the total percentage of members with PCP member disruption is greater than 10%, CMS will request the state submit a corrective action plan. In addition, CMS reserves the right to extend the transition of care protocol by an additional six months if the initial report, and subsequent reports, show there is not adequate access for members. Any notice of extension of transition of care protocols shall be communicated no less than 60 days prior to anticipated expiration of the protocols.

12.3 **Assurances of Adequate Capacity and Services for Managed Care Plans impacted by this demonstration.** For all managed care plans that furnish services to Medicaid members enrolled in Medi-Cal managed care and impacted by this section 1115(a) demonstration, the state must submit the Assurance of Compliance detailed in 42 CFR § 438.207(d) using the Access Reporting Template provided by CMS. Before implementation, each managed care plan expanding its COHS model or launching the Single Plan model must provide adequate assurances that it has sufficient capacity to serve the expected enrollment in its service area and offers an adequate range of preventive, primary, specialty, and acute services for the anticipated number of enrollees in the service area. The state must verify these assurances by reviewing demographic, utilization and enrollment data for members enrolled in the managed care plans participating in the COHS expansion and Single Plan county model changes as well as:

a. The number and types of preventive, primary, specialty, and acute providers available to provide covered services to members enrolled in the managed care plans participating in the COHS expansion and Single Plan county model changes;

b. The number of providers accepting members enrolled in the managed care plans participating in the COHS expansion and Single Plan county model changes; and

c. The geographic location of providers, as shown through GeoAccess or similar software;

d. The state must respond to, and cooperate with, any CMS requests during an audit.

12.4 **Timing of Submission of Assurances of Adequate Capacity and Services.** The state must begin submitting the Access Reporting Templates for all managed care plans that furnish services to Medicaid members enrolled in Medi-Cal managed care and impacted by this section1115(a) demonstration by January 1, 2024. For the initial submissions in DY 20, the state must tailor Access Reporting Template submissions based on operational readiness and data availability. For submissions in DY 21, the state must provide the complete set of data outlined in the Access Reporting Template for all managed care plans that furnish services to

Medicaid members enrolled in Medi-Cal managed care and impacted by this section 1115(a) demonstration. The state must publish these reports on its public website. To the extent appropriate, the state and CMS will work collaboratively to assure there is no redundancy in reporting efforts under the section 1115 and 1915(b) authorities.

12.5 **Quarterly Appeals and Grievance Report for Managed Care Plans.** CMS reserves the right to request quarterly appeals and grievance data for all programs authorized under this section 1115(a) demonstration. The state must submit 60 days after of the end of each quarter, appeals and grievance data for all managed care plans that furnish services to Medicaid members enrolled in Medi-Cal managed care and impacted by this section 1115(a) demonstration launching on or after January 1, 2024. Submissions must include a subgroup analysis of child members served by the CCS program in the 12 counties expanding Whole Child Model in 2025.

The state must submit the data for four quarters. If additional data is needed after that period, CMS shall provide the state with at least 60-days' notice of the extension of the reporting. In effectuating this requirement, the state must utilize the Appeals and Grievance Reporting Template provided by CMS. To the extent appropriate, the state and CMS will work collaboratively to assure there is no redundancy in reporting efforts under the section 1115 and 1915(b) authorities.

12.6 **Choice of Primary Care Physician (PCP).** Managed care plans are required to assure that members have a choice of PCPs. Specifically, members will have a choice of at least two primary care providers, and may request change of primary care provider at least at the times described in 42 CFR 438.56(c).

13. Traditional Health Care Practices

13.1. **Traditional Health Care Practices Program Overview.** This component of the demonstration will provide federal financial participation (FFP) for state expenditures on traditional health care practices received through Indian Health Service (IHS) facilities, facilities operated by Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act (ISDEAA) (here called Tribal facilities), and facilities operated by urban Indian organizations under Title V of the Indian Health Care Improvement Act (IHCIA) (here called urban Indian organization or UIO facilities) by Medicaid and CHIP beneficiaries who are able to receive services by or through those facilities. Because some of the traditional health care practices covered under this demonstration may be considered religious or may contain elements of religious or spiritual practices, the state must attest, as a condition of receiving federal matching funds for its expenditures under Expenditure Authority 15 and 17, to: 1) providing adequate access to secular alternatives, including but not limited to preventive services, primary care, pharmacy services, mental health and substance use disorder services, as approved in its state plan, 1115 demonstration(s), or 1915 waiver(s), and in compliance with federal laws and regulations; 2) for any condition(s) addressed by and through covered traditional health care practices, ensuring beneficiaries have a genuine, independent choice to use other Medicaid- and CHIP-covered services; and 3) assuring that traditional health care practices may not be used to reduce, discourage, or jeopardize a beneficiary's access to services or settings covered under the state plan, 1115 demonstration(s), or 1915 waiver(s) and that the state will not deny access to

services or settings on the basis that the beneficiary has been offered, is currently receiving, or has previously utilized traditional health care practices. Provided that all other applicable requirements for claiming FFP have been met, the state may begin claiming FFP for its expenditures on traditional health care practices only after submitting this attestation to CMS. The state must notify beneficiaries of their rights to file grievances, complaints, and appeals related to this attestation and take any needed actions or monitoring, consistent with federal laws and regulations regarding grievances, complaints, and appeals. As per STC 16.5b the state must report any such grievances, complaints, and appeals to CMS in Monitoring Reports. CMS will review all reports and will follow up on credible concerns in those reports, as well as any credible concerns raised by members of the public. If the state is found to be out of compliance with the attestation and related STCs, CMS may: 1) require the state to submit a corrective action plan, 2) issue a deferral, or 3) withdraw authority for traditional health care practices.

13.2. **Criteria for Receiving Coverage for Traditional Health Care Practices.** To receive coverage for traditional health care practices under this component of the demonstration, a beneficiary must meet the following criteria:

a. Is a Medicaid or CHIP beneficiary, and

b. Is able to receive services delivered by or through IHS, Tribal or UIO facilities, as determined by the facility.[1]

c. Is in a group for which the state has opted to phase-in implementation of this coverage.

13.3. **Scope of Traditional Health Care Practices**. The state may claim FFP for its expenditures on any traditional health care practice that is delivered by or through an IHS, Tribal, or UIO facility to a beneficiary meeting the criteria in STC 13.2.

a. The state will be required to report traditional health care practices provided and utilization in the Annual Monitoring Report.

b. Consistent with CMS's longstanding interpretation of section 1905(b) of the Act, the state will receive a 100 percent federal medical assistance percentage (FMAP) for its expenditures on the services for which coverage is authorized under Expenditure Authority 15 when those services are received through IHS and Tribal facilities by Medicaid beneficiaries who are American Indians or Alaska Natives.[2] State expenditures for these services when delivered to Medicaid beneficiaries by UIO facilities, state expenditures for these services when delivered by or through qualifying facilities to CHIP beneficiaries, and state expenditures on these services when

[1] Under IHS authorities, IHS and Tribal facilities serve Medicaid and CHIP beneficiaries who are eligible to receive services from the facility under IHS regulations at 42 CFR part 136, and also may serve other Medicaid and CHIP beneficiaries under 25 U.S.C. 1680c. Under IHS authorities, UIO facilities that receive funding from IHS are authorized to use the IHS funding to serve urban Indians (as defined in 25 U.S.C. 1603(28)), residing in the urban centers (as defined in 25 U.S.C. 1603(27)) in which such organizations are situated, including Medicaid and CHIP beneficiaries who also meet those definitions. UIO facilities may also serve other Medicaid and CHIP beneficiaries with non-IHS funds.

[2] Section 1905(b) of the Social Security Act (third sentence).

provided by or through qualifying facilities to Medicaid beneficiaries who are not American Indians or Alaska Natives will be federally matched at the otherwise applicable state service match.

c. Excluded items, services, and activities that are not covered as part of the scope of traditional health care practices include, but are not limited to:

i. Construction costs (including building modification and building rehabilitation);

ii. Room and board;

iii. Costs for services in prisons or correctional facilities, or services for people who are civilly committed and unable to leave an institutional setting, except as described in expenditure authority 13;

iv. Services provided to individuals who are not lawfully present in the United States or are undocumented;

v. Capital investments; and

vi. Research grants and expenditures not related to monitoring and evaluation.

13.4. **Participating Facilities**. Traditional health care practices are covered only when received through IHS, Tribal, or UIO facilities.

13.5. **Participating Providers**. Practitioners or providers of traditional health care practices must be employed by or contracted with IHS, Tribal, or UIO facilities, which could include an urban Indian organization contracted with an IHS or Tribal facility. The qualifying facility is expected to make the following determinations and to provide documentation of these determinations to the state, upon request. Each qualifying facility is responsible for determining that each practitioner, provider, or provider staff member employed by or contracted with the qualifying facility to provide traditional health care practices 1) is qualified to provide traditional health care practices to the qualifying facility's patients; and 2) has the necessary experience and appropriate training. The qualifying facility also is expected to: 1) establish its methods for determining whether its employees or contractors are qualified to provide traditional health care practices, 2) bill Medicaid or CHIP for traditional health care practices furnished only by employees or contractors who are qualified to provide them, and 3) provide documentation to the state about these activities upon request. The state must make any documentation it receives from qualifying facilities about these activities and determinations available to CMS upon request.

13.6. **Payment Methodology.** The state must comply with the payment rate-setting requirements in 42 CFR Part 447, Subpart B, as though a state plan amendment were required, to establish a payment rate or methodology for traditional health care practices as approved through demonstration expenditure authority 15 and 17. The state must conduct state-level public notice under 42 CFR 447.205 prior to using the applicable payment methodologies to pay for traditional health care practices and must maintain documentation of the payment methodologies on its website described in 42 CFR 447.203. The state is encouraged to engage

with CMS on the development of all new and modified fee-for-service or non-risk rate contract payment methodologies if the state is not using the IHS All-Inclusive Rate (AIR)[3] when paying for traditional health care practices. Provided that all other requirements for claiming FFP have been met (including submission of the attestation described in STC 13.1), the state may draw FFP for traditional health care practices after using the payment methodologies to pay providers (and can use them to pay providers only subsequent to conducting notice under 42 CFR 447.205, as described above). The DMC-ODS counties will pay participating facilities delivering traditional health care practices at the rates or methodologies established by the state.

14. Negative Balance

14.1. **Repayment of Payment Management System (PMS) Negative Account Balances:** As of November 6, 2021, California has negative account balances in some of its Medicaid PMS accounts. In order to bring the accounts into balance, the state shall do the following:

a. **Issue Resolution**. CMS and the state shall work collaboratively to resolve outstanding financial issues:

i. Delayed certified public expenditure reconciliations – The state should review all approved payment methodologies that require a final reconciliation and ensure that clear time frames are incorporated within the approved methodology. For any methodology not containing a clear timeline for completion of the final reconciliation, the state must submit a proposed revised methodology no later than December 31, 2022.

ii. Open deferrals – The state must immediately submit decreasing adjustments for any remaining placeholder claims after December 31, 2021. For all other open deferrals currently beyond the regulatory 120-day response period, the state must submit a timeline for resolving the deferral. This proposed timeline needs to be submitted no later than March 31, 2022. CMS will work collaboratively with the state to resolve each outstanding issue.

b. **Repayment Process.**

i. Negative Account Balances – For any negative account balances unresolved as of June 30, 2022, CMS will issue a demand letter to the state identifying the final negative account balance amount and the state's right to appeal. The state may request a repayment schedule in Attachment R that ensures repayment of any remaining amount of the negative account balances identified through Federal Fiscal Year 2020 through regular quarterly installments, plus interest, by the end of the waiver period (12/31/2020) or in three years or less from CMS' approval of the repayment schedule. Interest will begin on the date of the demand notice and end when the debt is paid in full. Additional repayment requirements are identified in section c through h below.

[3] See https://www.ihs.gov/businessoffice/reimbursement-rates/.

ii. Deferred Claims – For any deferred claims 1) not paid by CMS by June 30, 2022, 2) for which the state has drawn FFP from its PMS account, and 3) for which the state has not returned all drawn FFP to its PMS account by June 30, 2022, CMS shall proceed by disallowance in accordance with 42 CFR 430 Subpart C. The state may request a repayment schedule in accordance with 42 CFR 430 Subpart C. This repayment is not subject to the provisions of subsection (c) through (h) below.

c. **Repayment Period Interest**. Interest will accrue on the final unresolved negative account balance amount; at the Current Value of Funds Rate (CVFR) published by the U.S. Department of Treasury, beginning on the date of the demand letter issued by CMS pursuant to STC 12.1(b)(i) until the entire principle amount is repaid in full. Each payment will be applied first to accrued interest and then to principal. After each payment, interest will continue to accrue on the remaining principal balance until the debt is paid in full or otherwise resolved by CMS. CMS will adjust the repayment schedule to reflect any changes to the CVFR during the repayment schedule.

d. Each payment will be applied first to accrued interest and then to principal. After each payment, interest will continue to accrue on the remaining principal balance until the debt is paid in full or otherwise resolved by CMS. CMS will adjust the repayment schedule to reflect any changes to the CVFR during the repayment schedule.

e. **Source of Repayment Funds.** The funding source of repayment cannot be derived from federal funds, including any Medicaid or CHIP funds available to the state in FY 2014 or later PMS accounts.

f. **Mechanism of Repayment.** The quarter payment amount due or payment in full may be sent via FedWire (preferred), Automated Clearing House (ACH), or check – specific instructions for FedWire or ACH may be obtained from your state's Division of Payment Management representative. The quarter payment amount due or in payment full via check should be made payable to: "The Department of Health and Human Services" and sent to the following address:

HHS Program Support Center
P.O. Box 979132
St. Louis, MO 63197

Please include your PMS account number and a brief description explaining the nature of the return. Please include a copy of this STC along with your payment.

g. **PMS Draws for Deferred FFP.** When CMS issues a deferral of claims for FFP to the state in accordance with the timelines set forth in 42 CFR 430.40, the state must immediately return the deferred FFP to the applicable PMS subaccount while the deferral is being resolved. After CMS reviews the deferred claims, CMS will determine the allowability of the claims. If CMS determines that a deferred claims are allowable under federal requirements, CMS will release the deferred funds to the

appropriate PMS subaccount and will notify California that the funds are available for draw.

h. **Adjustments to Repayment Schedule.** The state may request a recalculation of the repayment schedule from CMS if the state decides to make accelerated repayment installments. CMS will work with the state to recalculate based on any existing positive amounts that may be available in the PMS subaccount(s) and/or any positive Medicaid grant awards issued that may reduce the outstanding negative PMS subaccount(s) balances. CMS will reissue the repayment schedule to reflect adjustments, if any.

i. **Cash Management Improvement Act (CMIA) Agreement.** The Repayment of Payment Management System (PMS) Negative Account Balances section of these STCs does not preclude action by other federal agencies, including the United States Department of Treasury resulting from a violation of the CMIA agreement between the State of California and the United States Department of Treasury.

15. Global Payment Program

15.1. California will operate a global payment program (GPP) to assist public health care systems (PHCS) that provide health care for the uninsured. The GPP is meant to focus on value, rather than volume, of care provided. The purpose is to support PHCS for their key role in providing services to California's remaining uninsured and to promote the delivery of more cost-effective and higher-value care to the uninsured. Promoting more cost-effective and higher value care means that the payment structure will reward the provision of care in more appropriate venues, rather than through the emergency department or through inpatient hospital settings. In addition to providing value-based care, the GPP will incorporate services that are otherwise available to the state's Medi-Cal beneficiaries under different Medicaid authorities with the aim of enhancing access and utilization among the uninsured, and thereby advancing health equity in the state. The state will continue to test and assess this approach to assist PHCS, and will strengthen the GPP performance and effectiveness for potentially broader application.

15.2. Under the GPP, participating PHCS will continue receiving GPP payments that will be calculated using a value-based point methodology that incorporates factors that shift the overall delivery of services for the uninsured to more appropriate settings and reinforce structural changes to the care delivery system that will improve the options for treating both Medicaid and uninsured patients. The methodology for setting service values will incorporate measures of value for the patient in conjunction with the recognition of costs to the health care system. Care being received in appropriate settings will be valued relatively higher than care given in inappropriate care settings for the type of illness.

15.3. Payments will not exceed the limits in Attachment K (GPP Funding and Mechanics Protocol), but may be less if the thresholds are not achieved. Services will be grouped into categories that reflect where care is being provided. Within each category services will be grouped into tiers of similar service intensity. This will assist in modifying relative values of services, so that their long-term value is incorporated and no longer an externality. Service tiers across categories that aim to provide the same end result would have relative values of generally equivalent care. The

intent of this framework is to provide flexibility in provision of services while encouraging a broad shift to more cost-effective care that is person-centered.

15.4. The total amount of annual funding available for the GPP in PY1-12 is a combination of a portion of the state's DSH allotment that would otherwise be allocated to the PHCS and the amount associated with the historical Safety Net Care Uncompensated Care Pool (UC Pool) that existed before the GPP.

15.5. **Entities Eligible to Receive Global Payments.** Payments under the GPP are available for PHCS that are comprised of a designated public hospital (DPH) identified in Attachment C that agrees to participate in the GPP and that DPH's affiliated and contracted providers (collectively, for purposes of the GPP only, Public Health Care System or "PHCS"). For purposes of the GPP, multiple DPHs and their affiliated and contracted providers may comprise a single PHCS in accordance with criteria established and set forth in Attachment K (GPP Funding and Mechanics Protocol). DHCS shall identify to CMS all PHCS that will participate in the GPP.

15.6. **General Overview of Global Payments**

a. Global payments shall be available based on a GPP program year ("GPP PY"). The first GPP PY is for the period July 1, 2015 through June 30, 2016. GPP PY 6 aligned with the six-month period of July 1, 2020 through December 31, 2020. GPP PY7 aligned with the period of January 1, 2021 through December 31, 2021. GPP PYs 8 through 12 will continue to align with CY periods, beginning with GPP PY 8 aligning with the CY period of January 1, 2022 through December 31, 2022.

b. An annual GPP budget for each participating PHCS shall be established in accordance with the parameters set forth in Attachment K (GPP Funding and Mechanics Protocol). For the purposes of GPP PY 6, the annual GPP budget shall be established for a six-month period; for GPP PY7 and all future PYs, the global budget shall be established for a full calendar year. The aggregate GPP budget among participating PHCS shall not exceed the total computable amount of GPP funds available in a given GPP PY, as established by the limits set forth in STC 13.10(e).

c. PHCS shall be required to provide a threshold amount of care, measured in points, to earn their entire annual GPP budget amount. Points for services will be assigned in a manner that incorporates measures of value for the patient and that achieves other programmatic goals, as set forth in Attachment L (GPP Valuation Methodology Protocol).

d. Each PHCS annual threshold point amount is determined through a baseline analysis, accounting for factors such as its historical and projected volume, cost and mix of services to the uninsured and estimated need, determined in accordance with Attachment L (GPP Valuation Methodology Protocol). These thresholds will ensure that PHCS only receive full GPP payments if the PHCS provides levels of services to the uninsured population necessary to meet its threshold that has been set based on the level of services that would otherwise have been provided to the uninsured. For purposes of the GPP, care will be considered uninsured for individuals for whom there

is no source of third-party coverage for the specific service furnished by the PHCS. Furthermore, an individual will not be considered uninsured with regard to a non-traditional service (as identified in Attachment L, GPP Valuation Methodology Protocol) he or she receives from the PHCS if the individual has a source of third party coverage for the category of service for which the non-traditional service is being used as a substitute.

e. Interim GPP payments shall be made to PHCS on a quarterly basis, calculated as 25 percent of the PHCS's annual global budget, or, with respect to GPP PY 6, 50 percent of the PHCS's annual budget. Within nine months following the end of each GPP PY, the state shall reconcile interim payments to the amount earned for services as established by the reports submitted in accordance with f. below.

f. Attachment K (GPP Funding and Mechanics Protocol) sets forth a reporting schedule by which each PHCS will report its actual services provided under the GPP and the corresponding points valuation to be used by DHCS to determine the payments due. The report shall at least include the GPP-related services furnished by the PHCS during the applicable year, reported by category, tier, and type, and shall serve as the basis for reconciling interim GPP payments with final amounts due. As payments for services under the GPP are based on point value, no cost reconciliation protocol will apply. PHCS shall not be subject to the reporting requirements of 42 C.F.R. Section 447.299.

g. The full amount of a PHCS global budget shall be payable to the PHCS if it meets or exceeds its designated threshold for a given GPP PY. In the event a PHCS does not achieve or exceed its threshold for a given GPP PY, the PHCS's GPP payment shall equal its global budget as reduced by the proportion by which it fell short of its threshold.

h. The state, in accordance with procedures set forth in Attachment K (GPP Funding and Mechanics Protocol), shall redistribute unearned GPP funds that were available in a given GPP PY amongst other PHCS that have exceeded their respective threshold for that year.

i. The non-federal federal share of GPP payments will be provided by PHCS through intergovernmental transfers (IGT), subject to the requirements of STC 15.10 (Sources of Non-Federal Share) below. Upon receipt of the IGTs, DHCS will draw the federal funding and pay both the non-federal and federal shares of the applicable GPP payments in accordance with the requirements and schedules described herein and in Attachment K (GPP Funding and Mechanics Protocol). In the event GPP payments are recouped upon reconciliation, DHCS will repay the corresponding federal share to CMS in accordance with federal regulations at 42 CFR 430.30, et seq.

j. GPP payments determined annually for each eligible PHCS, after accounting for finalization of the applicable DSH allotment and subparagraphs (g) and (h) as applicable, represent the final amounts available for that GPP PY.

15.7. **Valuation of Service**

a. Services under the GPP shall be valued in accordance with the methodology set forth in Attachment L (GPP Valuation Methodology Protocol). The valuation methodology allows for the continuation of services provided by Public Health Care Systems that were reimbursed under the DSH and SNCP structure that existed for PHCS prior to the GPP, while encouraging more cost-effective and innovative care where appropriate. Point values shall also be developed for those innovative or alternative services where there is currently little to no reimbursement. The valuation methodology reflects the following programmatic goals:

   i. Facilitate a shift away from the previous cost-based payment that was restricted to mostly hospital settings and subject to prolonged periods of cost reconciliation;

   ii. Broaden the settings in which Public Health Care Systems receive payment for services furnished to the uninsured, and encourages Public Health Care Systems to provide greater primary and preventive services, as well as to create access to alternative modalities such as telehealth, group visits and health coaching;

   iii. Emphasize coordinated care and alternative modalities by recognizing the higher value of access to primary care, ambulatory care, and other core components of care management, as compared to the higher cost of avoidable emergency room visits and acute care hospital stays;

   iv. Recognize the value of services that typically are not directly or separately reimbursed by Medicaid or other payors ("non-traditional" services), and that substitute or complement services for which payment is typically available upon provision of the service ("traditional" services).

   v. Make GPP a potentially equity-enhancing program through valuation of additional services otherwise available for the state's Medicaid beneficiaries such that the program can incentivize provision of such services to the uninsured population, potentially to begin addressing health inequities among populations these hospital systems serve.

b. All services eligible for points under the GPP are grouped into the four categories described below in STC 13.11:

c. Services within the categories are further stratified into tiers based on similar service intensity, activity and/or effort. Relative point values are assigned to tiers for purposes of reporting and generating payments.

d. The valuation methodology incorporates a phased approach in which traditional services, over the course of the demonstration approval period, reflect reduced point values. High intensity services will continue to be recognized for their value and importance, including recognition in the point system that emergency room visits and inpatient stays may be necessary and appropriate.

e. Relative point values will be initially set based on cost and then adjusted to a limited degree based on other measures of value, in order to assist in maintaining accountability for the amount of services provided compared to the funding PHCS receive. Higher relative value points may be assigned to services, including non-traditional services that help promote one or more of the objectives from the list below; however, the relative point value of services, except for those services for which cost information is not readily available, such as non- traditional services, may not vary from their initial cost-based amounts by more than 40 percent at any time during the GPP.

    i. Timeliness and convenience of service to patient;

    ii. Increased access to care;

    iii. Earlier intervention;

    iv. Appropriate resource use for a given outcome;

    v. Health and wellness services that result in improved patient; decisions and overall health status;

    vi. Potential to mitigate future costs;

    vii. Preventative services;

    viii. Likelihood of bringing a patient into an organized system of care; and

    ix. Additional criteria, to be designed by the state.

f. In GPP PYs in which point revaluation has occurred, point revaluation must be calibrated so that the overall impact would not lead to any PHCS receiving additional total points in any given GPP PY if its utilization and the mix of services provided remained the same as in the baseline period used to determine the designated threshold. When DHCS develops for approval point values for additional services intended to increase health equity, this subparagraph shall not be interpreted to necessarily require revaluation of other existing services' values. However, the state must provide valuation for any additional services, as further described.

g. The exact methodology for assigning points to the services is reflected in Attachment L (GPP Valuation Methodology Protocol), as approved by CMS on March 21, 2016. This Protocol remains in effect until the state introduces additional services to the GPP. Any updates to Attachment L, including introduction of additional services, and any modifications to the valuation methodology, will be subject to CMS approval, and will require CMS approval before it can be implemented. If the state proposes to change point valuations or add new services, it must obtain CMS approval before they may be implemented in the program.

h. PHCS are not required to provide every service identified on Attachment LFF (GPP Valuation Methodology Protocol), but are allowed the flexibility to provide any combination of services, through their global payments budgets and service-related point thresholds, to address local needs.

15.8. **Global Payment Program Funding and Mechanics Protocol and Global Payment Program Service Valuation Methodology Protocol.** The GPP Funding and Mechanics Protocol (Attachment K) and the GPP Valuation Methodology Protocol (Attachment L) set forth in detail the parameters and procedures related to the operation of the GPP.

a. **Global Payment Program Valuation Methodology Protocol** includes the following:

i. The master list of services and activities for which points apply under the GPP and their associated point values, including the placement of services within the categories and tiers and how point values will change over the course of the demonstration.

ii. Methodology for calculating and modifying the PHCS thresholds.

b. **The Global Payment Program Funding and Mechanics Protocol specifies the following:**

i. How PHCS may be defined, including criteria for when multiple DPHs may comprise a single Public Health Care System.

ii. Methodology for establishing and modifying annual global budgets for each PHCS.

iii. Technical guidance on how eligible services to the uninsured are defined, accounted for and reported.

iv. Reporting schedule for PHCS to report services provided under the GPP.

v. IGT, interim payment and final payment reconciliation mechanics and schedules.

vi. Methods for redistributing unused portions of annual global budgets among PHCS that exceeded their point threshold.

Within 90 calendar days of CMS approval of the CalAIM demonstration, the state will submit an updated version of the GPP Funding and Mechanics Protocol (Attachment K) and the GPP Valuation Methodology Protocol (Attachment L). Updates to both protocols must accommodate, among other things, inclusion of additional services available to Medi-Cal beneficiaries that the state will introduce in the GPP services with the aim of supporting health equity considerations in the state. For both the deliverables, the state must submit a revised Protocol within sixty (60) calendar days after receipt of CMS's comments, if any. Once the updated Protocols are finalized and approved, these will replace any previous CMS-approved versions, and the updated versions will be incorporated into the STCs as Attachments K and L, respectively.

15.9. **Global Payment Program Health Equity Monitoring Metrics Protocol:** No later than ninety (90) calendar days after the approval of the CalAIM demonstration extension, the state will submit to CMS a GPP Health Equity Monitoring Metrics Protocol outlining a set of metrics focused on access to, utilization of, and quality of health care and/or health outcomes that the state will systematically calculate and report for understanding existing health inequities among

the state's uninsured population who receive GPP services, and thereafter, for tracking progress in bridging any such inequities. The metrics will, to the extent possible, leverage the national established quality measures, including but not limited to, Medicaid Adult, Child, and Maternity Core Sets, and will in general be reported annually once available. The state can also propose other nationally recognized measures or appropriate metrics that are aligned with its demonstration goals pertinent to the GPP, the uncompensated care pool, and its health equity considerations.

The state will work collaboratively with CMS through iterations of the Protocol to finalize an approvable set of health equity metrics and prioritize collection of data on race, ethnicity, language, disability status and other factors to the extent feasible, and using the data to identify disparities in access, health outcomes and quality and experiences of care. The Health Equity Monitoring Metrics Protocol will outline for each of the selected metrics the reporting timeline, which might be impacted by the state's data systems readiness, the baseline reporting period, and the reporting frequency. The state will report the progress and metrics data through its Quarterly and/or Annual Monitoring Reports, per the reporting schedule that will be established in the Protocol. To the extent the state will require ramp-up time to set up data systems to be able to begin reporting the various metrics data overall or for any of the key subpopulations of interest, the state should provide regular updates to CMS on progress with data systems readiness via the Monitoring Reports.

Once approved, the Health Equity Monitoring Metrics Protocol will be appended to these STCs as Attachment M.

15.10. **Funding and Annual Limits.**

a. Under the GPP, a portion of the state's DSH funding and funding from the UC Pool are combined to make payments to participating PHCS that incur costs for services to the remaining uninsured. During each GPP PY, FFP will be available for such GPP payment expenditures up to the amount equal to the state's entire DSH allotment as set forth in section 1923(f) of the Act, adjusted as described in subparagraphs of this STC b and c below ("Adjusted DSH"), combined with the additional Demonstration UC funding amounts as set forth in subparagraph d below. For the purposes of GPP PY 6, only the Adjusted DSH shall be reduced by 50 percent. In order to align federal fiscal year DSH allotment amounts with the conversion to calendar year GPP PYs, GPP PYs 7 through 12 will be funded 50 percent of the Adjusted DSH for the FFY beginning prior to the first GPP PY, and 50 percent of the Adjusted DSH for the FFY beginning during the GPP PY.

b. A portion of California's DSH allotment shall be set aside for those California DSH facilities that do not participate in the GPP. The amount set aside shall be identified in Attachment Q DSH Coordination Methodology.

c. In any year to which reductions to California's DSH allotment are required by section 1923(f)(7) of the Social Security Act, the amount of the DSH allotment attributable to GPP in a given GPP PY shall be reduced consistent with CMS guidelines.

d. The total computable amount available for the UC component shall equal $472 million in GPP PY1. For GPP PYs two through five, the UC component was determined by CMS based upon the information contained in the Independent Report on Uncompensated Care. As approved by CMS on July 14, 2016, the total computable amounts available for the UC component shall equal $472 million for each of GPP PYs two through five. For GPP PY 6 the total computable amount available for the UC component shall equal $236 million. For GPP PY 7 through 12, the total computable amount available for the UC component shall equal $472 million annually.

e. Taken together, the total computable annual limits for GPP payments will not exceed the limits set forth below:

GPP PY 1 (SFY 15-16) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 2 (SFY 16-17) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 3 (SFY 17-18) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 4 (SFY 18-19) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 5 (SFY 19-20) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 6 (July 1, 2020 – December 31, 2020) – Adjusted DSH at 50% + $236 million = approximately $1.45 billion
GPP PY 7 (CY 2021)- Adjusted DSH + $472 million= approximately $2.9 billion
GPP PY 8 (CY 2022) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 9 (CY 2023) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 10 (CY 2024) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 11 (CY 2025) – Adjusted DSH + $472 million = approximately $2.9 billion
GPP PY 12 (CY 2026) – Adjusted DSH + $472 million = approximately $2.9 billion

f. The non-federal share of payments under the GPP shall be funded by voluntary intergovernmental transfers made by PHCS, or governmental agencies affiliated with PHCS. The funding entity shall certify that the funds transferred qualify for federal financial participation pursuant to 42 CFR part 433 subpart B, and are not derived from impermissible sources such as recycled Medicaid payments, federal money excluded from use as state match, impermissible taxes, and non- bona fide provider-related donations. The State must have permissible sources for the non-federal share of GPP expenditures, which may include permissible IGTs from government-operated entities and state funds. Sources of non-federal funding shall not include provider taxes or donations impermissible under section 1903(w), impermissible intergovernmental transfers from providers, or federal funds received from federal programs other than Medicaid or Medicare (unless expressly authorized by federal statute to be used for claiming purposes, and the federal Medicaid funding is credited to the other federal funding source). For this purpose, federal funds do not include GPP payments, PATH payments, or patient care revenue received as payment for services rendered under programs such as Medicare or Medicaid.

g. The state will ensure that any lack of adequate funds from local sources will not result in lowering the amount, duration, scope or quality of Medicaid services available under the state plan or this demonstration. The preceding sentence is not intended to

preclude the state from modifying the Medicaid benefit through the state plan amendment process.

15.11. **Categories.** Each service will be assigned into a category by the state that best reflects its characteristics of intensity and area delivered. These categories will assist in determining the point values of individual services. The categories listed below are intended to provide a broad overview of the categories and services. In addition to the categories below, the state will create a new category to include those services intended to address health equity; this new category will be in effect beginning in PY9. The full description of categories are included in Attachment M and shall be updated to reflect any additional services intended to address health equity.

a. **Category 1:** Traditional Outpatient – This category includes traditional outpatient services provided by a public hospital system facility:

i. Non-physician practitioner;

ii. Traditional, provider-based primary care or specialty care visit;

iii. Mental health visit;

iv. Dental;

v. Public health visit;

vi. Post-hospital discharge;

vii. Emergency room/Urgent Care; and

viii. Outpatient procedures/surgery, provider performed diagnostic procedures.

b. **Category 2:** Non-Traditional Outpatient – This category includes non-traditional outpatient encounters, where care is provided by non-traditional providers or in non-traditional settings

i. Community health worker encounters;

ii. Health coach encounters;

iii. Care navigation; and

iv. Health education & community wellness encounters.

c. **Category 3:** Technology-Based Outpatient – This category includes technology- based outpatient encounters that rely mainly on technology to provide care:

i. Call line encounters;

ii. Texting;

iii. Telephone and email consultations between provider and patient;

iv. Provider-to-provider eConsults for specialty care; and

v. Telemedicine;

d. **Category 4:** Inpatient and Facility Stays – This category includes traditional inpatient and facility stays by patients:

i. Recuperative/respite care days;

ii. Sober center days;

iii. Sub-acute care days; and

iv. Skilled nursing facility days;

15.12. **Service Threshold.** The threshold amounts for each PHCS will initially be constructed using the volume and cost of services occurring in participating providers, and will use the most recent complete state fiscal year data (Base SFY). Point values for each service will be consistent across all providers. The threshold amounts shall be determined in accordance with the methodology set forth in Attachment K (GPP Funding and Mechanics Protocol), which takes into account the following requirements and factors:

a. Historic point values for each service category on a per unit of service basis across all Public Health Care Systems, taking into account at a minimum, the varying methods for identifying units and categories of services, cost per unit, cost trends and service mix;

b. Base SFY utilization for each Public Health Care System; and

c. Adjustments to account for changes in uninsured service needs since Base SFY, including the coverage expansions resulting from ACA implementation; and,

d. Adjustments to account for public health emergencies or other state of emergency situations that impact the delivery of GPP services by a Public Health Care System.

e. This threshold will require approval by CMS before it can be finalized.

f. Thresholds for GPP PY2-PY12 will decline in proportion to reductions in annual limits.

15.13. **Coordination with DSH**

a. To maintain budget neutrality, the state will not make state plan-based DSH payments and uncompensated care payments to hospitals participating in the GPP.

b. Hospitals that meet DSH eligibility criteria and which are not participating within a PHCS may receive DSH payments under the applicable provisions of Attachment 4.19-A of the state plan, as modified pursuant to Attachment Q (DSH Coordination Methodology).

15.14. **Discontinuation of GPP**

DHCS may, in consultation with the participating PHCS, discontinue the GPP in any subsequent state fiscal year(s) for the remainder of the Demonstration and revert to financing uncompensated care costs for Medicaid and uninsured patients under the DSH program pursuant to the state plan. DHCS shall notify CMS no later than 30 calendar days prior to the start of the initial state fiscal year for which the GPP will be discontinued. DHCS will follow the appropriate processes as is necessary to facilitate DSH payments to affected PHCS under the State plan.

15.15. **DSH Payments and FFY**

The state is not authorized to make a DSH payment under the Medicaid state plan for any hospital for any federal fiscal year (FFY) in which that hospital is eligible for a GPP payment for a GPP PY or portion thereof that is within that FFY. A DSH payment is considered to be made for a FFY if the payment would count against the DSH allotment for that FFY. In the event that the GPP is not authorized for a full PY, the state is prohibited from making duplicate GPP and DSH payments to GPP-eligible hospitals and must submit, subject to CMS approval, a method for allocating GPP and DSH payments to avoid duplication during the affected period.

16. GENERAL REPORTING REQUIREMENTS

16.1. **Deferral for Failure to Submit Timely Demonstration Deliverables.** CMS may issue deferrals in accordance with 42 CFR part 430 subpart C, in the amount of $5,000,000 per deliverable (federal share) when items required by these STCs (e.g., required data elements, analyses, reports, design documents, presentations, and other items specified in these STCs) (hereafter singly or collectively referred to as "deliverable(s)") are not submitted timely to CMS or are found to not be consistent with the requirements approved by CMS. A deferral shall not exceed the value of the federal amount for the current demonstration period. The state does not relinquish its rights provided under 42 CFR part 430 subpart C to challenge any CMS finding that the state materially failed to comply with the terms of this agreement.

The following process will be used: 1) thirty (30) days after the deliverable was due if the state has not submitted a written request to CMS for approval of an extension as described in subsection (b) below; or 2) thirty days after CMS has notified the state in writing that the deliverable was not accepted for being inconsistent with the requirements of this agreement and the information needed to bring the deliverable into alignment with CMS requirements:

a. CMS will issue a written notification to the state providing advance notification of a pending deferral for late or non-compliant submissions of required deliverable(s).

b. For each deliverable, the state may submit to CMS a written request for an extension to submit the required deliverable that includes a supporting rationale for the cause(s) of the delay and the state's anticipated date of submission. Should CMS agree to the state's request, a corresponding extension of the deferral process can be provided. CMS may agree to a corrective action plan submitted by the state as an interim step before applying the deferral, if the state proposes a corrective action plan in the state's written extension request.

c. If CMS agrees to an interim corrective plan in accordance with subsection (b), and the state fails to comply with the corrective action plan or, despite the corrective action plan, still fails to submit the overdue deliverable(s) with all required contents in satisfaction of the terms of this agreement, CMS may proceed with the issuance of a deferral against the next Quarterly Statement of Expenditures reported in Medicaid Budget and Expenditure System/State Children's Health Insurance Program Budget and Expenditure System (MBES/CBES) following a written deferral notification to the state.

d. If the CMS deferral process has been initiated for state non-compliance with the terms of this agreement with respect to required deliverable(s), and the state submits the overdue deliverable(s), and such deliverable(s) are accepted by CMS as meeting the requirements specified in these STCs, the deferral(s) will be released.

As the purpose of a section 1115 demonstration is to test new methods of operation or service delivery, a state's failure to submit all required reports, evaluations and other deliverables will be considered by CMS in reviewing any application for an extension, amendment, or for a new demonstration.

16.2. **Submission of Post-approval Deliverables.** The state must submit all deliverables as stipulated by CMS and within the timeframes outlined within these STCs, unless CMS and the state mutually agree to another timeline.

16.3. **Compliance with Federal Systems Updates.** As federal systems continue to evolve and incorporate additional 1115 demonstration reporting and analytics functions, the state will work with CMS to:

a. Revise the reporting templates and submission processes to accommodate timely compliance with the requirements of the new systems;

b. Ensure all 1115, T-MSIS, and other data elements that have been agreed to for reporting and analytics are provided by the state; and

c. Submit deliverables to the appropriate system as directed by CMS.

16.4. **Monitoring Protocol.** The state must submit to CMS a Monitoring Protocol no later than 150 calendar days after the approval of the demonstration. The state must submit a revised Monitoring Protocol within 60 calendar days after receipt of CMS's comments. Once approved, the Monitoring Protocol will be incorporated in the STCs as Attachment DD. In addition, the state must submit an updated or a separate Monitoring Protocol for any amendments to the demonstration no later than 150 calendar days after the approval of the amendment. Such amendment Monitoring Protocols are subject to the same requirement of revisions and CMS approval, as described above.

At a minimum, the Monitoring Protocol must affirm the state's commitment to conduct Quarterly and Annual Monitoring Reports in accordance with CMS's guidance and technical assistance and using CMS-provided reporting templates, as applicable and relevant for different policies. Any proposed deviations from CMS's guidance should be documented in the

Monitoring Protocol. The Monitoring Protocol must describe the quantitative and qualitative elements on which the state will report through Quarterly and Annual Monitoring Reports. For the overall demonstration as well as specific policies where CMS provides states with a suite of quantitative monitoring metrics (e.g., those described under the performance metrics section in STC 16.5), the state is required to calculate and report such metrics leveraging the technical specifications provided by CMS. The Monitoring Protocol must specify the methods of data collection and timeframes for reporting on the demonstration's progress as part of the Quarterly and Annual Monitoring Reports. In alignment with CMS guidance, the Monitoring Protocol must additionally specify the state's plans and timeline on reporting metrics data stratified by key demographic subpopulations of interest (e.g., by sex, age, race/ethnicity, primary language, disability status, sexual orientation and gender identity, and geography) and demonstration component.

For the HRSN and reentry services, authorized through this demonstration, the Monitoring Protocol requires specifying a selection of quality of care and health outcomes metrics and population stratifications based on CMS's upcoming guidance on the Health Equity Measure Slate, and outlining the corresponding data sources and reporting timelines, as applicable to the demonstration initiatives and populations. If needed, the state may submit an amendment to the Monitoring Protocol within 150 days after the receipt of the final Health Equity Measure Slate from CMS. This slate of measures represents a critical set of equity-focused metrics known to be important for closing key equity gaps in Medicaid/CHIP (e.g. the National Quality Forum (NQF) "disparities-sensitive" measures) and prioritizes key outcome measures and their clinical and non-clinical (i.e. social) drivers. The Monitoring Protocol must also outline the state's planned approaches and parameters to track implementation progress and performance relative to the goals and milestones including relevant transitional, non-service expenditures investments, as captured in these STCs, or other applicable implementation and operations protocols.

The state will also be expected to set up its HRSN service delivery system to allow screening of beneficiaries for identified needs, and develop appropriate closed-loop referral system or other feedback loop to ensure beneficiaries receive service referrals and provisions, and provide any applicable update on this process via the Monitoring Reports, in alignment with information provided in the HRSN Community Supports Protocol (STC 8.10(d)).

In addition, the state must describe in the Monitoring Protocol methods and timeline to collect and analyze non-Medicaid administrative data to help calculate applicable monitoring metrics. These sources may include, but are not limited to (1) community resource referral platforms, (2) records of social services receipt from other agencies (such as SNAP or TANF benefits, or HUD assistance), (3) other data from social services organizations linked to beneficiaries (such as, services rendered, resolution of identified need, etc., as applicable), (4) social needs screening results from electronic health records, health plans, or other partner agencies, and (5) data related to carceral status Medicaid eligibility, and the health care needs of individuals who are incarcerated and returning to the community. Across data sources, the state must make efforts and consult with relevant non-Medicaid social service agencies to collect data in ways that support analyses of data on beneficiary subgroups.

To the extent applicable, the state's selection and reporting of monitoring metrics for the HRSN services is expected to align with the monitoring required by the state's 1915(b)(1)/(4) Waiver for California Advancing & Innovating Medi-Cal (CalAIM) special terms and conditions for other similar services.

In addition, the state must describe in the Monitoring Protocol methods and a timeline for collecting and analyzing non-Medicaid administrative data necessary to conduct comprehensive monitoring and evaluation of traditional health care practices. These sources may include but are not limited to data related to traditional health care practices provided by IHS, Tribal, or UIO facilities. Across data sources, in consultation with IHS, Tribal, and UIO facilities, the state must make efforts to collect data in ways that support subgroup analyses as appropriate.

For the qualitative elements (e.g., operational updates as described in STC 16.5 below), CMS will provide the state with guidance on narrative and descriptive information, which will supplement the quantitative metrics on key aspects of the demonstration policies. The quantitative and qualitative elements will comprise the state's Quarterly and Annual Monitoring Reports.

16.5. **Monitoring Reports.** The state must submit three (3) Quarterly Monitoring Reports and one (1) Annual Monitoring Report each DY. The fourth quarter information that would ordinarily be provided in a separate report should be reported as distinct information within the Annual Monitoring Report. The Quarterly Monitoring Reports are due no later than sixty (60) calendar days following the end of each demonstration quarter. The Annual Monitoring Report is due no later than ninety (90) calendar days following the end of the DY. The state must submit a revised Monitoring Report within sixty (60) calendar days after receipt of CMS's comments, if any. The reports will include all required elements as per 42 CFR 431.428, and should not direct readers to links outside the report. Additional links not referenced in the document may be listed in a Reference/Bibliography section. The Monitoring Reports must follow the framework provided by CMS, which is subject to change as monitoring systems are developed/evolve, and be provided in a structured manner that supports federal tracking and analysis.

a. Operational Updates. Per 42 CFR 431.428, the Monitoring Reports must document any policy or administrative difficulties in operating the demonstration. The reports shall provide sufficient information to document key challenges, underlying causes of challenges, how challenges are being addressed, as well as key achievements and to what conditions and efforts successes can be attributed. The discussion should also include any issues or complaints identified by beneficiaries; lawsuits or legal actions; unusual or unanticipated trends; legislative updates; and descriptions of any public forums held. The Monitoring Report should also include a summary of all public comments received through post-award public forums regarding the progress of the demonstration.

b. Performance Metrics. The demonstration's monitoring activities through quantitative data and narrative information must support tracking the state's progress toward meeting the applicable program-specific goals and milestones—including relative to their projected timelines—of the demonstration's program and policy implementation

and infrastructure investments and transitional non-service expenditures, as applicable. Specifically, the state must undertake standardized reporting on categories of metrics including, but not limited to: beneficiary participation in demonstration components, number of primary and specialist provider participation, utilization of services, quality of care, and health outcomes. The reporting of metrics focused on quality of care and health outcomes must be aligned with the demonstration's policies and objectives, as applicable for all key demonstration initiatives and populations. Such reporting must also be stratified by key demographic subpopulations of interest (e.g., by sex, age, race/ethnicity, primary language, disability status, sexual orientation and gender identity, and geography), and by demonstration components, to the extent feasible. Subpopulation reporting will support identifying any existing shortcomings or disparities in quality of care and health outcomes and help track whether the demonstration's initiatives help improve outcomes for the state's Medicaid population, including the narrowing of any identified disparities. To that end, CMS underscores the importance of reporting metrics data on quality of care and health outcomes that are known to be important for closing key equity gaps in Medicaid and CHIP (e.g. the National Quality Forum (NQF) "disparities sensitive" measures) and prioritizing key outcome measures and their clinical and non-clinical (i.e. social) drivers of health. In coordination with CMS, the state is expected to select such measures for reporting in alignment with a critical set of equity-focused measures CMS is finalizing as part of its upcoming guidance on the Health Equity Measure Slate, as applicable to the demonstration initiatives and populations. If needed, the State may submit an amendment to its monitoring plan no more than 150 days after receiving the final Health Equity Measure Slate from CMS to incorporate these measures.

Additionally, per 42 CFR 431.428, the Monitoring Reports must document the impact of the demonstration in providing insurance coverage to beneficiaries and the uninsured population, as well as outcomes of care, quality and cost of care, and access to care. This may also include the results of beneficiary satisfaction surveys, if conducted, and grievances and appeals. For the traditional health care practices demonstration component, Monitoring Reports must also include beneficiary grievances, complaints, and appeals related to the attestation described in STC 13.1.

For the approved HRSN initiatives, i.e., short-term post-hospitalization services and recuperative care, in addition to reporting on the metrics described above, the state may align with monitoring required in the state's 1915(b)(1)/(4) Waiver for California Advancing & Innovating Medi-Cal (CalAIM) special terms and conditions for other similar services, as may be applicable. The state must track beneficiary participation in applicable services over time, as well as narratively report annually on the adoption of information technology infrastructure to support data sharing between the state or partner entities assisting in the administration of the demonstration and contracted providers of applicable services (e.g., managed care plan and their contracted HRSN providers). Furthermore, the state's enrollment and renewal metrics must also capture baseline data and track progress via Monitoring Reports for the percent of Medicaid renewals completed ex-parte (administratively), as well as the percentage of Medicaid beneficiaries enrolled in other public benefit programs (such as, Supplemental

Nutrition Assistance Program (SNAP) and Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)) for which they are eligible.

The state's selection and reporting of quality of care and health outcomes metrics outlined above must also accommodate the newly approved reentry demonstration initiative. In addition, the state is required to report on metrics aligned with tracking progress with implementation and toward meeting the milestones of the reentry demonstration initiative. CMS expects such metrics to include, but not be limited to: administration of screenings to identify individuals who qualify for pre-release services, utilization of applicable pre-release and post-release services (e.g., case management, MAT, clinical/behavioral health assessment pre-release and primary and behavioral health services post-release), provision of health or social service referral pre-release, participants who received case management pre-release and were enrolled in case management post-release, and take-up of data system enhancements among participating carceral settings. In addition, the state is expected to monitor the number of beneficiaries served and types of services rendered under the demonstration Also, in alignment with the state's Reentry Initiative Implementation Plan, the state must also provide in its Monitoring Reports narrative details outlining its progress with implementing the initiative, including any challenges encountered and plans for addressing them. This information must also capture the transitional, non-service expenditures, including enhancements in the data infrastructure and information technology.

For the amendment allowing counties to participate or continue participating in COHS and Single Plan managed care models, as applicable, the state must provide monitoring data for managed care plan performance – including related to member access to care – in alignment and as required by the CalAIM Section 1915(b) waiver's STCs. This report may include, but not limited to, information on primary care provider disruption for the time period applicable, changes in access to care, and appeals and grievances. The state must also provide in its Monitoring Reports narrative details outlining its progress with implementing the amendment, including any challenges encountered and plans for addressing them.

In addition, the state must demonstrate through its Annual Monitoring Reports to CMS improvements in Medicaid fee-for-service base provider payment rates and payment rates for providers enrolled in managed care to the extent required by the DSHP-related STCs. As applicable, the state must also track the number and characteristics of contracted or participating organizations, specifically under the demonstration's HRSN and reentry initiatives, and corresponding payment-related metrics.

The state's selection and reporting of metrics for traditional health care practices are expected to include, but not be limited to: the number of facilities and providers providing traditional health care practices under the demonstration, the number of each type of traditional health care practice provided under the demonstration, and the number of individuals receiving traditional health care practices under the demonstration.

The required monitoring and performance metrics must be included in the Monitoring Reports, and will follow the framework provided by CMS to support federal tracking and analysis.

c. Budget Neutrality and Financial Reporting Requirements. Per 42 CFR 431.428, the Monitoring Reports must document the financial performance of the demonstration. The state must provide an updated budget neutrality workbook with every Monitoring Report that meets all the reporting requirements for monitoring budget neutrality set forth in the General Financial Requirements section of these STCs, including the submission of corrected budget neutrality data upon request. In addition, the state must report quarterly and annual expenditures associated with the populations affected by this demonstration on the Form CMS-64. Administrative costs for this demonstration should be reported separately on the CMS-64.

d. Evaluation Activities and Interim Findings. Per 42 CFR 431.428, the Monitoring Reports must document any results of the demonstration to date per the evaluation hypotheses. Additionally, the state shall include a summary of the progress of evaluation activities, including key milestones accomplished, as well as challenges encountered and how they were addressed.

16.6. **Corrective Action Plan Related to Demonstration Monitoring.** If monitoring indicates that demonstration features are not likely to assist in promoting the objectives of Medicaid, CMS reserves the right to require the state to submit a corrective action plan to CMS for approval. This may be an interim step to withdrawing waivers or expenditure authorities, as outlined in STC 3.11. CMS will withdraw an authority, as described in STC 3.11, when metrics indicate substantial, sustained directional change, inconsistent with state targets and goals, as applicable, and the state has not implemented corrective action. CMS would further have the ability to suspend implementation of the demonstration should corrective actions not effectively resolve these concerns in a timely manner.

16.7. **Close-Out Report.** Within one hundred twenty (120) calendar days after the expiration of the demonstration, the state must submit a draft Close-Out Report to CMS for comments.

a. The draft Close-Out Report must comply with the most current guidance from CMS.

b. In consultation with CMS, and per guidance from CMS, the state shall include an evaluation of the demonstration (or demonstration components) that are to phase out or expire without extension along with the Close-Out Report. Depending on the timeline of the phase-out during the demonstration approval period, in agreement with CMS, the evaluation requirement may be satisfied through the Interim and/or Summative Evaluation Reports stipulated in STCs 21.22 and 21.23, respectively.

c. The state must present to and participate in a discussion with CMS on the Close-Out report.

d. The state must take into consideration CMS's comments for incorporation into the final Close-Out report.

e. The revised Close-Out report is due to CMS no later than thirty (30) calendar days after receipt of CMS's comments.

f. A delay in submitting the draft or final version of the Close-Out report may subject the state to penalties described in STC 20.16.

16.8. **Monitoring Calls.** CMS will convene periodic conference calls with the state.

a. The purpose of these calls is to discuss ongoing demonstration operation, to include (but not limited to) any significant actual or anticipated developments affecting the demonstration. Examples include implementation activities, trends in reported data on metrics and associated mid-course adjustments, enrollment and access, budget neutrality, and progress on evaluation activities.

b. CMS will provide updates on any pending actions, as well as federal policies and issues that may affect any aspect of the demonstration.

c. The state and CMS will jointly develop the agenda for the calls.

16.9. **Post Award Forum.** Pursuant to 42 CFR 431.420(c), within six (6) months of the demonstration's implementation, and annually thereafter, the state must afford the public with an opportunity to provide meaningful comment on the progress of the demonstration. At least thirty (30) days prior to the date of the planned public forum, the state must publish the date, time and location of the forum in a prominent location on its website. The state must also post the most recent annual report on its website with the public forum announcement. Pursuant to 42 CFR 431.420(c), the state must include a summary of the comments in the Monitoring Report associated with the quarter in which the forum was held, as well as in its compiled Annual Monitoring Report.

17. EVALUATION OF THE DEMONSTRATION

17.1. **Cooperation with Federal Evaluators and Learning Collaborative.** As required under 42 CFR 431.420(f), the state shall cooperate fully and timely with CMS and its contractors in any federal evaluation of the demonstration or any component of the demonstration. This includes, but is not limited to, commenting on design and other federal evaluation documents and providing data and analytic files to CMS, including entering into a data use agreement that explains how the data and data files will be exchanged, and providing a technical point of contact to support specification of the data and files to be disclosed, as well as relevant data dictionaries and record layouts. The state shall include in its contracts with entities who collect, produce or maintain data and files for the demonstration, that they shall make such data available for the federal evaluation as is required under 42 CFR 431.420(f) to support federal evaluation. This may also include the state's participation—including, as applicable and in consultation and collaboration with the state, representation from the state's independent evaluators, and organizations associated with the demonstration operations—in a federal learning collaborative aimed at cross-state technical assistance, and identification of lessons learned and best practices for demonstration measurement, data development, implementation, monitoring and evaluation. The state may claim administrative match for these activities. Failure to comply with this STC may result in a deferral being issued as outlined in STC 20.16.

17.2. **Independent Evaluator**. The state must use an independent party to conduct an evaluation of the demonstration to ensure that the necessary data is collected at the level of detail needed to research the approved hypotheses. The independent party must sign an agreement to conduct the demonstration evaluation in an independent manner in accord with the CMS-approved draft Evaluation Design. When conducting analyses and developing the evaluation reports, every effort should be made to follow the approved methodology. However, the state may request, and CMS may agree to, changes in the methodology in appropriate circumstances.

17.3. **Draft Evaluation Design.** The state must submit, for CMS comment and approval, a draft Evaluation Design no later than 180 calendar days after the approval of the demonstration. The Evaluation Design must be drafted in accordance with Attachment A (Developing the Evaluation Design) of these STCs and any applicable CMS evaluation guidance and technical assistance for the demonstration's policy components. The Evaluation Design must also be developed in alignment with CMS guidance on applying robust evaluation approaches, such as quasi-experimental methods like difference-in-differences and interrupted time series, as well as establishing valid comparison groups and assuring causal inferences in demonstration evaluations. In addition to these requirements, if determined appropriate for the communities impacted by the demonstration, the state is encouraged to consider implementation approaches involving randomized control trials and staged rollout (for example, across geographic areas, by service setting, or by beneficiary characteristic) – as these implementation strategies help create strong comparison groups and facilitate robust evaluation.

The state is strongly encouraged to use the expertise of the independent party in the development of the draft Evaluation Design. The draft Evaluation Design also must include a timeline for key evaluation activities, including the deliverables outlined in STCs 21.22 and 21.23.

For any amendment to the demonstration, the state will be required to update the approved Evaluation Design to accommodate the amendment component. The amended Evaluation Design must be submitted to CMS for review no later than 180 calendar days after CMS's approval of the demonstration amendment. Depending on the scope and timing of the amendment, in consultation with CMS, the state may provide the details on necessary modifications to the approved Evaluation Design via the monitoring reports. The amendment Evaluation Design must also be reflected in the state's Interim (as applicable) and Summative Evaluation Reports, described below.

17.4. **Evaluation Design Approval and Updates.** The state must submit a revised draft Evaluation Design within sixty (60) calendar days after receipt of CMS's comments, if any. Upon CMS approval of the draft Evaluation Design, the document will be included as Attachment T to these STCs. Per 42 CFR 431.424(c), the state will publish the approved Evaluation Design within thirty (30) days of CMS approval. The state must implement the Evaluation Design and submit a description of its evaluation progress in each of the Quarterly and Annual Monitoring Reports. Once CMS approves the Evaluation Design, if the state wishes to make changes, the state must submit a revised Evaluation Design to CMS for approval if the changes are substantial in scope; otherwise, in consultation with CMS, the state may include updates to the Evaluation Design in monitoring reports.

17.5. **Evaluation Questions and Hypotheses.** Consistent with Attachments A and B (Developing the Evaluation Design and Preparing the Interim and Summative Evaluation Report) of these STCs, the Evaluation Design must include a discussion of the evaluation questions and hypotheses that the state intends to test. In alignment with applicable CMS evaluation guidance and technical assistance, the evaluation must outline and address well-crafted hypotheses and research questions for all key demonstration policy components that support understanding the demonstration's impact and its effectiveness in achieving the goals.

The hypothesis testing should include, where possible, assessment of both process and outcome measures. The evaluation must analyze outcomes, such as enrollment and enrollment continuity, and measures of access, utilization, and health outcomes, as appropriate and in alignment with applicable CMS evaluation guidance and technical assistance, for the demonstration policy components. Proposed measures should be selected from nationally-recognized sources and national measures sets, where possible. Measures sets could include CMS's Core Set of Health Care Quality Measures for Children in Medicaid and CHIP, Consumer Assessment of Health Care Providers and Systems (CAHPS), the Core Set of Health Care Quality Measures for Medicaid-Eligible Adults, the Behavioral Risk Factor Surveillance System (BRFSS) survey, and/or measures endorsed by National Quality Forum (NQF).

Specifically, hypotheses for the DMC-ODS component of the demonstration must include an assessment of the core goals of the program, to include (but are not limited to): initiation and engagement with treatment, reduction in unnecessary and inappropriate utilization of emergency department and inpatient hospitalization through expanded utilization of DMC-ODS services, and reductions in key outcomes such as deaths due to overdose. In addition, the state will also evaluate the effectiveness of the Contingency Management benefits provided to qualifying DMC-ODS beneficiaries. Further, the state will evaluate its program goals to improve alignment and integration and to enhance beneficiary experience under the expenditure authority provided in the demonstration for dually eligible beneficiaries.

Similarly, in alignment with the overarching goals of PATH and DSHP authority to support various infrastructure, transitional non-service expenditures, and capacity building efforts and the overall implementation and operationalization of CalAIM in the state, the evaluation of these demonstration components—for example—will analyze hypotheses focused on items such as how PATH (including the DSHP funding), in conjunction with related CalAIM initiatives, promotes: access to community-based providers of ECM, reentry services, and HRSN services, specifically, the two Community Supports authorized through this demonstration, and improved access and utilization of health care services at the community-level, with particular attention to historically under-resourced or marginalized populations. The evaluation will be informed by progress reports to be submitted to DHCS by Qualified Applicants on the need for and use of PATH funding and achievement of defined milestones.

The demonstration's GPP evaluation must study hypotheses and research questions that help understand, for example, whether the program leads to improvements in care delivery in more appropriate settings and improvements in health equity via improvements in access, quality and experience of care, and health outcomes among the state's uninsured population.

Hypotheses for the HRSN initiatives, i.e., short-term post-hospitalization services and recuperative care, must focus on assessing how the initiatives affect utilization of preventive and routine care, utilization of and costs associated with potentially avoidable, high acuity health care, and beneficiary physical and behavioral health outcomes. In addition, the state must coordinate with its managed care plans to secure necessary data—for a representative beneficiary population eligible for the HRSN services—to conduct a robust evaluation of the effectiveness of the HRSN services in mitigating identified needs of beneficiaries. Such an assessment will require setting up a data infrastructure and/or data sharing arrangement to collect data on beneficiary screening and rescreening and prevalence and severity of beneficiaries' HRSNs, among others. If the data system is not operational to capture necessary data for a quantitative evaluation by the time the state's evaluation activities must be conducted, the state must provide applicable qualitative assessment to this effect leveraging suitable primary data collections efforts (e.g., beneficiary surveys). Given the populations of focus and the program designs of the HRSN initiatives, the state must also include research questions and hypotheses focused on understanding the impact of the HRSN initiatives on advancing health quality, including through the reduction of health disparities, for example, by assessing the effects of the initiatives in reducing disparities in health care access, quality of care, or health outcomes at the individual and/or community level.

The state is required to examine whether and how state and local investments in housing and any other type of allowable HRSN services change over time in concert with new Medicaid funding toward those services. In addition, in light of how demonstration HRSN expenditures are being treated for purposes of budget neutrality, the evaluation of the HRSN initiatives must include, in alignment with the evaluation required in the state's 1915(b)(1)/(4) Waiver for California Advancing & Innovating Medi-Cal (CalAIM) special terms and conditions for other similar services, a cost analysis to support developing comprehensive and accurate cost estimates of covering such services. The state is also required to include a robust assessment of potential improvements in the efficiency, quality, and effectiveness of downstream services that can be provided under the state plan authority, and associated cost implications, related to the provision of upstream HRSN services.

Evaluation of the reentry demonstration initiative must be designed to examine whether the initiative expands Medicaid coverage through increased enrollment of eligible individuals, and efficient provision of high-quality pre-release services that promote continuity of care into the community post-release. In addition, in alignment with the goals of the reentry demonstration initiative in the state, the evaluation hypotheses must focus on, but not be limited to: cross-system communication and coordination, connections between carceral and community services, access to and quality of care in carceral and community settings, preventive and routine physical and behavioral health care utilization, non-emergent emergency department visits and inpatient hospitalizations.

The state must also provide a comprehensive analysis of services rendered by type of service over the duration of the 90-day coverage period immediately prior to the expected date of release—to the extent feasible, and discuss in the evaluation any relationship identified between the provision and timing of particular services with salient post-release outcomes, including utilization of acute care services for chronic and other serious conditions, overdose, and overdose- and suicide-related and all-cause deaths in the period soon after release. In addition,

the state is expected to assess the extent to which this coverage timeline facilitated providing more coordinated, efficient and effective reentry planning, enabled pre-release management and stabilization of physical and behavioral health conditions, and helped mitigate any potential operational challenges the state might have otherwise encountered in a more compressed timeline for coverage or pre-release services.

The demonstration's evaluation efforts will be expected to include an examination of carceral provider qualifications and standards as well as the experiences of carceral and community providers, including challenges encountered, as they develop relationships and coordinate to facilitate transition of individuals into the community. Finally, similar to the state's HRSN initiative, the state must conduct a comprehensive cost analysis to support developing estimates of implementing the reentry demonstration initiative, including covering associated services.

Evaluation of the traditional health care practices demonstration initiative must be designed to examine whether the initiative increases access to culturally appropriate care for beneficiaries served by or through IHS, Tribal, or UIO facilities. In evaluating the effectiveness of the initiative, the state must capture the perspectives of IHS, Tribal, and UIO facilities through qualitative data collection efforts. The state is also strongly encouraged to consult with IHS, Tribal, and UIO facilities, participating providers, and beneficiaries in the development of the evaluation design. The evaluation must address topics that include but are not limited to: beneficiary awareness and understanding of traditional health care practices; reasons for individuals receiving the traditional health care practices; access to, utilization and costs of traditional health care practices; quality and experience of care; and physical and behavioral health outcomes. The state's evaluation efforts must facilitate understanding the extent to which the traditional health care practices initiative might support reducing existing disparities in access to and quality of care and health outcomes.
In alignment with the CalAIM Section 1915(b) waiver reporting requirements, the state must examine the effects of the managed care amendment on beneficiaries, providers, and plans, particularly regarding achieving equitable beneficiary access to and quality of care.

The state must also investigate cost outcomes for the demonstration as a whole, including but not limited to: administrative costs of demonstration implementation and operation, Medicaid health service expenditures, and provider uncompensated care costs. As noted above, the state must also analyze the costs and cost effectiveness of the HRSN services and the budgetary effects of the reentry demonstration initiative. In addition, the state must use findings from hypothesis tests aligned with other demonstration goals and cost analyses together to assess the demonstration's effects on the fiscal sustainability of the state's Medicaid program.

CMS underscores the importance of the state undertaking a well-designed beneficiary survey and/or interviews to assess, for instance, beneficiary understanding of and experience with the various demonstration policy components, including but not limited to the reentry demonstration initiative and the HRSN components, and beneficiary experience with access to and quality of care. In addition, the state is strongly encouraged to evaluate the implementation of the demonstration programs in order to better understand whether implementation of certain key demonstration policies happened as envisioned during the demonstration design process and whether specific factors acted as facilitators of or barriers to successful implementation. Implementation research questions can also focus on beneficiary and provider experience with

the demonstration. The implementation evaluation can inform the state's crafting and selection of testable hypotheses and research questions for the demonstration's outcome and impact evaluations and provide context for interpreting the findings.

Finally, the state must collect data to support analyses stratified by key subpopulations of interest (e.g., by sex, age, race/ethnicity, primary language, disability status, sexual orientation and gender identity, and geography). Such stratified data analyses will provide a fuller understanding of existing disparities in access to and quality of care and health outcomes, and help inform how the demonstration's various policies might support reducing such disparities.

17.6. **Evaluation Budget.** A budget for the evaluations must be provided with the draft Evaluation Design. It will include the total estimated cost, as well as a breakdown of estimated staff, administrative and other costs for all aspects of the evaluations such as any survey and measurement development, quantitative and qualitative data collection and cleaning, analyses and report generation. A justification of the costs may be required by CMS if the estimates provided do not appear to sufficiently cover the costs of the design or if CMS finds that the designs are not sufficiently developed, or if the estimates appear to be excessive.

17.7. **Interim Evaluation Report.** The state must submit an Interim Evaluation Report for the completed years of the demonstration, and for each subsequent extension of the demonstration, as outlined in 42 CFR 431.412(c)(2)(vi). When submitting an application for an extension of the demonstration, the Interim Evaluation Report should be posted to the state's website with the application for public comment.

a. The Interim Evaluation Report will discuss evaluation progress and present findings to date as per the approved Evaluation Design.

b. For demonstration authority or any components within the demonstration that expire prior to the overall demonstration's expiration date, and depending on the timeline of expiration / phase-out, the Interim Evaluation Report may include an evaluation of the authority, to be collaboratively determined by CMS and the state.

c. If the state is seeking to extend the demonstration, the draft Interim Evaluation Report is due when the application for extension is submitted, or one year prior to the end of the demonstration, whichever is sooner. If the state is not requesting an extension for a demonstration, an Interim Evaluation Report is due one year prior to the end of the demonstration.

d. The state must submit the revised Interim Evaluation Report sixty (60) calendar days after receiving CMS's comments on the draft Interim Evaluation Report, if any. Once approved by CMS, the state must post the final Interim Evaluation Report to the state's Medicaid website within thirty (30) calendar days.

e. The Interim Evaluation Report must comply with Attachment B of these STCs.

17.8. **Summative Evaluation Report.** The state must submit a draft Summative Evaluation Report for the demonstration's current approval period within eighteen (18) months of the end of the

approval period represented by these STCs. The draft Summative Evaluation Report must be developed in accordance with Attachment B of these STCs, and in alignment with the approved Evaluation Design.

a. The state must submit a revised Summative Evaluation Report within sixty (60) calendar days of receiving comments from CMS on the draft

b. Once approved by CMS, the state must post the final Summative Report to the state's Medicaid website within thirty (30) calendar days.

17.9. **Corrective Action Plan Related to Evaluation.** If evaluation findings indicate that demonstration features are not likely to assist in promoting the objectives of Medicaid, CMS reserves the right to require the state to submit a corrective action plan to CMS for approval. These discussions may also occur as part of an extension process when associated with the state's Interim Evaluation Report, or as part of the review of the Summative Evaluation Report. A corrective action plan could include a temporary suspension of implementation of demonstration programs, in circumstances where evaluation findings indicate substantial and sustained directional change inconsistent with demonstration goals, such as substantial and sustained trends indicating increased difficulty accessing services. A corrective action plan may be an interim step to withdrawing waivers or expenditure authorities, as outlined in STC 3.11. CMS further has the ability to suspend implementation of the demonstration should corrective actions not effectively resolve these concerns in a timely manner.

17.10. **State Presentations for CMS.** CMS reserves the right to request that the state present and participate in a discussion with CMS on the Evaluation Design, the Interim Evaluation, and/or the Summative Evaluation.

17.11. **Public Access.** The state shall post the final documents (e.g., Implementation Plan, Monitoring Protocol, Monitoring Reports, Mid-Point Assessment, Close Out Report, approved Evaluation Design, Interim Evaluation Report, and Summative Evaluation Report) on the state's Medicaid website within thirty (30) calendar days of approval by CMS.

17.12. **Additional Publications and Presentations**. For a period of twelve (12) months following CMS approval of the final reports, CMS will be notified prior to presentation of these reports or their findings, including in related publications (including, for example, journal articles), by the state, contractor, or any other third party directly connected to the demonstration. Prior to release of these reports, articles or other publications, CMS will be provided a copy including any associated press materials. CMS will be given thirty 30 calendar days to review and comment on publications before they are released. CMS may choose to decline to comment or review some or all of these notifications and reviews.

18. GENERAL FINANCIAL REQUIREMENTS

18.1. **Allowable Expenditures**. This demonstration project is approved for expenditures applicable to services rendered during the demonstration approval period designated by CMS. CMS will provide FFP for allowable demonstration expenditures only so long as they do not exceed the pre-defined limits as specified in these STCs.

18.2. **Standard Medicaid Funding Process.** The standard Medicaid funding process will be used for this demonstration. The state will provide quarterly expenditure reports through the Medicaid and CHIP Budget and Expenditure System (MBES/CBES) to report total expenditures for services provided under this demonstration following routine CMS-37 and CMS-64 reporting instructions as outlined in section 2500 of the State Medicaid Manual. The state will estimate matchable demonstration expenditures (total computable and federal share) subject to the budget neutrality expenditure limit and separately report these expenditures by quarter for each federal fiscal year on the form CMS-37 for both the medical assistance payments (MAP) and state and local administration costs (ADM). CMS shall make federal funds available based upon the state's estimate, as approved by CMS. Within thirty (30) calendar days after the end of each quarter, the state shall submit form CMS-64 (Quarterly Medicaid Expenditure Report), showing Medicaid expenditures made in the quarter that just ended. If applicable, subject to the payment deferral process, CMS shall reconcile expenditures reported on form CMS-64 with federal funding previously made available to the state, and include the reconciling adjustment in the finalization of the grant award to the state.

18.3. **State Certification of Funding Conditions.** As a condition of demonstration approval, the state certifies that the following conditions for non-federal share financing of demonstration expenditures have been met:

a. Total computable expenditures for patient care that are either directly payable under this Demonstration, or the basis for DSH, may be certified by government entities that directly operate health care providers as long as the expenditures are not funded using impermissible provider taxes or donations as defined under section 1903(w) of the Social Security Act or using Federal funds other than Medicaid or Medicare funds (unless the other Federal funding source by law allows use of federal funds for matching purposes, and the federal Medicaid funding is credited to the other federal funding source). To the extent that the funding source for expenditures is a state program funded through this Demonstration, expenditures may be certified only as a total computable expenditure under such program. The State may not claim federal matching funds for a payment to a provider and also claim federal matching funds on the underlying expenditure certified by the provider, except to the extent that the State has an auditable methodology to prevent duplicate claims (such as one that limits claims for federal matching based on the certified expenditure to the shortfall after accounting for the claimed payment). For this purpose, Federal funds do not include GPP payments, PATH payments, or patient care revenue received as payment for services rendered under programs such as Medicare or Medicaid.

b. The state certifies that state and local monies are used as the source of non-federal share for the demonstration expenditures. The state further certifies that such funds shall not be used as matching funds for any other federal grant or contract, except as permitted by federal law or these STCs. All sources of the non-federal share of funding must be compliant with section 1903(w) of the Act and any applicable regulations and are not derived from impermissible provider taxes or donations or federal funds (unless the other federal funding source by law allows use of federal funds for purposes of obtaining additional federal matching funds under Medicaid). For this purpose, federal funds do not include GPP payments, PATH payments, or

patient care revenue received as payment for services rendered under programs such as Medicare and Medicaid. Further, these sources and distribution of monies involving federal match are subject to CMS approval. Upon review of the sources of the non-federal share of funding and distribution methodologies, any sources determined to be impermissible by CMS shall be addressed within the time frames set by CMS. For non-federal share funding using intergovernmental transfers, the funding entity shall certify that the funds transferred qualify for federal financial participation pursuant to 42 CFR part 433 Subpart B, and are not derived from impermissible sources such as recycled Medicaid payments, federal money not permitted by law to be used as state share, impermissible taxes, and non-bona fide provider-related donations.

c. Under all circumstances, health care providers must retain 100 percent of their payments received under this demonstration. Moreover, no pre-arranged agreements (contractual, voluntary, or otherwise) may exist between health care providers and state and/or local governments, or third parties to return and/or redirect to the state any portion of these demonstration payments in a manner inconsistent with the requirements in section 1903(w) of the Act and its implementing regulations. This confirmation of Medicaid payment retention is made with the understanding that payments that are the normal operating expenses of conducting business, such as payments related to taxes, including health care provider-related taxes, fees, business relationships with governments that are unrelated to Medicaid and in which there is no connection to Medicaid payments, are not considered returning and/or redirecting a Medicaid payment.

d. The State Medicaid Director or his/her designee certifies that all state and/or local funds used as the state's share of the allowable expenditures reported on the CMS-64 for this demonstration were in accordance with all applicable federal requirements and does not duplicate other sources of federal funds.

18.4. **Financial Integrity for Managed Care Delivery Systems.** As a condition of demonstration approval, the state attests to the following, as applicable:

a. All risk-based managed care organization, prepaid inpatient health plan (PIHP), and prepaid ambulatory health plan (PAHP) payments, comply with all applicable requirements for payments, including those in 42 CFR 438.6(b)(2), 438.6(c), 438.6(d), 438.60, and 438.74.

18.5. **Requirements for Health Care-Related Taxes and Provider Donations.** As a condition of demonstration approval, the state attests to the following, as applicable:

a. Except as provided in paragraph (c) of this STC, all health care-related taxes as defined by Section 1903(w)(3)(A) of the Act and 42 CFR 433.55 are broad-based as defined by Section 1903(w)(3)(B) of the Act and 42 CFR 433.68(c).

b. Except as provided in paragraph (c) of this STC, all health care-related taxes are uniform as defined by Section 1903(w)(3)(C) of the Act and 42 CFR 433.68(d).

c. If the health care-related tax is either not broad-based or not uniform, the state has applied for and received a waiver of the broad-based and/or uniformity requirements as specified by 1903(w)(3)(E)(i) of the Act and 42 CFR 433.72.

d. The tax does not contain a hold harmless arrangement as described by Section 1903(w)(4) of the Act and 42 CFR 433.68(f).

e. All provider-related donations as defined by 42 CFR 433.52 are bona fide as defined by Section 1903(w)(2)(B) of the Social Security Act, 42 CFR 433.66, and 42 CFR 433.54.

18.6. **State Monitoring of Non-Federal Share.** If any payments under the demonstration are funded in whole or in part by a locality tax, then the state must provide a report to CMS regarding payments under the demonstration no later than 60 days after the effective date of the demonstration amendment that added this STC. This deliverable is subject to the deferral as described in STC 14.1. This report must include:

a. A detailed description of and a copy of (as applicable) any agreement, written or otherwise agreed upon, regarding any arrangement among the providers including those with counties, the state, or other entities relating to each locality tax or payments received that are funded by the locality tax;

b. Number of providers in each locality of the taxing entities for each locality tax;

c. Whether or not all providers in the locality will be paying the assessment for each locality tax;

d. The assessment rate that the providers will be paying for each locality tax;

e. Whether any providers that pay the assessment will not be receiving payments funded by the assessment;

f. Number of providers that receive at least the total assessment back in the form of Medicaid payments for each locality tax;

g. The monitoring plan for the taxing arrangement to ensure that the tax complies with section 1903(w)(4) of the Act and 42 CFR 433.68(f); and

h. Information on whether the state will be reporting the assessment on the CMS form 64.11A as required under section 1903(w) of the Act.

18.7. **Extent of Federal Financial Participation for the Demonstration.** Subject to CMS approval of the source(s) of the non-federal share of funding, CMS will provide FFP at the applicable federal matching rate for the demonstration as a whole for the following, subject to the budget neutrality expenditure limits described in Section XII:

a. Administrative costs, including those associated with the administration of the demonstration;

b. Net expenditures and prior period adjustments of the Medicaid program that are paid in accordance with the approved Medicaid state plan; and

c. Medical assistance expenditures and prior period adjustments made under section 1115 demonstration authority with dates of service during the demonstration extension period; including those made in conjunction with the demonstration, net of enrollment fees, cost sharing, pharmacy rebates, and all other types of third-party liability.

18.8. **Program Integrity.** The state must have processes in place to ensure there is no duplication of federal funding for any aspect of the demonstration. The state must also ensure that the state and any of its contractors follow standard program integrity principles and practices including retention of data. All data, financial reporting, and sources of non-federal share are subject to audit.

18.9. **Medicaid Expenditure Groups (MEG).** MEGs are defined for the purpose of identifying categories of Medicaid or demonstration expenditures subject to budget neutrality, components of budget neutrality expenditure limit calculations, and other purposes related to monitoring and tracking expenditures under the demonstration. The Master MEG Chart table below provides a master list of MEGs defined for this demonstration.

Table 4: Master MEG Chart

MEG	To Which BN Test Does This Apply?	WOW Per Capita	WOW Aggregate	WW	Brief Description
CBAS	Hypo	X		X	An outpatient, facility-based program that delivers skilled nursing care, social services, therapies, personal care, family/caregiver training and support, nutrition services, care coordination, and transportation to eligible State Plan beneficiaries.
OOS FFCY	Hypo	X		X	Expenditures for extending eligibility for full Medicaid State Plan benefits to former foster care youth who are under age 26, were in foster care under the responsibility of another state or tribe in such state on the date of attaining 18 years of age or such higher age as the state has elected, and were enrolled in Medicaid on that date

Table 4: Master MEG Chart					
MEG	**To Which BN Test Does This Apply?**	**WOW Per Capita**	**WOW Aggregate**	**WW**	**Brief Description**
DMC-ODS: IMD	Hypo	X		X	Expenditures for otherwise covered Medicaid services furnished to qualified beneficiaries who are primarily receiving treatment and withdrawal management services for substance use disorder as short-term residents in facilities that meet the definition of an IMD.
IHS Chiropractic Services	Hypo	X		X	Supplemental payments to support participating IHS and tribal facilities that incur costs associated with chiropractic services for which Medi-Cal coverage was eliminated hat are furnished by these providers to individuals enrolled in the Medi-Cal program.
HRSN Services	Capped Hypo		X	X	Recuperative care and Short-Term Post Hospitalization Housing
PATH Supports	Non-Hypo			X	Ensuring Access to Services During Transition and Delivery System Transformation and Innovation PATH program
IP UPL PH	Non-Hypo		X		Inpatient Upper Payment Limit for Public Hospitals
GPP	Non-Hypo			X	DSH & SNCP (Safety Net Care Pool)
Contingency Management	Non-Hypo			X	Expenditures for evidence-based, cost-effective treatment for substance use disorder that combines motivational incentives with behavioral health treatments.

Table 4: Master MEG Chart					
MEG	**To Which BN Test Does This Apply?**	**WOW Per Capita**	**WOW Aggregate**	**WW**	**Brief Description**
Asset Test	Hypo	X		X	Expenditures to extend eligibility for individuals in the following Deemed SSI populations who are eligible based on (1) applying a targeted asset disregard of $130,000 for a single individual and an additional $65,000 per household member
Reentry Demonstration Initiative	Hypo	X		X	Expenditures for targeted services that are otherwise covered under Medicaid provided to qualifying beneficiaries for up to 90 days immediately prior to the expected date of release from participating state prisons, county jails, or youth correctional facilities.
PATH - Reentry Demonstration Initiative Transitional Non-Service Expenditures	Hypo		X	X	Expenditures to for planning and supporting the reentry demonstration initiative including for technology and IT services, hiring and training of staff, purchasing of necessary technology and electronic health records and billing systems, developing protocols and procedures, and other expenditures to provide support for pre-release services.
DSHP	Non-Hypo			X	Expenditures for costs of designated programs which are otherwise state-funded

Table 4: Master MEG Chart					
MEG	**To Which BN Test Does This Apply?**	**WOW Per Capita**	**WOW Aggregate**	**WW**	**Brief Description**
ADM	N/A				All additional administrative costs that are directly attributable to the demonstration and not described elsewhere and are not subject to budget neutrality.

18.10. **Reporting Expenditures and Member Months**. The state must report all demonstration expenditures claimed under the authority of title XIX of the Act and subject to budget neutrality each quarter on separate forms CMS-64.9 WAIVER and/or 64.9P WAIVER, identified by the demonstration project number assigned by CMS (11-W-00193/9). Separate reports must be submitted by MEG (identified by Waiver Name) and Demonstration Year (identified by the two-digit project number extension). Unless specified otherwise, expenditures must be reported by DY according to the dates of service associated with the expenditure. All MEGs identified in the Master MEG Chart as WW must be reported for expenditures, as further detailed in the MEG Detail for Expenditure and Member Month Reporting table below. To enable calculation of the budget neutrality expenditure limits, the state also must report member months of eligibility for specified MEGs.

a. **Cost Settlements.** The state will report any cost settlements attributable to the demonstration on the appropriate prior period adjustment schedules (form CMS-64.9P WAIVER) for the summary sheet line 10b, in lieu of lines 9 or 10c. For any cost settlement not attributable to this demonstration, the adjustments should be reported as otherwise instructed in the State Medicaid Manual. Cost settlements must be reported by DY consistent with how the original expenditures were reported.

b. **Premiums and Cost Sharing Collected by the State.** The state will report any premium contributions collected by the state from demonstration enrollees quarterly on the form CMS-64 Summary Sheet line 9D, columns A and B. In order to assure that these collections are properly credited to the demonstration, quarterly premium collections (both total computable and federal share) should also be reported separately by DY on form CMS-64 Narrative, and on the Total Adjustments tab in the Budget Neutrality Monitoring Tool. In the annual calculation of expenditures subject to the budget neutrality expenditure limit, premiums collected in the demonstration year will be offset against expenditures incurred in the demonstration year for determination of the state's compliance with the budget neutrality limits.

c. **Pharmacy Rebates.** Because pharmacy rebates are not included in the base expenditures used to determine the budget neutrality expenditure limit, pharmacy

rebates are not included for calculating net expenditures subject to budget neutrality. The state will report pharmacy rebates on form CMS-64.9 BASE, and not allocate them to any form 64.9 WAIVER or 64.9P WAIVER.

d. **Administrative Costs.** The state will separately track and report additional administrative costs that are directly attributable to the demonstration. All administrative costs must be identified on the forms CMS-64.10 WAIVER and/or 64.10P WAIVER. Unless indicated otherwise on the Master MEG Chart table, administrative costs are not counted in the budget neutrality tests; however, these costs are subject to monitoring by CMS.

e. **Member Months**. As part of the Quarterly and Annual Monitoring Reports described in Section IX, the state must report the actual number of "eligible member months" for all demonstration enrollees for all MEGs identified as WOW Per Capita in the Master MEG Chart table above, and as also indicated in the MEG Detail for Expenditure and Member Month Reporting table below. The term "eligible member months" refers to the number of months in which persons enrolled in the demonstration are eligible to receive services. For example, a person who is eligible for three months contributes three eligible member months to the total. Two individuals who are eligible for two months, each contribute two eligible member months, for a total of four eligible member months. Appropriate exceptions, as applicable, must be documented in the state's Budget Neutrality Specifications Manual referenced in STC 18.11(f) (e) The state must submit a statement accompanying the annual report certifying the accuracy of this information.

f. **Budget Neutrality Specifications Manual**. The state will create and maintain a Budget Neutrality Specifications Manual that describes in detail how the state will compile data on actual expenditures related to budget neutrality, including methods used to extract and compile data from the state's Medicaid Management Information System, eligibility system, and accounting systems for reporting on the CMS-64, consistent with the terms of the demonstration. The Budget Neutrality Specifications Manual will also describe how the state compiles counts of Medicaid member months. The Budget Neutrality Specifications Manual must be made available to CMS on request.

g. **Demonstration Years**. Demonstration Years (DY) for this demonstration are defined in the table below.

Table 6: Demonstration Years		
Demonstration Year 18	January 1, 2022 to December 31, 2022	12 months
Demonstration Year 19	January 1, 2023 to December 31, 2023	12 months
Demonstration Year 20	January 1, 2024 to December 31, 2024	12 months
Demonstration Year 21	January 1, 2025 to December 31, 2025	12 months
Demonstration Year 22	January 1, 2026 to December 31, 2026	12 months

h. **Budget Neutrality Monitoring Tool.** The state must provide CMS with quarterly budget neutrality status updates, including established baseline and member months data, using the Budget Neutrality Monitoring Tool provided through the Performance Metrics Database and Analytics (PMDA) system. The tool incorporates the "Schedule C Report" for comparing demonstration's actual expenditures to the budget neutrality expenditure limits described in Section XIV. CMS will provide technical assistance, upon request.

i. **Claiming Period**. The state will report all claims for expenditures subject to the budget neutrality agreement (including any cost settlements) within two years after the calendar quarter in which the state made the expenditures. All claims for services during the demonstration period (including any cost settlements) must be made within two years after the conclusion or termination of the demonstration. During the latter two-year period, the state will continue to identify separately net expenditures related to dates of service during the operation of the demonstration on the CMS-64 waiver forms in order to properly account for these expenditures in determining budget neutrality.

j. **Future Adjustment to Budget Neutrality**. CMS reserves the right to adjust the budget neutrality expenditure limit:

    i. To be consistent with enforcement of laws and policy statements, including regulations and letters, regarding impermissible provider payments, health care related taxes, or other payments, CMS reserves the right to make adjustments to the budget neutrality limit if any health care related tax that was in effect during the base year, or provider-related donation that occurred during the base year, is determined by CMS to be in violation of the provider donation and health care related tax provisions of section 1903(w) of the Act. Adjustments to annual budget targets will reflect the phase out of impermissible provider payments by law or regulation, where applicable.

    ii. To the extent that a change in federal law, regulation, or policy requires either a reduction or an increase in FFP for expenditures made under this demonstration. In this circumstance, the state must adopt, subject to CMS approval, a modified budget neutrality agreement as necessary to comply with such change. The modified agreement will be effective upon the implementation of the change. The trend rates for the budget neutrality agreement are not subject to change under this STC. The state agrees that if mandated changes in the federal law require state legislation, the changes shall take effect on the day such state legislation becomes effective, or on the last day such legislation was required to be in effect under the federal law, whichever is earlier

    iii. The state certifies that the data it provided to establish the budget neutrality expenditure limit are accurate based on the state's accounting of recorded historical expenditures or the next best available data, that the data are allowable in accordance with applicable federal, state, and local statutes, regulations, and policies, and that the data are correct to the best of the state's

knowledge and belief. The data supplied by the state to set the budget neutrality expenditure limit are subject to review and audit, and if found to be inaccurate, will result in a modified budget neutrality expenditure limit.

18.11. **Budget Neutrality Mid-Course Correction Adjustment Request.** No more than once per demonstration year, the state may request that CMS make an adjustment to its budget neutrality agreement based on changes to the state's Medicaid expenditures that are unrelated to the demonstration and/or outside the state's control, and/or that result from a new expenditure that is not a new demonstration-covered service or population and that is likely to further strengthen access to care.

a. **Contents of Request and Process**. In its request, the state must provide a description of the expenditure changes that led to the request, together with applicable expenditure data demonstrating that due to these expenditures, the state's actual costs have exceeded the budget neutrality cost limits established at demonstration approval. The state must also submit the budget neutrality update described in STC 18.11c. If approved, an adjustment could be applied retrospectively to when the state began incurring the relevant expenditures, if appropriate. Within 120 days of acknowledging receipt of the request, CMS will determine whether the state needs to submit an amendment pursuant to STC 3.8. CMS will evaluate each request based on its merit and will approve requests when the state establishes that an adjustment to its budget neutrality agreement is necessary due to changes to the state's Medicaid expenditures that are unrelated to the demonstration and/or outside of the state's control, and/or that result from a new expenditure that is not a new demonstration-covered service or population and that is likely to further strengthen access to care.

b. **Types of Allowable Changes.** Adjustments will be made only for actual costs as reported in expenditure data. CMS will not approve mid-demonstration adjustments for anticipated factors not yet reflected in such expenditure data. Examples of the types of mid-course adjustments that CMS might approve include the following:

i. Provider rate increases that are anticipated to further strengthen access to care;

ii. CMS or State technical errors in the original budget neutrality formulation applied retrospectively, including, but not limited to the following: mathematical errors, such as not aging data correctly; or unintended omission of certain applicable costs of services for individual MEGs;

iii. Changes in federal statute or regulations, not directly associated with Medicaid, which impact expenditures;

iv. State legislated or regulatory change to Medicaid that significantly affects the costs of medical assistance;

v. When not already accounted for under Emergency Medicaid 1115 demonstrations, cost impacts from public health emergencies;

vi. High cost innovative medical treatments that states are required to cover; or,

vii. Corrections to coverage/service estimates where there is no prior state experience (e.g., SUD) or small populations where expenditures may vary widely.

c. **Budget Neutrality Update.** The state must submit an updated budget neutrality analysis with its adjustment request, which includes the following elements:

i. Projected without waiver and with waiver expenditures, estimated member months, and annual limits for each DY through the end of the approval period; and,

ii. Description of the rationale for the mid-course correction, including an explanation of why the request is based on changes to the state's Medicaid expenditures that are unrelated to the demonstration and/or outside the state's control, and/or is due to a new expenditure that is not a new demonstration-covered service or population and that is likely to further strengthen access to care.

18.12. **Supplemental Payments to IHS and 638 Facilities.** The state shall make supplemental payments to participating Indian Health Service (IHS) and tribal 638 facilities that incur costs associated with providing chiropractic services. Supplemental payments shall be computed based on the cost for chiropractic services that were eliminated from Medi-Cal coverage in July 2009 pursuant to state plan amendment 09-001, furnished by such facilities to individuals enrolled in the Medi-Cal program. Participating tribal facilities shall maintain policies for furnishing chiropractic services to non-IHS beneficiaries that are in place as of January 1, 2013. Payments shall be based on the approved methodology set forth in Attachment D. The annual limit for such supplemental payments shall be $1,550,000 total computable per year (DY 18-22).

18.13. **Accounting Procedure.** The State has submitted and CMS has approved accounting procedures for CalAIM to ensure oversight and monitoring of demonstration claiming and expenditures. These procedures are included as Attachment H. The State shall submit a modification to the "Accounting Procedures" within 90 days after the renewal approval to account for changes and expansions to the waiver as described within these STCs for the CalAIM Demonstration.

19. MONITORING BUDGET NEUTRALITY FOR THE DEMONSTRATION

19.1. **Budget Neutrality Effective Date.** All STCs, waivers, and expenditure authorities relating to budget neutrality shall be effective beginning January 1, 2022. Notwithstanding this effective date, expenditures made for Uncompensated Care Pool payments under GPP during the temporary extension period of July 1, 2020 through December 31, 2021 are permitted.

19.2. **Limit on Title XIX Funding.** California will be subject to a limit on the amount of Federal title XIX funding that California may receive on selected Medicaid expenditures during the period of approval of the Demonstration. The selected Medicaid expenditures consist of the expenditures for the range of services included in the managed care contracts and used to develop the without waiver per member per month limits under the Demonstration. The limit

will consist of three parts, and is determined by using a per capita cost method combined with an aggregate amount based on the aggregate annual diverted upper payment limit determined for designated public hospitals in California and disproportionate share hospital (DSH) allotments. Spending under the budget neutrality limit is authorized for all spending related to approved expenditure authorities. Budget neutrality expenditure targets are calculated on an annual basis with a cumulative budget neutrality expenditure limit for the length of the demonstration extension (January1, 2022 through December 31, 2026). Actual expenditures subject to the budget neutrality expenditure limit must be reported by California using the procedures described in the section for General Financial Requirements Under Title XIX. The data supplied by the state to CMS to calculate the annual limits is subject to review and audit, and if found to be inaccurate, will result in a modified budget neutrality expenditure limit. CMS' assessment of the State's compliance with these annual limits will be done using the Schedule C report from the MBES/CBES system.

19.3. **Risk.** California will be at risk for the per capita cost for demonstration enrollees under this budget neutrality agreement, but not for the number of demonstration enrollees in each of the groups. By providing FFP for all demonstration enrollees, California will not be at risk for changing economic conditions which impact enrollment levels. However, by placing California at risk for the per capita costs for demonstration enrollees, CMS assures that the federal demonstration expenditures do not exceed the level of expenditures that would have occurred had there been no demonstration.

19.4. **Calculation of the Budget Neutrality Limits and How They Are Applied.** To calculate the budget neutrality limits for the demonstration, separate annual budget limits are determined for each DY on a total computable basis. Each annual budget limit is the sum of one or more components: per capita components, which are calculated as a projected without-waiver PMPM cost times the corresponding actual number of member months, and aggregate components, which project fixed total computable dollar expenditure amounts. The annual limits for all DYs are then added together to obtain a budget neutrality limit for the entire demonstration period. The federal share of this limit will represent the maximum amount of FFP that the state may receive during the demonstration period for the types of demonstration expenditures described below. The federal share will be calculated by multiplying the total computable budget neutrality expenditure limit by the appropriate Composite Federal Share.

19.5. **Main Budget Neutrality Test.** The Main Budget Neutrality Test allows the state to show that approval of the demonstration has not resulted in Medicaid costs to the federal government that are greater than what the federal government's Medicaid costs would likely have been absent the demonstration, and that federal Medicaid "savings" have been achieved sufficient to offset the additional projected federal costs resulting from expenditure authority. The table below identifies the MEGs that are used for the Main Budget Neutrality Test. MEGs designated as "WOW Only" or "Both" are components used to calculate the budget neutrality expenditure limit. MEGs that are indicated as "WW Only" or "Both" are counted as expenditures against the budget neutrality expenditure limit. In addition, any expenditures in excess of the limit from Hypothetical Budget Neutrality Tests count as expenditures under the Main Budget Neutrality Test. However, excess expenditures from the Capped Hypothetical Budget Neutrality Test do not count as expenditures under the Main Budget Neutrality Test. The state is at risk for any

amount over the capped hypothetical amount. The Composite Federal Share for this test is calculated based on all MEGs indicated as "Both."

Table 7: Main Budget Neutrality Test								
MEG	**PC or Agg.**	**WOW Only, WW Only, or BOTH**	**Trend Rate**	**DY 18**	**DY 19**	**DY 20**	**DY 21**	**DY 22**
Contingency Management	Agg.	WW Only	N/A	$4,866,666	$29,200,000	$31,515,350	$31,515,350	$31,515,350
IP UPL PH	Agg.	WOW Only	N/A	$863,054,000	$863,054,000	$863,054,000	$863,054,000	$863,054,000
DSHP	N/A	WW Only	N/A	The state must have savings to offset these expenditures.				
GPP-DSH	N/A	Both	N/A	The state shall calculate annually in accordance with Attachment Q.				
GPP	N/A	WW Only	N/A	$472,000,000	$472,000,000	$472,000,000	$472,000,000	$472,000,000
PATH Supports	Agg.	WW Only	N/A	The state must have savings to offset these expenditures, except for certain PATH-Reentry Demonstration Initiative Transitional Non-Service Expenditures as shown in Table 8.				

19.6. **Hypothetical Budget Neutrality.** When expenditure authority is provided for coverage of populations or services that the state could have otherwise provided through its Medicaid state plan or other title XIX authority (such as a waiver under section 1915 of the Act), or when a WOW spending baseline for certain WW expenditures is difficult to estimate due to variable and volatile cost data resulting in anomalous trend rates, CMS considers these expenditures to be "hypothetical," such that the expenditures are treated as if the state could have received FFP for them absent the demonstration. For these hypothetical expenditures, CMS makes adjustments to the budget neutrality test which effectively treats these expenditures as if they were for approved Medicaid state plan services. Hypothetical expenditures, therefore, do not necessitate savings to offset the expenditures on those services. When evaluating budget neutrality, however, CMS does not offset non-hypothetical expenditures with projected or accrued savings from hypothetical expenditures; that is, savings are not generated from a hypothetical population or service. To allow for hypothetical expenditures, while preventing them from resulting in savings, CMS currently applies separate, independent Hypothetical Budget Neutrality Tests, which subject hypothetical expenditures to pre-determined limits to which the state and CMS agree, and that CMS approves, as a part of this demonstration approval. If the state's WW hypothetical spending exceeds the Hypothetical Budget Neutrality Test's expenditure limit, the state agrees (as a condition of CMS approval) to offset that excess spending through savings elsewhere in the demonstration or to refund the FFP to CMS.

19.7. **Hypothetical Budget Neutrality Test 1:** The table below identifies the MEGs that are used for Hypothetical Budget Neutrality Test 1. MEGs that are designated "WOW Only" or "Both" are the components used to calculate the budget neutrality expenditure limit. The Composite Federal Share for the Hypothetical Budget Neutrality Test is calculated based on all MEGs indicated as "WW Only" or "Both." MEGs that are indicated as "WW Only" or "Both" are

counted as expenditures against this budget neutrality expenditure limit. Any expenditures in excess of the limit from Hypothetical Budget Neutrality Test 1 are counted as WW expenditures under the Main Budget Neutrality Test. The following applies to hypothetical budget neutrality tests under this demonstration:

i. Actual expenditures for the CBAS benefit will be included in the expenditure limit for the demonstration project. The amount of actual expenditures to be included will be the actual cost of providing the CBAS services (whether provided through managed care or fee-for- service) to the SPD Medicaid-only population and to dual eligible.

ii. Actual expenditures for the DMC-ODS benefit will be included in the expenditure limit for the demonstration project. The amount of actual expenditures to be included will be the actual cost of providing the DMC- ODS benefit to the eligible population;

iii. Actual expenditures for the Deemed SSI asset limit increase and elimination will be included in the expenditure limit for the demonstration project. The amount of actual expenditures to be included will be actual cost of increasing and eliminating the asset limit for the Deemed SSI populations;

Table 8: Hypothetical Budget Neutrality Test 1								
Eligibility Group (EG)	**PC or Agg.**	**WOW Only, WW Only, or Both**	**Trend Rate**	**DY 18 PMPM**	**DY 19 PMPM**	**DY 20 PMPM**	**DY 21 PMPM**	**DY 22 PMPM**

PATH- Reentry Demonstration Initiative Transitional Non-Service Expenditures	Agg.	Both	0%	0	$209,000,000	$201,000,000	$0	0

19.8. **Capped Hypothetical Budget Neutrality for Evidence-Based HRSN Initiatives.** When expenditure authority is provided for specified HRSN initiatives in the demonstration (in this approval, as specified in STC 8, CMS considers these expenditures to be "capped hypothetical" expenditures; that is, the expenditures are eligible to receive FFP up to a specific aggregate spending cap per demonstration year, based on the state's expected expenditures. States can also receive FFP for capacity-building, infrastructure, and operational costs for the HRSN initiatives; this FFP is limited by a sub-cap of the aggregate spending cap and is determined by CMS based on the amount the state expects to spend. Like all hypothetical expenditures, capped hypothetical expenditures do not need to be offset by savings, and cannot produce savings; however, unspent expenditure authority allocated for HRSN infrastructure in a given demonstration year can be applied to HRSN services in the same demonstration year. Any unspent HRSN services expenditure authority may not be used to fund HRSN infrastructure. To allow for capped hypothetical expenditures and to prevent them from resulting in savings that would apply to the rest of the demonstration, CMS currently applies a separate, independent Capped Hypothetical Budget Neutrality Test, which subjects capped hypothetical expenditures to pre-determined aggregate limits to which the state and CMS agree, and that CMS approves, as a part of this demonstration approval. If actual HRSN initiative spending is less than the Capped

Hypothetical Budget Neutrality Test's expenditure limit for a given demonstration year, the difference is not considered demonstration savings. Unspent HRSN expenditure authority under the cap for each demonstration year can be carried, shifted, or transferred across future demonstration years. However, unspent HRSN expenditure authority cannot roll over to the next demonstration approval period. If the state's capped hypothetical spending exceeds the Capped Hypothetical Budget Neutrality Test's expenditure limit, the state agrees (as a condition of CMS approval) to refund any FFP in excess of the cap to CMS. Demonstration savings from the Main Budget Neutrality Test cannot be used to offset excess spending for the capped hypothetical.

19.9. **Capped Hypothetical Budget Neutrality Test: HRSN.** The table below identifies the MEGs that are used for the Capped Hypothetical Budget Neutrality Test. MEGs that are designated "WOW Only" or "Both" are the components used to calculate the budget neutrality expenditure limit. The Composite Federal Share for the Capped Hypothetical Budget Neutrality Test is calculated based on all MEGs indicated as "WW Only" or "Both." MEGs that are indicated as "WW Only" or "Both" are counted as expenditures against this budget neutrality expenditure limit. Any expenditures in excess of the limit from the Capped Hypothetical Budget Neutrality Test cannot be offset by savings under the Main Budget Neutrality Test or the Hypothetical Budget Neutrality Tests.

Table 9: Capped Hypothetical Budget Neutrality Test

MEG	Agg	WOW Only, WW Only, or Both	DY 18	DY 19	DY 20	DY 21	DY 22
HRSN Services	Agg	Both	$353,702,693	$371,919,141	$391,653,626	$412,906,148	$434,158,671

19.10. **Monitoring Budget Neutrality for Traditional Health Care Practices.** As discussed earlier, the expenditure authority provided for the coverage of traditional health care practices is limited to practices that are delivered by or through certain facility types that are defined by the IHCIA and ISDEAA (laws that stem from the unique government-to-government relationship between the federal government and Indian Tribes). This expenditure authority is also limited to coverage for Medicaid beneficiaries who are able to receive services from those facilities. Further, traditional health care practices are being covered as a complement to services covered by Medicaid under existing authorities. This expenditure authority is not likely to increase overall expenditures beyond what those expenditures could have been without the demonstration. This expenditure authority will not expand the Medicaid-eligible populations, and CMS anticipates that the Medicaid payment rate for most of these services will be the IHS AIR. CMS has therefore determined that this coverage of traditional health care practices is expected to be budget neutral and will not require a specific budget neutrality expenditure sub-limit. The state will be held to the general monitoring and reporting requirements, as per the STCs, and will continue to be held accountable to the overall budget neutrality expenditure limit

of the demonstration.[4] Failure to meet the monitoring and reporting requirements might result in CMS requiring the state to include these expenditures in the budget neutrality agreement for this demonstration, to ensure that CMS has sufficient information to support its initial determination that the approval of these expenditures is expected to be budget neutral. CMS reserves the right to request budget neutrality expenditures and analyses from the state at any time, or whenever the state seeks a change to the demonstration, per STC 3.7. The state must still report quarterly claims and report expenditures on the CMS 64.9 form.

19.11. **Composite Federal Share Ratios.** The Composite Federal Share is the ratio that will be used to convert the total computable budget neutrality limit to federal share. The Composite Federal Share is the ratio calculated by dividing the sum total of FFP received by the state on actual demonstration expenditures during the approval period by total computable demonstration expenditures for the same period, as reported through MBES/CBES and summarized on Schedule C. Since the actual final Composite Federal Share will not be known until the end of the demonstration's approval period, for the purpose of interim monitoring of budget neutrality, a reasonable estimate of Composite Federal Share may be developed and used through the same process or through an alternative mutually agreed to method. Each Hypothetical Budget Neutrality Test has its own Composite Federal Share, as defined in the paragraph pertaining to each particular test.

19.12. **Exceeding Budget Neutrality**. CMS will enforce the budget neutrality agreement over the demonstration period, which extends from January 1, 2022 through December 31, 2026. The Main Budget Neutrality Test for this demonstration period may incorporate carry-forward savings, that is, net savings from up to 10 years of the immediately prior demonstration approval period(s) (07/01/2015 to 06/30/2020). If at the end of the demonstration approval period the Main Budget Neutrality Test or a Capped Hypothetical Budget Neutrality Test has been exceeded, the excess federal funds will be returned to CMS. If the Demonstration is terminated prior to the end of the budget neutrality agreement, the budget neutrality test shall be based on the time elapsed through the termination date.

19.13. **Budget Neutrality Savings Cap.** The amount of savings available for use by the state during this demonstration period will be limited to the lower of these two amounts: 1) the savings amount the state has available in the current demonstration period, including carry-forward savings as described in STC 19.12, or 2) 15 percent of the state's projected total Medicaid expenditures in aggregate for this demonstration period. This projection will be determined by taking the state's total Medicaid spending amount in its most recent year with completed data and trending it forward by the President's Budget trend rate for this demonstration period. Fifteen percent of the state's total projected Medicaid expenditures for this demonstration period is $99,215,335,167.

19.14. **Corrective Action Plan.** If at any time during the demonstration approval period CMS determines that the demonstration is on course to exceed its budget neutrality expenditure limit, CMS will require the state to submit a corrective action plan for CMS review and approval.

[4]For more information on CMS's current approach to budget neutrality, see State Medicaid Director letter #24-003.

CMS will use the threshold levels in the tables below as a guide for determining when corrective action is required.

Table 10: Budget Neutrality Test Corrective Action Plan Calculation		
Demonstration Year	**Cumulative Target Definition**	**Percentage**
DY 18	Cumulative budget neutrality limit plus:	2.0 percent
DY 18 through DY 19	Cumulative budget neutrality limit plus:	1.5 percent
DY 19 through DY 20	Cumulative budget neutrality limit plus:	1.0 percent
DY 20 through DY 21	Cumulative budget neutrality limit plus:	0.5 percent
DY 21 through DY22	Cumulative budget neutrality limit plus:	0.0 percent

20. MONITORING ALLOTMENT NEUTRALITY

20.1. **Reporting Expenditures Subject to the Title XXI Allotment Neutrality Agreement.** The following describes the reporting of expenditures subject to the allotment neutrality agreement for this demonstration:

a. **Tracking Expenditures.** In order to track expenditures under this demonstration, the state must report demonstration expenditures through the Medicaid and State Children's Health Insurance Program Budget and Expenditure System (MBES/CBES), following routine CMS-21 reporting instructions outlined in section 2115 of the State Medicaid Manual.

b. **Use of Waiver Forms.** Title XXI demonstration expenditures will be reported on the following separate forms designated for CHIP (i.e., Forms CMS-21 Waiver and/or CMS-21P Waiver), identified by the demonstration project number assigned by CMS (including project number extension, which indicates the demonstration year in which services were rendered or for which capitation payments were made). The state must submit separate CMS-21 waiver forms for each title XXI demonstration population.

c. **Premiums.** Any premium contributions collected under the demonstration must be reported to CMS on the CMS-21 Waiver form (specifically lines 1A through 1D as applicable) for each title XXI demonstration population that is subject to premiums, in order to assure that the demonstration is properly credited with the premium collections.

d. **Claiming Period.** All claims for expenditures related to the demonstration (including any cost settlements) must be made within two years after the calendar quarter in

which the state made the expenditures. Furthermore, all claims for services during the demonstration period (including cost settlements) must be made within two years after the conclusion or termination of the demonstration. During the latter two-year period, the state must continue to identify separately, on the Form CMS-21 Waiver, net expenditures related to dates of service during the operation of the demonstration.

20.2. **Standard CHIP Funding Process.** The standard CHIP funding process will be used during the demonstration. The state will continue to estimate matchable CHIP expenditures on the quarterly Forms CMS-21B for CHIP. On these forms estimating expenditures for the title XXI funded demonstration populations, the state must separately identify estimates of expenditures for each applicable title XXI demonstration population.

a. CMS will make federal funds available based upon the state's estimate, as approved by CMS. Within 30 days after the end of each quarter, the state must report demonstration expenditures through Form CMS-21W and/or CMS-21P Waiver for the CHIP population. Expenditures reported on the waiver forms must be identified by the demonstration project number assigned by CMS (including project number extension, which indicates the demonstration year in which services were rendered or for which capitation payments were made). CMS will reconcile expenditures reported on the CMS-21W/CMS-21P Waiver form with federal funding previously made available to the state, and include the reconciling adjustment in the finalization of the grant award to the state.

20.3. **Title XXI Administrative Costs.** All administrative costs (i.e., costs associated with the title XXI state plan and the title XXI funded demonstration populations identified in these STCs) are subject to the title XXI 10 percent administrative cap described in section 2105(c)(2)(A) of the Act.

20.4. **Limit on Title XXI Funding.** The state will be subject to a limit on the amount of federal title XXI funding that the state may receive on eligible CHIP state plan populations and the CHIP demonstration populations described in STC 4 during the demonstration period. Federal title XXI funds for the state's CHIP program (i.e., the approved title XXI state plan and the demonstration populations identified in these STCs) are restricted to the state's available allotment and reallocated funds. Title XXI funds (i.e., the allotment or reallocated funds) must first be used to fully fund costs associated with CHIP state plan populations. Demonstration expenditures are limited to remaining funds.

a. **Exhaustion of Title XXI Funds for CHIP Population**. If the state exhausts the available title XXI federal funds in a federal fiscal year during the period of the demonstration, the state must continue to provide coverage to the approved title XXI separate state plan population.

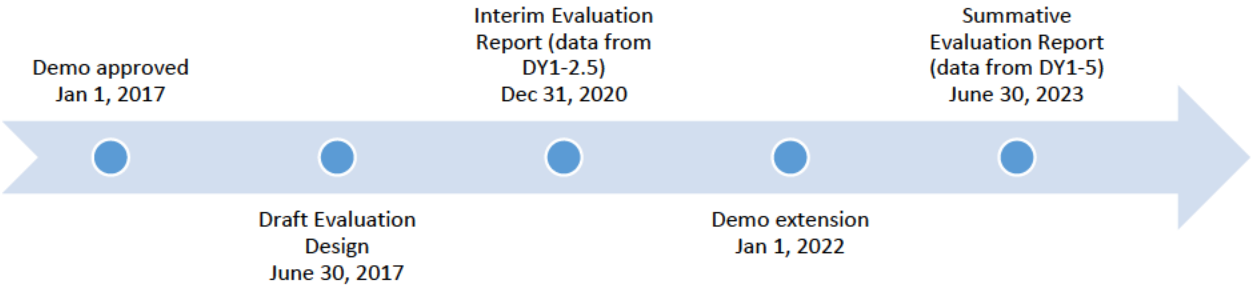
Attachment A
Developing the Evaluation Design

Introduction

Both state and federal governments need rigorous quantitative and qualitative evidence to inform policy decisions. To that end, for states that are testing new approaches and flexibilities in their Medicaid programs through section 1115 demonstrations, evaluations are crucial to understand and disseminate information about these policies. The evaluations of new initiatives seek to produce new knowledge and direction for programs and inform Medicaid policy for the future. While a narrative about what happened during a demonstration provides important information, the principal focus of the evaluation of a section 1115 demonstration should be obtaining and analyzing data. Evaluations should include findings about the process (e.g., whether the demonstration is being implemented as intended), outcomes (e.g., whether the demonstration is having the intended effects on the target population), and impacts of the demonstration (e.g., whether the outcomes observed in the targeted population differ from outcomes in similar populations not affected by the demonstration).

Submission Timelines

There is a specified timeline for the state's submission of its draft Evaluation Design and subsequent evaluation reports. The graphic below depicts an example of this timeline for a 5-year demonstration. In addition, the state should be aware that section 1115 evaluation documents are public records. The state is required to publish the Evaluation Design to the state's website within thirty (30) calendar days of CMS approval, as per 42 CFR 431.424(e). CMS will also publish a copy to the Medicaid.gov website.



Expectations for Evaluation Designs

CMS expects Evaluation Designs to be rigorous, incorporate baseline and comparison group assessments, as well as statistical significance testing. Technical assistance resources for constructing comparison groups and identifying causal inferences are available on Medicaid.gov: https://www.medicaid.gov/medicaid/section-1115-demonstrations/1115-demonstration-monitoring-evaluation/1115-demonstration-state-monitoring-evaluation-resources/index.html. If the state needs technical assistance using this outline or developing the Evaluation Design, the state should contact its demonstration team.

All states with section 1115 demonstrations are required to conduct Interim and Summative Evaluation Reports, and the Evaluation Design is the roadmap for conducting these evaluations. The roadmap begins with the stated goals for the demonstration, followed by the measurable evaluation questions and quantifiable hypotheses, all to support a determination of the extent to

which the demonstration has achieved its goals. When conducting analyses and developing the evaluation reports, every effort should be made to follow the approved methodology. However, the state may request, and CMS may agree to, changes in the methodology in appropriate circumstances.

The format for the Evaluation Design is as follows:

A. General Background Information;
B. Evaluation Questions and Hypotheses;
C. Methodology;
D. Methodological Limitations;
E. Attachments.

A. General Background Information – In this section, the state should include basic information about the demonstration, such as:

1. The issue/s that the state is trying to address with its section 1115 demonstration and/or expenditure authorities, the potential magnitude of the issue/s, and why the state selected this course of action to address the issue/s (e.g., a narrative on why the state submitted an 1115 demonstration proposal).
2. The name of the demonstration, approval date of the demonstration, and period of time covered by the evaluation.
3. A description of the population groups impacted by the demonstration.
4. A brief description of the demonstration and history of its implementation, and whether the draft Evaluation Design applies to an amendment, extension, renewal, or expansion of, the demonstration.
5. For renewals, amendments, and major operational changes: a description of any changes to the demonstration during the approval period; the primary reason or reasons for the change; and how the Evaluation Design was altered or augmented to address these changes.

B. Evaluation Questions and Hypotheses – In this section, the state should:

1. Identify the state's hypotheses about the outcomes of the demonstration, and discuss how the evaluation questions align with the hypotheses and the goals of the demonstration.
2. Address how the hypotheses and research questions promote the objectives of Titles XIX and/or XXI.
3. Describe how the state's demonstration goals are translated into quantifiable targets for improvement, so that the performance of the demonstration in achieving these targets can be measured. Include a Driver Diagram to visually aid readers in understanding the rationale behind the cause and effect of the variants behind the demonstration features and intended outcomes. A driver diagram, which includes information about the goals and features of the demonstration, is a particularly effective modeling tool when working to improve health and health care through specific interventions. A driver diagram depicts the relationship between the aim, the primary drivers that contribute

directly to achieving the aim, and the secondary drivers that are necessary to achieve the primary drivers for the demonstration. For an example and more information on driver diagrams: https://innovation.cms.gov/files/x/hciatwoaimsdrvrs.pdf.

C. Methodology – In this section, the state is to describe in detail the proposed research methodology. The focus is on showing that the evaluation meets the prevailing standards of scientific and academic rigor, that the results are statistically valid and reliable, and that it builds upon other published research, using references where appropriate.

This section also provides evidence that the demonstration evaluation will use the best available data. The state should report on, control for, and make appropriate adjustments for the limitations of the data and their effects on results, and discuss the generalizability of results. This section should provide enough transparency to explain what will be measured and how, in sufficient detail so that another party could replicate the results. Table A below is an example of how the state might want to articulate the analytic methods for each research question and measure.

Specifically, this section establishes:

1. *Methodological Design* – Provide information on how the evaluation will be designed. For example, whether the evaluation will utilize pre/post data comparisons, pre-test or post-test only assessments. If qualitative analysis methods will be used, they must be described in detail.

2. *Target and Comparison Populations* – Describe the characteristics of the target and comparison populations, incorporating the inclusion and exclusion criteria. Include information about the level of analysis (beneficiary, provider, or program level), and if populations will be stratified into subgroups. Additionally, discuss the sampling methodology for the populations, as well as support that a statistically reliable sample size is available.

3. *Evaluation Period* – Describe the time periods for which data will be included.

4. *Evaluation Measures* – List all measures that will be calculated to evaluate the demonstration. The state also should include information about how it will define the numerators and denominators. Furthermore, the state should ensure the measures contain assessments of both process and outcomes to evaluate the effects of the demonstration during the period of approval. When selecting metrics, the state shall identify opportunities for improving quality of care and health outcomes, and controlling cost of care. The state also should incorporate benchmarking and comparisons to national and state standards, where appropriate.

   Include the measure stewards (i.e., the organization(s) responsible for the evaluation data elements/sets by "owning", defining, validating, securing, and submitting for endorsement, etc.) Proposed health measures could include CMS's Core Set of Health

Care Quality Measures for Children in Medicaid and CHIP, Consumer Assessment of Health Care Providers and Systems (CAHPS), the Initial Core Set of Health Care Quality Measures for Medicaid-Eligible Adults and/or measures endorsed by National Quality Forum. Proposed performance metrics can be selected from nationally recognized metrics, for example from sets developed by the Center for Medicare and Medicaid Innovation or for meaningful use under Health Information Technology.

5. *Data Sources* – Explain from where the data will be obtained, describe any efforts to validate and clean the data, and discuss the quality and limitations of the data sources. If the state plans to collect primary data (i.e., data collected specifically for the evaluation), include the methods by which the data will be collected, the source of the proposed questions and responses, and the frequency and timing of data collection. Additionally, copies of any proposed surveys must be provided to CMS for approval before implementation.

6. *Analytic Methods* – This section includes the details of the selected quantitative and/or qualitative analysis measures that will adequately assess the effectiveness of the demonstration. This section should:
    a. Identify the specific statistical testing which will be undertaken for each measure (e.g., t-tests, chi-square, odds ratio, ANOVA, regression).
    b. Explain how the state will isolate the effects of the demonstration from other initiatives occurring in the state at the same time (e.g., through the use of comparison groups).
    c. Include a discussion of how propensity score matching and difference-in-differences designs may be used to adjust for differences in comparison populations over time, if applicable.
    d. Consider the application of sensitivity analyses, as appropriate.

7. *Other Additions* – The state may provide any other information pertinent to the Evaluation Design for the demonstration.

Table A. Example Design Table for the Evaluation of the Demonstration

Research Question	Outcome measures used to address the research question	Sample or population subgroups to be compared	Data Sources	Analytic Methods
Hypothesis 1				
Research question 1a	-Measure 1 -Measure 2 -Measure 3	-Sample e.g. All attributed Medicaid beneficiaries -Beneficiaries with diabetes diagnosis	-Medicaid fee-for-service and encounter claims records	-Interrupted time series
Research question 1b	-Measure 1 -Measure 2 -Measure 3 -Measure 4	-Sample, e.g., PPS patients who meet survey selection requirements (used services within the last 6 months)	-Patient survey	Descriptive statistics
Hypothesis 2				
Research question 2a	-Measure 1 -Measure 2	-Sample, e.g., PPS administrators	-Key informants	Qualitative analysis of interview material

D. Methodological Limitations – This section provides more detailed information about the limitations of the evaluation. This could include limitations about the design, the data sources or collection process, or analytic methods. The state should also identify any efforts to minimize these limitations. Additionally, this section should include any information about features of the demonstration that effectively present methodological constraints that the state would like CMS to take into consideration in its review.

CMS also recognizes that there may be certain instances where a state cannot meet the rigor of an evaluation as expected by CMS. In these instances, the state should document for CMS why it is not able to incorporate key components of a rigorous evaluation, including comparison groups and baseline data analyses. For example, if a demonstration is long-standing, it may be difficult for the state to include baseline data because any pre-test data points may not be relevant or comparable. Other examples of considerations include:

1. When the demonstration is:
    a. Non-complex, unchanged, or has previously been rigorously evaluated and found to be successful; or
    b. Could now be considered standard Medicaid policy (CMS published regulations or guidance).

2. When the demonstration is also considered successful without issues or concerns that would require more regular reporting, such as:

a. Operating smoothly without administrative changes;
b. No or minimal appeals and grievances;
c. No state issues with CMS-64 reporting or budget neutrality; and
d. No Corrective Action Plans for the demonstration.

E. E. Attachments

1) **Independent Evaluator.** This includes a discussion of the state's process for obtaining an independent entity to conduct the evaluation, including a description of the qualifications that the selected entity must possess, and how the state will assure no conflict of interest. Explain how the state will assure that the Independent Evaluator will conduct a fair and impartial evaluation and prepare objective Evaluation Reports. The Evaluation Design should include a "No Conflict of Interest" statement signed by the independent evaluator.

2) **Evaluation Budget.** A budget for implementing the evaluation shall be provided with the draft Evaluation Design. It will include the total estimated costs, as well as a breakdown of estimated staff, administrative, and other costs for all aspects of the evaluation. Examples include, but are not limited to: the development of all survey and measurement instruments; quantitative and qualitative data collection; data cleaning and analyses; and reports generation. A justification of the costs may be required by CMS if the estimates provided do not appear to sufficiently cover the costs of the draft Evaluation Design, if CMS finds that the draft Evaluation Design is not sufficiently developed, or if the estimates appear to be excessive.

3) **Timeline and Major Milestones.** Describe the timeline for conducting the various evaluation activities, including dates for evaluation-related milestones, including those related to procurement of an outside contractor, if applicable, and deliverables. The final Evaluation Design shall incorporate milestones for the development and submission of the Interim and Summative Evaluation Reports. Pursuant to 42 CFR 431.424(c)(v), this timeline should also include the date by which the Final Summative Evaluation Report is due.

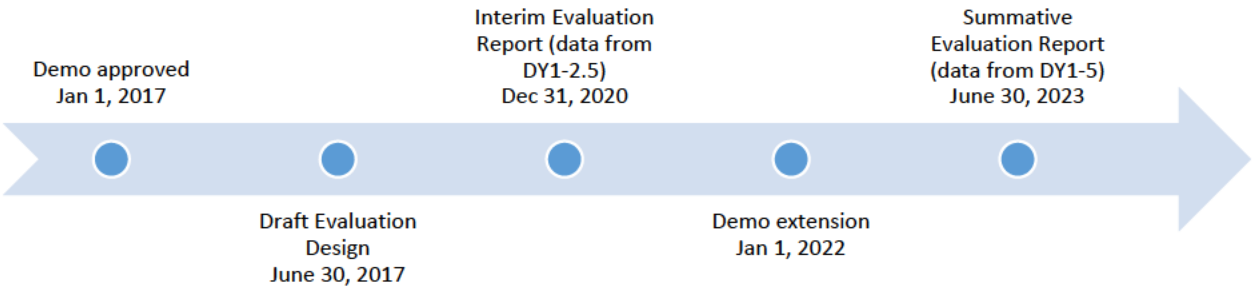
Attachment B
Preparing the Interim and Summative Evaluation Reports

Introduction

Both state and federal governments need rigorous quantitative and qualitative evidence to inform policy decisions. To that end, for states that are testing new approaches and flexibilities in their Medicaid programs through section 1115 demonstrations, evaluations are crucial to understand and disseminate information about these policies. The evaluations of new initiatives seek to produce new knowledge and direction for programs and inform Medicaid policy for the future. While a narrative about what happened during a demonstration provides important information, the principal focus of the evaluation of a section 1115 demonstration should be obtaining and analyzing data. Evaluations should include findings about the process (e.g., whether the demonstration is being implemented as intended), outcomes (e.g., whether the demonstration is having the intended effects on the target population), and impacts of the demonstration (e.g., whether the outcomes observed in the targeted population differ from outcomes in similar populations not affected by the demonstration).

Submission Timelines

There is a specified timeline for the state's submission of Evaluation Designs and Evaluation Reports. These dates are specified in the demonstration Special Terms and Conditions (STCs). The graphic below depicts an example of a deliverables timeline for a 5-year demonstration. In addition, the state should be aware that section 1115 evaluation documents are public records. In order to assure the dissemination of the evaluation findings, lessons learned, and recommendations, the state is required to publish the Interim and Summative Evaluation Reports to the state's website within thirty (30) calendar days of CMS approval, as per 42 CFR 431.424(d). CMS will also publish a copy to the Medicaid.gov website.



Expectations for Evaluation Reports

All states with Medicaid section 1115 demonstrations are required to conduct evaluations that are valid (the extent to which the evaluation measures what it is intended to measure), and reliable (the extent to which the evaluation could produce the same results when used repeatedly). The already-approved Evaluation Design is a map that begins with the demonstration goals, then transitions to the evaluation questions, and to the specific hypotheses, which will be used to investigate whether the demonstration has achieved its goals. When conducting analyses and developing the evaluation reports, every effort should be made to follow

the methodology outlined in the approved Evaluation Design. However, the state may request, and CMS may agree to, changes in the methodology in appropriate circumstances.

When submitting an application for extension, the Interim Evaluation Report should be posted on the state's website with the application for public comment. Additionally, the Interim Evaluation Report must be included in its entirety with the application submitted to CMS.

CMS expects Interim and Summative Evaluation Reports to be rigorous, incorporate baseline and comparison group assessments, as well as statistical significance testing. Technical assistance resources for constructing comparison groups and identifying causal inferences are available on Medicaid.gov: https://www.medicaid.gov/medicaid/section-1115-demonstrations/1115-demonstration-monitoring-evaluation/1115-demonstration-state-monitoring-evaluation-resources/index.html. If the state needs technical assistance using this outline or developing the evaluation reports, the state should contact its demonstration team.

Intent of this Attachment
Title XIX of the Social Security Act (the Act) requires an evaluation of every section 1115 demonstration. In order to fulfill this requirement, the state's evaluation report submissions must provide comprehensive written presentations of all key components of the demonstration, and include all required elements specified in the approved Evaluation Design. This Attachment is intended to assist states with organizing the required information in a standardized format and understanding the criteria that CMS will use in reviewing the submitted Interim and Summative Evaluation Reports.

Required Core Components of Interim and Summative Evaluation Reports
The Interim and Summative Evaluation Reports present research and findings about the section 1115 demonstration. It is important that the reports incorporate a discussion about the structure of the Evaluation Design to explain the goals and objectives of the demonstration, the hypotheses related to the demonstration, and the methodology for the evaluation. The evaluation reports should present the relevant data and an interpretation of the findings; assess the outcomes (what worked and what did not work); explain the limitations of the design, data, and analyses; offer recommendations regarding what (in hindsight) the state would further advance, or do differently, and why; and discuss the implications on future Medicaid policy.

A. The format for the Interim and Summative Evaluation reports is as follows: Executive Summary;
B. General Background Information;
C. Evaluation Questions and Hypotheses;
D. Methodology;
E. Methodological Limitations;
F. Results;
G. Conclusions;
H. Interpretations, and Policy Implications and Interactions with Other State Initiatives;
I. Lessons Learned and Recommendations; and
J. Attachment(s).

A. **Executive Summary** – A summary of the demonstration, the principal results, interpretations, and recommendations of the evaluation.

B. **General Background Information about the Demonstration** – In this section, the state should include basic information about the demonstration, such as:

1. The issue/s that the state is trying to address with its section 1115 demonstration and/or expenditure authorities, how the state became aware of the issue, the potential magnitude of the issue, and why the state selected this course of action to address the issues.
2. The name of the demonstration, approval date of the demonstration, and period of time covered by the evaluation.
3. A description of the population groups impacted by the demonstration.
4. A brief description of the demonstration and history of the implementation, and if the evaluation is for an amendment, extension, renewal, or expansion of, the demonstration.
5. For renewals, amendments, and major operational changes: A description of any changes to the demonstration during the approval period; whether the motivation for change was due to political, economic, and fiscal factors at the state and/or federal level; whether the programmatic changes were implemented to improve beneficiary health, provider/health plan performance, or administrative efficiency; and how the Evaluation Design was altered or augmented to address these changes. Additionally, the state should explain how this Evaluation Report builds upon and expands earlier demonstration evaluation findings (if applicable).

C. **Evaluation Questions and Hypotheses** – In this section, the state should:

1. Identify the state's hypotheses about the outcomes of the demonstration, and discuss how the goals of the demonstration align with the evaluation questions and hypotheses.
2. Address how the research questions / hypotheses of this demonstration promote the objectives of Titles XIX and XXI.
3. Describe how the state's demonstration goals were translated into quantifiable targets for improvement, so that the performance of the demonstration in achieving these targets could be measured.
4. The inclusion of a Driver Diagram in the Evaluation Report is highly encouraged, as the visual can aid readers in understanding the rationale behind the demonstration features and intended outcomes.

Methodology – In this section, the state is to provide an overview of the research that was conducted to evaluate the section 1115 demonstration, consistent with the approved Evaluation Design. The Evaluation Design should also be included as an attachment to the report. The focus is on showing that the evaluation builds upon other published research, (using references), meets the prevailing standards of scientific and academic rigor, and the results are statistically valid and reliable.

An Interim Evaluation Report should provide any available data to date, including both quantitative and qualitative assessments. The Evaluation Design should assure there is

appropriate data development and collection in a timely manner to support developing an Interim Evaluation Report.

This section provides the evidence that the demonstration evaluation used the best available data and describes why potential alternative data sources were not used. The state also should report on, control for, and make appropriate adjustments for the limitations of the data and their effects on results, and discusses the generalizability of results. This section should provide enough transparency to explain what was measured and how, in sufficient detail so that another party could replicate the results. Specifically, this section establishes that the approved Evaluation Design was followed by describing:

1) *Methodological Design* – Whether the evaluation included an assessment of pre/post or post-only data, with or without comparison groups, etc.

2) *Target and Comparison Populations* – Describe the target and comparison populations, describing inclusion and exclusion criteria.

3) *Evaluation Period* – Describe the time periods for which data will be collected.

4) *Evaluation Measures* – List the measures used to evaluate the demonstration and their respective measure stewards.

5) *Data Sources* – Explain from where the data were obtained, and efforts to validate and clean the data.

6) *Analytic Methods* – Identify specific statistical testing which was undertaken for each measure (t-tests, chi-square, odds ratio, ANOVA, regression, etc.).

7) *Other Additions* – The state may provide any other information pertinent to the evaluation of the demonstration.

D. Methodological Limitations – This section provides sufficient information for discerning the strengths and weaknesses of the study design, data sources/collection, and analyses.

F. Results – In this section, the state presents and uses the quantitative and qualitative data to demonstrate whether and to what degree the evaluation questions and hypotheses of the demonstration were addressed. The findings should visually depict the demonstration results, using tables, charts, and graphs, where appropriate. This section should include findings from the statistical tests conducted.

G. Conclusions – In this section, the state will present the conclusions about the evaluation results. Based on the findings, discuss the outcomes and impacts of the demonstration and identify the opportunities for improvements. Specifically, the state should answer the following questions:

1. In general, did the results show that the demonstration was/was not effective in achieving the goals and objectives established at the beginning of the demonstration?

a. If the state did not fully achieve its intended goals, why not?
b. What could be done in the future that would better enable such an effort to more fully achieve those purposes, aims, objectives, and goals?

H. Interpretations, Policy Implications and Interactions with Other State Initiatives – In this section, the state will discuss the section 1115 demonstration within an overall Medicaid context and long-range planning. This should include interrelations of the demonstration with other aspects of the state's Medicaid program, interactions with other Medicaid demonstrations, and other federal awards affecting service delivery, health outcomes and the cost of care under Medicaid. This section provides the state with an opportunity to provide interpretations of the data using evaluative reasoning to make judgments about the demonstration. This section should also include a discussion of the implications of the findings at both the state and national levels.

I. Lessons Learned and Recommendations – This section of the evaluation report involves the transfer of knowledge. Specifically, it should include potential "opportunities" for future or revised demonstrations to inform Medicaid policymakers, advocates, and stakeholders. Recommendations for improvement can be just as significant as identifying current successful strategies. Based on the evaluation results, the state should address the following questions:

1. What lessons were learned as a result of the demonstration?
2. What would you recommend to other states which may be interested in implementing a similar approach?

J. Attachment(s)

1) Evaluation Design: Provide the CMS-approved Evaluation Design

Attachment C
Global Payment Program Participating Public Health Care Systems

Public Health Care Systems participating in the GPP consist of the following designated public hospitals (DPHs), including any successor or differently named hospital as applicable, and their affiliated and contracted providers. The DPHs are operated by a county, a city and county, University of California, or special hospital authority described in Section 101850 or 101852, *et seq*., of the California Health & Safety Code.

1. Los Angeles County (LA Co.) health system
    a. LA Co. Harbor/UCLA Medical Center
    b. LA Co. Olive View Medical Center
    c. LA Co. Rancho Los Amigos National Rehabilitation Center
    d. LA Co. University of Southern California Medical Center
2. Alameda Health System
    a. Highland Hospital (including the Fairmont and John George Psychiatric facilities)
    b. Alameda Hospital
    c. San Leandro Hospital
3. Arrowhead Regional Medical Center
4. Contra Costa Regional Medical Center
5. Kern Medical Center
6. Natividad Medical Center
7. Riverside University Health System -- Medical Center
8. San Francisco General Hospital
9. San Joaquin General Hospital
10. San Mateo County General Hospital
11. Santa Clara Valley Medical Center
12. Ventura County Medical Center

Attachment D - Funding and Reimbursement Protocol for IHS

Funding and Reimbursement Protocol for Claiming IHS and 638 Facilities Uncompensated Care Payment Methodology The methodology outlined below has been approved for structuring supplemental payments to IHS and 638 facilities from November 1, 2015 through December 31, 2020 as required by STC 18.12. Using the methodology escribed below in section (A), the state shall make supplemental payments to Indian Health Service (IHS) and tribal facilities to account for the uncompensated costs of furnishing primary care services between April 5, 2013 and December 31, 2013 to uninsured individuals with incomes up to 133 percent of the Federal Poverty Level (FPL) who are not enrolled in a Low-Income Health Program (LIHP). Using the methodology described below in section (A) and (B), the state shall also make supplemental payments to account for the uncompensated costs of furnishing services between April 5, 2013 and December 31, 2014 to individuals enrolled in the Medi-Cal program for benefits that were eliminated from the state plan pursuant to state plan amendment 09-001 and are not covered by Medi-Cal. Costs for optional dental and psychology, that were eliminated through SPA 09-001, but have been added back in through State Plan Amendments are not available for reimbursement through these supplemental payments.

A. Provider Claiming Methodology for services provided November 1, 2015 through December 31, 2020

1. Participating IHS and tribal 638 facilities shall enter into a billing agent agreement with the California Rural Indian Health Board (CRIHB) consistent with the requirements of 42 C.F.R. 447.10.
2. Participating facilities shall track qualifying uncompensated encounters by utilizing a tracking document or other electronic means to record the following:
    a. The qualifying Medi-Cal service provided to a Medi-Cal beneficiary;
    b. Whether the service was provided to an IHS eligible individual; and
    c. The service date.
3. Qualifying encounters shall not include encounters for which any payment was made under Medi-Cal at the IHS published rate.
4. Participating IHS and tribal 638 facilities shall submit to CRIHB, on a quarterly basis, the number of qualifying uncompensated encounters, broken down by status of individual as IHS-eligible (Indian or Alaskan Native).
5. Participating IHS and tribal 638 facilities shall submit to CRIHB, on a quarterly basis, the amount of third-party payments received for Medi-Cal beneficiaries for qualifying uncompensated care. Third party payments received after the end of the quarter shall be reported as a prior period adjustment.
6. CRIHB will process the reports from participating IHS and tribal facilities and submit to DHCS, within 60 working days after the end of each quarter, a

Quarterly Summary Aggregate Encounter Report (Exhibit 1.B) specifying the number of qualifying uncompensated encounters for each IHS/Tribal 638 facility broken down as reported by each facility. The submission will also include a summary page totaling the aggregate qualifying uncompensated encounters as well as the aggregate supplemental payments due based on the applicable IHS encounter rate offset by any third-party payments received by each facility forthe qualifying uncompensated encounters.

7. In support of the Quarterly Aggregate Encounter Rate, CRIHB shall submit a certification, signed by the Executive Director of CRIHB that the information contained therein is current, complete, and accurate.

State Payment Process

1. The state shall make supplemental payments to each participating facility through CRIHB within 30 days of receipt of each quarterly report, based on the reported uncompensated care costs as calculated by multiplying qualifying uncompensated encounters by the appropriate IHS published rate, offset by any third party payments received by each IHS/Tribal 638 facility foruncompensated encounters involving Medi-Cal beneficiaries, including third party payments reported as a prior period adjustment. If third party payments are reported as a prior period adjustment after the supplemental payment period, the state will offset other Medi-Cal payments to the facility by the amount of such payments.
2. The state shall terminate supplemental payments if the cap for the SNCP is met.
3. The CRIHB must maintain, and upon request provide DHCS, documentation sufficient to support the claims for supplemental payments.
4. CRIHB will disburse the supplemental payments received from the state to each IHS facility in accordance with its agreement with each facility, but no later than 20 business days after receipt from the state.
5. The State may claim federal matching funding for supplemental payments to IHS and tribal 638 at the 100 percent FMAP rate only to the extent that the supplemental payments reflect uncompensated care furnished to IHS eligible individuals.

Exhibit 1.B: Aggregate Encounter Report for January 1, 2022 through October 31, 2026

Facility Name	IHS Eligible Medi-Cal Beneficiaries
Total Number of Encounters	
IHS Encounter rate	
Total Expenditures	
Less: Any other payments received	
Total Net Expenditures	

Certification:

I HEREBY CERTIFY THAT:

1. I have examined this statement, for the period from XXX to XXX and that to the best of my knowledge and belief they are true and correct statements prepared from the books and records of the IHS/Tribal 638 facilities andCRIHB.

2. The information contained in this report is current, complete, and accurate.

Attachment E
SUD Health IT Plan

California Progress on SUD HIT Plan

Overview

The state's Department of Justice (DOJ) manages the Controlled Substance Utilization Review and Evaluation System (CURES), the state's prescription drug monitoring program (PDMP). CURES is governed by strict statutory and regulatory requirements that limit the entities—licensed prescribers, pharmacists, regulatory agency officials, and law enforcement officials--who can access the database. CURES stores Schedule II-V controlled substance prescription information that is reported as dispensed in California. Prescribers must consult CURES to review a patient's controlled substance history no earlier than 24 hours, or the previous business day, before prescribing a Schedule II, Schedule III, or Schedule IV controlled substance to the patient for the first time and at least once every 6 months thereafter if the substance remains part of the treatment of the patient. In accordance with CMS' request, this document details the state of CURES for each functionality included in the SUD HIT.

Prescription Drug Monitoring Program Functionalities

- **Interstate sharing:** AB 1751 (Stats 2018, Ch 478, Low) authorized the DOJ, once final regulations addressing CURES access and use have been issued, to participate in interstate sharing. The DOJ is in the process of developing functionality within CURES to support interstate data sharing and plans to use both RxCheck and sPMPi to facilitate data sharing across states. Additionally, DOJ is actively working with potential data sharing partners. Data obtained from CURES may be provided to authorized users of another state PDMP if the entity operating the interstate data sharing hub, and the PDMP of that state, have entered into an agreement with the DOJ for interstate sharing of PDMP information. Implementation of this functionality is scheduled for Spring 2022.
- **Enhanced "ease of use" for prescribers and other state and federal stakeholders**. CURES launched the Information Exchange Webservice (IEWS) an interoperability platform in 2018 that allows for integration with providers' EHRs and with HIEs where users log into the data system. Currently, 50 health IT entities, including HIEs and large health systems, whose users are authorized to access CURES, use the platform. In addition, DOJ is engaged in a CURES optimization effort to update the "look and feel" of the web-portal and dashboard to promote ease of use. Additionally, interstate searches will be available through the IEWS. Implementation of the optimized CURES is scheduled for Spring 2022.
- **Enhanced connectivity between the state's PDMP and any statewide, regional or local health information exchange.** *See bullet immediately above*
- **Enhanced identification of long-term opioid use directly correlated to clinician prescribing patterns.** CURES presents daily patient safety alerts within the CURES dashboard to prescribers when their patient's aggregate prescription level exceeds certain thresholds, including:
  - Patient is currently prescribed more than 90 morphine milligram equivalents per day

- Patient has obtained prescriptions from 6 or more prescribers or 6 or more pharmacies during last 6 months
- Patient is currently prescribed more than 40 morphine milligram equivalents of methadone daily
- Patient is currently prescribed opioids more than 90 consecutive days
- Patient is currently prescribed both benzodiazepines and opioids

The CURES database also provides health care practitioners and pharmacists with a messaging capability that allows a message to be sent to another health care practitioner regarding a mutual patient from within the secure CURES environment.

Current and Future PDMP Query Capabilities

- **Facilitate the state's ability to properly match patients receiving opioid prescriptions with patients in the PDMP (i.e. the state's master patient index (MPI) strategy with regard to PDMP query).** CURES uses an algorithm to de-duplicate patient entities and that considers various elements of a patient record. It is important to note that use of this algorithm is applied only when CURES generates daily patient safety alerts and for the production of CURES de-identified datasets.

Use of PDMP – Supporting Clinicians with Changing Office Workflows / Business Processes

- **Develop enhanced provider workflow / business processes to better support clinicians in accessing the PDMP prior to prescribing an opioid or other controlled substance to address the issues which follow.** The IEWS platform allows providers easy access to CURES through their EHR as detailed above. State statute requires prescribers to review a patient's history on CURES within 24 hours or one business day before prescribing a controlled substance. In accordance with state law, approved prescribers and pharmacists will be able delegate their authority to access CURES reports. This delegate functionality will become available within the web application in Spring 2022. Delegate access through IEWS is dependent on the National Council for Prescription Drug Programs (NCPDP) to adopt an update to the NCPDP SCRIPT Standard and is therefore on a longer timeframe.
- **Develop enhanced supports for clinician review of the patients' history of controlled substance prescriptions provided through the PDMP—prior to the issuance of an opioid prescription.** In addition to the CURES functionality described above and related to patient alerts, CURES includes links to resources on safe prescribing of controlled substances. For example, the CURES public website includes links to the CDC prescribing guidelines, Medical Board of California guidelines, California's Department of Public Health (CDPH) opioid overdose surveillance dashboard, as well as the CDPH Guidance Letter.

Master Patient Index / Identity Management

- **Enhance the master patient index (or master data management service, etc.) in support of SUD care delivery.** See bullet above on master patient index/patient matching.

Overall Objective for Enhancing PDMP Functionality & Interoperability

- **Leverage the above functionalities / capabilities / supports (in concert with any other state health IT, TA or workflow effort) to implement effective controls to minimize the risk of inappropriate opioid overprescribing—and to ensure that Medicaid does not inappropriately pay for opioids.** Key functionalities intended to help minimize the risk of inappropriate opioid

overprescribing are described above. Additionally, in accordance with state statute and regulations, a public or private entity, including a Bona Fide Researcher, is eligible to obtain data from CURES, subject to the requirements of the data request process. Accordingly, there is no specific data transmittal that occurs between CURES and Medicaid. Related other state IT efforts, DHCS data and clinical staff regularly monitor inappropriate prescribing of opioids through its routine utilization monitoring, an effort that has increased in priority due to the current opioid crisis. Onsite reviews of suspect practitioners have resulted in Drug Code Limitation, a sanction restricting pharmacies from billing for prescriptions written by sanctioned practitioners, and suspension from the Medi-Cal program when there is evidence of potential fraud and/or patient harm. Fraud investigations are conducted and cases are referred to law enforcement for criminal investigation and prosecution when warranted.

Attachment H
Community-Based Adult Services (CBAS) Provider Standards of Participation

A. General Provider Requirements

To become a Medi-Cal Community-Based Adult Services (CBAS) provider, the prospective provider must first obtain an Adult Day Health Care (ADHC) center license, issued by the California Department of Public Health and apply for certification for enrollment in Medi-Cal to the Department of Health Care Services (DHCS) or its designee*. Upon meeting the criteria for certification and Medi-Cal provider enrollment, the ADHC center licensee will be certified as a CBAS provider. This specific waiver provider designation will afford CBAS providers the opportunity to deliver outpatient CBAS center services to eligible Medi-Cal beneficiaries (referred to as CBAS participants) in a community setting.

CBAS providers shall:

4. Meet all applicable licensing and certification, as well as Medi-Cal and waiver program standards, as described or referenced in this document;
5. Adhere to these waiver Standards of Participation (SOPs);
6. Enter into contracts with Medi-Cal managed care plans within the provider's geographic area to provide CBAS center services to Medi-Cal plan members;
7. Provide services in accordance with the CBAS participant's Individual Plan of Care (IPC);
8. Adhere to the documentation, training, and quality assurance requirements identified in the Centers for Medicare and Medicaid Services (CMS)-approved 1115 waiver (#11-W-00193/9), inclusive of all the Special Terms and Conditions (STCs) contained therein; and
9. Demonstrate ongoing compliance with the requirements specified in these SOPs.

*The California Department of Aging (CDA) is DHCS' designated representative for the certification of CBAS providers. Future reference in these SOPs will specify CDA.

B. CBAS Center Services

1. CBAS provider shall provide services at the ADHC center, pursuant to a CBAS participant's IPC, developed by the center's multidisciplinary team. These services shall include all of the following, as specified in a CBAS participant's IPC, during a minimum of a four-hour stay at the center. Any length of stay under four hours will not be reimbursed. The CBAS provider is responsible for documenting the provision of services and the duration of attendance of each participant at the center.
    a. Core services: each CBAS participant shall be scheduled to receive ALL of these services on each day of attendance at the center:

i. Professional nursing.
ii. Therapeutic activities.
iii. Social services and/or personal care services.
iv. One meal offered per day.

b. Additional services: each CBAS participant shall receive the following services as needed and as specified in his/her IPC:
i. Restorative physical therapy.
ii. Restorative occupational therapy.
iii. Speech therapy.
iv. Behavioral health services.
v. Registered dietitian services.

c. Transportation to and from the center and the participant's place of residence, shall be arranged or provided as needed.

2. Requirements specified in Section B.1 of these SOPs may be suspended in the event of qualifying emergencies pursuant to the CBAS STCs for Emergency Remote Services (ERS). All requirements for CBAS ERS specified in the CBAS STCs and further defined in state-issued policy letters must be met to be eligible for reimbursement.

A. Legal Authority and Requirements

1. CBAS providers shall:
   a. Deliver services in licensed ADHC centers in accordance with Health and Safety (H&S) Codes under Division 2, Chapter 3.3 and shall provide services in accordance with the California Code of Regulations (CCR), Title 22 under Division 5, Chapter 10 and with the CMS-approved waiver document(s), except when CBAS ERS supports and services are delivered in accordance with these STCs and SOPs and all requirements specified in state-issued policy letters.
   b. Be certified and enrolled as Medi-Cal providers and shall meet the standards specified in the Welfare and Institutions Codes under Division 9, Chapter 8.7; in the CCR, Title 22 under Division 3, Chapter 5; in Medi-Cal Provider Bulletins and CBAS All Center Letters, and as set forth in these SOPs.
   c. Apply for certification. The application review includes, but is not limited to, evaluation of the provider legal entity and associated individuals to ensure there are no restrictions on their Medi-Cal/Medicaid enrollment status.
   d. Apply for recertification as Medi-Cal providers at least every 24 months and be subject to an application review as specified in Subsection C.1.c. and an onsite review. The onsite review includes, but is not limited to, evaluation of administrative systems and processes, staffing, and the appropriateness and quality of services delivered. Recertification is contingent upon the provider's demonstration of continuing compliance with standards for participation in the Medi-Cal program.

2. If there is a change in adopted laws or regulations governing the licensing of ADHC centers and/or the certification of CBAS providers, these SOPs shall be interpreted in such a manner as to be in conformance with such laws or regulations.

B. Physical Plant and Health and Safety Requirements

To ensure the health and safety of the CBAS participants, the physical plant of each center shall conform to the requirements of applicable sections of Title 22 of the CCR as described in part by the following:

1. Physical accommodations – Designed, equipped, and maintained to provide for a safe and healthful environment. Each center shall:
    a. Comply with state and local building requirements and codes.
    b. Be maintained in conformity with the regulations adopted by the State Fire Marshal.
    c. Have a working, listed telephone number.
    d. Have a working FAX number.
    e. Have a working email address.
    f. Have electronic equipment, including computers and software, adequate to comply with State CBAS reporting requirements.
    g. Have a working heating and cooling system.
    h. Have adequate lighting.
    i. Have appropriate water supply and plumbing.
2. Space Requirements – Demonstrate all of the following, to include but not be limited to:
    a. Available space sufficient to accommodate both indoor and outdoor activities and store equipment and supplies.
    b. A multipurpose room large enough for all participants to gather for large group activities and for meals.
    c. A secluded area that is set aside for participants who require bed rest and privacy during medical treatments or social service interventions.
    d. Appropriate office area(s).
3. Maintenance and Housekeeping – Be clean, safe, and in good repair at all times; maintenance shall include provisions for cleaning and repair services.
4. Safety – Have appropriate protective devices to guard against hazards by means of supervision, instruction, and installation.
5. Supplies – Maintain sufficient supplies for functional operation and meeting the needs of the participants.
6. Solid Waste – Provide for the storage and disposal of solid waste according to the standards set forth in Title 22.

E. CBAS Eligibility Determination and Authorization

Eligibility determination and authorization for CBAS shall be determined as specified in the CBAS STCs and as follows:

1. A Treatment Authorization Request (TAR) or other agreed upon authorization document shall be prepared by the CBAS provider and submitted to the managed care plan, or to DHCS for beneficiaries exempt from enrolling in a managed care plan, for each beneficiary seeking CBAS. TARs for CBAS must be supported by the participant's IPC.
2. Reauthorization TARs for CBAS must be submitted to the appropriate reviewer at least every six months, or up to 12 months, as specified in the STCs, and must continue to be supported by the participant's IPC. Reauthorization for CBAS ERS is required at least every three months, in accordance with the STCs and all requirements specified in state-issued policy letters.
3. Authorization timeframes shall be in accordance with H&S Code 1367.01 and State Medi-Cal regulations and policy.

F. Individual Plan of Care (IPC)

The participant's IPC shall:

1. Be developed by the CBAS center's multidisciplinary team and signed by representatives of each discipline required to participate in the multidisciplinary team assessment.
2. Be the result of a collaborative process among the CBAS provider, the participant, and if applicable, the participant's authorized representative(s) and/or managed care plan.
3. Be signed by either the CBAS provider's physician or the participant's personal health care provider. "Personal health care provider" may include a physician assistant or nurse practitioner within their scope of practice under the appropriate supervision of the physician.
4. Be based on a person-centered planning process and meet the requirements specified in the CBAS STCs.
5. Be based on assessment or reassessment conducted no more than 30 days prior to the start date of the IPC. If the CBAS participant is a Medi-Cal managed care member and the participant's plan requires submission more than 30 days prior to the IPC effective date, the CBAS provider must identify any change in condition requiring IPC amendment prior to implementation and amend it accordingly if a change to the IPC is needed.
6. Be approved by the participant or participant's authorized representative and documented in the signed CDA ADHC/CBAS Participation Agreement attesting to having participated in the center's care planning process to develop the IPC. Signing the CDA ADHC/CBAS Participation Agreement shall occur after the participant's assessment or reassessment process has been completed and the IPC has been developed, and prior to the delivery of CBAS services identified on the IPC.

G. CBAS Staffing

1. A CBAS provider shall employ or contract with a variety of staff and render required services as described in these SOPs. The staff providing CBAS center services shall meet all licensing requirements as specified in the California Business and Professions Code, as well as these SOPs, as appropriate to the individual staff person. A CBAS provider's staffing requirements shall be based on the provider's hours of service and the average daily attendance (ADA), including days of service provided under CBAS ERS, from the previous three consecutive months. The ADA can also be tied to ADA levels on various days of the week so long as the CBAS provider can demonstrate that the ADA for those days are consistent.
    a. "Hours of service" means the program hours for the provision of CBAS, which shall be no less than 4 hours excluding transportation. The hours of service shall be defined and posted by the adult day health care center.
2. Professional nursing coverage of the center shall include Registered Nurse (RN) staffing at a ratio of one RN for every 40 participants in ADA, or one RN for the first 40 participants and a half-time Licensed Vocational Nurse (LVN) for every increment of 10 in ADA exceeding 40 participants.
    a. There shall be at least one licensed nurse physically present and performing nursing duties at the center at all times during the center's hours of service during which participants are present. The licensed nurse physically present may be an LVN, providing the LVN is under the supervision of the RN, is working within scope of practice, and the RN is immediately available by phone if needed.
3. Social services staffing must include social workers at a ratio of one medical social worker for every 40 participants in ADA, or one medical social worker for the first 40 participants and a half-time social worker assistant for every increment of 10 in ADA exceeding 40 participants.
4. The program aide staffing shall be at a ratio of one program aide on duty for up to and including 16 participants.
    a. "On duty" means physically present and performing duties at the center at all times during the center's hours of service in which participants are present.
    b. Any number of participants up to the next 16 shall require an additional program aide (for example, 17 participants require two program aides).
5. Participants' needs supersede the minimum staffing requirements specified in these SOPs. The CBAS provider shall be responsible for increasing staffing levels as necessary to maintain the health and safety of all participants and to ensure that services are provided to all participants according to their IPCs.
6. Physical, occupational, and speech therapy, and mental health services shall be provided at a minimum monthly rate of 20 total therapy hours for each increment of five participants in ADA.

H. Organization and Administration

The CBAS center shall be organized and staffed to carry out the services and other requirements specified in the waiver. Such organization shall include:

1. An administrator and full-time program director. An administrator or program director must be on duty at all times.
    a. "On duty" means physically present and performing duties at the center at all times during the center's hours of service in which participants are present.
    b. The CBAS provider shall have a written policy for coverage of the administrator and program director during times of absence.
2. Sufficient supportive staff to conduct the CBAS provider's daily business in an orderly manner.
3. CBAS staffing that meets the individual professional requirements specified in relevant state laws and regulations and in these SOPs.
4. Financial and accounting records that fully disclose the disposition of all funds.
5. The maintenance of appropriate personnel and CBAS participant health records and personnel records.
6. Ability to comply with State reporting requirements as specified through Provider Bulletins, these SOPs, and as applicable, Medi-Cal managed care plan contract requirements. CBAS providers must report the following:
    a. Discharge plan at time of disenrollment from the CBAS center:
        i. Must be reported to CDA for fee-for-service CBAS participants and to the responsible managed care plan for managed care plan members.
    b. Incident reports:
        i. All incidents that threaten the welfare, safety, or health of the participant(s) shall be reported to CDA, and, if applicable, the CBAS participant's managed care plan within 48 hours of the incident and documented in writing in the required format. Such documentation shall be available to appropriate CDA/managed care plan staff at all times.
7. Written policies and procedures for center operations and the provision of services to CBAS participants.
8. Emergency Services – Maintenance of updated written procedures for dealing with emergency situations. Such procedures shall include, at a minimum all of the following:
    a. Use of the local 911 system.
    b. Appropriately trained personnel; at a minimum, all direct care staff shall be trained in first aid and certified in basic life support.
    c. Written permission from all CBAS participants for transfer to and treatment by local hospitals or other treatment facilities as needed, which can be provided for in the participation agreement.
9. Grievance Procedures – A written grievance process whereby participants and family/caregivers can report and receive feedback regarding CBAS services.
10. Civil Rights and Confidentiality – Adherence to all laws and regulations regarding civil rights and confidentiality of both participants and CBAS staff. CBAS providers are subject to Federal and State laws regarding discrimination and abuse and the reporting of such, inclusive of the requirements of the Health Insurance Portability and Accountability Act (HIPAA) and the Information Practices Act (IPA).

11. Quality Control/Quality Assurance – Quality control/quality assurance reviews that are in accordance with the Quality Assurance Plan, as described in the CMS-approved 1115 waiver (#11-W-00193/9).
12. Training Requirements – Training of all direct care CBAS staff regarding the care appropriate to each participant's diagnoses and his/her individual care needs. Provision of training to CBAS staff is a requirement to be enrolled in Medi-Cal as a CBAS provider and is not separately reimbursable outside of the CBAS provider's rate by either Medi-Cal or the Medi-Cal managed care plans.
    a. A Training of CBAS staff shall include an initial orientation for new staff; review of all updated policies and procedures; hands-on instruction for new equipment and procedures; and regular updates on State and Federal requirements, such as abuse reporting and fire safety.
    b. Training shall be conducted and documented on a quarterly basis and shall include supporting documentation on the information taught, attendees, and the qualifications of the instructor(s).
13. Documentation – Maintenance of a health record for each CBAS participant that shall be available to appropriate DHCS/CDA and managed care plan staff for any scheduled or unscheduled visits.
    a. This health record shall include documentation of all services provided and refused, the current IPC, referral requests and outcomes of said referral(s).
    b. Health record documentation shall be maintained in compliance with applicable Federal and State laws and shall be retained by the CBAS provider for a minimum of seven years. Health records shall be stored so as to protect against loss, destruction, or unauthorized use.
    c. The CBAS provider shall maintain administrative records that document compliance with these SOPs.

Attachment I
Drug Medi-Cal Organized Delivery System (DMC-ODS)
County Certified Public Expenditures (CPE) Protocol (Updated September 16, 2020)

GENERAL

Consistent with 42 CFR 433.51, a State or a unit of local government may use for its share in claiming federal financial participation (FFP) its public funds appropriated directly to the State or local Medicaid agency, transferred from other public agencies (including Indian tribes) to the State or local agency and under its administrative control, or certified by the contributing public agency as representing expenditures eligible for FFP. Public funds must not be federal funds unless specifically authorized by Federal law to be used for such purpose. The certified public expenditures of each Drug Medi-Cal (DMC) Organized Delivery System (ODS) County are comprised of expenditures incurred for payments made to contracted providers, payments made to contracted managed care plans, and expenditures incurred by county-operated providers, for the furnishing of DMC ODS waiver services specified in the special terms and conditions of this 1115 demonstration waiver, authorized under California's Section 1915(b) waiver, and California's Medicaid State Plan to eligible Medi-Cal beneficiaries. Services provided to beneficiaries residing in an IMD will be reported in the necessary 1115 line items within the CMS-64 report, separate and apart from all other services rendered to beneficiaries residing outside of an IMD.

DMC ODS county expenditures for contracted provider services are the payments made to the contracted providers for substance use disorder services rendered. For the NTP/OTP modality of service, each DMC ODS county pays contracted providers at the lower of the uniform statewide daily rate (USDR) or the provider's usual and customary charge to the general public for the same or similar services. For non-NTP/OTP modalities, each DMC ODS county pays contracted providers at county-specific negotiated rates, subject to contracted provider cost reconciliation as discussed below. The rates are proposed as part of the county fiscal plan that is submitted as addendum to the implementation plan and approved by the Department of Health Care Services (DHCS).

Each DMC ODS county that contracts with a managed care plan pays the managed care plan a county specific interim per utilizer per month (PUPM) rate for all substance use disorder services rendered by county and non-county providers to each user each month. Each county-specific PUPM rate is reviewed and approved by DHCS, and is subject to reconciliation as described below.

The county-specific negotiated rates are based on several criteria as required in the fiscal guidance that has been provided in Mental Health and Substance Use Disorders (MHSUDS) INFORMATION NOTICE NO: 15-034 and MHSUDS INFORMATION NOTICE NO: 16-050. The county will use the projected actual cost for services based on the most current prior fiscal year cost report data, where these services were previously available, with adjustments for increased projected beneficiary counts and the resulting projected increase in units of service (projected utilization) that will result from participation in the pilot. In the cases where the services have not been previously available, the counties will project staff hours for providing the services and calculate a projected cost per unit. Additional adjustments can be applied for

inflation, using an approved government inflation factor, in similar manner to the county interim rate development.

The county-specific interim PUPM rates are based on the following criteria.

- Total enrollment for each county multiplied by assumed prevalence rates and penetration rates by age group equals estimated utilizers for each county.
- Estimated utilizers multiplied by the percentage of utilizers in Marin County, Riverside County, and San Mateo County who used each mode of service.
- Estimated utilizers by mode of services multiplied by the average rate per mode of service paid in Marin County, Riverside County, and San Mateo County or the Fiscal Year 2015-16 county cost trended forward, if available, determined the total cost for each mode of service.
- Summed the total cost across all modes of service to determine the total cost for the estimated utilizers.
- Divided the total estimated cost by the total estimated utilizers to determine the service component of the interim PUPM rate.

As the State reviews proposed county interim rates and county interim PUPM rates, the additional information that is considered in the review includes data that illustrates the contract providers' or contract managed care plan's projected cost per unit for each DMC ODS service. The State is able to provide oversight to the contract provider rate or contract managed care interim PUPM rate development at this stage of the review. If the projected expenditure or the projected utilization appears to be excessive or unsubstantiated, the State will provide feedback in the review process and request additional justification and/or correction to the projections. DMC ODS county expenditures for county-operated provider services are determined through county provider cost reports. Section 14124.24(9) (1) of the Welfare and Institutions Code (WIC) requires that legal entities (i.e., counties and contracted providers), except for those contracted providers providing only narcotic treatment, submit substance use disorder (SUD) cost reports to DHCS by November 1 for the previous state fiscal year, unless DHCS grants a formal extension. A county-operated narcotic treatment facility will be required to submit the complete SUD cost report. A county with an approved PUPM rate will not be required to submit a cost report for non-county-operated providers. The reconciliation of those payments will be subject to a reconciliation based on payments and actual encounters. A county with an approved PUPM rate will be required to submit a county provider cost report for county-operated providers, and payments for services rendered by county-operated providers will be reconciled to county-operated provider cost.

The SUD cost report forms are structured to obtain each legal entity's methodology for allocating costs between the various services provided by the legal entity, separate by provider number. The provider must demonstrate in their cost report the allocation base they used to distribute their total program costs to specific SUD programs and modality types. There is one Excel file that must be completed by the legal entity for each service site that has its own DMC number and DMC certification and maintains its separate accounting records. There are 23 worksheet tabs with data entry areas identified in yellow; however, most of the worksheet areas are automatically populated.

The SUD cost reporting forms were reviewed and approved by the Centers for Medicare and Medicaid Services (CMS) as part of the Medicaid state plan amendment 09-022 review. Direct costs and indirect costs are recognized consistent with federal cost principles, including 2 CFR 200 Subpart E, Medicare cost principles (42 CFR 413 and Medicare Provider Reimbursement Manual Parts 1 and 2), and Medicaid non-institutional reimbursement policy. Any substantive modification to the approved cost reporting form is subject to review and approval by CMS. For the purposes of determining DMC ODS county certified public expenditures for county-operated and contract providers under the 1115 waiver, each county as contractor with the State receives and aggregates the legal entity cost reports into a cost report for all DMC ODS services provided under the contract to eligible Medi-Cal beneficiaries. The county is responsible for certification of public expenditures. DHCS is reconciling the county cost, based on the aggregate of costs incurred by the county for payments to all subcontracted providers and costs incurred by the county-operated providers. Cost reports completed by non-county (i.e., contracted) legal entities (which are required to file cost reports for non-NTP services under the Medicaid state plan), and cost reports completed by county-operated providers, are used to determine the DMC ODS expenditures under the 1115 waiver. These cost reports are used to determine if the reconciled amount was the lower of cost or customary charge (and in the case of dosing and individual/group sessions provided by county-operated NTP providers, the lowest of USDR or cost or customary charge). These cost reports are subject to audit by State and Federal authorities.

This attachment will remain operative until the effective date for the State's implementation of behavioral health payment reform no sooner than July 1, 2023, which will include a shift from the CPE-based framework to a prospective reimbursement rate methodology in DMC-ODS; DHCS will provide CMS with at least 30 days written notice prior to the effective date for behavioral health payment reform and the sunset of CPE-based payments for DMC-ODS, but the State will not be required to seek a formal demonstration amendment.

DEFINITIONS

1. "CMS" means the Centers for Medicare and Medicaid Services.
2. "Cost center" means a department or other unit within an organization to which costs may be charged for accounting purposes.
3. "DHCS" means the California Department of Health Care Services.
4. "Direct costs" means those that are directly incurred, consumed, expanded and identifiable for the delivery of the specific covered service, objective or cost center. Examples of direct costs include unallocated (i.e., directly assigned or directly charged) wages/salaries of employees for the time devoted and identifiable specifically to delivery of the covered services or the final cost objective such as intensive outpatient treatment, outpatient drug free treatment. Other direct costs may include direct materials, equipment, supplies, professional services and transportation that are directly acquired, consumed, or expended for the delivery of the specific covered service or objective.
5. "DMC" means Drug Medi-Cal.
6. "DMC unreimbursable costs" means costs that are not reimbursable or allowable in determining the provider's allowable costs in accordance to the California's Medicaid State Plan, the special terms and conditions of this 1115 demonstration waiver, federal and state laws and regulations, including 2 CFR Part 200 Subpart E, 42 CFR 413, Medicare

Provider Reimbursement Manuals, CMS non-institutional reimbursement policy and California Code of Regulations Titles 9 and 22 (to the extent that they do not conflict with federal cost principles).

7. "Indirect costs" means those costs: a) incurred for a common or joint objective benefiting more than one cost center or objective, and b) are not readily identifiable and assignable to the cost center or objectives specifically benefited, without effort disproportionate to the particular cost center or objective.
8. "Indirect cost rate" means a tool for determining the proportion of indirect costs each program should bear. It is the ratio (expressed as a percentage) of the indirect costs to a direct cost base. A provider's indirect cost rate must be determined and approved by a cognizant agency (federal or state agency).
9. "IOT" means intensive outpatient treatment.
10. "Legal Entity" means each county alcohol and drug department or agency, each corporation and its subsidiaries, sole proprietors, partnerships, agencies, or individual practitioners providing alcohol and drug treatment services under contract with the county alcohol and drug department or agency or with DHCS.
11. "NTP" or "OTP" means narcotic treatment program treatment.
12. "ODF" means outpatient drug free treatment.
13. "Percent of Direct Costs" means a tool for determining the proportion of indirect costs each program should bear. It is the ratio (expressed as a percentage) of each modality or cost center's direct costs to the total direct costs. Percent of Direct Costs is a variation of the Indirect Cost Rate which allows the allocation of indirect costs by line item rather than in aggregate.
14. "Interim Per Utilizer Per Month(PUPM) Rate" means the approved county specific monthly interim rate paid per beneficiary who utilized at least one substance use disorder service for the month in which the service(s) is rendered.
15. "PH" means partial hospitalization.
16. "SUD" means substance use disorder.
17. "Total Utilizer Months" means the number of months during which all beneficiaries utilized at least one substance use disorder service.

SUMMARY OF STATE-DEVELOPED COST REPORT

Modifications to the Current CMS Approved SUD Cost Report Forms

In order to collect accurate cost data for the additional services offered in the DMC ODS, it will be necessary to insert sections into each of the four modality-specific worksheets to capture data for all of the added DMC ODS services that will be offered in each level of care. These include adding case management, physician consultation, withdrawal management, recovery services. and additional medication-assisted treatment. DHCS will also need to add new tabs for Partial Hospitalization (PH) services. These tabs will also include the additional DMC ODS services as described above. These changes will not change how the forms calculate the amounts; they will just add the additional services into the current structure.

The other necessary modification is to remove the current statewide rates that are currently included on the forms. The Cost Allocation tab of the forms will calculate the cost per unit based on total allowable cost/total allowable units. This cost per unit will be used to reconcile the interim payments. The state will not use the current DMC Maximum Allowed for the ODS cost

settlement. However, all other limits including the USDR for NTP services and customary charges will continue to apply as they do under the state plan for DMC services.

Inpatient hospital-based residential and withdrawal management services include ASAM levels 3.7 and 4.

These services are reimbursable in the DMC ODS when they are delivered by a licensed and certified chemical dependency rehabilitation hospital (CDRH) or a licensed and certified freestanding acute psychiatric hospital (FAPH). CMS requires the use of the form CMS 2552-10 for all hospital cost reporting. Contracted CDHRs and FAPHs must submit a copy of the CMS 2552-10 to the county for the purpose of DMC ODS cost reporting. The information from the CMS 2552-10 submitted to the county will be used to identify the relevant cost data that the county will enter into the cost report system.

Cost Report Forms Description:

Provider Information and Certification Worksheet (Tab 1)

This worksheet collects legal entity details, including entity name, address, other contact information, and all related legal entity information under the same county contract. This worksheet is also where the legal entity representative signs and certifies that the cost report is accurate and complies with all Federal and State requirements.

Overall Cost Summary Worksheet (Tab 2)

This worksheet displays a summary of the totals for all the cost centers being reported. No data entry is necessary in this worksheet; information will automatically populate from the Overall Detailed Costs worksheet.

Overall Detailed Costs Worksheet (Tab 3)

This worksheet requires the legal entity to enter all necessary data related to all direct and indirect costs being reported. This worksheet must reflect all costs incurred by the legal entity related to their SUD services and it must demonstrate the allocation methodologies used by the legal entity (in accordance with applicable cost reimbursement standards) to distribute their costs across various cost centers.

Detailed Costs Worksheet (Tab 4 - ODF: Tab I - PH: Tab 12 - IOT: Tab 16 - Residential: Tab 20 - NTPI

This worksheet displays the results of all calculations for the cost reported for the specific modality. No data entry is necessary in this worksheet; information will automatically populate from other worksheets.

Detailed Adjustments For DMC Unreimbursable & Direct Costs Worksheet (Tab 5 - ODF: Tab 9 - PH: Tab 13 - IOT: Tab 17 - Residential: Tab 21 - NTP

This worksheet allows the legal entity to enter the breakout of costs from the program's general ledger for each of the cost categories between the different services. This information automatically populates data in the Detailed Costs worksheet and the Cost Allocation worksheet.

Cost Allocation Worksheet (Tab 6 - ODF; Tab 10 - PH: Tab 14 - IOT: Tab 18 Residential: Tab 22 - NTP)

This worksheet further identifies the breakout of costs between the different services and between private pay, DMC and non-DMC. The legal entity will enter the units of service and the rates that have been charged for the services. The worksheet calculates the maximum reimbursement for DMC services. All other areas are automatically populated based on data entry in other worksheet tabs.

Reimbursed Units Worksheet (Tab 7 - ODF: Tab 1l - PH: Tab 15 - IOT: Tab 19 Residential: Tab 23 - NTP)

This worksheet requires the legal entity to enter the approved units of DMC service based on a report generated by DHCS. There are areas on this sheet that are automatically populated from other worksheets. The worksheet produces specific reimbursement amounts by funding source and aid code category. The county will use the amounts from this worksheet for data entry into the cost report system application.

PUPM Reconciliation Report Description

The PUPM Reconciliation Report reconciles costs eligible for reimbursement with the total PUPM payments the county made to the Managed Care Plan (i.e., Certified Public Expenditures). For non-NTP services provided by non-county-operated providers, cost eligible for reimbursement are equal to the lower of the amount the managed care plan paid the contract provider or the prevailing charge for the same or similar service. For non-NTP services provided by county-operated providers, costs eligible for reimbursement are equal to county-operated provider's allowable cost. Reimbursement for non-NTP inpatient hospital services, provided either by non-county-operated providers or county-operated providers, will not exceed the provider's customary charge for the service. For NTP services provided by non-county operated providers, the cost eligible for reimbursement is equal to the lower of the USDR, or the provider's usual and customary charge for the same or similar services. For NTP services provided by county-operated providers, the cost eligible for reimbursement is equal to the lower of county-operated provider's allowable cost, the USDR, or the provider's usual and customary charge for the same or similar service. The following describes each tab in the PUPM Reconciliation Report and how it is used to calculate costs eligible for reimbursement and to compare those costs eligible for reimbursement to the county's certified public expenditures.

DMC ODS County Information Worksheet

This worksheet captures detailed contact information for the DMC ODS County and its contracted managed care plan. Contact information includes the county code; county name; managed care plan; and name, phone number, and e-mail address of the person the county wants the state to contact with questions about the PUPM Reconciliation Report.

Total Beneficiaries Served Worksheet

The DMC ODS County or contracted managed care plan must enter the total unduplicated beneficiaries served by month and aid code group based upon a report generated by DHCS. This worksheet calculates Total Utilizer Months.

Approved Units of Service Worksheet – Non-County-Operated Providers

The DMC ODS County or contracted managed care plan must enter on this worksheet the total approved units of service rendered by non-county-operated providers for the reporting fiscal year

by aid code group, modality, and population (i.e., perinatal or non-perinatal) based upon a report generated by DHCS.

Cost Per Unit of Service Worksheet – Non-County-Operated Providers

The DMC ODS County or contracted managed care plan must enter on this worksheet the cost of services for each DMC ODS covered service modality provided to Medi-Cal beneficiaries enrolled in the DMC ODS County for which the reconciliation report is submitted. This worksheet calculates the cost per unit of service for each service modality. This worksheet is also prepopulated with the prevailing charge for each service modality. The USDR is the prevailing charge for NTP services.

Third Party Revenue Worksheet

The managed care plan must enter any revenue it received from third parties for the units of service reported in the Approved Units of Service Worksheet.

Eligible Cost Worksheet

This worksheet calculates the managed care plan's eligible costs for each DMC ODS service modality. Eligible costs for each service modality is equal to the total units of service multiplied by the cost per unit of service minus third party revenue.

Eligible Prevailing Charges Worksheet

This worksheet calculates the total prevailing charges less third party revenue for each DMC ODS service modality. Eligible prevailing charges is equal to the total units of service multiplied by the prevailing charge per unit of service minus third party revenue.

Cost Allocation Worksheet

This worksheet calculates the proportion of eligible costs that are to be reimbursed by the federal government, state government, and county government by service modality.

Prevailing Charges For Non-County-Operated Providers Allocation Worksheet

This worksheet calculates the proportion of eligible prevailing charges that would be reimbursed by the federal government, state government, and county government by service modality.

UPL/Budget Neutrality Demonstration Worksheet

This worksheet compares the total actual cost to total prevailing charges by aid code group, selects the lower of total actual cost or prevailing charges, and calculates federal reimbursement based upon the lower of total actual cost or prevailing charges.

County Contracted MCP Reconciliation Worksheet

This worksheet reconciles contracted managed care plan's actual costs eligible for reimbursement with the County interim PUPM payments to the managed care plan. The County or the contracted managed care plan must enter actual costs eligible for reimbursement by aid code group for county-operated providers as determined in the cost report form described on page 5. The worksheet adds the actual costs eligible for reimbursement for non-county-operated providers to calculate the total costs eligible for reimbursement. The county must enter the total interim payments made to the managed care plan. The amount of total costs eligible for reimbursement

less County interim payments to the contracted managed care plan equals the amount due to or from the contracted managed care plan.

DHCS County Reconciliation Worksheet

This worksheet reconciles the DMC ODS County's final total payments to the contracted managed care plan for DMC ODS services with total interim payments made to the DMC ODS County for those services. The DMC ODS County received an overpayment when interim payments exceed the DMC ODS County's final total payments. DHCS will recoup any overpayments to the DMC ODS County and return the overpayment to the federal government. The DMC ODS County received an underpayment when its final total payments to the managed care plan exceed interim payments. DHCS will made addition interim payments to the DMC ODS County when there is an under payment. DHCS will not pay a DMC ODS county more than the amount it paid the managed care plan for DMC ODS services rendered.

County Certification

The County Auditor Controller must certify the final total payments to the managed care plan as reported in the Total Payments Worksheet.

INTERIM RATE SETTING METHODOLOGY

Each county's interim CPE claim submitted to the state will be based on the services provided and the approved county interim rates or county interim PUPM rate for the covered services. Annual county interim rates for each covered service will be developed by the county and approved by the State. Annual county interim PUPM rates for the covered services will also be approved by the State. The approved interim rates will be specified in the State/County contract. These interim rates must conform to SSA §1903(w)(6) and §42 CFR 433.51. All interim payments for services rendered by contract providers and county operated providers will be subject to annual reconciliation and cost settlement consistent with Federal and State requirements. All interim payments for services rendered through contracts with a managed care plan will be subject to an annual reconciliation.

Proposed county interim rates must be developed for each required and (if indicated) optional service modality. The proposed county interim rates must be developed consistent with the terms and conditions of the Waiver, written guidance provided by DHCS, and federal certified public expenditure (CPE) requirements related to interim payments; and are subject to annual reconciliation and cost settlement.

Proposed county interim PUPM rates must be developed for all required and optional service modalities. The proposed county interim PUPM rates must be developed consistent with the terms and conditions of the Waiver, written guidance provided by DHCS, and federal certified public expenditure (CPE) requirements related to interim payments; and are subject to annual reconciliation.

The proposed county interim rates and county interim PUPM rates should be based on the most recently calculated or estimated total county cost with adjustments for projected increases in utilization and the application of the Home Health Agency Market Basket inflation factor. The proposed interim rate should be calculated for each service including both county directly

delivered (if appropriate), and subcontracted fee for service provider costs. For county-operated services the county will be reimbursed based on actual allowable costs. County payments to contracted fee for service providers and managed care plans are considered to be actual expenditures according to the terms and conditions of the waiver.

Uniform Statewide Daily Reimbursement Rate Methodology for DMC ODS Narcotic Treatment Programs

The uniform statewide daily reimbursement (USDR) rate for the daily dosing service is based on the average daily cost of providing dosing and ingredients, core and laboratory work services as described in State Plan Amendment (SPA) 09-022, Section D. The daily cost is determined based on the annual cost per patient and a 365- day year, using the most recent and accurate data available, and in consultation with narcotic treatment providers, and county alcohol and drug program administrators. The uniform statewide daily reimbursement rates for NTP Individual and Group Counseling are based on the non-NTP Outpatient Drug Free Individual and Group Counseling SMA rates as described under SPA 09-022, Section E.1.a.

For interim rate purposes, county-operated NTP/OTP providers are reimbursed at the USDR for dosing, individual/group sessions. However, additional ODS services available to county operated NTPs (case management, physician consultation, recovery services) will be reimbursed at county interim rates discussed above.

For a county that contracts with a managed care plan, the USDR rates for NTP services will serve as the upper payment limit for reconciliation purposes. The managed care plan will pay the provider the lower of the USDR or the provider's usual and customary charge for NTP services.

INTERIM MEDICAID PAYMENTS

The State makes interim payments of FFP to the DMC ODS counties based upon submitted expenditures. The DMC ODS counties will submit monthly CPE claims to the state for interim payments for services provided during the fiscal period. When submitting a claim for FFP for services provided by a county-operated or contracted provider, the DMC ODS county is required to certify that it has made expenditures on which the claim for FFP is based, that the expenditures are no greater than the actual county cost of providing services, and that the expenditures meet all federal and State requirements for claiming FFP. Interim payments for FFP for county contracts with county-specific rates by covered service will be available through claim adjudication for those expenditures the contracting county has officially certified. This certification must satisfy all federal Medicaid and State Medi-Cal CPE, full funds expenditure (federal and non-federal share expenditure), and claims integrity requirements. Claims will be reimbursed at the annual interim rates for each covered service developed by the county participating in the demonstration and approved by the State. All interim rates must conform to 42 CFR. 433.51, and all certified public expenditures continue to be subject to annual reconciliation and cost settlement consistent with Federal and State requirements.

Interim payments of FFP for services rendered through county contracts with managed care plans will be available through claim adjudication at the county Interim PUPM rate for those expenditures the contracting county has officially certified. This certification must satisfy all federal Medicaid and State Medi-Cal CPE, full funds expenditure (federal and non-federal share

expenditure), and claims integrity requirements. Claims will be reimbursed at the interim PUPM rate developed by the county participating in the demonstration and approved by the State. All interim PUPM rates must conform to 42 CFR. 433.51, and all certified public expenditures continue to be subject to annual reconciliation consistent with Federal and State requirements.

INTERIM RECONCILIATION OF INTERIM MEDICAID PAYMENTS – COUNTY SPECIFIC RATES

Consistent with the cost report submission, acceptance, reconciliation, and settlement process outlined in the state plan for DMC services, DHCS will complete the interim settlement of the DMC ODS county cost report no later than eighteen months after the close of the State fiscal year. Each DMC ODS county's expenditures that are used to claim interim FFP payments are reconciled to its State-developed cost report package for the State fiscal year in which services were provided. Each DMC ODS county cost report package is an aggregate of expenditures incurred for payments made to contracted providers and expenditures incurred by county-operated providers as determined through individual legal entity cost reports. Reimbursement under the DMC ODS program is available only for allowable costs incurred for providing DMC ODS services during the fiscal year to eligible Medi-Cal beneficiaries as specified in the special terms and conditions of this 1115 waiver demonstration. If, at the end of the interim reconciliation process, it is determined that a county received an overpayment, the overpayment is properly credited to the federal government in accordance with 42 CFR 433.316. If, at the end of the interim reconciliation process, it is determined that a county received an underpayment, an additional payment is made to the county. The State uses the following process to complete its interim reconciliation of interim Medicaid payments of FFP.

Participating counties and their contracted non-NTP providers must maintain fiscal and statistical records for the period covered by the cost report that are accurate and sufficiently detailed to substantiate the cost report data. The records must be maintained for a period of ten years from the date of service for all claims for reimbursement. All records of funds expended and costs reported are subject to review and audit by DHCS and/or the federal government pursuant to the California Welfare and Institutions Code Section 14124.24(g)(2) and 14170.

Participating counties and their contracted non-NTP providers must compute allowable costs and determine their allocation methodology in accordance with applicable cost reimbursement principles in 42 CFR Part 413, CMS-Pub 15-1 and 15-2, 2 CFR Part 200 Subpart E, CMS noninstitutional reimbursement policy, and California Code of Regulations (CCR) Title 9 and Title 22 (to the extent that they do not conflict with federal cost principles). Direct and indirect costs are determined and allocated using a methodology consistent with that approved for DMC state plan services, except that the methodology is applied to waiver services. The cost allocation plan must identify, accumulate, and distribute allowable direct and indirect costs and identify the allocation methods used for distribution of indirect costs. Although there are various methodologies available for determining actual direct costs and for allocating actual indirect costs, for consistency, efficiency and compliance with federal laws and regulations, the cost report identifies direct cost categories for each modality and establishes a standard methodology of percentage of total direct cost to allocate indirect costs. This methodology is a variation of the indirect cost rate methodology in 2 CFR Part 225 (OMB Circular A-87) and 2 CFR Part 230 (OMB Circular A-122). DHCS recognizes that there are other indirect cost allocation bases (such

as percentage of direct salaries and wages) that result in an equitable distribution of indirect administrative overhead. However, if a provider wishes to use an indirect cost allocation basis other than the one prescribed in the cost report, the provider must obtain their respective county's prior approval. Before granting approval to the provider, the county must seek DHCS's approval and DHCS will make a final determination of the propriety of the methodology used. All allocation plans will still be subject to a review during a DHCS financial audit.

INTERIM RECONCILIATION OF INTERIM PUPM PAYMENTS

DHCS will complete the interim reconciliation and settlement of DMC ODS counties' interim PUPM payments to managed care plans with which they contract no later than twelve months after the close of the State fiscal year. Each DMC ODS county that contracts with a managed care plan must submit a PUPM Reconciliation Report to DHCS by November 1st following the close of the fiscal year. DHCS staff will review the PUPM Reconciliation Report to validate the total beneficiaries served, total approved units of service, and rate per service modality. If the Interim Reconciliation Worksheet shows that the DMC ODS County made additional payments to the managed care plan, DHCS will make an additional payment of FFP to the DMC ODS County. If the Interim Reconciliation Worksheet shows that the DMC ODS County recouped a portion of the Interim PUPM payments already paid to the managed care plan, DHCS will recoup those funds from the DMC ODS County and return them to the federal government. Participating counties and their contracted managed care plan must maintain fiscal and statistical records for the period covered by PUPM Reconciliation report that are accurate and sufficiently detailed to substantiate the PUPM reconciliation data. The records must be maintained for a period of ten years from the date of service for all claims for reimbursement.

All records of funds expended and services rendered are subject to review and audit by DHCS and/or the federal government pursuant to the California Welfare and Institutions Code Section 14124.24(g)(2) and 14170.

FINAL RECONCILIATION OF INTERIM MEDICAID PAYMENTS

Consistent with the cost report submission, acceptance, reconciliation, and settlement process outlined in the state plan for DMC services, the State will audit and complete the final reconciliation and settlement of the cost report or PUPM reconciliation within three years from the date of the interim settlement. The audit performed by the State determines whether the income, expenses, and statistical data reported on the cost report or reconciliation are reasonable, allowable, and in accordance with State and federal rules, regulations, and Medicare principles of reimbursement issued by the Department of Health and Human Services and CMS. The audit also determines that the county's cost report accurately represents the actual cost of operating the DMC program in accordance with Generally Accepted Accounting Principles (GAAP), Title 42, Code of Federal Regulations (42 CFR), Office of Management and Budget (OMB) Circular A-87, Generally Accepted Auditing Standards (GAAS), Generally Accepted Governmental Auditing Standards (GAGAS) as published by the Comptroller General of the United States and other State and federal regulatory authorities. The State audit staff compares the FFP due to the county in the audited cost report with all interim payments, including the interim settlement and supplemental payments to eligible entities. The purpose of this comparison or review is for the State to determine if an overpayment or underpayment exists, and ensure that any overpayment of FFP is promptly returned to the federal government per 42 CFR 433.316 and 433.320. If the State

determines that the county received an underpayment, the State makes an additional payment to the county.

COVID-19 PUBLIC HEALTH EMERGENCY

Notwithstanding any other provisions in this Attachment, the following modified requirements will apply for non-NTP services provided on or after March 1, 2020, until the COVID-19 public health emergency ends:

- Each DMC ODS county may pay contracted providers at up to 100 percent above the approved county-specific negotiated rates, subject to contracted provider cost reconciliation as discussed in this Attachment.
- For purposes of interim Medicaid payments, claims will be reimbursed at the lower of the county's billed amount or the approved annual interim rates for each covered service increased by 100 percent.
- For purposes of interim and final reconciliation, DHCS will settle interim payments for outpatient services to actual allowable cost. The limitation of customary charges is suspended.
- For inpatient hospital-based residential and withdrawal management services (including ASAM levels 3.7 and 4), DHCS will continue to settle interim payments to the lower of actual allowable cost or usual and customary charges.

To the extent necessary to implement these modified requirements, all conflicting provisions in this Attachment are suspended.

Attachment J
SUD Monitoring Protocol
(Reserved)

Attachment K
Global Payment Program Funding and Mechanics Protocol

A. Public Health Care Systems (PHCS)

GPP Payments are available for PHCS, which are comprised of a designated public hospital and its affiliated and contracted providers. Each PHCS participating in the GPP is listed in Attachment C. Where multiple designated public hospitals are operated by the same legal entity, the PHCS includes multiple designated public hospitals, as set forth in Attachment C.

The GPP provides support for the delivery of more cost-effective and higher value care for indigent, uninsured individuals. PHCS will provide an assurance that, to the extent the GPP exceeds the amount that is attributable to the state's Adjusted DSH (determined pursuant to STC 78), a percentage of GPP points earned by each PHCS will be associated with care and activities that are furnished through charity care and discount payment policies for financially qualified, uninsured individuals that adhere to California state law ability-to-pay requirements. The required percentage is equal to the amount of the GPP that is in excess of the Adjusted DSH divided by the total GPP for the year. For the first year of the GPP, each PHCS is required in the aggregate to satisfy the above assurance for at least 21.4% of GPP points earned.

Each PHCS shall identify to DHCS the affiliated and contracted providers that will constitute the PHCS, and shall notify DHCS of changes.

B. Determination of GPP Annual Limits

For each GPP PY, DHCS shall work with CMS to determine the annual limit for the GPP consistent with STC 78. The annual limit shall be calculated as the sum of the Adjusted DSH allotment and the Uncompensated Care Component for PY 1-12. F. The Adjusted DSH allotment shall be determined consistent with the provisions of Attachment Q (DSH Coordination Methodology).

C. Establishment of Participating PHCS global budgets

DHCS will determine for each PHCS a global budget for each GPP PY, which is the total amount of funding each PHCS will earn if it meets or exceeds its applicable threshold. Threshold amounts for each PHCS for GPP PY1 are set forth in Attachment L, section B. Threshold amounts for subsequent GPP PYs will be calculated through adjustments in proportion to changes in the size of the aggregate GPP annual limits, except where otherwise allowed during a public health emergency or other state of emergency, as set forth in Attachment L, section B.

To determine a PHCS' global budget for a GPP year, DHCS shall calculate the PHCS' allocation percentage, which is the PHCS's point threshold for a GPP PY divided by the sum of all PHCS point thresholds for the same GPP PY. The PHCS's global budget shall equal the allocation percentage multiplied by the total computable annual limit for the GPP, as set forth in STC 78 of

the Special Terms and Conditions ("Funding and Annual Limits").

DHCS shall determine an initial total computable annual limit for a GPP PY based on the initial CA DSH allotment published by CMS for the applicable GPP PY and any uncompensated care funding allocated under the applicable waiver. DHCS shall determine initial threshold amounts and annual budgets for each PHCS based on this information and publish the information on its GPP webpage within 10 days of the determination. Threshold amounts and annual budgets may be adjusted throughout the GPP PY in coordination with funding allocation adjustments.

DHCS shall determine the final total computable annual limit for a GPP PY upon CMS notification of the final CA DSH allotment and shall publish the final amounts, and associated PHCS threshold amounts and annual budgets within 10 days of such determination.

D. Reporting Requirements

By August 15th following each GPP PY, or with respect to GPP PY 6 through 12, by February 15th following the GPP PY, each PHCS shall submit an interim year-end summary report summarizing the aggregate number of uninsured units of service provided during the GPP PY, broken out by the service categories, tiers, and types as defined in Attachment L (GPP Valuation Methodology Protocol). The summary report will also compute the number of points earned based on the corresponding point valuations for the services provided, and the payments due to the PHCS (net of any payments previously received for the GPP PY). Data contained in the interim year-end summary report will be based on the best data available through the close of the GPP PY. Revisions to the interim data will be reflected in the final reconciliation report.

By March 31st following the close of each GPP PY, or with respect to GPP PY 6 through 12, by September 30th following the GPP PY each PHCS shall submit a final year-end reconciliation summary report in the same format as the interim year-end summary report referenced above that includes the PHCS final submission with regard to the services, points, and funds earned for the GPP PY. The final reconciliation summary report shall reflect any necessary revisions to the interim data and shall serve as the basis for the final reconciliation of GPP payments for the GPP PY.

Starting with GPP PY 2, each PHCS shall submit encounter-level data on their uninsured services in order to provide auditable verification that the reported uninsured services were provided. For this purpose, encounter-level data may include line-level encounters or documentation of claims or other reliable methods for determining the number of contracted units of service to the uninsured by contracted providers. Such reporting shall be provided at the time of the final reconciliation summary reports. All reports shall be submitted in a manner and format as set forth by DHCS. In addition, for all GPP PYs, PHCS shall maintain documentation of services and shall make such information available to DHCS or CMS upon request.

DHCS shall review all summary reports and data submitted for accuracy and compliance with established procedures, and perform tests for reasonableness. If discrepancies or inconsistencies are identified, DHCS shall work directly with PHCS staff to promptly resolve issues and correct data and reporting. PHCS shall provide a formal response to DHCS inquiries within five (5)

business days of receipt of an inquiry or question; additional time to respond may be requested by the PHCS and approved by DHCS.

The interim year-end summary report and the final year-end reconciliation summary report shall be due at the times specified in Tables 1 and 1.1 below. If the identified date falls on a weekend or holiday, the report shall be due at the close of the following business day.

Table 1: Reporting timeline, PY 1-6

Report name	**Reporting period**	**Report due date to DHCS**	**Reporting Period**	**Report Due Date to DCHS**
Interim year-end summary report	July 1 – June 30	August 15 (following program year)	GPP PY 6 July 1 – December 31	February 15 (following program year)
Final year-end reconciliation	July 1 – June 30	March 31 (following program year)	GPP PY 6 July 1 – December 31	September 30 (following program year)

Table 1.1: Reporting timeline, PY 7-12

Report name	**Reporting period**	**Report due date to DHCS**
Interim year-end summary report	January 1 – December 31	February 15 (following program year)
Final year-end reconciliation	January 1 – December 31	September 30 (following program year)

E. Payment schedule

Interim Payments

PHCS shall receive interim quarterly GPP payments based on 25% of their annual global budget for the first three quarters of the GPP PY. DHCS will notify PHCS of the IGT due dates and

payment dates according to Tables 2 and 2B. For GPP PY 6, PHCS shall receive only two quarterly payments, each based on 50% of their annual budget. DHCS will notify PHCS of the IGT due dates and payment dates according to Table 2A. Payments will be made within 15 days after the quarter end as long as IGTs are submitted by the IGT due date as identified in Tables 2, 2A, and 2B. However, beginning in PY 7, quarter 2 payments will be made within 30 days after the quarter end as long as IGTs are submitted by the IGT due date as identified in Table 2B. For a PHCS that is comprised of more than one DPH, payments will be made to the health system under which the DPHs operate.

For the fourth quarter of each GPP PY, an interim payment shall be made to each PHCS that is sufficient to bring the PHCS' interim payments for the GPP PY to the amount earned by the PHCS based on its interim year-end summary report. The total Interim payments earned by a PHCS shall be determined by multiplying the PHCS's annual global budget by the ratio of the value of the points earned during the GPP PY to the PHCS's threshold, as reported in the interim year-end summary report; however, no PHCS may earn more than its annual global budget prorated by the number of months in the reporting period. The fourth quarter interim payment shall be calculated based on the amount earned by the PHCS for the GPP PY, net of any GPP payments previously received by the PHCS for the GPP PY. If the PHCS' interim year-end summary report reflects an annual payment that is less than 75% of its total annual budget, no additional interim payment shall be made for the fourth quarter. DHCS shall calculate the amount of the required IGTs for the fourth quarter and make GPP IGT notifications to all PHCS no later than 30 calendar days after submission of the interim year-end summary report, as shown in Tables 2 and 2B. PHCS shall submit IGTs within 7 days of receiving notification. Interim payments will be made to all PHCS no later than one month following their respective IGT notification date, if IGTs are received within the required 7 days.

Final Reconciliation and Redistribution Process

There will be a final reconciliation annually following the submission of each PHCS' final reconciliation summary report and (beginning with GPP PY 2) the required supporting encounter data. DHCS shall determine the amount earned by each PHCS based on the total number of points earned by each PHCS for the GPP PY, as reported in the final year-end reconciliation summary reports. For PHCS that exceeded their threshold for the GPP PY, the amount earned is subject to adjustment in accordance with the following redistribution process set forth below.

DHCS will identify any GPP global budget amounts that PHCS were individually unable to claim and redistribute such unclaimed amounts to the PHCS that exceeded their point thresholds for the applicable GPP PY. To determine redistribution amounts, DHCS shall first calculate a dollar amount of funding per GPP point by dividing the total GPP annual limit for the GPP PY by the aggregate threshold points for all PHCS. DHCS will then multiply this dollar amount by the amount by which each PHCS has exceeded its threshold to determine the PHCS's maximum redistribution amount. Each PHCS that has exceeded its threshold will receive its maximum redistribution amount if there are sufficient unused funds for the year from other PHCS. If there are insufficient unused funds to pay all PHCS that exceeded their thresholds their maximum redistribution amount, then each PHCS will receive an adjusted redistribution amount, prorating the amount of unused funds available by the number of points each PHCS is above its applicable

threshold. The redistributed amounts following this determination shall be added to the GPP amounts earned by the applicable PHCS for the purposes of the final reconciliation.

Based on the final reconciliation amounts determined as set forth above, DHCS shall adjust, as necessary, the interim payments previously made to the PHCS for the GPP PY. Within 90 calendar days of receiving the final reconciliation summary reports from the PHCS DHCS shall calculate the amount of the required IGTs for the reconciliation and make GPP IGT notifications to all PHCS, as shown in Tables 2, 2A and 2B.

PHCS shall submit IGTs within 14 days of receiving notification. Final payments will be made to all PHCS no later than 45 days following their respective IGT notification date, if PHCS have submitted the IGTs within the 14-day requirement. If the necessary IGTs are submitted past the 14-day requirement, final payments, as well as any other associated payments, will be made no later than 45 days following submission of the necessary IGT amounts. If, at the end of the reconciliation process, it is determined that the interim GPP funds for a GPP PY exceeded the amounts due upon final reconciliation, DHCS shall recoup the amounts from the appropriate PHCS. In the event of any recoupments, DHCS shall return the associated IGT funds to the transferring entity within 14 calendar days.

Payment Summary Report to CMS

For each GPP PY, DHCS will submit a Payment Summary Report to CMS (following the schedule in Tables 2, 2A and 2B) that summarizes all GPP transactions to date which pertain to that GPP PY and includes a list of entities that have provided IGTs during the report period and the amount of the IGTs provided.

Transactions include interim payments, final payments, and recoupments. Each transaction record will include the name of the PHCS to which the transaction pertains, whether the transaction is an interim, reconciliation, or redistribution payment, the interim year-end Summary Report or Final Reconciliation Summary Report that supports the transaction, and the Quarterly Expenditure Report on which the transaction was or will be reported. The Payment Summary Report following the Final Reconciliation Summary Report will show how the sum of all transactions for each PHCS matches the PHCS final reconciliation amount.

Table 2: Interim and Final Payment timeline, GPP PY 1-5

Payment	Payment Amount	Payment Amount & IGT Notification Date	IGT Due Date	Payment Date	Payment Summary Report to CMS
Interim Quarter 1	25% of Annual	September 15	September 22	October 15	November 15
Interim Quarter 2	25% of Annual	December 15	December 22	January 15	February 15
Interim Quarter 3	25% of Annual	March 15	March 22	April 15	May 15

Interim Quarter 4	Final Interim based on interim year-end summary report	September 15 following the GPP PY end	September 22 following the GPP PY end	October 15 following GPP PY end	November 15 following GPP PY end
Final Reconciliation	Final reconciled amount	June 30 following the GPP PY end	July 14 after notification date	August 15 after notification date	September 15 after notification date

Table 2A: Interim and Final Payment timeline, GPP PY 6

Payment	**Payment Amount**	**Payment Amount & IGT Notification Date**	**IGT Due Date**	**Payment Date**	**Payment Summary Report to CMS**
Interim Quarter 1	50% of Annual	September 15	September 22	October 15	November 15
Interim Quarter 2	50% of Annual	December 15	December 22	January 15	February 15
Final Reconciliation	Final reconciled amount	December 31 following the GPP PY end	January 14 after notification date	February 15 afte notification date	March 15 after notification date

Final Reconciliation	Final reconciled amount	December 31 following the GPP PY end	January 14 after notification date	February 15 after notification date	March 15 after notification date

Attachment L
Global Payment Program Valuation

A. Valuation of Services

Each eligible uninsured service a PHCS provides will earn the PHCS a number of points based on this protocol. Each service has an identical point value for every PHCS, but the assigned point values per service shall vary by GPP Program Year (GPP PY) as described in detail below.

1. Categories and tiers of service

   Services associated with points in the GPP are shown in Table 1 below, grouped into both categories (1-5) and tiers within categories (A-D). These groupings can contain both traditional and non-traditional services. The groupings were intended to better display the full range of services that may be provided to the uninsured under the GPP, to help develop initial point values for non-traditional services (for which cost data is not available), and to clarify which service types it made sense to revalue up or down for GPP purposes over time.

   Categories 1 through 5 are groupings of health care services that are organized according to their similar characteristics. For example, Category 1 contains outpatient services in traditional settings, mostly "traditional" services provided by licensed practitioners. Category 2 is made up of a range of outpatient services provided by non-provider care team members, both inside and outside of the clinic, including health education, health coaching, group and mobile visits, etc. Category 3 services are technologically- mediated services such as real-time video consultations or e-Consults between providers. Category 4 services are those involving facility stays, including inpatient and residential services. Category 5 services are those aiming to advance health equity in the state.

   Grouping of services into tiers was based on factors including training/certification of the individual providing the service, time or other resources spent providing the service, and modality of service (in- person, electronic, etc.). Generally speaking, within each category, tier D is the most intensive and/or costly, and often requires individuals with the most advanced training or certifications, resulting in higher initial point values on average, whereas tier A is on the other end of the spectrum in intensity and resource use. However, there can still be significant point value variation within tiers, based on cost, resource utilization, or other relevant factors.

   The services whose values would decline over time under the GPP (as described in section 4 below) are most service types in categories 1C (emergent outpatient) and 4B (inpatient medical/surgical and mental health), which are higher-cost and judged as the most likely to be reducible through efforts at coordination, earlier intervention, and increased access to appropriate care.

Table 1: GPP Service Types by Category and Tier, with Point Values

Category and description	Tier	Tier description	Service type	Traditional / non-traditional	Initial Point Value
1: Outpatient in traditional settings	A	Care by Other Licensed or Certified Practitioners	RN-only visit	NT	50
			PharmD visit	NT	75
			Complex care manager	NT	75
	B	Primary, specialty, andother non-emergent care (physicians orother licensed independent practitioners)	Primary/specialty **(benchmark)**	T	100
			Contracted primary/specialty (contracted provider)	T	19
			Mental health outpatient	T	38
			Substance use outpatient	T	11
			Substance use: methadone	T	2
			Dental	T	62
	C	Emergent care	OP ER	T	160
			Contracted ER (contracted provider)	T	70
			Mental health ER / crisis Stabilization	T	250
	D	High-intensity outpatientservices	OP surgery	T	776
2: Complementary patient support and care services	A	Preventive health, education and patient support services	Wellness	NT	15
			Patient support group	NT	15
			Community health worker	NT	15
			Health coach	NT	15
			Panel management	NT	15
			Health education	NT	25
			Nutrition education	NT	25
			Case management	NT	25
			Oral hygiene	NT	30
			*Doula service (prenatal or postnatal)	NT	60
			*Peer support	NT	25
	B	Chronic and integrative care services	Group medical visit	NT	50
			Integrative therapy	NT	50
			Palliative care	NT	50
			Pain management	NT	50
			Home nursing visit	NT	75

	C	Community- based face-to-face encounters	Paramedic treat and release	NT	75
			Mobile clinic visit	NT	90
			Physician home visit	NT	125
3: Technology-based outpatient	A	Non-providercare team telehealth	Texting	NT	1
			Video-observed therapy	NT	10
			Nurse advice line	NT	10
			RN e-Visit	NT	10
	B	eVisits	Email consultation with PCP	NT	30
	C	Store and forward telehealth	Telehealth (patient - provider) - Store & Forward	NT	*100
			Telehealth (provider - provider) – eConsult / eReferral	NT	50
			Telehealth – Other Store &Forward	NT	*100
	D	Real-time telehealth	Telephone consultation withPCP	NT	*100
			Telehealth (patient - provider) - real time	NT	*100
			Telehealth (provider - provider) - real time	NT	90
4: Inpatient	A	Residential, SNF, and other recuperative services; low intensity	Mental health / substance use residential	T	23
			Sobering center	NT	50
			Recuperative / respite care	NT	85
			SNF	T	141
	B	Acute inpatient, moderate intensity	Medical/surgical	T	634
			Mental health	T	341
	C	Acute inpatient,high intensity	ICU/CCU	T	964
	D	Acute inpatient, critical community Services	Trauma	T	863
			Transplant/burn	T	1,131
**5: Equity-Enhancing Services	A	Enhanced care management	Enhanced care management	E	75 PMPM
	B	Community Supports	Asthma remediation	E	80/case
			Community transition: Nursing facility to home	E	220 PMPM
			Day habilitation	E	3/hr
			Housing deposits	E	700/ move-in
			Housing tenancy and sustaining service	E	90 PMPM

			Housing transition navigation service	E	90 PMPM
			Nursing facility transition/diversion to assisted living facility	E	12/day
			Personal care services	E	4/hr
			Short-term post-hospitalization housing	E	15/day
	C	Other Equity-Enhancing Services	Team-based street outreach and engagement	E	150/visit

Notes:
*Services and points marked with an asterisk are applicable to PY 8 and forward. Services and points prior to CalAIM are shown in Medi-Cal 2020 STCs.
**The Equity Enhancing Services Category is effective beginning in PY 9.

2. Valuation of traditional services

Services for which payment typically is made available upon provision of the service, referred to herein as "traditional" services, will receive initial point valuations based on their cost per unit of service in the historical year SFY 2013-14. These traditional services are grouped into categories that reflect generally where care is being provided and intensity. Gross costs incurred for services provided to the uninsured by PHCS in SFY 2013-14, as determined under the applicable claiming methodologies, are summed across all PHCS by service type, using the most complete and reliable data when available, to obtain an average cost per unit for each traditional service. All traditional services are assigned point values based on their relative cost compared to an outpatient primary and specialty visit, which serves as the benchmark traditional service. These initial points are shown in table 1; the relative costs per unit of service are shown in Appendix 1.

3. Valuation of non-traditional services

Non-traditional services typically are not directly or separately reimbursed by Medicaid or other payers, and are often provided as substitutes for or complementary to traditional services. These services are assigned initial point values based on their estimated relative cost compared to the benchmark traditional service, and their value in enhancing the efficiency and effectiveness of traditional services.

The non-traditional services in the table 1 provide value to the delivery of health care to the uninsured population by enhancing the efficiency and effectiveness of traditional services, by improving uninsured individuals' access to the right care, at the right time, in the right place. For example, instead of needing to go to the emergency department, an uninsured individual could have telephone access to his or her care team, which would both help address and treat the presenting condition, as

well as help connect the patient back to the entire breadth of primary care services. Likewise, a PHCS deploying eReferral/eConsult services would be able to better prioritize which uninsured individuals need early access to face-to-face specialty care expertise, or which can benefit from receipt of specialty care expertise via electronic collaboration between their PCP and a specialist. This collaboration enhances the PCPs' capacity to provide high-quality, patient-centered care, and allows the individual receiving that care to avoid specialty care wait times and the challenges of travelling to an additional appointment to a specialist who may be located far from where they live. This increased ability to provide timely access to specialty expertise will result in earlier treatment of complex conditions and help uninsured individuals avoid the need to seek emergent or acute care for untreated or partially treated sub-acute and chronic conditions. More detail on non-traditional services, including codes where available and descriptions, is in Appendix 2.

Individuals will be considered uninsured with respect to a non-traditional service if he or she has no source of third party coverage for a comparable traditional service. For example, an individual with coverage for outpatient visits would not be considered uninsured with regard to technology-based outpatient services, even if his or her insurance does not cover those services. DHCS shall, in consultation with the DPH systems, issue guidance letters addressing whether individuals shall be considered uninsured in specific factual circumstances, to ensure that the requirements are consistently applied.

4. Point revaluation over time

Point values for services will be modified over the course of the GPP, from being linked primarily to cost to being linked to both cost and value. The provision of general medical/surgical acute inpatient services and emergent services will receive fewer points over time. The changing point structure will be designed to incentivize PHCS to provide care in the most appropriate and cost-effective setting feasible. Point revaluation will be calibrated so that the overall impact would not lead to any PHCS receiving additional total points in any given GPP PY if utilization and the mix of services provided remained constant. Specifically, for any PHCS, if its utilization and mix of services does not change from the baseline year of SFY 2014-15, it will not earn any more points in GPP PY 1 than it earned under the baseline year, and in subsequent GPP PYs shall earn fewer points.

As points for certain services are revalued over the course of the GPP, PHCS will be incentivized to provide more of certain valued services and less of certain more costly and avoidable services. This revaluation will be phased in over time to enable PHCS to adapt to the change in incentives. In GPP PY 1, points will be identical to the initial cost-based point values. In GPP PY 2, 20% of the full change will be made to point values. In GPP PY 3, an additional 30% of the revaluation will be phased in, with the final 50% change occurring in GPP PY 4, except that in GPP PY 6, an additional point value change will be made at the same average annual pace of changes from PY1 to PY5. This phase-in is illustrated in Table 2. Point values for

GPP PYs 7 through 12 will not change.

Point values will not vary from their initial cost-based amounts by more than 40% at any time during the GPP.

Table 2: Revaluations to categories of service, by year, compared to initial point value, PYs 1-12

Category of service	Initial point value	Point value (% change) PY 1	Point value (% change), PY 2	Point value (% change), PY 3	Point value (% change) PY 4	Point value (% change) PY 5	Point value (% change) PY 6	Point value (% change), PY 7 -12
OP ER	160	160 (0%)	158 (-1%)	156 (-2.5%)	152 (-5%)	152 (-5%)	151 (-5.5%)	151 (-5.5%)
Mental health ER / crisis	250	250 (0%)	248 (-1%)	244 (-2.5%)	238 (-5%)	238 (-5%)	236 (-5.5%)	236 (-5.5%)
IP med/surg	634	634 (0%)	630 (-0.6%)	624 (-1.5%)	615 (-3%)	615 (-3%)	613 (-3.3%)	613 (-3.3%)
IP Mental	341	341 (0%)	339 (-0.6%)	336 (-1.5%)	331 (-3%)	331 (-3%)	329 (-3.3%)	329 (-3.3%)

Values for categories not listed are unchanged. Contracted IP and ER values are changed identically with other IP/ER.

B. PHCS-Specific Point Thresholds

DHCS established GPP PY 1-point thresholds for each PHCS by collecting utilization data for all traditional uninsured services (by each traditional table 1 category) provided in SFY 2014-15, and then multiplying those service counts by corresponding initial point values. The thresholds for PY1 are shown in Table 3.For GPP PY 2 through 7, each threshold shall be adjusted proportionally to the total GPP funds available for that PY under STC 78, compared to the total GPP funds available in GPP PY 1, e.g. if total GPP funding in PY 2 is 5% less than PY 1 each PHCS threshold will be reduced by 5%.

During a period of public health emergency or other state of emergency only, thresholds may be further adjusted without modifying the applicable total GPP payments available for achieving such thresholds by a determined percentage based upon estimated impact to utilization rates. All threshold adjustment methodologies shall be approved by CMS. In response to the COVID-19 public health emergency GPP PY 5 PHCS thresholds will be reduced by 10% and PHCS threshold adjustments for GPP PY 6 will be reduced by 29%. Any additional PYs impacted by the COVID-19 public health emergency will be proposed once the extent of the impact to the delivery of GPP services due to the public health emergency is determined.

Starting in PY 8 and continuing through PY 12, DHCS will shift to the revised threshold percentages in Table 4, to reflect utilization experience in selected prior years, in order to bring budgets closer to that experience. For PY 8, the final total system threshold is

determined by dividing the final GPP budget for PY 8 by the same value per point as PY 1. The resulting PY 8 final total system threshold is then allocated to each PHCS using the recalibrated percentages in Table 4, to determine the final PY 8 system threshold for each PHCS. For GPP PY 9 and onward, each threshold shall be adjusted proportionally to the total GPP funds available for that PY under STC 78, compared to the final PY 8 thresholds, e.g. if total GPP funding in PY 9 is 5% less than PY 8 each PHCS threshold will be reduced by 5% so that the value for each individual point remains consistent from PY 1 through PY 12.

Table 3: GPP PY 1 PHCS Thresholds, Based on FY 2014-15 Uninsured Services

Public Health Care System	**System Threshold, GPP PY1**
Los Angeles County Health System	101,573,445

Appendix 2

Table 6: Categories of Service and Point Values, Non-Traditional
DHCS may update the codes and descriptions contained in this table to reflect ongoing changes made by CMS or other nationally recognized entities. Updated codes and descriptions will be reflected in reporting guidance provided by DHCS to PHCS.

Tier	Service	Relevant codes and description if available (CPT, ICD)	Definition [source] Where no nationally recognized code exists	Relative Points
Service Category 1: Outpatient				
A	RN Visit[84, 85] (includes Wound Assessment visits)	**99211** Office or other outpatient visit for the evaluation and management of an established patient that may not require the presence of a physician or other qualified health care professional. Usually, the presenting problem(s) are minimal.		50
A	PharmD Visit[86]	**99605, 99606, 99607** Medication therapy management service(s) provided by a pharmacist, individual, face-to-face with patient, with assessment, and intervention if provided.		75
A	Complex Care Manager[87]	**99490** Chronic care management services, at least 20 minutes of clinical staff time directed by a physician or other qualified health care professional, per calendar month, with the following required elements: • Multiple (two or more) chronic conditions expected to last at least 12 months, or until the death of the patient, • Chronic conditions place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline, Comprehensive care plan established, implemented, revised, or monitored.		75
Service Category 2: Complementary Patient Support and Care Services				
A	Wellness[88,89]	G0438 Annual wellness visit; includes a personalized prevention plan of service (PPPS),		15

		Initial visit G0439 Annual wellness visit, includes a personalized prevention plan of service (PPPS), subsequent visit **S5190** Wellness assessment, performed by non- physician **Z00.00, Z00.01** Z00.00: Encounter for general adult medical examination without abnormal findings Z00.01 Encounter for general adult medical examination with abnormal findings		
A	Patient Support Group	**Non-physician Health Care Professional CPT Code** **98961** Education And Training For Patient Self- Management By A Qualified, Nonphysician Health Care Professional Using A Standardized Curriculum, Face-To-Face With The Patient (Could Include Caregiver/ Family) 2-4 Patients **98962** Education And Training as above; 5-8 Patients		15

A	Community Health Worker (CHW)		Encounters in which a Community Health Worker assists individuals and communities to adopt healthy behaviors. Conduct outreach for medical personnel or health organizations to implement programs in the community that promote, maintain, and improve individual and community health. May provide information on available resources, provide social support and informal counseling, advocate for individuals and community health needs, and provide services such as first aid and blood pressure screening. May collect data to help identify community health needs.[90]	15
A	Health Education		Services provided for the purpose of promoting health and preventing illness or injury. These include risk factor reduction interventions, preventive medicine counseling and behavior change interventions.	25
A	Nutrition Education[91,92]	**97802** Medical nutrition therapy; initial assessment and intervention, individual, face- to-face with the patient **97803** Medical nutrition therapy; re-assessment and intervention, individual, face-to-face with the patient		25

Tier	Service	Relevant codes and description if available (CPT, ICD)	Definition [source] Where no nationally recognized code exists	Relative Points
A	Oral Hygiene Encounters		Adult and Pediatric oral health services including dental varnishing, oral health education and other prevention services provided by dental hygienists	30
A	Doula service, prenatal or postnatal		Personal support to women, including emotional and physical support, and families throughout a person's pregnancy and postpartum experience, provided by a qualified doula.	60
A	Peer support		Culturally competent individual and group services that promote recovery, resiliency, engagement, socialization, self-sufficiency, self-advocacy, development of natural supports, and identification of strengths to set recovery goals and identify steps to reach the goals. Services aim to prevent relapse, empower beneficiaries through strength-based coaching, support linkages to community resources, and to educate beneficiaries and their families about their conditions and the process of recovery.	25
B	Group medical visits	**99411-99412** Preventive medicine counseling and/or risk factor reduction provided to individuals in a group setting **99078** Physician educational services rendered to patients in a group setting (eg, obesity or diabetic instructions)		50
B	Integrative medical therapies	**97810-97811,97813-97814:** Acupuncture, one or more needles, with or without electrical stimulation, personal one-on-one contact with the patient		50

B	Palliative Care	**0690-0699 Pre-hospice/Palliative Care Services**: Services that are provided prior to the formal election of hospice care. These services may consist of evaluation, consultation and education, and support services. No specific therapy is excluded from consideration. Care may be provided in the home, hospitals, skilled nursing facilities, or nursing homes by palliative care teams, hospice organizations, or palliative care specialists. Unlike hospice care, palliative care may include potentially curative treatments and there is no requirement for life expectancy parameters.	Encounters with non-provider care team members that focus on preventing and relieving suffering, and improving the quality of life of patients and their families facing serious illness. Palliative care is provided by an interdisciplinary team which works with primary and specialty care providers to identify and treat pain and other distressing symptoms, provide psychosocial and spiritual support, and assist in complex decision-making and advance care planning.	50
B	Pain management		Encounter provided by a non-provider caregiver or care team focused on enhancing self-management of chronic pain, implementing behavioral strategies for managing pain, discussing medication effectiveness and side effects, assessing treatment effectiveness, and adjusting treatment plan and goals. Chronic pain visits may also include assessment for signs of substance use or mental health disorder as well as motivational interviewing or other treatment strategies for these disorders	50
C	Physician Home Visit[97]	**99341 - 99345** Home visit, new patient; **99347 - 99350** Home visit, established patient		125

Table 14: Categories of Service and Point Values, Equity-Enhancing Services

Category	Tier	**Service Name** (description when not in CalAIM)	Initial point value
5	**A**	Enhanced care management	75 PMPM
	B	Asthma remediation	80/case
	B	Community transition: Nursing facility to home	220 PMPM
	B	Day habilitation	3/hr
	B	Housing deposits	700/move-in
	B	Housing tenancy and sustaining service	90 PMPM
	B	Housing transition navigation service	90 PMPM
	B	Nursing facility transition/diversion to assisted living facility	12/day
	B	Personal care services	4/hr
	B	Short-term post-hospitalization housing	15/day
	C	Team-based street outreach and engagement: Service for people who have similar needs and intensity to those needing ECM but who are harder to reach, typically houseless, such as referral and transitions to shelter, mental health, substance use, physical health services, sources of income, permanent housing opportunities and/or other supportive services, building sufficient trust to help them navigate to housing and services, including eventually Medi-Cal enrollment and CalAIM services	150/visit

Note: services without descriptions above are defined in accordance with CalAIM.

Attachment M
Global Payment Program Health Equity Monitoring Metrics Protocol

A. Health Equity within GPP

GPP provides support to Public Health Care Systems (PHCS) for the delivery of more cost-effective and higher value care for indigent, uninsured individuals. PHCS are comprised of a designated public hospital and its affiliated and contracted providers. Each PHCS participating in the GPP is listed in Attachment C. Where multiple designated public hospitals are operated by the same legal entity, the PHCS includes multiple designated public hospitals, as set forth in Attachment C. In alignment with federal and state equity goals, PHCS will work with DHCS to advance equity through a Health Equity Monitoring Metrics Protocol that improves reporting for equity-related metrics and initiates evaluation of disparities within the GPP program, as described in detail below.

B. Expanded Reporting of Equity-Related Data Fields

PHCS will strengthen data reporting to allow for more robust stratification and improved evaluation of disparities. In the GPP reporting structure, PHCS currently report gender, race (one field), ethnicity, and zip code.[5] However, PHCS generally have the ability to collect more data than they are currently being asked to report in GPP. PHCS, in collaboration with DHCS, will implement the following changes in encounter-level data reporting in order to improve the ability to stratify and evaluate disparities within GPP.

1. The GPP reporting structure will be updated to:
   a. Add fields for multiple race categories, transitioning from the current structure that only allows for reporting of a single race category.
   b. Add a new field for Preferred Language.
   c. Add a new field for Sexual Orientation.
   d. Expand the values allowed for reporting of gender identity (to be determined) that align with other State data collection approaches for gender identity.[6]
2. PHCS will begin reporting these updated and new data fields beginning in 2023 for PY 8 and continuing through PY 12 on an annual basis as part of the existing GPP encounter data reporting process.
3. DHCS will work with PHCS to determine the detailed reporting specifications and update GPP reporting guidance accordingly. DHCS will monitor implementation of these changes in encounter-level data reporting and adjust data specifications as needed.

---

[5] Full RUCA coding requires complete addresses to determine census tracts and, from there, delineation of rural/urban status. GPP reporting includes only zip codes. However, there is a zip-code version of RUCA that approximates census tracts, which could be used in analyzing GPP zip codes data. DHCS can explore this option as part of the demonstration evaluation.

[6] The DHCS proposed stratification methodology for sexual orientation and gender identity (SOGI) is based on federal data standards for SOGI established by ONC during Meaningful Use (2015 Final Rule on Certified EHR Technology, pp 496-7) and approved by ONC in 2021 as part of (USCDIv2, pp12-13). This approach also aligns with the State's standards. DHCS will take into account any future guidance from CMS, as feasible.

C. Initiating Evaluation of Disparities

DHCS will begin exploring evaluation of disparities in GPP with the aid of more robust data reporting as described in Sections 1 and 2 below.

1. Stratified GPP Utilization Rates and Trends – PHCS and DHCS will evaluate stratified utilization rates and trends over time to determine whether care is shifting from acute settings to primary and preventive services, including non-traditional services – a key objective of the program and the subject of the initial GPP evaluation.
    a. The following two utilization metrics will be examined:
        i. Annual Utilization in selected GPP service categories stratified by race, ethnicity, language, sexual orientation, and/or gender identity
        ii. Annual Utilization trended over time (by GPP program year) in selected GPP service categories stratified by race, ethnicity, language, sexual orientation
    b. PHCS will be required to report utilization, stratified by race, ethnicity, and preferred language spoken (REAL) and sexual orientation and gender identity (SOGI), for selected GPP service categories of interest,[7] including but not limited to:
        i. Physical health: Inpatient, ER and Outpatient
        ii. Behavioral health: Inpatient, ER and Outpatient
        iii. Non-traditional services
        iv. Equity-enhancing services that will be added to GPP beginning in 2023[8]
    c. DHCS will analyze the stratified PHCS annual utilization data by comparing patterns by REAL and SOGI characteristics (within and across GPP service categories). DHCS will trend utilization over time to identify any desirable or undesirable changes. The types of analyses that DHCS conducts may change over time as DHCS becomes more familiar with the data and identifies patterns of interest.
    d. The list of utilization measures is subject to change, based on lessons learned in the initial years of reporting and other factors. Changes to the measures will be uniformly treated for all PHCS and is subject to DHCS approval.
2. Stratified Clinical Quality Measures

[7] The initial GPP evaluation identified these service categories as categories of interest to track, looking at whether acute care services (such as inpatient and emergency) utilization declines over time and outpatient (including non-traditional) utilization increases over time.

[8] The addition of the equity-enhancing services category was approved by CMS on 2/16/23 (Attachment L, Table 1). The equity-enhancing services category is effective beginning in Program Year 9 (2023); systems will first report these services in 2024, based on 2023 utilization. The equity-enhancing services were selected to mirror the new Medi-Cal Enhanced Care Management and Community Supports benefits that are available as part of CalAIM. Now that these benefits are available to Medi-Cal beneficiaries, the intention was to add these benefits as GPP services to make access to new benefits /services equitable across both populations.

a. PHCS and DHCS will work to identify five clinical quality metrics that are applicable to the GPP and that align as much as possible with goals outlined in the DHCS Comprehensive Quality Strategy submitted to CMS on February 4, 2022.
b. Initial clinical quality measures that DHCS and PHCS have identified include:
    i. Colorectal Cancer Screening: CMS130v10 (UDS)
    ii. Controlling High Blood Pressure: CMS165v10 (UDS)
    iii. Diabetes: HbA1c Poor Control (> 9%): CMS122v10 (UDS)
    iv. Preventive Care and Screening: Screening for Depression and Follow-Up Plan (CMS2v11) (UDS)
    v. Coronary Artery Disease (CAD): ACE/ARB Therapy - Diabetes or LVSD (LVEF < 40%) QPP #118 MIPS CQM 2021 (MIPS)
c. The five quality of care measures were selected to align with the quality strategy goals of providing early interventions for rising risk and patient-centered chronic disease management as well as keeping families and communities healthy via prevention. These goals are outlined in the DHCS Comprehensive Quality Strategy (CQS) Report. In addition, although the measure addresses depression for the broader population, the Preventive Care and Screening: Screening for Depression and Follow-Up Plan measure aligns with the state level Bold Goal to improve maternal and adolescent depression screening by 50%.
d. The data used in reference to state and national disparities in these measures come from the DHCS 2021 Health Disparities Report, DHCS Health Disparities in the Medi-Cal Population Fact Sheets, AHRQ 2022 National Healthcare Quality and Disparities Reports, U.S. Department of HHS Office of Minority Health, National Center for Health Statistics, and other peer reviewed publications.
e. The list of clinical quality measures is subject to change, pending changes made to measures at the national level and other factors. Changes to the measures will be uniformly treated for all PHCS and is subject to DHCS approval.

3. DHCS will work with PHCS to develop reporting guidance for all measures, including adjusting metric specifications and identifying which stratifications will be reported for each measure. DHCS will also work with PHCS to interpret performance rates on the measures listed above, considering the challenges with applying national measures and benchmarks to a program like GPP, monitor performance and trends over time, and discuss improvement strategies, if needed, at the end of the waiver period.
4. PHCS will begin reporting these utilization rates and trends and clinical quality measures beginning in 2024 for PY 9 and continuing through PY 12 on an annual basis after the encounter data reporting process with specific dates to be determined. PHCS will report the measure rates to DHCS in a form and manner to be specified by DHCS.
5. The state may retain flexibility on two distinct aspects of the quality of care measures: a) The selection of the composition of the measure set, and b) the selection of benchmarks that will be utilized to determine the level of quality performance.
    a. Measure selection flexibility is due to the nature of the GPP population and the limitations of denominator sizes, which are further limited by measure

specification requirements (e.g., age restrictions, diagnosis established, etc.). To ensure that meaningful data is reported the state requests flexibility to identify and select measures with sufficient denominators that also meet the alignment to the Quality Strategy Report discussed above.

b. The state may retain flexibility in the selection of comparison data/benchmarks. The state may select the most appropriate benchmark for each measure based on the closest approximation to the GPP population. DCHS will describe the benchmarks selected in the annual monitoring report.

6. DHCS will report on the progress of the Health Equity Monitoring Metrics Protocol to CMS on an annual basis as part of its Annual Monitoring Report.

Attachment N
Providing Access and Transforming Health (PATH) Supports
Funding and Mechanics Protocol

In accordance with the State's section 1115 demonstration and Special Terms and Conditions (STC 5.13 – 5.25), this protocol provides additional detail on the requirements for the Providing Access and Transforming Health (PATH) initiative as specifically required by STC 5.23. Designated State Health Programs (DSHP) will be used to support portions of PATH. The State is authorized for up to $1.85 billion (total computable) in expenditure authority for PATH. PATH is one-time transitional funding that will support State efforts to maintain, build, and scale the capacity necessary to transition the Whole Person Care (WPC) Pilot Program and Health Home Pilots approved in the Medi-Cal 2020 demonstration to the California Advancing and Innovating Medi-Cal (CalAIM) initiative. This protocol outlines the award criteria and milestones for Qualified Applicants to receive funding through PATH across the Ensuring Access to Services During Transition and Delivery System Transformation and Innovation Program (which is comprised of five initiatives), as well as the Reentry Demonstration Initiative Planning and Implementation Program. See *Attachment O: PATH Operational and Monitoring Protocol* which outlines allowable state expenditures for activities permitted under PATH, required progress reporting and performance metrics, and the State's approach to PATH-related program integrity.

I. Award Criteria for Qualified Applicants

A. Global Award Criteria For PATH

In order to receive PATH funds through any program or initiative, Qualified Applicants must meet the following global award criteria:

i. The Qualified Applicant must meet the initiative-specific Qualified Applicant criteria outlined in *Section B: Initiative-Specific Award Criteria* of this protocol.
ii. The Qualified Applicant must complete all components required in the application and submit all necessary supporting documentation, as required.
iii. The Qualified Applicant's application must be reviewed and approved by the PATH TPA and/or the State as appropriate.
iv. The Qualified Applicant must be in good standing with the State Department of Health Care Services (DHCS) and the Centers for Medicare & Medicaid Services (CMS) and other relevant state and federal governmental agencies, and not excluded from participation in any federal health care program under section 1128 or 1128A of the Social Security Act.
v. The Qualified Applicant must attest that funding received through PATH will not supplant funding provided by other Federal, state or local programs, or that the applicable PATH-funded activities will not duplicate reimbursement from such other programs, consistent with clause vi., on an ongoing basis and in a form and manner as required by DHCS.

vi. Other Federal, state or local funding sources and programs that are complementary to or enhance PATH funds will not be considered supplanted by PATH funds or duplicate reimbursement. If applicable, the Qualified Applicant must describe how similar or related services and activities supported by other Federal, state or local funding sources are complemented or enhanced by efforts funded by PATH. For example, if other funding 1) does not fully reimburse activities with the exception of the services provided through the Support for Sustaining Services Through the Transition to Managed Care initiative and the Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care initiative, 2) may allow additional/different populations to be served, or 3) may allow additional/different services to be provided beyond those funded by PATH. To the extent otherwise allowable PATH activities are reimbursed by other Federal, state or local programs, PATH funding must not duplicate such reimbursement.

vii. Consistent with federal "free care" guidance, other sources of funding do not need to be exhausted before PATH reimbursement is available.

viii. The Qualified Applicant must submit all necessary progress reports and meet program oversight requirements associated with receipt of PATH funding as outlined in *Section (4): Program Integrity, Oversight and Monitoring* of *Attachment O: PATH Operational and Monitoring Protocol.*

B. Initiative-Specific Award Criteria

In addition to meeting the global award criteria outlined in *Section A: Global Award Criteria For PATH*, Qualified Applicants must also include the following initiative-specific information in applications in order to be considered for funding, as further described and specified in DHCS guidance, applications and related documents:

i. **Support for Sustaining Services Through the Transition to Managed Care**. Initiative specific award criteria include:
   a. Inclusion of appropriate and accurate documentation showing that the former WPC Lead Entity provides a service eligible for PATH-funding (see STC 5.14a-b. for additional information on WPC services that are eligible for PATH funding under this initiative).
   b. Inclusion of FFS or PMPM rate used to bill for the service, for DHCS review and approval.
   c. Inclusion of estimated utilization of services eligible for PATH funding.
   d. The Qualified Applicant must attest that funding received through PATH will only be claimed for allowable services as outlined in the program application and in *Section (1): Allowable Expenditures* of *Attachment O: PATH Operational and Monitoring Protocol*, on an ongoing basis and in a form and manner as required by DHCS.

ii. **Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care.** Initiative specific award criteria include:
   a. Inclusion of appropriate and accurate documentation showing that the former WPC Lead Entity provides a service eligible for PATH-funding (see STC 5.14c.

for additional information on WPC services that are eligible for PATH funding under this initiative).

b. Inclusion of DHCS-approved FFS or PMPM rate used to bill for the service.
c. Inclusion of estimated utilization of services eligible for PATH funding.
d. The Qualified Applicant must attest that funding received through PATH will only be claimed for allowable services as outlined in the program application and in *Section (1): Allowable Expenditures* of *Attachment O: PATH Operational and Monitoring Protocol*, on an ongoing basis and in a form and manner as required by DHCS.

iii. **Technical Assistance Marketplace.** Initiative specific award criteria include:

a. Inclusion of appropriate and accurate documentation of the need and goals for the requested technical assistance resource.
b. Inclusion of a copy of all existing, executed contracts with a Medi-Cal Managed Care Plan(s) (MCP) in the State of California for CalAIM-related activities or a copy of a signed letter from an MCP stating the Qualified Applicant's intent to contract with the MCP in a timely manner for CalAIM related activities.
c. The Qualified Applicant must attest that funding received through PATH will only be applied towards allowable purposes as outlined in the program application and in *Section (1): Allowable Expenditures* of *Attachment O: PATH Operational and Monitoring Protocol*, on an ongoing basis and in a form and manner as required by DHCS.

iv. **Collaborative Planning and Implementation for ECM and Community Supports/Health-Related Social Needs (HRSN).** Qualified Applicants responsible for facilitating the Collaborative Planning and Implementation initiative must include the following initiative specific award criteria:

a. Inclusion of a robust description of the approach to collaborative planning and goals.
b. Provision of a detailed description of the process to engage potential collaborative planning participants that includes the following:
    i. List of a diverse set of partners that intend to participate in the collaborative in order to meet its goals and objectives, including, but not limited to: MCPs; city, county, and other government agencies; community-based providers including, but not limited to, public hospitals, community-based organizations (CBOs), and Medi-Cal Tribal and Designees of Indian Health Programs; and others as specified by DHCS.
    ii. A detailed approach for engaging and including providers / organizations that are under-resourced and/or serve historically underserved populations.
c. Submission of required letter(s) of support from collaborative participants in the region served indicating a commitment to work with a facilitator.
d. Inclusion of a copy of all existing, executed contracts with MCP(s) in the State of California for CalAIM-related activities or a copy of a signed letter from an MCP stating the Qualified Applicant's intent to contract with the MCP in a timely manner for CalAIM related activities.

e. The Qualified Applicant must attest that funding received through PATH will only be applied towards allowable purposes as outlined in the program application and in *Section (1): Allowable Expenditures* of *Attachment O: PATH Operational and Monitoring Protocol*, on an ongoing basis and in a form and manner as required by DHCS.

v. **Support for Expanding Access to Services:** Qualified Applicants may apply for up to one year's worth of funding at a time. Qualified Applicants that request PATH funding to sustain allowable activities for longer than one year must reapply for subsequent funding each year and demonstrate a continued funding purpose as follows:
   a. Submission of a detailed justification for why funds are needed to support delivery and/or bolster capacity to support of ECM and/or Community Support/HRSN services.
   b. Submission of a detailed description of how the Qualified Applicant intends to coordinate with MCPs to ensure alignment of activities and avoid duplication of MCP reimbursement.
   c. Inclusion of a detailed description of approach to sustaining items/activities funded via PATH after PATH funding ends.
   d. Inclusion of a detailed description of how funding request will align with CalAIM goals.
   e. Inclusion of a copy of all existing, executed contracts with Managed Care Plan(s) (MCP) in the State of California for CalAIM-related activities or a copy of a signed letter from an MCP stating the Qualified Applicant's intent to contract with the MCP in a timely manner for CalAIM related activities.
   f. The Qualified Applicant must attest that funding received through PATH will only be applied towards allowable purposes as outlined in the program application and in *Section (1): Allowable Expenditures* of *Attachment O: PATH Operational and Monitoring Protocol*, on an ongoing basis and in a form and manner as required by DHCS.

vi. **Reentry Demonstration Initiative Planning and Implementation Program**
   a. Inclusion of a detailed description of all correctional institutions within the applicable jurisdiction including number of facilities and average daily census by facility.
   b. Inclusion of a detailed description of current pre-release enrollment, suspension, and Medi-Cal screening processes, and the proposed approach to modifications that need to be made to align with related state mandates.
   c. Inclusion of a detailed summary of current IT capabilities including booking / management systems and EHR platform, and the proposed approach to modifications that need to be made to improve data linkages with county departments of social services.
   d. Inclusion of a plan to collaborate with local correctional institutions and county departments of social services to support planning and implementation of pre-release Medi-Cal enrollment and suspension processes.

e. The Qualified Applicant must attest that funding received through PATH will only be applied towards allowable purposes as outlined in the program application and in *Section (1): Allowable Expenditures* of *Attachment O: PATH Operational and Monitoring Protocol*, on an ongoing basis and in a form and manner as required by DHCS.

II. Milestones for Ongoing Funding for Qualified Applicants

Qualified Applicants must achieve milestones in order to receive PATH funding for all PATH programs and initiatives. Milestones will be aligned with PATH performance metrics, described in *Attachment O: PATH Operational and Monitoring Protocol*. The TPA will monitor achievements of milestones for the Technical Assistance Marketplace, Collaborative Planning and Implementation, and Support for Expanding Access to Services initiatives, as well as the Reentry Demonstration Initiative Planning and Implementation Program. Achievement of milestones for the Support for Sustaining Services Through the Transition to Managed Care initiative and the Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care initiative will be assessed by the State. Receipt of PATH funding for other initiatives will be contingent upon meeting requirements and milestones based on the category of PATH funding, described in B below.

A. Milestone Categories for Support for Sustaining Services Through the Transition to Managed Care initiative and the Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care initiative

i. **Support for Sustaining Services Through the Transition to Managed Care**
   a. The Qualified Applicant has submitted and completed all required elements of the invoice and progress reports outlined in *Section (3): Progress Reporting* of *Attachment O: PATH Operational and Monitoring Protocol* in a timely manner.

ii. **Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care**
   a. The Qualified Applicant has submitted and completed all required elements of the invoice and progress reports outlined in *Section (3): Progress Reporting* of *Attachment O: PATH Operational and Monitoring Protocol* in a timely manner.

B. Standardized Milestone Categories for Remaining PATH Programs and Initiatives

For the remaining PATH program/initiatives, Qualified Applicants must meet milestones across the first two standardized milestone categories listed below, and depending on the scope of the requested funding, may be required to fulfill interim milestones in order to receive PATH funding.

i. **Written Approval of Application**. Qualified Applicants must submit and receive approval from DHCS or its contracted TPA on their application prior to receiving PATH funding.

ii. **Documented Completion of Activities Outlined in Application.** In order to receive PATH funding, Qualified Applicants must complete the activities outlined in their original application and submit an invoice, utilization or progress report (as requested by DHCS) documenting completion. Activities may include, for example:

a. Timely submission of required progress reports and reporting on performance metrics.
b. Timely submission of an invoice for the delivery of approved services as part of the Support for Sustaining Services Through the Transition to Managed Care and/or Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care initiatives.
c. Successful completion of the technical assistance goals outlined by the Qualified Applicant in Technical Assistance initiative application.
d. Completion of a collaborative planning and implementation webinar series.
e. Hiring of a community health worker to support the delivery of ECM and/or Community Supports/HRSN.
f. Successful collaboration between a county Sheriff's office and a county department of social service to identify funding needs to support implementation of pre-release enrollment and suspension processes for the Reentry Demonstration Initiative Planning and Implementation Program.

iii. **Progress Towards Organization/Project Specific Milestones Approved in Application.** Depending on the nature of the project and/or funding request, Qualified Applicants may propose organization / project-specific milestones/deliverables as part of their applications. Ongoing PATH funding may be contingent upon the Qualified Applicant meeting such interim milestones, as determined by DHCS, and defined by Qualified Applicants as part of their initial applications, and approved by the State and its TPA. Sample interim milestones/deliverables may include, for example:

a. Facilitation of a certain percentage of planned convenings in a collaborative planning series.
b. Completion of an assessment of current organizational capabilities prior to determining hiring needs.
c. Conducting a certain number of collaborative planning sessions between correctional institutions and county social service departments to assist with the coordination of Medi-Cal enrollment and suspension processes.

Attachment O
Providing Access and Transforming Health (PATH) Operational and Monitoring Protocol

In accordance with the State's section 1115 demonstration Special Terms and Conditions (STC 5.13 – 5.25) this protocol outlines key operational features of the Providing Access and Transforming Health (PATH) initiative as required by STC 5.24. The State is authorized for up to $1.85 billion (total computable) in expenditure authority for two approved PATH Programs: the Ensuring Access to Services During Transition and Delivery System Transformation and Innovation Program (which is comprised of five initiatives) and the Reentry Demonstration Initiative Planning and Implementation Program. PATH is a one-time transitional funding that will support the State's efforts to maintain, build, and scale the capacity necessary to transition the Whole Person Care (WPC) Pilot Program and Health Home Pilots approved in the Medi-Cal 2020 demonstration to the California Advancing and Innovating Medi-Cal (CalAIM) initiative. This protocol outlines: (1) allowable state expenditures for activities permitted under PATH; (2) required performance metrics; (3) progress reporting; and, (4) the State's approach to PATH-related program integrity, oversight and monitoring across the two approved PATH Programs. *See Attachment N: PATH Funding and Mechanics Protocol for the award criteria and milestones for Qualified Applicants to receive funding through PATH.*

(1) **Allowable Expenditures.** Allowable state expenditures under all PATH programs and their associated initiatives are described below. Expenditures under the Ensuring Access to Services During Transition and Delivery System Transformation and Innovation Program are organized by initiative, as described below. PATH funding must complement or enhance, but not supplant related funding provided by other federal, state or local funding sources. To the extent otherwise allowable, PATH activities are reimbursed by other federal, state or local programs, and PATH funding must not duplicate such reimbursement.

Consistent with the federal "free care" guidance with respect to third party payment, other sources of funding do not have to be exhausted before a Qualified Applicant receives and applies PATH funding, or an authorized provider bills an Medi-Cal Managed Care Plan (MCP) for an approved Community Supports/Health Related Social Needs (HRSN) service that the Medi-Cal MCP has elected to offer. For example, where a county or local provider may access funding for comparable housing support services under another program, the county or local provider is not required to use that funding before providing and seeking PATH funding or Medi-Cal MCP reimbursement for a Community Supports/HRSN housing support service to an eligible Medi-Cal enrollee. Double billing or duplicative reimbursement for the same delivered service is not permitted. Other available funding should be used to provide additional and complementary services or supports that may benefit Medi-Cal members or other community residents depending on the purposes of the funds.

Allowable expenditures by PATH program and initiative include:

Ensuring Access to Services During Transition and Delivery System Transformation and Innovation Program:

A. **Support for Sustaining Services Through the Transition to Managed Care:** Qualified Applicants may receive PATH funding for the continued operation of allowable WPC services that will transition to Enhanced Care Management (ECM) and Community Supports/HRSN[9] by January 1, 2024, as approved in their application to the State. *(See Attachment N: PATH Funding and Mechanics Protocol for more details).*

B. **Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care:** Qualified Applicants may receive PATH funding for the delivery of allowable WPC reentry demonstration initiative services and supports that will transition to ECM by January 1, 2024, as approved in their application to the State. *(See Attachment N: PATH Funding and Mechanics Protocol for more details).*

C. **Technical Assistance Marketplace:** Qualified Applicants must apply received PATH funding for the purchase of resources or to engage with approved vendors in the technical assistance marketplace to provide customized project specific technical assistance in one or more of the domains listed below**:**
    i. Contracting between Medi-Cal MCPs and providers;
    ii. Collecting, documenting and exchanging data between MCPs and providers;
    iii. Billing for ECM and Community Supports/HRSN services;
    iv. Building provider capacity and developing care plans to support ECM and Community Supports/HRSN service delivery;
    v. Designing new workflows/service delivery models to support ECM and Community Supports/HRSN service delivery;
    vi. Supporting applicants in applying for regional CalAIM collaborative planning and implementation efforts or other types of PATH funding;
    vii. Organizational strategic planning to support CalAIM implementation;
    viii. Promoting health equity through the delivery of ECM and Community Supports/HRSN;
    ix. Engaging with stakeholders to support the implementation of ECM and Community Supports/HRSN;
    x. Aiding entities in understanding and navigating CalAIM program requirements;
    xi. Supporting applicant compliance with monitoring, oversight and program integrity requirements; and/or,
    xii. Other domains approved by the State.

[9] As described in the State's 1115 demonstration and 1915(b) waiver. Community Supports/HRSN are equivalent to in-lieu-of-services (ILOS).

D. Collaborative Planning and Implementation for ECM and Community Supports/HRSN: Funding from this initiative will support facilitation of local collaborative planning groups. Qualified Applicants must apply received funds for one or more of the activities described below. The State may consider providing funding to Qualified Applicants for allowable activities performed prior to the start of the application period, but not before January 1, 2022, and only on a case by case basis:

i. Identifying ECM and Community Support/HRSN needs and gaps within the community;
ii. Working with MCPs to review Incentive Payment Program (IPP) Needs Assessment and Gap Filling Plans to prevent duplication with PATH[10];
iii. Educating stakeholders on key topics related to CalAIM and PATH;
iv. Facilitating convenings to identify, discuss, and resolve local implementation issues that arise as CalAIM is rolled out across a county/region;
v. Conducting quality improvement activities to ensure the delivery of high-quality services;
vi. Monitoring how PATH and other funds are being used to address implementation issues to ensure funding is going towards identified and prioritized uses, e.g., closing ECM or Community Supports/HRSN service gaps, addressing community level infrastructure needs to expand access to ECM or Community Supports/HRSN in certain geographic areas;
vii. Disseminating written materials or hosting webinars on best practices on ECM or Community Supports/HRSN service delivery or operational processes and/or providing guidance to collaborative planning entities that addresses implementation issues;
viii. Identifying and inviting entities to participate in local collaborative planning groups;
ix. Conducting outreach to entities that have been historically underutilized and/or under-resourced (as defined by DHCS), and/or that serve the diverse needs of the state's population to encourage participation in CalAIM; and/or,
x. Other activities approved by the State (e.g., hosting topical roundtables on key issues that arise during the collaborative planning process, forming population specific collaboratives such as those serving tribes/tribal entities, providing support to entities in accessing other PATH resources via the Technical Assistance Marketplace or Support for Expanding Access to Services, etc.).

E. Support for Expanding Access to Services. Qualified Applicants must use received funding for one or more or the activities described below. The State may consider providing funding to Qualified Applicants for allowable activities performed prior to the

[10] The State has designed and is implementing a $1.5 billion CalAIM Incentive Payment Program (IPP) to stimulate Managed Care Plan (MCP) investments in ECM and Community Supports/HRSN infrastructure and capacity (https://www.dhcs.ca.gov/Pages/ECMandILOS.aspx). To be eligible for incentive payments, MCPs must assess ECM and Community Supports/HRSN capacity and infrastructure gaps in their region and demonstrate progress in filling those gaps against a set of DHCS established metrics and must meet or exceed specified thresholds.

start of the application period, but not before January 1, 2022, and only on a case by case basis:

i. Increasing the provider workforce, including, for example, by assessing current organizational capabilities and capacity to deliver ECM and Community Supports/HRSN and supporting initial hiring, recruiting, onboarding, and training for staff that have a direct role in executing ECM and Community Supports responsibilities/HRSN;
ii. Modifying, purchasing and/or developing the necessary referral, billing, data reporting or other infrastructure and IT systems, to support integration into CalAIM;
iii. Providing upfront funding needed by Qualified Applicants to support capacity and infrastructure necessary to deliver ECM and Community Supports/HRSN services (e.g., support for hiring additional team members needed to provide ECM/Community Supports/HRSN;
iv. Evaluating and monitoring ECM and Community Supports/HRSN service capacity to assess gaps and identifying strategies to address gaps (e.g., conducting a community health needs assessment to identify where there are gaps in capacity for one or more Community Supports/HRSN);
v. Developing a plan to conduct outreach to populations who have traditionally been under-resourced and/or underserved to engage them in care; and/or
vi. Other activities approved by the State.

PATH Reentry Demonstration Initiative Planning and Implementation Program

F. **PATH Reentry Demonstration Initiative Planning and Implementation Program**: Qualified Applicants must apply received funding for the activities described below. The State may consider providing funding to Qualified Applicants for activities performed prior to the start of the application period, but not before January 1, 2022, and only on a case by case basis:

i. Modifying technology and IT systems needed to support Medi-Cal enrollment and suspension processes. This includes development of electronic interfaces for correctional facilities to communicate with Medicaid county welfare department eligibility and enrollment IT systems to support Medi-Cal enrollment and suspension;
ii. Recruiting, hiring, onboarding, and training staff to assist with the coordination of Medi-Cal enrollment and suspension for justice-involved individuals;
iii. Development or modification of protocols and procedures that specify steps to be taken in preparation for and execution of the Medi-Cal enrollment and suspension processes for eligible individuals;
iv. Facilitating collaborative planning activities between correctional institutions, correctional agencies, county welfare and social services departments, and other stakeholders as needed to support planning, implementation, and modification of Medi-Cal enrollment and suspension processes;
v. Activities to support a milieu appropriate for provision of Medi-Cal pre-release services including accommodations for private space such as movable screen

walls, desks, and chairs to conduct assessments and screenings within correctional institutions, and support for installation of audio-visual equipment or other technology to support pre-release services delivered via telehealth.

vi. Planning focused on development or modification of processes and information sharing protocols to:
    a. Identify uninsured individuals who are potentially eligible for Medi-Cal;
    b. Assisting with the completion of a Medi-Cal application;
    c. Submitting an application to the county welfare eligibility and enrollment departments or coordinating suspension;
    d. Establishing on-going oversight and monitoring of processes upon implementation; and,

vii. Other activities approved by the State.

(2) **Performance Metrics.** Progress reports submitted by Qualified Applicants will include information detailing their progress towards milestones and performance metrics that are standardized by the initiative. In order to receive ongoing funding, Qualified Applicants must meet both milestones set forth in *Attachment N: PATH Funding and Mechanics Protocol* as well as submit all required progress reports informing progress towards performance metrics detailed here. When appropriate, the Third-Party Administrator (TPA) will summarize and report on performance metrics across Qualified Applicants that have received PATH funding.

A. Support for Sustaining Services Through the Transition to Managed Care: Qualified Applicants must report directly to the State at regular intervals on the following performance metrics, including, at a minimum:

i. Utilization of PATH-funded services as reported in semi-annual utilization reports that include the following information:
    a. Client identification numbers;
    b. FFS/PMPM service codes;
    c. Dates of service; and,
    d. Demographic data on individuals receiving services (if available).[11]

ii. Funding claimed for eligible services as reported in semi-annual invoices summarizing services delivered; and,

iii. Other metrics as defined by the State.

B. Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care: Qualified Applicants must report directly to the State at regular intervals on the following performance metrics, including, at a minimum:

[11] In addition, the State will crosswalk demographic data provided through Support for Sustaining Services Through the Transition to Managed Care reporting with existing data from the State's Medi-Cal Eligibility Data System (MEDS).

i. Utilization of PATH-funded services as reported in semi-annual utilization reports that include the following information:
    a. Client identification numbers;
    b. FFS/PMPM service codes;
    c. Dates of service; and,
    d. Demographic data on individuals receiving services (if available).[12]
ii. Funding claimed for eligible services as reported in semi-annual invoices summarizing services delivered; and,
iii. Other metrics as defined by the State.

C. Technical Assistance Initiative: The TPA must report to the State at regular intervals across the following Technical Assistance Initiative performance measures, including, at a minimum:

i. Total funding dispersed to entities by county and by Qualified Applicant (to ensure fair distribution of resources);
ii. Which Qualified Applicants have applied for Technical Assistance services;
iii. Which Qualified Applicants were funded to receive Technical Assistance services and how much funding was allocated to the Qualified Applicant;
iv. Which Qualified Applicants applied for Technical Assistance and were not funded and the reason(s) why funding was rejected;
v. Utilization of different Technical Assistance resources by domain and by Qualified Applicant;
vi. Number of Qualified Applicants that met self-defined milestones during the performance period;
vii. Number of Qualified Applicants that failed to meet self-defined milestones during the performance period;
viii. Outreach efforts to reach Qualified Applicants that are under-resourced and/or serve historically underserved communities (as defined by the State and to be documented via a future demonstration Monitoring Report);
ix. Outreach efforts to entities in counties that are not on track to hit target funding disbursements;
x. Number of Qualified Applicants that are under-resourced, and/or serve historically underserved communities (as defined by the State);
xi. Summary of complaints/grievances; and,
xii. Other measures as defined by the State.

D. Collaborative Planning and Implementation Initiative: The TPA must report to the State at regular intervals across the following Collaborative Planning and Implementation Initiative performance measures, including, at a minimum:

[12] In addition, the State will crosswalk demographic data provided through Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care reporting with existing data from the State's Medi-Cal Eligibility Data System (MEDS).

i. Entity participation in collaborative planning groups, including which entities are under-resourced, and/or serve historically underserved communities (as defined by the State);
ii. Agendas and meeting summaries of collaborative planning convenings;
iii. Identified successes and challenges experienced by participants in the collaborative planning initiative;
iv. Lessons learned and best practices identified in the collaborative planning group;
v. Results from a participant survey assessing satisfaction with collaborative planning facilitators and recommendations for future topics and convenings;
vi. Summary of complaints/grievances received related to the initiative; and,
vii. Other metrics as defined by the State.

E. Support for Expanding Access to Services Initiative: The TPA must report to the State at regular intervals across the following Support for Expanding Access to Services Initiative performance measures, including, at a minimum**:**

i. Total funding dispersed to entities by county (to ensure fair distribution of resources);
ii. Outreach efforts to entities in counties that are not on schedule to provide target funding disbursements;
iii. Number of Qualified Applicants that met self-defined milestones during the performance period;
iv. Number of Qualified Applicants that failed to meet self-defined milestones during the performance period;
v. Number of Qualified Applicants that received funding, and amount of funding received by type of entity (e.g., county, provider, community-based organization, etc.);
vi. Number of Qualified Applicants that are under-resourced and/or serve historically underserved communities (as defined by the State), and amount of funding received by type of entity (e.g., county, provider, community-based organization, etc.);
vii. Number of Qualified Applicants that were denied funding, and rationale indicating why;
viii. Summary of how funding was applied, including by allowable activity type;
ix. Number of Qualified Applicants that reported applying received funds for purposes that were not documented in applications;
x. Summary of complaints/grievances received related to the initiative; and,
xi. Other metrics as defined by the State.

F. Reentry Demonstration Initiative Planning and Implementation Program: The TPA must submit a report to the State by December 31, 2023 that summarizes performance measures for this program. The report will document at a minimum:

i. Number of Qualified Applicants that received funding, including by type of Qualified Applicant (e.g., Sheriff's Office, Probation Office, County Department of Social Service etc.);

ii. Number of qualified applicants that were denied funding, and rationale indicating why;
iii. Total funding dispersed by type of Qualified Applicant;
iv. Summary of the payments made by type of Qualified Applicant broken out by allowable activities type;
v. Number of Qualified Applicants that met self-defined milestones during the performance period;
vi. Number of Qualified Applicants that failed to meet self-defined milestones during the performance period; and,
vii. Other metrics as defined by the State.

(3) **Progress Reporting**. Qualified Applicants that receive PATH funding must provide progress reports to the State or the TPA (as required) documenting progress toward approved, entity-specific milestones and standardized[13] performance metrics.

i. Progress reports for all PATH initiatives must be submitted to the State or the TPA, at a minimum, bi-annually.
ii. Progress reports for the Support for Sustaining Services Through the Transition to Managed Care and the Support for Sustaining Reentry Demonstration Initiative Services Through the Transition to Managed Care will be submitted directly from funding recipients to the State. Progress reports for all other PATH initiatives and programs will be submitted by the funding recipient to the TPA, who will then collate information in these progress reports into performance metrics, review them, and provide status reports to the State.
iii. Progress reports from Qualified Applicants must include, at a minimum:
    a. Narrative description of achieved milestones, as defined in the Qualified Applicant's application, or progress towards milestones during the reporting period *(described further in Attachment N: PATH Funding and Mechanics Protocol);*
    b. Reporting to inform progress towards standardized performance metrics, including progress towards specific State-specified targets, as appropriate (described in detail in *Section (2): Performance Metrics*);
    c. Description of how funds were applied during reporting period.
    d. Description of activities/milestones that were not achieved as expected during the reporting period, and an explanation indicating why they were not achieved, and the strategies to overcome hurdles to achieve them. Future progress reports should include subsequent progress in completing those activities/milestones, or other mitigation strategies, as applicable;
    e. Requests to modify activities/milestones and the budget, as needed, including the rationale for modification; and,

[13] DHCS works with the TPA to develop standardized criteria and implement appropriate performance metrics for each of the PATH initiatives. DHCS provides oversight and is accountable for setting criteria, and standardized reporting requirements and metrics. The TPA is responsible for developing recommended criteria and performance metrics for DHCS consideration and for operationalizing the reporting processes (i.e., collecting reports from qualified applicants and analyzing findings) and implementing initiative requirements per DHCS's direction.

f. Attestation of non-duplication of reimbursement and supplantation of PATH funding consistent with the requirements in Attachment N.

iv. For applicable initiatives, the TPA must summarize progress report findings and report them to DHCS.
   a. Upon request, the TPA must make available to the State any individual progress report submitted by a Qualified Applicant, for any initiative.

v. Upon receipt, the State or TPA (as appropriate, based on initiative) is responsible for reviewing and approving the progress report. In the event that progress reports are rejected, the Qualified Applicant will have 30 days to rectify any deficiencies and submit an updated report to the State. If an entity fails to submit an appropriately updated report then the State may pursue corrective action in accordance with Section (4) below.

(4) **Program Integrity, Oversight and Monitoring:** The State will monitor and enforce program integrity standards in the PATH program, across all initiatives, including through the following mechanisms as required by STC 5.24(a)-(c):

A. Regular Progress Reporting

i. As described in Section (2) (i) above, all Qualified Applicants that receive PATH Funding must submit regular progress reports to the State or its contracted TPA, as applicable, including all required attestations, including updated attestations as needed.

ii. The State or its contracted TPA will monitor for funding irregularities and potential supplantation of federal, state and/or local programs across all PATH programs and initiatives.

iii. The State or its contracted TPA will monitor for funding irregularities and potential duplication of reimbursement by federal, state and/or local programs across all PATH programs and initiatives.

B. Participating in Audit Processes

i. The State or its TPA, as appropriate, must perform spot check audits of funding disbursements across all PATH initiatives. Spot check audits must include, at a minimum:
   a. Review of documentation to support activities identified on PATH invoices to ensure funds were appropriately applied;
   b. With respect to the Technical Assistance, Collaborative Planning and Implementation, Support for Expanding Access, and Reentry Demonstration Initiative Planning and Implementation Program Initiatives, identifying instances where PATH funds have potentially been applied on activities outside of those that are approved;
   c. Detecting irregularities, discrepancies or outliers requiring further investigation; and
   d. Identifying instances of potential payment duplication or supplantation of federal, state and/or local funds. Such review shall take into account

the Qualified Applicant's description of how other support from state, federal or local programs are complementary to PATH funding consistent with Attachment N.

C. Actions Taken to Correct Underperformance

i. The State and its contracted TPA will utilize a standardized Corrective Action Plan process for Qualified Applicants who are not meeting progress reporting or other requirements for receipt of PATH funding.

ii. Underperformance is defined as, at a minimum:
   a. Failure to submit timely progress reports or invoices to the State or TPA;
   b. Failure to adequately correct progress reports that have been rejected by the State or TPA;
   c. Invoice, utilization report or progress report submission errors;
   d. With respect to the Technical Assistance, Collaborative Planning and Implementation, Support for Expanding Access to Services, and Reentry Demonstration Initiative Planning and Implementation Program Initiatives, applying PATH funding for non-approved activities, or duplicating reimbursement; and,
   e. Significant discrepancies between planned application of PATH funds and actual program activities.

iii. Upon identifying underperformance, the State or its contracted TPA must issue a written notice to the Qualified Applicant detailing their underperformance and requesting a written Corrective Action Plan Strategy that will describe how the Qualified Applicant will improve on areas of underperformance.

iv. Qualified Applicants that receive a request for a Corrective Action Plan Strategy must submit a written plan that will describe how the Qualified Applicant will improve on areas of identified underperformance. The Qualified Applicant must include in their submission a "performance improvement plan" that clearly states the steps taken to rectify the underperformance.

v. Failure to implement steps in the written plan in a timely manner may result in discontinuation and/or recoupment of awarded PATH funding (see addressing non-compliance below).

vi. The TPA will report to the State on any Qualified Applicants that are subject to a Corrective Action Plan process.

D. Actions Taken to Addressing Non-Compliance

i. Funding to Qualified Applicants will be discontinued and/or recouped in the following instances, at a minimum:
   a. Instance where corrective action has been imposed and underperformance continues.
   b. Cases of fraud, waste and/or abuse.

ii. Qualified Applicants that have funding discontinued and/or recouped may also be precluded from being approved to receive additional PATH funding in the future.

iii. The TPA will report to the State on any Qualified Applicants that have had funding discontinued, recouped, and/or have been precluded from being approved to receive additional PATH funding in the future.

Attachment P
Historical Information-Budget Neutrality Test
(Reserved)

Attachment Q
DSH Coordination Methodology

During any year in which the State of California conducts the Global Payment Program ("GPP"), the state shall make the modifications listed in this Attachment Q to its methodologies for making disproportionate share hospital payments under the DSH State Plan provisions (Attachment 4.19-A, commencing with page 18).

1. The state shall not make disproportionate share hospital payments during a state fiscal year to any designated public hospital that participates in the Global Payment Program during that year.

2. Prior to the start of the applicable GPP PY, or as soon thereafter as possible, the amount of the preliminary federal DSH allotment under SSA § 1923(f) for the FFY that commences prior to the start of (for GPP PYs 7-12) or commences in (for GPP PYs 1-6) the applicable GPP PY shall be determined. For this purpose, the allotment identified for California for the applicable FFY in the Preliminary Disproportionate Share Hospital Allotments file that is released by CMS shall be initially used.

3. Hospitals that meet DSH eligibility criteria and are "non-cost-based DSH facilities," as defined under the DSH State Plan provisions, will receive DSH payments pursuant to the applicable State Plan methodology. The state shall calculate the sum of the DSH payment amounts projected for non-cost-based DSH facilities, less the non-federal share, which shall be the federal DSH allotment amount set aside for these DSH facilities.

4. Hospitals that meet DSH eligibility criteria and are "non-government operated hospitals," as defined under the DSH State Plan provisions, will receive DSH payments pursuant to the applicable State Plan methodology. The state shall calculate the sum of the DSH payment amounts projected for non-government operated hospitals, less the non-federal share, which shall be the federal DSH allotment amount set aside for these DSH facilities.

5. The federal DSH allotment set-aside amounts determined above for non-cost-based DSH facilities in paragraph 3, and for non-government operated hospitals in paragraph 4, will be subtracted from the full federal DSH allotment amount identified in paragraph 2.

6. Hospitals that meet DSH eligibility criteria, and are "cost-based DSH facilities" as defined under the DSH State Plan provisions, and which are licensed to the University of California and not participating in GPP for the applicable PY, will receive DSH payments pursuant to the applicable State Plan methodology, subject to an annual aggregate cap on the associated federal DSH allotment for those payments. The annual aggregate cap is equal to an applicable percentage multiplied by the amount of the federal DSH allotment that is left after the set-asides for non-cost-based DSH facilities and non-government operated hospitals, as calculated in paragraph 5, which shall be the DSH allotment amount set aside

for the University of California DSH facilities. The applicable percentages for each GPP PY are as follows:

GPP PY 1:	26.296%
GPP PY 2:	24.053%
GPP PY 3:	23.150%
GPP PY 4:	21.896%
GPP PY 5:	21.896%
GPP PY 6:	21.896%
GPP PY 7:	21.896%
GPP PY 8:	21.896%
GPP PY 9:	21.896%
GPP PY 10:	21.896%
GPP PY 11:	21.896%
GPP PY 12:	21.896%

Should any cost-based DSH facility licensed to the University of California elect to forego DSH payments to participate in GPP beginning with any GPP PY in the Demonstration, this percent shall be modified to reflect the appropriate shift of funds. Any modification to this percent shall be approved by CMS prior to implementation, and the list of GPP-participating PHCS in Attachment C will be amended accordingly.

7. The full federal DSH allotment amount, less the aggregate DSH allotment set-aside amounts determined for non-cost-based DSH facilities in paragraph 3, for non- government operated hospitals in paragraph 4, and for cost-based DSH facilities licensed to the University of California in paragraph 6, shall constitute the initial "Adjusted DSH" component of the funding for the GPP described in STC 78. For GPP PY 6, the "Adjusted DSH" component shall reflect an additional reduction of 50%. To align federal DSH allotment funding with GPP PYs 7 through 12, 50% of this Adjusted DSH amount will fund a portion of the GPP PY.

8. For GPP PYs 7-12, the remaining allotment funding for the GPP PY will be determined pursuant to the same steps in paragraph 3-7 based on the FFY preliminary federal DSH allotment under SSA § 1923(f) allocated to California for the FFY that commences during the GPP PY, including the application of the 50% reduction to ensure alignment with the GPP PY. Until the Preliminary Disproportionate Share Hospital Allotment file for the FFY commencing during the GPP PY is released by CMS, an estimated 2% increase over the prior FFY DSH allotment will be used.

9. The initial combined Adjusted DSH component pursuant to paragraphs 7 and 8 is determined no later than May 15 prior to the start of GPP PYs 1 through 6 and no later than November 15 prior to the start of GPP PYs 7 through 12.

10. The final combined Adjusted DSH component of the GPP shall be determined pursuant to the steps in paragraphs 1 – 8 above, which shall take into account the following:

a) The allotment identified for California in the Final Disproportionate Share Hospital Allotments file that is released by CMS for the applicable FFY that commences during the GPP PY (for PY 1-6) and for the applicable FFY that commences prior to the start of the GPP PY (for PY 7-12).

b) The actual amount of DSH payments paid or payable to the hospitals described in paragraphs 3, 4 and 6 for the applicable state fiscal year; and

c) The results of the applicable DSH audits for the hospitals, including any adjustments that increase or decrease DSH payments to the hospitals.

11. Adjustments shall be made to the GPP total computable annual limit and GPP annual budgets to take into account the final Adjusted DSH component for the applicable GPP PY determined in paragraph 10, and, notwithstanding the final payment timeline set forth in Attachment K, all final reconciliation payments for the applicable GPP PY made pursuant to Attachment K shall be subject to these adjustments.

12. Within 30 days of its determination of the initial "Adjusted DSH" component discussed in step 9, the state will submit a report to CMS stating the amount of the initial "Adjusted DSH" component for the applicable GPP PY (with explanation for how "Adjusted DSH" component was calculated) and projected DSH payment amounts for all hospitals that will receive DSH payments.

13. Within 30 days of its determination of the final "Adjusted DSH" component discussed in step 10, the state will submit a report to CMS stating the amount of the final "Adjusted DSH" component for the applicable GPP PY, the actual and final amount of DSH payments paid or payable to the hospitals described in paragraphs 3, 4 and 6 for the applicable state fiscal year, and the final GPP total paid to each GPP hospital.

The state will report all DSH payments to "non-cost-based DSH facilities," "non- government operated hospitals," "cost-based DSH facilities" licensed to the University of California, and designated public hospitals not participating in the Global Payment Program, on Forms CMS-64.9 WAIVER, with waiver number 11-W-00193/9, under Waiver Name "DSH," and with project number extension indicating the demonstration year corresponding to the federal fiscal year of the DSH allotment for which the payments were made.

Attachment S
CBAS Program Integrity

Following a determination that a credible allegation of fraud exists with respect to a CBAS provider, and that there is no good cause not to suspend payments, the State will initiate an email notification within one business day to all contracted Managed Care Plans (MCPs) that have provider networks in which the CBAS provider participates. Commencing with payments made by an MCP on or after April 1, 2016, MCPs will be required to report to the State all payments made to a CBAS provider for whom a credible allegation of fraud exists for dates of services rendered after the date the MCP was notified. The procedures below outline details regarding the reporting and recoupment process:

- The State's notification email to the MCPs will contain specific instructions for reporting requirements. MCPs will utilize the "Total MCP Payments to CBAS under Credible Allegation of Fraud" form to track total payments made to the applicable CBAS provider on a quarterly basis, commencing with the first quarter that the MCP was notified of the credible allegation of fraud. Reports for all subsequent quarters will indicate the total payments made for the given quarter, as well as the cumulative total payments made to the CBAS provider from the date following initial notification of the credible allegation of fraud.

- MCPs will submit quarterly reports to the State within seven business days from the end date of each quarter. The State will, in turn, submit quarterly reports to CMS reflecting all MCP payments made to applicable CBAS providers within fifteen business days from the end date of each quarter.

- Reporting requirements will remain in effect until the State notifies the MCP that the law enforcement agency investigating the credible allegation of fraud has either charged the CBAS provider with fraud or has informed the State that there is insufficient evidence to bring charges. Upon receipt of such information from the investigating agency, the State will notify the MCPs of the determination via email within three business days.

- The notification of the MCP by the State that there no longer exists a credible allegation of fraud against a CBAS provider will immediately extinguish the MCP's responsibility for quarterly reporting to the State and the State's responsibility for quarterly reports regarding payments to that CBAS provider to CMS.

- If, after investigation, the law enforcement agency brings charges against a CBAS provider for fraud, and the provider is either found guilty by the court or enters into a settlement agreement indicating fault by the provider occurs, the following actions will be required to ensure recovery of all payments made to the CBAS provider:

Recoupment to the State	Recoupment to CMS
1. The MCP will submit to the State within 15 business days of notification of a final report reflecting payments for dates of services rendered up until the date the MCP was notified by the State that the law enforcement agency has charged the CBAS provider with fraud and the provider is either found guilty by the court or enters into a settlement agreement indicating fault by the provider occurs. 2. Within 90 days of receiving the final report, the State will recoup the CBAS provider fraud amount from the MCP capitated payment. The statement issued to the MCP will reflect the CBAS provider fraud amount.	1. The State will submit to CMS within 15 business days of receipt of a final report reflecting MCP payments made to the applicable CBAS provider for dates of services rendered up until the date the MCP was notified by the State that the law enforcement agency has charged the CBAS provider with fraud and the provider is either found guilty by the court or enters into a settlement indicating fault by the provider occurs. 2. The State will reimburse CMS in accordance with its established repayment system by: A. Setting up an Accounts Receivable to reimburse the State General Fund through the MCP's recoupment for the Total Computable (federal and state share), and B. When applicable, completing Federal repayment paper work to reimburse CMS from the State General Fund.

Attachment V
Contingency Management Procedures and Protocols

In accordance with the State's "California Advancing and Innovating Medi-Cal (CalAIM)" Section 1115(a) Demonstration Waiver (Project Number 11-W-00193/9) and Special Terms and Conditions (STCs), this protocol provides additional detail regarding the distribution of motivational incentives to Medi-Cal beneficiaries receiving contingency management as required by STCs 55 and 57. The Department of Health Care Services' (DHCS) contingency management program is based on established clinical research demonstrating effective contingency management treatment and California's unique needs. The contingency management treatment program consists of a structured 24-week outpatient contingency management program, during which motivational incentives will be available, followed by six or more months of additional recovery support services, during which motivational incentives will not be available. DHCS' contingency management program may be provided to eligible Medi-Cal beneficiaries and is intended to complement other substance use disorder (SUD) treatment services already offered by Drug Medi-Cal Organized Delivery System (DMC-ODS) providers. Motivational incentives earned through DHCS' contingency management program shall be excluded from participating beneficiaries' modified adjusted gross income (MAGI)-based eligibility determinations, non-MAGI-based eligibility determinations, and share of cost determinations when determining those beneficiaries' eligibility for Medi-Cal.

I. Treatment Framework

A. Beneficiary Eligibility and Participation. Beneficiaries who meet the contingency management eligibility criteria detailed in STC 54 and who consent to treatment may participate in the contingency management program. A participating beneficiary will be considered to have dropped out of the contingency management program if they are absent from contingency management services for more than 30 days. If the beneficiary later returns to the contingency management provider, they will be invited to re-start the contingency management program if they continue to meet eligibility criteria. Participation in contingency management will have no impact on beneficiary eligibility for, or obligation or right to use, other DMC-ODS services.

B. Incentives. Beneficiaries will receive motivational incentives, as defined in STC 55, for meeting the target behavior of stimulant-non-use as demonstrated by point-of-care UDTs. At the discretion of the State and consistent with STC 55, the definition of target behavior may be revised in accordance with the evidence-base for contingency management as a treatment intervention for SUD to include non-use of substances other than stimulants, and/or other target behaviors such as treatment/medication adherence. During the initial phase of the pilot, DHCS shall set a maximum dollar amount of total incentives in a calendar year that participating beneficiaries will be able to receive for successful completion of the treatment protocol. As described in Attachment V, Section IV below, and consistent with the guardrails described in STC 55, providers have no discretion to determine the size or distribution of motivational incentives.

Attachment V, Sections I.C-F below describe an example of how DHCS will implement

the incentive delivery schedule and corresponding dollar amounts. The final delivery schedule and corresponding dollar amounts are subject to change by DHCS.

C. Treatment Schedule Overview. The contingency management program will consist of two phases: 1) contingency management treatment; followed by 2) contingency management aftercare.

Contingency management treatment will consist of a 24-week outpatient program, during which motivational incentives will be available for meeting the target behavior of stimulant-non-use. Weeks 1–12 of contingency management treatment will serve as the escalation/reset/recovery period, and weeks 13–24 will serve as the maintenance period.

After completing 24-weeks of contingency management treatment, the participating beneficiary will receive contingency management aftercare consisting of six months, or more, of aftercare and treatment services to support ongoing recovery (e.g., counseling and peer support services). During the period of contingency management aftercare, participating beneficiaries may receive informal engagement and recovery-oriented support from DMC-ODS providers, as well as covered DMC-ODS services, including but not limited to Recovery Services.

D. Weeks 1-12: Escalation/Reset/Recovery Period. During the initial 12 weeks of the contingency management treatment, participating beneficiaries will be asked to visit the treatment setting in person for a minimum of two treatment visits per week. Visits will be separated by at least 72 hours (e.g., Monday and Thursday/Friday, or Tuesday and Friday) to help ensure that drug metabolites from the same drug use episode will not be detected in more than one UDT. Participating beneficiaries will be able to earn motivational incentives during each visit the UDT indicates they have a negative sample for stimulants (or other target behaviors, such as a negative sample for other substances, or treatment adherence/medication, as determined by the State and consistent with Section VII of the STCs).

The initial motivational incentive value for the first sample negative for stimulants in a series is $10. For each week the participating beneficiary demonstrates non-use of stimulants (i.e., two consecutive UDTs negative for stimulants), the value of the motivational incentive is increased by $1.50. The maximum aggregate motivational incentive a participating beneficiary can receive during this initial 12-week period is $438.

A “reset” will occur when the participating beneficiary submits a positive sample or has an unexcused absence. The next time they submit a stimulant-negative sample, their motivational incentive amount will return to the initial value of $10.

A “recovery” of the pre-reset value will occur after two consecutive stimulant-negative urine samples. At that time, the participating beneficiary will recover their previously earned motivational incentive level without having to restart the process.

E. Weeks 13-24: Maintenance Period. During weeks 13–24, participating beneficiaries will be asked to visit the treatment setting for testing a minimum of once a week. During weeks 13–18, participating beneficiaries will be eligible to receive $15 per stimulant-negative UDT. During weeks 19–23, they will be eligible to earn $10 per stimulant-negative test, and if their sample is stimulant-negative on week 24, they will earn $21. The maximum aggregate motivational incentive a participating beneficiary will be able to receive during weeks 13–24 is $161.

F. Hypothetical Example: Incentive Delivery Schedule for Perfect Performance. Table 1 illustrates an incentive delivery schedule for a participating beneficiary in a scenario where the beneficiary has a consistent attendance record and submits samples that are stimulant-negative during each visit over the 24-week period.

Table 1: Sample Incentive Delivery Schedule	
Week	**Incentive for Stimulant-Free Test**
Week 1	$10.00 + $10.00 = $20
Week 2	$11.50 + $11.50 = $23
Week 3	$13.00 + $13.00 = $26
Week 4	$14.50 + $14.50 = $29
Week 5	$16.00 + $16.00 = $32
Week 6	$17.50 + $17.50 = $35
Week 7	$19.00 + $19.00 = $38
Week 8	$20.50 + $20.50 = $41
Week 9	$22.00 + $22.00 = $44
Week 10	$23.50 + $23.50 = $47
Week 11	$25.00 + $25.00 = $50
Week 12	$26.50 + $26.50 = $53
Weeks 13-18	$15.00 per week/test
Weeks 19-23	$10.00 per week/test
Week 24	$21.00 per week/test
Total	**$599**

Note: The incentive delivery schedule and corresponding dollar amounts in the section above are an illustrative example of how DHCS will implement the contingency management program. This incentive delivery schedule and corresponding dollar

amounts are subject to change by DHCS.

II. Contingency Management Provider and Staffing Criteria

A. Contingency Management Providers. DMC-ODS providers meeting the criteria detailed in STC 57 and other applicable STCs (e.g., per STC 53, residential providers cannot deliver contingency management; per STC 56, contingency management providers must comply with data reporting requirements) will be eligible to deliver the contingency management benefit

B. Contingency Management Coordinator. At least one trained contingency management coordinator will administer the participating DMC-ODS provider's contingency management program. The contingency management coordinator must meet the practitioner requirements listed in STC 57(c).

C. Role of the Contingency Management Coordinator. The contingency management coordinator will be the main point of contact for all contingency management program participating beneficiaries and will be responsible for collecting UDT samples, inputting test results, and supporting the delivery of motivational incentives as described in Attachment V, Section IV below.

III. Urine Drug Testing

During each visit, the contingency management coordinator will collect a urine sample from the participating beneficiary. The sample will be tested for stimulants, including cocaine, amphetamine and methamphetamine, as well as for opioid, to rapidly indicate whether recent stimulant use occurred (or other substance use defined by the State and consistent with STC 55). Samples will be collected in a point-of-care test cup with specimen validity measures.

IV. Incentive Delivery

A. Overview. The contingency management coordinator will immediately inform the participating beneficiary of the results of the UDT, and enter the results into a secure incentive management program that includes strict safeguards against fraud and abuse. The incentive management program will compute the appropriate motivational incentive earned according to the protocol detailed above in Attachment V, Section I. The incentive amount can be immediately delivered electronically to participating beneficiaries via e-gift cards sent to participating beneficiaries' emails, sent to the provider to print the gift card, or delivered using other strategies developed by the incentive management program. The immediate delivery of the motivational incentive to the beneficiary following the determination of the motivational incentive amount earned by the incentive management program is a critical component of the contingency management benefit and consistent with the evidence-base.

B. Incentive Calculations. A secure incentive management program will automatically calculate the appropriate motivational incentive amount based on the UDT results with adjustments for the escalating value, reset and recovery features as described above in Attachment V, Section I. The program will be designed to prevent tampering with, modifying or overriding the protocol amounts. Upon each visit, the results of the UDT will be entered into the incentive management program. The incentive management program will operate using an algorithm based on the motivational incentive delivery schedule described above. Using this algorithm, when a result is entered, the program will report the amount of any motivational incentive the participating beneficiary should receive per the protocol. A positive test for stimulants will result in the participating beneficiary receiving no motivational incentive. A negative test for stimulants (or other substances as defined at State discretion and consistent with STC 56) will result in an incentive amount as indicated by the software, considering escalations and resets.

C. Oversight. As a safeguard against fraud, waste and abuse, the contingency management coordinator, or other staff trained in the delivery of contingency management under the supervision of a Licensed Practitioner of the Healing Arts (LPHA) consistent with STC 57 when the contingency management coordinator is not available, will be permitted to enter the results of the participating beneficiary's UDT into the incentive management program during the visit. On a recurring basis, the DMC-ODS provider must conduct and document that a regular audit of the incentive delivery functions has been completed, including the software calculations recommended and incentive distributed. This provider audit must be conducted by an individual who has responsibility for overseeing the use of organizational funds (e.g., program or fiscal manager). The providers will be required to routinely submit the results of the audit to their DMC-ODS contracted county. The DMC-ODS county will be required to share the results of the audits with DHCS.

D. Incentive Delivery Method and Parameters. After the motivational incentive amount is determined, the incentive management program will disburse the motivational incentive and will track all motivational incentives awarded to all participating beneficiaries, including the date the incentive was distributed and the amount of the motivational incentive.

E. Incentive Types. To redeem earned motivational incentives consistent with the protocol described in this Attachment V, participating beneficiaries will be able to choose gift or debit cards from a range of retail outlet options to use or redeem the incentive balance, with restrictions placed on the incentives so they are not used to purchase cannabis, tobacco, alcohol or lottery tickets.

Attachment W
Reentry Demonstration Initiative Qualifying Conditions and Pre-Release Services

Table 1. Adult Health Care Need Criteria Definitions for the Reentry Demonstration Initiative

Qualifying Condition	Definition
Mental Illness	A person with a "Mental Illness" is a person who is currently receiving mental health services or medications OR meets both of the following criteria: i. The beneficiary has one or both of the following: a. Significant impairment, where impairment is defined as distress, disability, or dysfunction in social, occupational, or other important activities; AND/OR b. A reasonable probability of significant deterioration in an important area of life functioning; AND ii. The beneficiary's condition as described in paragraph (i) is due to either of the following: a. A diagnosed mental health disorder, according to the criteria of the current editions of the Diagnostic and Statistical Manual of Mental Disorders and the International Statistical Classification of Diseases and Related Health Problems; OR b. A suspected mental disorder that has not yet been diagnosed.
Substance Use Disorder (SUD)	A person with a "Substance Use Disorder" is a person who either: i. Meets SUD criteria, according to the criteria of the current editions of the Diagnostic and/or Statistical Manual of Mental Disorders and/or the International Statistical Classification of Diseases and Related Health Problems; OR ii. Has a suspected SUD diagnosis that is currently being assessed through either National Institute of Drug Abuse (NIDA)-modified Alcohol, Smoking and Substance Involvement Screening Test (ASSIST), American Society of Addiction Medicine (ASAM) criteria, or other state-approved screening tool.
Chronic Condition or Significant Non-Chronic Clinical Condition	A person with a "Chronic Condition" or a "Significant Non-Chronic Clinical Condition" shall have ongoing and frequent medical needs that require treatment and can include one of the following diagnoses, as indicated by the individual, and may be receiving treatment for the condition, as indicated: • Active cancer; • Active COVID-19 or Long COVID-19;

Qualifying Condition	Definition
	• Active hepatitis A, B, C, D, or E; • Advanced liver disease; • Advanced renal (kidney) disease; • Dementia, including but not limited to Alzheimer's disease; • Autoimmune disease, including but not limited to rheumatoid arthritis, Lupus, inflammatory bowel disease, and/or multiple sclerosis; • Chronic musculoskeletal disorders that impact functionality of activities of daily living, including but not limited to arthritis and muscular dystrophy; • Chronic neurological disorder; • Severe chronic pain; • Congestive heart failure; • Connective tissue disease; • Coronary artery disease; • Currently prescribed opiates or benzodiazepines; • Currently undergoing a course of treatment for any other diagnosis that will require medication management of three or more medications or one or more complex medications that requires monitoring (e.g. anticoagulation) therapy after reentry; • Cystic fibrosis and other metabolic development disorders; • Epilepsy or seizures; • Foot, hand, arm, or leg amputee; • Hip/pelvic fracture; • HIV/AIDS; • Hyperlipidemia; • Hypertension; • Incontinence; • Severe migraine or chronic headache; • Moderate to severe atrial fibrillation/arrhythmia; • Moderate to severe mobility or neurosensory impairment (including, but not limited to spinal cord injury, multiple sclerosis, transverse myelitis, spinal canal stenosis, peripheral neuropathy); • Obesity; • Peripheral vascular disease; • Pressure injury or chronic ulcers (vascular, neuropathic, moisture-related); • Previous stroke or transient ischemic attack (TIA); • Receiving gender affirming care; • Active respiratory conditions, such as severe bronchitis, COPD, asthma or emphysema;

Qualifying Condition	Definition
	• Severe viral, bacterial, or fungal infections; • Sickle cell disease or other hematological disorders; • Significant hearing or visual impairment; • Spina Bifida or other congenital anomalies of the nervous system; • Tuberculosis; or • Type 1 or 2 diabetes.
Intellectual or Developmental Disability	A person with an "Intellectual or Developmental Disability" is a person who has a disability that begins before the individual reaches age 18 and that is expected to continue indefinitely and present a substantial disability. Qualifying conditions include intellectual disability, cerebral palsy, autism, Down syndrome, and other disabling conditions as defined in Section 4512 of the California Welfare and Institutions Code.
Traumatic Brain Injury	A person with a "Traumatic Brain Injury" means a person with a traumatic brain injury or other condition, where the condition has caused significant cognitive, behavioral, and/or functional impairment.
HIV/AIDS	A person with "HIV/AIDS" means a person who has tested positive for either human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS) at any point in their life.
Pregnant or Postpartum	A person who is "Pregnant or Postpartum" is a person who is either currently pregnant or within the 12-month period following the end of the pregnancy.

Table 2. Service Definitions for the Reentry Demonstration Initiative.

Covered Service	Definition
Case Management	Case management will be provided in the period up to 90 days immediately prior to the expected date of release and is intended to facilitate reentry planning into the community in order to: (1) support the coordination of services delivered during the pre-release period and upon reentry; (2) ensure smooth linkages to social services and supports; and (3) ensure arrangement of appointments and timely access to appropriate care and pre-release services delivered in the community. Services shall include: • Conducting a health risk assessment, as appropriate; • Assessing the needs of the individual in order to inform development, with the client, of a discharge/reentry person-centered care plan, with input from the clinician providing consultation services and correctional facility's reentry planning team; ○ While the person-centered care plan is created in the pre-release period and is part of the case management pre-release service to assess and address physical and behavioral health needs and HRSN identified, the scope of the plan extends beyond release; • Obtaining informed consent, when needed, to furnish services and/or to share information with other entities to improve coordination of care; • Providing warm linkages with designated managed care plan care managers (including potentially a care management provider, for which all individuals eligible for pre-release services will be eligible) which includes sharing discharge/reentry care plans with managed care plans upon reentry; • Ensuring that necessary appointments with physical and behavioral health care providers, including, as relevant to care needs, with specialty county behavioral health coordinators and managed care providers are arranged; • Making warm linkages to community-based services and supports, including but not limited to educational, social, prevocational, vocational, housing, nutritional, transportation, childcare, child development, and mutual aid support groups; • Providing a warm hand-off, as appropriate, to post-release case managers who will provide services under the Medicaid state plan or other waiver or demonstration authority; • Ensuring that, as allowed under federal and state laws and through consent with the beneficiary, data are shared with

Covered Service	Definition
	managed care plans, and, as relevant, to physical and behavioral health/SMI/SUD providers to enable timely and seamless hand-offs; • Conducting follow-up with community-based providers to ensure engagement was made with individual and community-based providers as soon as possible and no later than 30 days from release; and • Conducting follow up with the individual to ensure engagement with community-based providers, behavioral health services, and other aspects of discharge/reentry planning, as necessary, no later than 30 days from release.
Physical and Behavioral Health Clinical Consultation Services	Physical and behavioral health clinical consultation services include targeted preventive, physical and behavioral health clinical consultation services related to the qualifying conditions. Clinical consultation services are intended to support the creation of a comprehensive, robust and successful reentry plan, including: conducting diagnosis, stabilization and treatment in preparation for release (including recommendations or orders for needed labs, radiology, and/or medications); providing recommendations or orders for needed medications and durable medical equipment (DME) that will be needed upon release; and consulting with the pre-release care manager to help inform the pre-release care plan. Clinical consultation services are also intended to provide opportunities for clients to meet and form relationships with the community-based providers who will be caring for them upon release, including behavioral health providers, and enable information sharing and collaborative clinical care between pre-release providers and the providers who will be caring for the client after release, including behavioral health warm linkages. Services may include, but are not limited to: • Addressing service gaps that may exist in correctional care facilities; • Diagnosing and stabilizing individuals while incarcerated, preparing them for release; • Providing treatment, as appropriate, in order to ensure control of qualifying conditions prior to release (e.g. to suggest medication changes or to prescribe appropriate DME for post-release); • Supporting reentry into the community; and • Providing behavioral health clinical consultation which includes services covered in the State Plan rehabilitation

Covered Service	Definition
	benefit but is not limited to clinical assessment, patient education, therapy, counseling, SUD Care Coordination (depending on county of residence), Peer Support services (depending on county of residence), and Specialty Mental Health Services Targeted Case Management covered in the Medi-Cal State Plan.
Laboratory and Radiology Services	Laboratory and radiology services will be provided consistent with the State Plan.
Medications and Medication Administration	Medications and medication administration will be provided consistent with the State Plan.
Medication-Assisted Treatment	• MAT for Opioid Use Disorders (OUD) includes all medications approved under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and all biological products licensed under section 351 of the Public Health Service Act (42 U.S.C. 262) to treat opioid use disorders as authorized by the Social Security Act Section 1905(a)(29). • MAT for Alcohol Use Disorders (AUD) and Non-Opioid Substance Use Disorders includes all FDA-approved drugs and services to treat AUD and other SUDs. • Psychosocial services delivered in conjunction with MAT for OUD as covered in the State Plan 1905(a)(29) MAT benefit, and MAT for AUD and Non-Opioid Substance Use Disorders as covered in the State Plan 1905(a)(13) rehabilitation benefit, including assessment; individual/group counseling; patient education; prescribing, administering, dispensing, ordering, monitoring, and/or managing MAT. Services may be provided by correctional facilities that are not DMC-certified providers as otherwise required under the State Plan for the provision of the MAT benefit.
Community Health Worker Services	Community Health Worker Services will be provided consistent with the Community Health Worker State Plan.
Services Provided Upon Release	Services provided upon release include: • Covered outpatient prescribed medications and over-the-counter drugs (a minimum 30-day supply as clinically appropriate, consistent with approved Medicaid State Plan). • DME consistent with Medi-Cal State Plan requirements.

California DSHP Related Provider Payment Increase Assessment – Attestation Table		
The reported data and attestations pertain to DSHP related provider payment increase requirements for the demonstration period of performance DY 19 through DY 22.		
Category of Service	**Medicaid Fee-for-Service to Medicare Fee-for-service Ratio**	**Medicaid Managed Care to Medicare Fee-for-service Ratio**
Primary Care Services	76.46%	88.9%
	Ratio derived under STC 11.5(b) utilizing CY 2021 utilization for codes representing 75% of utilization.	*Ratio derived under STC 11.6(b) utilizing Calendar Year 2021 encounter data for code set utilizing 75% of utilization*
Obstetric Care Services	62.46%	67.76%
	Ratio derived under STC 11.5 (b) utilizing Calendar Year 2021 utilization for code set utilized in Health Affairs article.	*Ratio derived under STC 11.6(b) utilizing Calendar Year 2021 encounter data for code set utilized in Health Affairs article*
Behavioral Health Services	92.61%	96.39%
	Ratio derived under STC 11.5(b utilizing Calendar Year 2021 utilization for top 10 codes that had corresponding Medicare Rate.)	*Ratio derived under STC 11.6(b) utilizing Calendar Year 2021 encounter data for top 10 utilized codes that had a corresponding Medicare Rate.*

In accordance with STCs 11.1 through 11.12, including that the Medicaid provider payment rates used to establish the ratios do not reflect fee-for-service supplemental payments, with the exception of any state plan payments made using revenue derived by The California Healthcare, Research, and Prevention Tobacco Tax Act (Proposition 56, 2016), and do not incorporate Medicaid managed care pass-through payments in accordance with 42 CFR § 438.6(a) and 438.6(d), I attest that at least a two percentage point payment increase will be applied to all the services in each of the three categories in each of the fee-for-service or managed care delivery systems with a ratio below 80 percent if these systems apply to the state's Medicaid program listed herein. Such provider payment increases for each service will be effective beginning on January 1, 2024 and will not be lower than the highest rate for that service code in DY 19 plus at least a two percentage point increase relative to the rate for the same or similar Medicare billing code through at least December 31, 2026, in the total amount of state expenditure of at least $21.76 million across affected delivery systems. For the purpose of deriving the Medicaid to Medicare provider payment rate ratio, and to apply the rate increase as may be required under a fee-for-service delivery system and under a managed care delivery system, the state agrees to define primary care, behavioral health and obstetric care, including identify applicable service codes and providers types for each of primary care, behavioral health and obstetric care in a manner consistent with other state and federal Medicaid program requirements, except that inpatient behavioral health services may be excluded. The services that comprise each service category to which the rate increase must be applied will include all service codes that fit under the state's definition of the category, except the behavioral health codes do not have to include inpatient care services. For provider payment rates paid under managed care delivery system, the data and methodology for any one of the service categories as provided in STC 11.6(b) will be based on Medicaid managed care provider payment rate and utilization data. The effective date of the rate increases is the first day of DY 20 and will be at least sustained, if not higher, through DY 22. The additional payment increases required under STC 11.2 will also be made in the total amount of state expenditure of at least $21.76 million across the affected delivery systems.
California does make Medicaid state plan fee-for-service payments for the following categories of service for at least some populations: primary care, behavioral health, and / or obstetric care. For any such payments, as necessary to comply with the DSHP STCs, I agree to submit by no later than December 31, 2023 for CMS review and approval the Medicaid state plan fee-for-service payment increase methodology, including the Medicaid code set to which the payment rate increases are to be applied, code level utilization, Medicaid and Medicare rates for the same or similar Medicare billing codes, and other data used to calculate the ratio, and the methodology, as well as other documents and supporting information (e.g., state responses to Medicaid funding questions) as required by statutes, regulations and CMS policy, through the submission of a new state plan amendment, following the normal SPA process including publishing timely tribal and public notice and submitting to CMS all required SPA forms (e.g., SPA transmittal letter, CMS-179, Attachment 4.19-B pages from the state), by no later than December 31, 2023.

The state will also provide similar documentation for the additional payment increases required under STC 11.2.
California does include the following service categories within a Medicaid managed care delivery system for which the managed care plans make payments to applicable providers for at least some populations: primary care, behavioral health, and or obstetric care. For any such payments, I agree to submit the Medicaid managed care plans' provider payment increase methodology, including the information listed in STC 11.7 through the state directed payments submission process and in accordance with 42 CFR 438.6(c), as applicable, by no later than *December 31, 2023*. The state will also provide similar documentation for the additional payment increases required under STC 11.2.
If the state utilizes a managed care delivery system for the applicable service categories, then in accordance with STC 11.8, I attest that necessary arrangements will be made to assure that 100 percent of the amount necessary, so that the Medicaid to Medicare ratio increases by two percentage points, will be paid by managed care plans to the providers of those service categories and none of this payment rate increase is retained by the managed care plans. The state will also assure that 100 percent of the additional payment increases under STC 11.2 will be paid to providers of the applicable services.
California agrees not to use DSHP funding to finance any provider payment rate increase required under Section 11. California further agrees not to decrease provider payment rates for other Medicaid- or demonstration-covered services to make state funds available to finance provider rate increases required under STC 11.
I, *Lindy Harrington, Assistant State Medicaid Director*, attest that the above information is complete and accurate. *Lindy Harrington, Assistant State Medicaid Director* April 26, 2023

Reentry Demonstration Initiative Implementation Plan

Revised: October 2, 2024

Introduction:

On January 26, 2023, the Centers for Medicare & Medicaid Services (CMS) granted approval of California's request to amend the Section 1115(a) demonstration waiver "California Advancing and Innovating Medi-Cal (CalAIM)" to provide limited coverage for services furnished to a subset of incarcerated individuals for up to 90 days immediately prior to their expected dates of release.[14]

CalAIM Demonstration Special Term and Condition (STC) 9.9 requires California to submit a Reentry Demonstration Initiative Implementation Plan (hereinafter "Implementation Plan"). The following Implementation Plan details California's approach for meeting the five milestones outlined in STC 9.9 and additional conditions articulated in the CMS State Medicaid Director (SMD) Letter# 23-003, "Opportunities to Test Transition-Related Strategies to Support Community Reentry and Improve Care Transitions for Individuals Who Are Incarcerated."[15]

The Implementation Plan, effective October 1, 2024, is organized around the following five Section 1115 Demonstration Waiver milestones:

1. Increasing coverage and ensuring continuity of coverage for individuals who are incarcerated.
2. Covering and ensuring access to the minimum set of pre-release services for individuals who are incarcerated to improve care transitions upon return to the community.
3. Promoting continuity of care.
4. Connecting to services available post-release to meet the needs of the reentering population.
5. Ensuring cross-system collaboration.

For each milestone, the Implementation Plan describes (1) a summary of how the State already meets any expectation and specific activities related to each milestone, and (2) any actions needed to be completed by the State to meet all the expectations for each milestone, including the persons or entities responsible for completing these actions and the timelines and activities the State will undertake to achieve the milestone.

[15] SMD# 23-003, "Opportunities to Test Transition-Related Strategies to Support Community Reentry and Improve Care Transitions for Individuals Who are Incarcerated," April 17, 2023. Available at https://www.medicaid.gov/federal-policy-guidance/downloads/smd23003.pdf.

- DHCS is readying its systems and processes for a go-live in October 2024 and will commence conducting readiness assessments for facilities starting in the spring/summer of 2024. All facilities must go live by October 1, 2026. Nothing in this approval will supersede the state's compliance actions to meet all CAA of 2023 Section 5121 implementation requirements and timelines.

In addition to this Implementation Plan, DHCS released the "Policy and Operational Guide for Planning and Implementing CalAIM Demonstration Reentry Initiative" (hereinafter "Policy and Operational Guide") in October 2023.. (The expectation is that the Policy and Operational Guide will be updated as new policy and operational requirements are identified.) The Policy and Operational Guide provides detailed policy requirements and operational expectations for implementation of the CalAIM Demonstration Reentry Initiative. The audience of the Policy and Operational Guide is the State's implementation partners, including, without limitation, correctional facilities, county behavioral health agencies, county social service agencies/offices),[16] Medi-Cal Managed Care Plans (MCPs), Mental Health Plans (MHPs)/Drug Medi-Cal and Drug Medi-Cal Organized Delivery Systems (DMC/DMC-ODS), and community-based providers. The Policy and Operational Guide will be updated on an ongoing basis as implementation partners begin the process of standing up the CalAIM Demonstration Reentry Initiative.

[16] County social service agencies/offices are responsible for processing Medi-Cal applications and enrollment.

Milestone 1: Increasing coverage and ensuring continuity of coverage for individuals who are incarcerated

STC 9.9.a. The State must describe its plans to fully effectuate, no later than two years from approval of the expenditure authority, a state policy to identify Medicaid- eligible individuals or individuals who would be eligible for CHIP, except for their incarceration status, and suspend a beneficiary's eligibility or benefits during incarceration. It must describe its processes to undertake robust outreach to ensure beneficiary and applicant awareness of the policy and assist individuals with Medicaid application, enrollment, and renewal processes. Other aspects to be included in the Implementation Plan related to this milestone include the State's plan to make available a Medicaid and/or managed care plan identification number or card to an individual, as applicable, upon release; and establish processes to allow and assist all individuals who are incarcerated at a participating facility to access and complete a Medicaid application, including providing information about where to complete the Medicaid application for another State, e.g., relevant State Medicaid agency website, if the individual will be moving to a different State upon release.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
1.a. Implement a State policy for a suspension strategy during incarceration (or implement an alternative proposal to ensure that only allowable benefits	***Current State:*** Effective January 1, 2023, all California county social services agencies/offices were required to suspend, rather than terminate, Medicaid coverage for the duration of an individual's incarceration.[17,18] Both adult and youth coverage is suspended for the duration of incarceration.[19,20] State guidance, published in November 2022, provides information related to implementing DHCS' Medicaid benefit suspension and unsuspension (activation) policies, including guidance on suspension timelines for

[17] See ACWDL 21-22 (October 28, 2021) for more information on suspension of Medi-Cal benefits for youth.
[18] Public Health Omnibus Bill, SB 184 (Chapter 47, Statutes of 2022), amended Welfare and Institutions Code § 14011.10(d).
[19] Public Health Omnibus Bill, Senate Bill (SB) 184 (Chapter 47, Statutes of 2022) amended Welfare and Institutions Code § 14011.10(d) in 2022.
[20] Under SB 184, beginning January 1, 2023, Medi-Cal benefits for adults must be kept in suspended status until the individual is no longer an inmate of a public institution. For individuals under the age of 21 or Former Foster Youth (FFY) under the age of 26, under the federal SUPPORT Act and State law (Welfare & Institutions Code § 14011.10 (e)(1) & (2)), the State and counties are prohibited from terminating Medicaid eligibility because the individual is an inmate of a public institution.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
are covered and paid for during incarceration, while ensuring coverage and payment of full benefits as soon as possible upon release), with up to a two-year glide path to fully effectuate.	individuals with short-term stays.[21,22] The following summarizes the State's policy and operational approach: • Through the benefit suspension process, the correctional facility reports the member's incarceration status to the county; the social services agency/office will change an individual's Medi-Cal status from "active" to "suspended." While in the suspension period, the individual will be eligible to receive inpatient hospitalization and pre-release services (for no more than 90 days) only. Individuals receive a notice of action when their Medi-Cal coverage is suspended and again upon reactivation. • If inpatient hospital services are required during an individual's incarceration, the correctional facility can submit an application for the county or State Medi-Cal Incarceration Eligibility Program (MCIEP). MCIEP occurs at both a State and county level and allows Medi-Cal reimbursement for inpatient hospital stays of 24 or more hours for incarcerated individuals who are determined eligible for Medi-Cal. • All individuals found eligible for pre-release services, including individuals who were incarcerated for 28 days or less, will be assigned a specific aid code that will ensure the only services that will be provided and paid for are Reentry Demonstration Initiative services. DHCS required social services agencies/offices, County Sheriff's Departments and County Probation Departments to complete and submit readiness assessments in November 2022, through which they attested to their readiness to implement pre-release Medi-Cal application processes.[23] DHCS also implemented a monitoring plan to assess compliance with the mandate, including suspension and unsuspension processes, and ongoing implementation of the mandate.
	Future State: Planned Activities and Associated Timelines:

[21] See ACWDL 22-26 (October 28, 2022) for more information on suspension/unsuspension for individuals incarcerated and released to different counties, the annual renewal policy, change in circumstance redeterminations, and notices of action.
[22] See ACWDL 22-27 (November 10, 2022) for more information on pre-release application processes for juvenile and adult inmates of county correctional facilities and county youth correctional facilities.
[23] See MEDIL 22-46 and MEDIL 22-47 (November 10, 2022) for more information on the Pre-Release Medi-Cal Application Mandate Readiness Assessments for County Social services agencies/offices and County Sheriff's Departments and County Probation Departments.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	• DHCS required all counties to be in full compliance with the CalAIM Medi-Cal Pre-Release Application mandate by June 30, 2023; this mandate includes implementing suspension and reactivation processes described above. • Beginning July 2023, DHCS will implement enforcement actions, including requiring counties that are not in compliance to complete an ongoing Plan of Action and Milestones (POAM) and provide DHCS with bi-monthly updates until they are deemed compliant. (Ongoing, beginning July 2023) • To support tracking of implementation progress and monitoring, DHCS will also require social services agencies/offices, County Sheriff's Departments, and County Probation Departments to submit Pre-Release Medi-Cal application data on a quarterly basis, starting November 1, 2023.[24] **(November 2023)** • DHCS will continue to monitor and evaluate the State's pre-release suspension processes and make program changes, as needed, as pre-releases go live.[25] **(Ongoing)** • DHCS will continue to monitor and evaluate compliance with suspension processes and provide ongoing technical assistance to implementation stakeholders, including correctional facilities and county social services agencies/offices, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge**: Under Welfare and Institutions Code Section 14011.10(d), social services agencies/offices must suspend, rather than terminate, coverage for Medi-Cal members who are incarcerated for the duration of their incarceration. However, suspending Medi-Cal coverage for all incarcerated Medi-Cal members—and the time lags associated with doing so—may result in situations where individuals re-enter the community without active Medi-Cal, especially for those who were only incarcerated for several hours or days. ○ **Mitigation Approach**: For individuals likely subject to a short-term stay of incarceration, the benefit suspension will only be activated after the individual has been incarcerated for at least 28 days. The objective of this approach is to

[24] See MEDIL 23-24 (April 13, 2023) and Erratum to MEDIL 23-24 (I 23-24E (ca.gov) for more information on reporting requirements for pre-release application data.

[25] See MEDIL 23-24 (April 13, 2023) for more information on DHCS' monitoring plan for the CalAIM mandated pre-release Medi-Cal application process implementation.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	minimize gaps in coverage and ensure the individual has access to full benefits as quickly as possible upon release. Additionally and as noted, individuals found eligible for pre-release services, including those who were incarcerated for 28 days or less, will be assigned a specific aid code to ensure the only services that will be provided and paid for are Reentry Demonstration Initiative services. As noted above, DHCS will also continue to monitor and evaluate the State's pre-release suspension processes and make program changes, as needed. • **Challenge**: Some incarcerated individuals with suspended Medi-Cal may not have their coverage unsuspended upon community reentry due to communication delays or unclear understanding of roles and responsibilities between correctional facilities and social services agencies/offices, among other factors. ○ **Mitigation Approach**: DHCS is requiring that correctional facilities make every effort to notify the social services agency/office a week prior to the individual's expected release date, if known, and no later than one business day before the expected release date. If the release is unplanned, correctional facilities must make best efforts to notify social services agencies/offices within 24 hours of the unplanned release. DHCS is also specifying the specific data elements that must be communicated from the correctional facility to the social services agency/offices to support coordination (e.g., individual's full name (and any known aliases), date of birth, client identification numbers/Social Security numbers, and known/estimated release date). DHCS is also requiring that social services agencies/offices see the release from incarceration is reported, activate coverage within one business day of notification with the ultimate goal of ensuring the individual can access benefits upon release. As noted above, DHCS will also continue to monitor and evaluate compliance with suspension processes and provide ongoing technical assistance to implementation stakeholders, including correctional facilities and county social services agencies/offices as needed.
	Current State:

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
1.b. Ensure that any Medicaid-eligible person who is incarcerated at a participating facility but not yet enrolled is afforded the opportunity to apply for Medicaid in the most feasible and efficient manner and is offered assistance with the Medicaid application process in accordance with 42 CFR § 435.906 and § 435.908. This could include applications online, by telephone, in person, or via mail or common electronic means in accordance	State prisons already have standardized Medicaid application processes in place, consistent with State policy and CMS sub-regulatory guidance. Effective January 1, 2023, correctional facilities and social services agencies/offices were mandated to implement pre-release Medi-Cal application processes.[26] • County jails and youth correctional facilities are in various States of readiness to implement pre-release Medi-Cal application processes. All County Welfare Directors' Letter (ACWDL) 14-24 describes policies and procedures for the pre-release Medi-Cal application process for State prisons.[27] • ACWDL 22-27 provides detailed guidance and directives for implementing the mandatory pre-release Medi-Cal application process for county social services agencies/offices and county correctional facilities.[28] • As part of the technical assistance provided to correctional facilities and social services agencies/offices, DHCS developed and shared minimum Medi-Cal application and enrollment processes to ensure all potentially eligible individuals are screened for Medi-Cal eligibility at or near intake or at minimum of 135 days prior to release when the release date is known.[29,30] • Correctional facilities or their designated entity are expected to facilitate and submit, and social services agencies/offices must receive and process, pre-release Medi-Cal applications from individuals in correctional facilities submitted online, via mail, telephone, or fax. • In accordance with Medicaid regulations, ACWDL 22-27, requires social services agencies/offices to notify applicants of the outcome of their eligibility determination through an eligibility determination notice (aka Notice of Action) and issue a Benefits Identification Card

[26] In accordance with Penal Code Section 4011.11 and as outlined in ACWDL 22-27 (November 10, 2022).
[27] See ACWDL 14-24 (May 6, 2014) for more information on the State inmate pre-release Medi-Cal application process.
[28] See ACWDL 22-27 (November 10, 2022) for more information on pre-release application processes for juvenile and adult inmates of county correctional facilities and county youth correctional facilities.
[29] A slide deck that provides an overview of the pre-release Medi-Cal application mandate is available here. An issue brief titled Strategies for Conducting Pre-Release Medi-Cal Enrollment in County Jails brief describing best practices for pre-release Medi-Cal enrollment can be found here.
[30] A slide deck that provides an overview of the pre-release Medi-Cal application mandate is available here. An issue brief titled Strategies for Conducting Pre-Release Medi-Cal Enrollment in County Jails brief describing best practices for pre-release Medi-Cal enrollment can be found here.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
with 42 CFR § 435.907. All individuals enrolled in Medicaid during their incarceration must be provided notice of any Medicaid eligibility determinations and actions pursuant to 42 CFR § 435.917 and § 431.211.	(BIC), both sent to the community address listed on the Medi-Cal application or on file. Social services agencies/offices and correctional facilities are expected to work together to ensure processes are in place for individuals to receive all communications sent by the Social services agency/office to the applicant.[31] • The State has also worked to establish data-sharing processes between social services agencies/offices and correctional facilities, including allowing correctional facilities to access the State's electronic eligibility verification systems.[32] • DHCS is encouraging correctional facilities or their designees to leverage an Accelerated Enrollment (AE) portal for incarcerated individuals for whom it would be infeasible to complete the Medi-Cal application and enrollment process before the individual's release date (e.g., individuals with very short incarcerations or unpredictable release dates). The AE process provides Medi-Cal applicants with temporary full-scope benefits while their self-attested eligibility information, including income, is being verified; those benefits continue until the final eligibility determination is made on the application. • DHCS also requires that individuals are afforded the right to request a fair hearing (in writing, online, and by telephone, but not in person) regarding any adverse actions related to Medicaid coverage or services. For individuals who remain incarcerated during their scheduled fair hearing date, correctional facilities are required to implement a process by which the incarcerated individual can attend the hearing by telephone, at minimum, or virtually if the individual is able to participate via videoconferencing. Many correctional facilities already have capabilities in place to support telephone or virtual court hearings, and DHCS expects these facilities to leverage this existing infrastructure to support Medi-Cal fair hearings. • In order to support planning for and implementation of pre-release Medi-Cal applications, DHCS provided two rounds of capacity building Providing Access and Transforming Health Initiative (PATH) grant funding to correctional facilities and social services

[31] See ACWDL 22-27 (November 10, 2022) for more information on pre-release application processes for juvenile and adult inmates of county correctional facilities and county youth correctional facilities.

[32] See MEDIL 23-13 (March 6, 2023) for more information on the Eligibility Verification System and its utilization by county correctional facilities and county youth correctional facilities.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	agencies/offices.[33,34] The first round of capacity building grant funding supported collaborative planning activities (e.g., collaborative planning sessions, identification of operational gaps, and hiring processes for staff to support pre-release application processing). The second round of capacity building grant funding supported implementation and administration activities related to pre-release Medi-Cal applications (e.g., IT systems upgrades, physical infrastructure modification, development of protocols and procedures, and staff training to coordinate pre-release applications).
	Future State: Planned Activities and Associated Timeline: • County and youth correctional facilities and social services agencies/offices were required to be in full compliance with the pre-release Medi-Cal application mandate by June 30, 2023. In order to ensure compliance with this mandate, DHCS is requiring that all counties report pre-release application data on a quarterly basis beginning November 2023.[35] **(Ongoing, beginning November 2023)** • DHCS will continue to monitor compliance with the pre-release application mandate throughout the implementation of pre-release services. **(Ongoing)** • DHCS will provide ongoing technical assistance to stakeholders, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** Because individuals are incarcerated, they will not be able to submit applications in person, and submissions via online portals and telephones may be restricted due to the unique nature of correctional facilities. While DHCS provided clear guidance in the Policy and Operational Guide that these standards for enrollment pathways do apply in all correctional facilities, the State cannot guarantee all pathways will be available in every facility. ○ **Mitigation Approach:** The State will monitor Medi-Cal enrollment against the expectation that standards for enrollment pathways apply in all correctional facilities and will work with correctional facilities and social services

[33] Guidance regarding the first round of capacity building grant funding can be found here.
[34] Guidance regarding the second round of capacity building grant funding can be found here.
[35] See MEDIL 23-24 (April 13, 2023) for more information on policies and procedures for county Medicaid eligibility departments and county correctional facilities to document implementation efforts of the pre-release Medicaid mandate.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	agencies/offices to continue to refine operational processes related to Medi-Cal enrollment in correctional settings. • **Challenge:** Individuals will be afforded the right to request a fair hearing, and many correctional facilities already have capabilities in place to support telephone or virtual hearings. While these expectations, guidance, and standards apply and the State will monitor for compliance with them, the State cannot guarantee these processes will be implemented in every instance given the unique nature of carceral settings. For example, the State may observe increased rates of no-shows to fair hearings for incarcerated individuals (compared to individuals in the community) due to facility lockdowns and other factors that contribute to high rates of canceled visits in the correctional setting, broadly. ○ **Mitigation Approach:** DHCS will monitor the number of fair hearing requests of individuals who were found ineligible for Medi-Cal and pre-release services and the rates of no-shows and will work with correctional facilities to continue to refine operational processes related to requests for fair hearings.
1.c. Ensure that all individuals at a participating facility who were enrolled in Medicaid prior to their incarceration are offered assistance with the Medicaid renewal or redetermination process requirements in accordance with 42 CFR § 435.908 and § 435.916. All	***Current State:*** • As described in Section 1.a, social services agencies/offices must suspend coverage for Medi-Cal members who are incarcerated for the duration of their incarceration. Individuals who were enrolled in Medi-Cal at the time of incarceration will not need to reapply for Medi-Cal. Once correctional facilities report the beneficiary's incarceration release date to the social services agency/office, Medi-Cal benefits will be activated upon release. • Effective January 1, 2023, annual redeterminations are not required for individuals who are incarcerated if they are the only individual on their Medi-Cal case. If the incarcerated member is part of a household, the household will still be subject to an annual redetermination.[36] • Upon the individual's release, a redetermination would only be required if one had not been completed within the 12 months prior to the release date, barring any other known changes in circumstance which would require a change of circumstance redetermination under existing policy.

[36] See ACWDL 22-26 (October 28, 2022) for more information on suspension/unsuspension for individuals incarcerated and released to different counties, the annual renewal policy, change in circumstance redeterminations, and notices of action.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
individuals enrolled in Medicaid during their incarceration must be provided notice of any Medicaid eligibility determinations and actions pursuant to 42 CFR § 435.917 and § 431.211.	• For instances when redeterminations are required, social services agencies/offices are required to notify applicants of the outcome of an eligibility determination through a Notice of Action sent to the community address listed on the Medi-Cal application or on file. DHCS expects social services agencies/offices and correctional facilities to collaborate to ensure that individuals receive all communications sent by the Social services agency/office to the applicant. • DHCS, in partnership with social services agencies/offices, will continue to work with correctional facilities to ensure annual and change of circumstance redeterminations are completed, as needed.
	Future State: Planned Activities & Associated Timelines: • DHCS will continue monitoring compliance with redetermination processes throughout the implementation of pre-release services. **(Ongoing)** • DHCS will provide ongoing technical assistance to stakeholders, as needed. **(Ongoing)**

	Challenges and Mitigation Approaches:
	• **Challenge:** As described above in Section 1.a., potential time lags in suspending Medi-Cal coverage for incarcerated Medi-Cal members could result in situations where individuals re-enter the community without active Medi-Cal, especially for those who were incarcerated for a short period.
	  ○ **Mitigation Approach:** For individuals likely subject to a short-term stay of incarceration, the benefit suspension will be activated only after the individual has been incarcerated for at least 28 days to ensure gaps in coverage are minimized and the individual has access to full benefits as quickly as possible upon release.
	• **Challenge**: As described above, communication delays between correctional facilities and social services agencies/offices, confusion about roles and responsibilities or other breakdowns in suspension process protocols or timelines could result in incarcerated individuals re-entering the community with their Medi-Cal coverage still suspended.
	  ○ **Mitigation Approach**: DHCS is requiring that correctional facilities make every effort to notify the social services agency/office a week prior to the individual's expected release date, if known, and no later than one business day

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	before the expected release date. If the release is unplanned, correctional facilities must make best efforts to notify social services agencies/offices within 24 hours of the unplanned release. DHCS has specified the specific data elements that the correctional facility must share with the social services agency/office support coordination. DHCS is also requiring that social services agencies/offices the release from incarceration is reported, activate coverage within 1 business day of notification. DHCS will continue to monitor compliance with suspension processes and provide ongoing technical assistance to implementation stakeholders, including correctional facilities and county, social services agencies/offices as needed.
1.d. Implement a State requirement to ensure that all Medicaid-enrolled individuals who are incarcerated at a participating facility have Medicaid and/or managed care plan cards or some other Medicaid and/or managed care enrollment documentation (e.g., identification number, digital documentation, instructions on	***Current State:*** • As outlined in State guidance, social services agencies/offices are required to notify applicants of the outcome of their eligibility through an eligibility determination notice (aka Notice of Action) and issue a BIC.[37]
	Future State: Planned Activities & Associated Timelines: • Social services agencies/offices will work with correctional facilities to issue a BIC prior to release; social services agencies/offices and correctional facilities will develop processes to issue a temporary BIC when individuals have short-term stays. DHCS will auto-assign incarcerated individuals who receive pre-release services to an MCP to ensure coverage and access to services upon re-entry into the community. Once coverage is unsuspended and MCP enrollment activated upon release, MCPs will be required to send standard member materials, including a BIC, to each new or re-enrolled member's residence. **(DHCS IT system changes to support the Reentry Initiative will be in place by October 1, 2024[38]. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than**

[37] See MEDIL 23-13 (March 6, 2023) for more information on the Eligibility Verification System and its utilization by county correctional facilities and county youth correctional facilities. See ACWDL 22-27 (November 10, 2022) for more information on pre-release application processes.

38 While minimal viable products for system updates will be ready by October 1, 2024, there will be subsequent IT system builds and phases for full project implementation.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
how to print a card) provided to the individual upon release, along with information on how to use their coverage (coordinated with the requirements under milestone #3 below).	**October 2026, depending on the correctional facilities' go-live date. For more information on go-live dates and readiness assessment requirements please see Appendix.)** • DHCS included guidance for pre-release and re-entry care managers in the Policy & Operational Guide that requires the care managers to ensure that the individual has received the BIC as part of the re-entry care planning process and warm handoff (described in Section 2.c. and 3.d.). **(October 2023)** • DHCS will continue monitoring compliance of the requirement to ensure individuals are able to receive Medicaid-related communication and materials prior to and throughout the implementation of pre-release services.[39] **(Ongoing)** • DHCS will provide ongoing technical assistance to stakeholders, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** Correctional facilities and social services agencies/offices may face challenges with timely issuance and receipt of BICs, particularly for those individuals who are incarcerated for a short period. ○ **Mitigation Approach:** As noted, social services agencies/offices are required to work with the correctional facility to issue a temporary paper BIC to the individual while they are incarcerated so that they can access Medi-Cal immediately upon release. A permanent BIC must also be mailed to the community address listed on the Medicaid application or on file. ○ Individuals will be auto-assigned to an MCP for when they are released into the community. The MCP will send all plan materials and the plan card to the community address listed on the Medicaid application or on file. DHCS will require pre-release and post-release care managers to ensure that the individual has received the Medi-Cal BIC as part of re-entry planning and (where applicable) the warm handoff process, and the plan card in the post-release period. ○ Lastly, DHCS published an issue brief on strategies for conducting pre-release Medi-Cal enrollment in county jails,

[39] See MEDIL 23-24 (April 13, 2023) for more information on policies and procedures for county Medicaid eligibility departments and county correctional facilities to document implementation efforts of the pre-release Medicaid mandate.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	which outlines best practices for ensuring BICs are issued in a timely manner.[40]
1.e. Establish processes to allow and assist all individuals who are incarcerated at a participating facility to access and complete a Medicaid application, including providing information about where to complete the Medicaid application for another State (e.g., relevant State Medicaid agency website, if the individual will be moving to a different State upon release).	***Current State:*** • As outlined in 1.b., correctional facilities and social services agencies/offices are mandated to implement pre-release Medi-Cal application processes. • As part of this mandate, DHCS developed and distributed technical assistance materials[41] and a Policy and Operational Guide chapter that describes expectations that Medi-Cal application processes should occur in correctional facilities at or near intake in order to ensure all potentially eligible individuals are screened for and enrolled in Medi-Cal.
	Future State: Planned Activities & Associated Timelines: • The Policy and Operational Guide includes clear guidance to reentry care managers to provide individuals who may be moving to a different State upon release with Medicaid application information (e.g., State Medicaid agency website or hotline number) to the State in which they will reside. **(October 2023)** • DHCS will continue monitoring compliance with the pre-release application mandate throughout implementation of pre-release services. **(Ongoing)** • DHCS will continue to provide ongoing technical assistance to stakeholders, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** As noted above, incarcerated individuals are not able to submit applications in-person and, due to the unique nature of correctional settings, use of online portals and telephones may be subject to restrictions.

[40] Strategies for Conducting Pre-Release Medi-Cal Enrollment in County Jails, updated August 9, 2022; available here: https://www.dhcs.ca.gov/provgovpart/pharmacy/Documents/Issue-Brief-Strategies-PreRelease-MediCal-Enrollmentin-County-Jails-8-18-22.pdf

[41] A slide deck that provides an overview of the pre-release Medi-Cal application mandate is available here. An issue brief titled Strategies for Conducting Pre-Release Medi-Cal Enrollment in County Jails brief describing best practices for pre-release Medi-Cal enrollment can be found here.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	○ **Mitigation Approach:** DHCS will provide clear guidance around expectations for the pre-release application process and for reentry care to managers to provide Medi-Cal application information to individuals who may be moving to a different State upon release. DHCS will monitor Medicaid enrollment to ensure compliance with pre-release application requirements and work with correctional facilities and social services agencies/offices to continue to refine relevant operational processes.

Milestone 2: Covering and ensuring access to the minimum set of pre-release services for individuals who are incarcerated to improve care transitions upon return to the community

STC 9.9.b. The State must describe its plan to implement a screening process to identify individuals who qualify for pre-release services, consistent with the qualifying criteria outlined in these STCs. The State must detail how the facilities will ensure that beneficiaries can access the demonstration benefit package, as clinically appropriate. The State must describe its approach and plans for implementing processes to assure that all pre-release service providers, as appropriate for the provider type, have the necessary experience and training, and care managers have knowledge of (or means to obtain information about) community-based providers in the communities where individuals will be returning upon release. Further, as applicable, the State must establish State requirements for carceral health providers who are not participating in Medicaid or CHIP that are similar to Medicaid provider standards, as well as program integrity standards to ensure appropriate billing.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
2.a. Implement State processes to identify individuals who are incarcerated who qualify for pre-release services under the State's proposed demonstration design (e.g., by chronic condition, incarceration in a participating facility).	***Current State:*** • DHCS developed detailed definitions for its pre-release eligibility criteria, which are available in Attachment W of the approved 1115 Demonstration.[42] • DHCS does not yet have State processes in place to identify individuals who are incarcerated who qualify for pre-release services. • DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to establish a screening process.
	Future State: Planned Activities & Associated Timelines: Correctional facilities will be responsible for operationalizing the pre-release screening process to identify adults eligible for pre-release services, guidance to implementing partners that is further outlined in the state's Policy and Operational Guide. Note, all youth (defined as youth in youth correctional facilities and youth under the age of 21 or former foster youth in an adult facility) will be eligible for pre-release services and will not need to be screened. To implement these requirements, DHCS will:

[42] Please see Attachment W in the CalAIM Reentry Demonstration approval available here.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	• Require that the correctional facility screen all incarcerated Medi-Cal eligible adults for any qualifying conditions in accordance with minimum requirements specified in the Policy & Operations Guide. **(The Policy and Operations Guide was released in October 2023. DHCS IT system changes to support the Reentry Initiative will be in place by October 1, 2024. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date. For more information on go-live dates and readiness assessment requirements please see Appendix.)** • Allow flexibility for correctional facilities in how they implement the screening process, so long as they are screening for all eligibility criteria (including for behavioral health linkages), and allow individuals to be screened or otherwise identified as qualifying for pre-release services/behavioral health linkages at any time during incarceration (e.g., as part of initial screening at booking, as part of a later screening, through available medical records/diagnoses information, and through self-attestation). Screening tools for behavioral health linkages must be validated, State-approved screening instruments or another State-approved option. DHCS is also exploring how to develop a standardized screening process that will be developed and released at a future date. **(The Policy and Operations Guide was released in October 2023. DHCS IT systems changes to support the Reentry Initiative will be in place by October 1, 2024. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date. For more information on go-live dates and readiness assessment requirements please see Appendix.)** • Encourage correctional facilities to leverage existing health screening and assessment processes that are already in place to screen individuals for eligibility to receive pre-release services (e.g., based on information collected through a facility's existing screening/assessment processes). **(Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date)** • Require correctional facilities to demonstrate how they will meet this requirement as part of the readiness assessments. No

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	correctional facility will be able to bill for pre-release services until it demonstrates that it has a screening process that meets policy and operational requirements. **(DHCS released a draft readiness assessment template in October 2023 for stakeholder comment and plans to release the final readiness assessment tool in late 2023/early 2024. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date)** • Develop a pre-release services eligibility screening portal for correctional facilities to use to support screening and identification of qualifying individuals. This technical solution, known as the Justice-Involved Screening Portal, will allow correctional facilities to document eligibility for pre-release services, triggering the appropriate aid code for the individual's case in State Medicaid systems. The Portal will also allow the facility to access information about an individual's Medicaid eligibility, status of any other aid codes that may be active, and managed care enrollment, as applicable, to support service delivery. **(DHCS systems to support the Reentry Initiative will be in place by October 1, 2024. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date)** • Memorialize the minimum requirements for the pre-release screening process in the Policy and Operational Guide. **(October 2023)** • Monitor against pre-release screening requirements and make program changes, as needed, as pre-release services are implemented and needed changes are identified. **(Ongoing, beginning in October 2024)** • Provide technical assistance to stakeholders, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** Given the prevalence of short-term stays and unpredictable release dates, particularly in county jails and county youth correctional facilities, correctional facilities may

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	face operational challenges in screening all individuals who are incarcerated for only a short period of time. ○ **Mitigation Approach:** DHCS has developed detailed "short-term stay" operational guidance and expectations for correctional facilities providing services to individuals who are expected to have short term stays. The expectations seek to take into account the inherent constraints in the corrections environment and articulates minimum requirements and best practices based on the duration of the JI individual's stay within the correctional facility. DHCS will require that individuals are screened for pre-release services eligibility as close to intake as possible to ensure that individuals have access to as much of the full 90 days of pre-release services as possible. DHCS will monitor compliance with these requirements, through qualitative (e.g., survey) and quantitative (e.g., claims data related to screening) data. • **Challenge:** While DHCS is allowing flexibility in screening tools to allow correctional facilities to leverage the existing health screening and assessment processes already in place, variation in screening tools may result in some individuals not being appropriately identified for pre-release services. ○ **Mitigation Approach**: DHCS will provide to correctional facilities the minimum requirements each screening process should have to ensure individuals are properly screened for pre-release service eligibility. DHCS will monitor rates of individuals deemed eligible for pre-release services across correctional facilities to identify discrepancies that may indicate issues with screening processes or tools at a given facility. Dependent on lessons learned from initial implementation experiences and related data, DHCS develop a standardized screening process to be implemented at a future date.
	Current State:

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach

2.b. Cover and ensure access to the minimum short-term, pre-release benefit package, including case management to assess and address physical and behavioral health needs and HRSN, MAT services for all types of SUD as clinically appropriate with accompanying counseling, and a 30-day supply of medication (as clinically appropriate based on the medication dispensed and the indication) provided to the beneficiary immediately upon release, to Medicaid-eligible individuals identified as participating in the Reentry Section 1115 Demonstration Opportunity. In addition, the State should specify any additional pre-release services that the State proposes to cover for beneficiaries.	DHCS developed definitions for its targeted pre-release services as listed below. Additional details are available in Attachment W of the approved 1115 waiver.[43]
	
	• **Case Management:** Case management is intended to facilitate reentry planning into the community in order to (1) support the coordination of services delivered during the pre-release period and upon reentry, (2) ensure smooth linkages to social services and supports, and (3) ensure arrangement of appointments and timely access to appropriate care and pre-release services delivered in the community.
	• **Medication-Assisted Treatment (MAT):** Covered services for MAT are as follows:
	  ○ MAT for Opioid Use Disorders (OUD) includes all medications approved under Section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and all biological products licensed under Section 351 of the Public Health Service Act (42 U.S.C. 262) to treat opioid use disorders as authorized by the Social Security Act Section 1905(a)(29).
	  ○ MAT for Alcohol Use Disorders (AUD) and Non-Opioid Substance Use Disorders includes all FDA-approved drugs and services to treat AUD and other SUDs.
	  ○ Psychosocial services delivered in conjunction with MAT for OUD as covered in the State Plan 1905(a)(29) MAT benefit, and MAT for AUD and Non-Opioid Substance Use Disorders as covered in the State Plan 1905(a)(13) rehabilitation benefit, including assessment; individual/group counseling; patient education; and prescribing, administering, dispensing, ordering, monitoring, and/or managing MAT.
	  ○ Note that as part of the approved Reentry 1115 Demonstration, California received approval that MAT services may be provided by correctional facilities that are not Drug Medi-Cal (DMC)-certified providers as otherwise required under the State Plan for the provision of the MAT benefit. Without this authority, correctional facilities that are not DMC-certified providers would have experienced additional challenges in providing MAT services.

[43] Please see Attachment W in the CalAIM Reentry Demonstration approval available here.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	• **Physical and Behavioral Health Clinical Consultation Services:** Physical and behavioral health clinical consultation services include targeted preventive, physical, and behavioral health clinical consultation services related to the qualifying conditions. Clinical consultation services are intended to support the creation of a comprehensive, robust, and successful reentry plan, including conducting diagnosis, stabilization, and treatment in preparation for release (including recommendations or orders for needed labs, radiology, and/or medications); providing recommendations or orders for needed medications and durable medical equipment (DME) that will be needed upon release; and consulting with the pre-release care manager to help inform the pre-release care plan. Clinical consultation services are also intended to provide opportunities for individuals to meet and form relationships with the community-based providers who will be caring for them upon release, including behavioral health providers, and enable information sharing and collaborative clinical care between pre-release providers and the providers who will be caring for the members after release. Note that behavioral health clinical consultation services may be provided by correctional facilities that are not certified mental health organizations or agencies as otherwise required under the State Plan. Please note that peer support specialists are a provider type that would fall under this benefit. This provider type is distinct Medi-Cal Peer Support Specialist services under the SMHS and DMC-ODS programs. Counties can voluntarily opt-in to provide this service in one or both county behavioral health delivery systems (SMHS, and DMC or DMC-ODS). • **Laboratory and Radiology Services:** Laboratory and radiology services will be provided consistent with the State Plan. • **Medications and Medication Administration:** Medications and medication administration will be provided consistent with the State Plan. • **Community Health Worker Services:** Community Health Worker Services will be provided consistent with the Community Health Worker State Plan. • **Services Provided Upon Release:** Services provided upon release include: ○ Covered outpatient prescribed medications and over-the-counter drugs (a minimum 30-day supply as clinically appropriate, consistent with the approved Medicaid State Plan).

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	○ DME consistent with Medi-Cal State Plan requirements. DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to establish processes and infrastructure needed to deliver pre-release services. .
	Future State: Planned Activities & Associated Timelines: *Readiness Assessments*. To support implementation of the pre-release services benefit package, DHCS will implement a correctional facility Readiness Assessment and provider enrollment processes, issue necessary guidance including around provision of pre-release services for individuals with short-term stays, and track duration of pre-release services against 90-day limits, among other activities. Implementation activities will take place in accordance with the timelines described below. To ensure the delivery of services in the pre-release period, and as required by the demonstration's STCs, DHCS established policy will require all correctional facilities to demonstrate their readiness to be able to provide pre-release services in order to participate in the Reentry Demonstration Initiative prior to going live with pre-release services. (See Section 5.a. for more details on readiness assessments.) • DHCS will require that correctional facilities submit their readiness assessments to DHCS at least five months prior to their proposed go-live date. As part of the correctional facility readiness assessment, DHCS will assess correctional facilities' ability to provide pre-release services to individuals who are eligible. **(April 2024-Septemberl 2026)** Correctional facilities will need to demonstrate readiness related to Medi-Cal application and suspension processes as well as the following pre-release service provision-related activities: 1. **90-Day Pre-Release Eligibility and Behavioral Health Linkage Screening**

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	a. Screening for Pre-Release Services b. Screening for Behavioral Health Linkages 2. **90-Day Pre-Release Service Delivery** a. Medi-Cal Billing and Provider Enrollment b. Support of Pre-Release Care Management c. Clinical Consultation d. Virtual/In-Person In-Reach Provider Support e. Support for Medications f. Support for MAT g. Support for Prescriptions Upon Release h. Support for DME Upon Release 3. **Reentry Planning and Coordination** a. Release Date Notification b. Care Management Reentry Plan Finalization c. Reentry Care Management Warm Handoff d. Reentry Behavioral Health Linkage 4. **Oversight and Project Management** a. Staffing Structure and Plan b. Governance Structure for Partnerships c. Reporting and Oversight Process *Provider Enrollment Processes* • In order for correctional facilities to deliver and be reimbursed for targeted pre-release services (e.g., care management, medications, MAT, and labs/radiology), DHCS will require that each pharmacy and facility enroll through the Medi-Cal provider process. **(January 2024-September 2026)** o Correctional facilities will enroll in Medi-Cal through the following provider enrollment pathways: ▪ *Correctional Pharmacy Enrollment:* DHCS will require that each State prison, county jail, youth correctional facility with an on-site pharmacy, and any pharmacy located in or out of state that is contracted to provide pre-release prescription services to eligible incarcerated individuals, enroll as a Medi-Cal pharmacy. Enrollment will be location-specific, and only one pharmacy per site must enroll. ▪ *Correctional Provider Enrollment:* DHCS will require that each State prison, county jail, and youth correctional facility enroll as a Medi-Cal

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	provider under the Medi-Cal exempt from licensure clinic status. Enrollment will be location-specific, and only one provider enrollment per site will be required. The clinic that is enrolled in Medi-Cal within the correctional facility must oversee all billing submitted to DHCS, with the exception of community-based, in-reach providers who will be separately enrolled as Medi-Cal providers and directly bill DHCS for services. o All providers delivering pre-release services within the correctional facility will be licensed, registered, certified, or otherwise appropriately credentialed consistent with Medicaid State Plan requirements. Correctional facilities will be required to attest and provide documentation, as necessary, that the providers delivering Medi-Cal services meet those requirements as part of the readiness assessment. o A limited number of correctional facility-based providers who order, prescribe, or refer services and medications and operate under the exempt from licensure clinic status may not be required to enroll in Medi-Cal but will be required to meet the State's Medi-Cal provider participation requirements. o DHCS will monitor and regulate all employed and contracted providers under this demonstration through the following mechanisms: ▪ *Monitoring of the exempt from licensure clinic:* All providers will bill under either the pharmacy or exempt from licensure clinic status. As part of the exempt from licensure clinic provider agreement, facilities must attest to compliance with a number of program integrity measures including, but not limited to: billing for claims with an NPI that was registered with CMS; not engaging in conduct contrary to the public health, welfare, safety or fiscal integrity of the Medi-Cal program; ensuring compliance with non-discrimination clauses; agreeing to maintain in good standing liability insurance; making, keeping and maintaining record keeping consistent with state and federal regulations; upon request, making available copies of records to DHCS, the Attorney General and the Secretary; ensuring confidentiality of beneficiary

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	medical records; disclosing all information as required by Federal Medicaid laws and regulations and any other information required by DHCS; and attesting that it shall not engage or commit provider fraud, waste and abuse. ▪ *Monitoring individual providers' ordering and prescribing activities:* DHCS will conduct oversight and monitoring of such providers who are not enrolled in Medi-Cal but are referring, ordering, or prescribing under the correctional facility exempt from licensure clinic. DHCS will continue to require individual level NPIs of the ordering, referring, or prescribing providers on all orders, referrals (as required), and prescriptions. DHCS will track the DME orders and prescriptions (covered as pre-release services) for unusual prescribing and ordering processes. o Pre-release care management may be provided by embedded care managers or in-reach care managers and will be reimbursed on a fee-for-service (FFS) basis. To ensure continuity between the pre- and post-release periods, community-based care managers who will serve the justice-involved population must agree to enroll as FFS Medi-Cal providers and be willing to, at minimum, conduct in-reach warm handoffs with an embedded pre-release care manager. *Provider Payment Process* • Pre-release covered services will be delivered, claimed, and paid for via Medi-Cal's FFS delivery system. FFS claims may be submitted through normal processes utilizing Medi-Cal Rx for pharmacy services; CA-MMIS for clinical services including care management, clinical consultations, MAT, CHW services, laboratory, and radiology. Federally Qualified Health Centers (FQHCs) and Rural Health Clinics may bill and claim within the FFS system, which is supplemental to the prospective payment system (PPS) and not subject to reconciliation, for any in-reach pre-release services. Costs associated with JI pre-release services and billed through the FFS system will be excluded from any future calculations of the PPS rate.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	• DHCS will allow both providers embedded/contracted in the correctional facility (including care managers and physical and behavioral health clinical consultants) and community-based providers (including care managers/ECM providers and physical and behavioral health clinical consultants) to provide pre-release services. DHCS will provide billing and claiming guidance, including which NPI to bull under and which CPT codes to use in the Policy and Operations Guide and in Medi-Cal provider manuals. • DHCS will provide tiered rates for in-reach, in-person visits (e.g., for care management, clinical consultation, and CHWs) to account for the unique additional complexities and time for individual providers to pass through security clearance and deal with appointment cancellations due to lockdowns or other unique correctional facility challenges. • DHCS will develop five bundled payments for care management services. DHCS will provide guidance on billing care management bundles in the Policy and Operations Guide and in Medi-Cal provider manuals. *Issuance of Operational Guidance for Short-Term Stays and Care Manager Responsibilities* • To support the provision of services to individuals who have short stays in correctional facilities and unpredictable release dates (e.g., non-sentenced individuals in jails or youth in county youth correctional facilities), DHCS will issue clear guidance via the Policy and Operational Guide on how to provide pre-release services to individuals with short-term stays and/or unknown release dates. **October 2023)** ○ The Policy and Operational Guide includes minimum requirements and timelines for correctional facilities to provide Medi-Cal screening, pre-release eligibility screening, provision of pre-release services, and reentry planning and coordination as well as best practices based on duration of stay at a correctional facility. The Policy and Operational Guide will provide specific timelines for meeting minimum requirements in the Short-Term model and will be updated on an on-going basis. • In addition to information on the readiness assessment and short-term model, DHCS included clear guidance for care managers in the Policy & Operations Guide regarding care

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	manager roles and responsibilities to ensure correctional facilities and in-reach providers are able to deliver pre-release services against required timelines. **(October 2023)** *Monitoring the Duration of Pre-Release Services* • DHCS will track the duration of service provision to ensure coverage of pre-release services does not exceed 90 days per facility stay, per incarceration. **(DHCS will provide clear guidance to correctional facilities on starting, pausing, resetting, and tracking the number of days in a pre-release period in forthcoming guidance on the Provider Portal (Spring 2024). Correctional facility processes will be phased in over a two-year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date.)** For example: ○
	Challenges and Mitigation Approaches: ○ **Challenges:** Correctional facilities may experience challenges implementing components of the pre-release benefit package. For example: ▪ *Case Management:* Correctional facilities will need to establish new operational processes and infrastructure to enable required coordination with a diverse group of stakeholders including MCPs, county behavioral health agencies, and community-based providers. Additionally, correctional facilities that choose to use embedded providers will need to clearly define roles and responsibilities with community-based care managers prior to warm handoffs to ensure reentry care plan includes accurate details on community-based resources. • ***Mitigation Approach:*** DHCS will require all correctional facilities to pass/conditionally pass a readiness assessment, which will include defined processes for care management delivery, including detailed protocols for warm handoffs based on their care management delivery systems (i.e., either embedded or

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	in-reach care management models); additional information on a conditional pass can be found in section 5.a.. DHCS will also encourage all correctional facilities and counties to work collaboratively with all implementing partners, including MCPs, county behavioral health agencies, and community-based providers to establish processes and protocols that will be submitted to DHCS as part of the readiness assessment. ▪ *Medication Coverage During Pre-Release Period:* DHCS expects there will be some differences between drugs covered by Medi-Cal (as documented in the Medi-Cal Contract Drug List) and the drugs currently used by correctional facilities under their existing formularies. For example, some correctional facilities have stated they are unable to dispense medications in bottles due to safety concerns. Additionally, correctional facilities dispense some medications to individuals from a shared stock (e.g., from a non-patient specific bottle that is dispensed to multiple patients based on patient-specific orders). These medications are dispensed to individuals dose-by-dose in a patient-specific way, though the stock/shared bottle itself is not patient-specific. This medication distribution approach presents some challenges for correctional facility billing through Medi-Cal Rx, as the outpatient pharmacy benefit and federal regulations require that all billed medications be dispensed from the pharmacy in a specific patient manner. Correctional facilities will need to adjust their processes to comply with Medi-Cal Rx requirements. • ***Mitigation Approach:*** DHCS will work with correctional facilities to identify and minimize gaps by supporting the identification of alternative medications that

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	correctional facilities can provide in lieu of those that are currently being used but are not covered by the Medi-Cal Contract Drug List. DHCS will also consider adding high-priority medications used by correctional facilities to the Medi-Cal Contract Drug List. DHCS will provide billing guidance on physician-administered drugs to ensure non-patient specific medications can be billed to Medi-Cal. Additionally, DHCS will allow pharmacies located in or out of state that are contracted to provide pre-release prescription services to eligible incarcerated individuals to enroll in Medi-Cal to be able to bill for medications in the pre-release period and upon release. ▪ *Support for Medications Upon Release*: Correctional facilities that already have on-site pharmacies or partnerships with community-based pharmacies will need to enroll in Medicaid and develop new processes to bill/claim Medi-Cal Rx (including prior authorization, as needed). Correctional facilities that do not provide any medications because they do not have on-site/partnership pharmacy will need to establish new processes for providing medications upon release. DHCS also understands there will be operational complexities associated with sending active medications to a community pharmacy to ensure continued access in the post-release period, specifically for individuals leaving prison who may have been incarcerated for a relatively longer period of time and do not have an established residence/pharmacy. • ***Mitigation Approach***: DHCS developed a list of best practices to support delivery of medications in-hand upon release that was included in the Policy and Operations Guide. These best practices were informed by discussions with county partners and

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	include performing a medical checkout prior to release to ensure reentry with medications in-hand and storing medications to be dispensed upon reentry with an individual's personal property. DHCS recognizes that implementation of best practices will vary based on the specific setting and individual content. DHCS is also requiring pre- and post-release care managers to coordinate to support the individual in transferring medication refill orders to the individual's preferred community pharmacy, as necessary. ▪ *Support for DME Upon Release:* Correctional facilities may have to establish new processes to purchase DME for specific patients (as many currently do not provide DME upon release or provide DME that was used by others within the correctional facility and purchased in bulk at a date outside of the 90-day pre-release period), develop new processes to bill/claim Medicaid for DME, including prior authorization as needed, secure space to store DME until individual is released, and ensure that care managers coordinate to ensure provision of DME. • ***Mitigation Approach:*** DHCS developed a model roles and responsibilities chart that was included in the Policy and Operations Guide that describes a potential approach for coordinating across relevant entities for the provision of DME upon release. • **Challenge**: Implementation partners that have not traditionally billed Medi-Cal (e.g., correctional facilities and community-based providers that will be providing in-reach and post-release care management services) will be enrolling in Medi-Cal and setting up new billing and claiming processes for the first time and may face challenges navigating related requirements. ○ **Mitigation Approach**: To mitigate challenges, DHCS will provide clear guidance on Medi-Cal provider enrollment

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach

	and billing/claiming systems and processes to correctional facilities and other stakeholders who may be unfamiliar with related requirements; administer PATH capacity funds to support the development of the infrastructure and processes needed for provider enrollment and billing/claiming; and offer targeted technical assistance to stakeholders, including correctional facilities and non-traditional community-based providers, to assist in the development or modification of billing systems as needed. DHCS is also working to develop a Medi-Cal enrollment pathway for community-based organizations that will serve as pre- or post-release care management providers and will establish a glidepath for this requirement to support non-traditional providers who may experience challenges or require additional assistance to enroll as FFS providers.
	• **Challenge:** The majority of individuals incarcerated in county correctional facilities will not have release dates and may be released unexpectedly, making it difficult for correctional facilities to identify a 90-day pre-release period.
	  ○ **Mitigation Approach:** DHCS will allow correctional facilities to pause and restart the 90-day pre-release period in certain circumstances, as outlined in the section above.
	• **Challenge:** The vast majority of county corrections incarceration stays is less than 30 days, giving correctional facilities limited time to initiate pre-release services.
	  ○ **Mitigation Approach:** DHCS developed detailed operational guidance for correctional facilities on navigating short-stay situations. DHCS expects all county facilities to begin pre-release services as soon as the individual is identified as eligible. DHCS provided a short-term model in the Policy and Operations Guide outlining the time period for when pre-release services should begin in order to ensure maximum access to services in a short time period.

	Current State:

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
2.c. Develop State process to ensure care managers have knowledge of community-based providers in communities where individuals will be returning upon release or have the skills and resources to inform themselves about such providers for communities with which they are unfamiliar.	• DHCS does not yet have pre-release care management processes in place. ***Future State: Planned Activities & Associated Timelines:*** • Care management is a critical component of the State's Justice-Involved Reentry Initiative and essential to supporting individuals preparing for community reentry. DHCS will implement pre-release care management processes and requirements to ensure care managers have knowledge of and can connect individuals to community-based providers in the community to which they will return post-release, as described below. This minimum requirements for care managers is included in the Policy and Operations Guide. • DHCS will require that all individuals receiving pre-release services are assigned a pre-release care manager as close to being identified as eligible for pre-release services as possible (expected timeline requirements can be found in the Policy and Operational Guide). Pre-release care managers will either be in-reach, community-based care managers or embedded correctional facility providers. DHCS defines "in-reach care management model" as a model through which Medi-Cal-enrolled, community-based care management providers deliver care management services to individuals in correctional facilities, either in person or via telehealth. "Embedded care management" is a model through which the correctional facility employs or contracts with care managers to provide services in the correctional facility. All pre-release care managers will bill for services on a fee-for-service basis. Individuals who received pre-release service and who are eligible for managed care will be auto-assigned (with subsequent choice period) into a MCP and, upon release, qualify for the Enhanced Care Management (ECM) benefit.[44] • DHCS aims to maximize continuity of care management across the pre- and post-release periods. DHCS will strongly encourage correctional facilities to use a community-based, in-reach care manager that serves the individuals during both their pre- and post-release periods, such as community-based ECM providers that will continue to provide ECM services to

[44] More information on CalAIM's enhanced care management benefit is available here: https://www.dhcs.ca.gov/Pages/ECMandILOS.aspx.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	individuals following their reentry into the community.[45] If the correctional facility elects an embedded care management model, the pre-release care management provider will be required to facilitate a warm handoff to the community-based, post-release ECM care manager prior to release (ideally at least two weeks prior to release). DHCS will establish standard requirements for embedded care managers to implement warm handoffs with community-based care managers during the reentry process and will require that all warm handoff meetings include the individual and the pre- and post-release care managers. • As part of the warm handoff process, an embedded care manager is expected to work closely with the individual's assigned community-based, post-release ECM care manager and the individual to identify necessary community resources, as needed, and document them in the re-entry care plan. As part of the care model, embedded and community-based care managers should have information about providers in the communities in which the individual is being released, and the skill and resources to connect the individual to those providers. DHCS will require that the pre- and post-release care managers review the re-entry care plan with the individual as part of the warm handoff meeting. Upon release, individuals who receive reentry services and are eligible for Medi-Cal managed care will be auto-assigned (with subsequent choice period) to a MCP and qualify for ECM which will be delivered by community-based care managers with knowledge of providers available in the community to which the individual will be released.[46] • To facilitate assignment of community-based, in-reach care managers and post-release care managers, as part of the provider directory requirements under the Medi-Cal MCP contracts, DHCS will require MCPs to develop and maintain a list of care managers that have agreed to serve as pre-release care managers (via fee-for-service) and post-release ECM providers (via managed care). MCPs will also be required to establish a publicly posted point-of-contact to whom correctional facilities, pre-release care management providers, and/or ECM

[45] In the post-release period, once the individual is enrolled in managed care, the care management provider will provide ECM services.

[46] More information on CalAIM's enhanced care management benefit is available here: https://www.dhcs.ca.gov/Pages/ECMandILOS.aspx.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	providers can reach out for support related to provider networks and other issues. • Correctional facilities will be required to update their internal processes to accommodate the pre-release services care management model, including the use of the care manager provider directory and the MCP point-of-contact. • DHCS released the Policy and Operations Guide to stakeholders to support implementation of pre- and post-release care management to ensure individuals are able to access needed services upon their reentry into the community. **(October 2023)** • DHCS released an All Plan Letter that references the requirements as laid out in the Policy and Operations Guide. **(October 2023)** • DHCS is implementing a process for monitoring MCPs' implementation of ECM and Community Supports, and for following up through technical assistance and/or escalation – up to and including sanctions, as established in the MCP contract – where implementation deficiencies are seen. DHCS' oversight and monitoring process of ECM and Community supports will be strongly data-centered and implemented in a consistent way across the MCPs. Prior to launch of ECM for Justice Involved Population of Focus (effective January 2024) MCPs are required to submit a comprehensive Model of Care detailing their policies for implementing ECM and Community Supports in the counties in which they operate. o Prior to go-live for the justice-involved ECM Population of Focus, MCPs must submit model of care responses pertaining to the new populations they are required to serve, with updated policies to be submitted to DHCS upon request. **(October 2023)** o DHCS reviews and approves MOC submissions from each MCP. **(December 2023)** o Subsequent to the effective date of the Justice Involved Population of Focus, MCPs will be required to submit quarterly monitoring data through a Quarterly Implementation Monitoring Report. (Starting in Q1 2024) o DHCS supplements this data report with a wide range of secondary sources for monitoring, which includes, for example, extensive stakeholder feedback with multiple Advisory Groups. DHCS is committed to long-term

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	monitoring and continuing technical assistance to MCPs. **(Ongoing)** • DHCS will monitor compliance with pre- and post-release care management requirements. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date; DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** • DHCS will provide ongoing technical assistance to implementation stakeholders as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** Individuals may be released into a different county than the one in which they are incarcerated. This could present challenges for connecting them to community-based providers due to care managers' limited knowledge about providers and services in the county of release. ○ **Mitigation Approach:** DHCS requires that individuals be assigned a post-release care manager (and in-reach pre-release care manager, as applicable) that works in the county in which the individual will be released to ensure the care manager is familiar with and can connect the individual with community-based providers in the county of release. Post-release care managers are expected to collaborate with the pre-release care manager on development of the transitional care plan. If the post-release care manager is located in a different county than the correctional facility, warm handoffs may be provided via telehealth. Correctional facilities and pre-release care managers may also reach out to the established Justice-Involved MCP point-of-contact in the county of release for assistance in identifying community-based providers and coordinating services in the county to which the individual will be released. • **Challenge:** The pre- and post-release care managers may face challenges in facilitating the warm handoff during the pre-release period in some instances, such as when the individuals is released by court order earlier than expected or has a very short stay.

CMS State Medicaid Director Letter Specific Requirements	Implementation Approach
	○ **Mitigation Approach:** DHCS will require that pre- and post-release care manager conduct the warm handoff in the community post-release within one week, and that the pre-release care manager shares the re-entry plan and other pertinent information with the post-release care manager and the assigned MCP within 24 hours of release (or as close to that timeline as possible). DHCS recommends as a best practice that post-release care managers meet the individual at release if possible, or, if that is not possible, within one to two days of release.

Milestone 3: Promoting continuity of care

STC Language: The State must describe its process to ensure that beneficiaries receive a person-centered plan for coordination post-release to address health needs, as well as HRSN and LTSS, as applicable. The State must detail its plans and timeline for implementing State policies to provide or facilitate timely access to post-release medical supplies, equipment, medication, additional exams, or other post-release services to address the physical and behavioral health care needs identified during the care management assessment and the development of the person-centered care plan. The State must describe its processes for promoting and ensuring collaboration between care managers, providers of pre-release services, and providers of post-release services to ensure that appropriate care coordination is taking place. As applicable, the State must also describe the planning or projected activities to ensure that Medicaid managed care plan and county behavioral health plan contracts include requirements and processes for transfer of relevant health information from the carceral facility, community-based providers, and/or State Medicaid agency to the managed care plan to support continuity and coordination of care post-release.

Prompts	Summary
3.a. Implement a State requirement that individuals who are incarcerated receive a person-centered care plan prior to release to address any physical and behavioral health needs, as well as HRSN and consideration for long term services and supports (LTSS) needs that should be coordinated post-release, that were identified as part of pre-release care management activities and the development of the person-centered care plan.	***Current State:*** • DHCS does not have pre-release care management processes in place. • DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to set up pre-release and post-release care management processes. ***Future State: Planned Activities & Associated Timelines:*** Care management is a critical component of the State's Reentry Demonstration Initiative and is essential to supporting individuals in preparing for community reentry. As part of pre-release care management services for Medi-Cal enrolled individuals who are incarcerated, DHCS will require that pre-release care managers develop a transitional care plan with and for the individual. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date.)** As outlined in the Policy and Operations Guide, DHCS will require that the transitional care plan include, at minimum:

Prompts	Summary

	• A completed whole-person care plan assessment that includes an assessment of mental health, substance use, physical health, long-term services and supports (LTSS) needs, health related social needs (HRSN), and functional needs. This assessment must be completed by a licensed professional (e.g., RN care manager, LCSW). HRSN assessments should include the identification of needs the members may have upon release including but not limited to: housing; access to food or medically tailored meals; transportation needs; cell phone/smart phone access; social support including who should be included in care plan (e.g., family/friends/parole/probation).
	• A post-release service needs assessment, including assessment related to functioning in the community upon release such as HRSN; considerations for LTSS; medication management; scheduling community-based appointments; paying bills; and utilizing electronic communication.
	• Plans for post-release medications, including ensuring that the medications have undergone any prior authorizations (PAs) or other requirements for coverage, if necessary.
	• Plans for DME, including ensuring that DME prescriptions have undergone any treatment authorization reviews (TARs) or other requirements for coverage, if necessary.
	• Coordination, scheduling, and linkages to required reentry services, including:
	  ○ MAT and psychotropic medications.
	  ○ Identification of a primary care provider and follow-up appointment scheduled at appropriate time post-release.
	  ○ Required specialty, mental health, substance use, dental, and MCP community supports appointments.
	  ○ Community service referrals.
	  ○ HRSN referrals (e.g., nutrition, housing, transportation).
	  ○ LTSS referrals.
	• Scheduled follow-up appointments with community-based providers, including primary care and others as clinically indicated, to ensure they have access to needed clinical services as soon as necessary and no later than 30 days from release.

Prompts	Summary
	• Scheduled follow-up appointments with community-based providers, behavioral health services, and other aspects of discharge/reentry planning, as necessary, no later than 30 days from release. • Coordination of reentry logistics, including transportation. • Ensuring that, as allowed under federal and State laws and with consent from the beneficiary, data are shared with MCPs, county MHPs, DMC/DMC-ODS, and, as relevant, with physical and behavioral health providers to enable timely and seamless handoffs. • A plan for engagement of identified supports for the member (e.g., probation/parole officer, family, others). • A list of individuals/organizations that will receive the finalized transitional care plan prior to release. • Documentation of any additional consents needed to share information for seamless care. • As described in Section 2.c. and 3.d., DHCS will require that embedded pre-release care managers conduct a warm handoff with the community-based post-release care manager prior to an individual's release (or, if not possible prior to release, within one week of release). During the warm handoff, the pre- and post-release care managers will be required to review the re-entry care plan with the individual as part of the warm handoff meeting. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities go-live date)** • DHCS released the Policy and Operations Guide to stakeholders to support implementation of pre- and post-release care management to ensure individuals are able to access needed services upon their reentry into the community. **(October2023)** • DHCS also released an All Plan Letter that will reference the requirements as laid out in the Policy and Operations Guide. **(October 2023)** • DHCS will monitor compliance with requirements related to the transitional care plan **(DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** DHCS will provide ongoing technical assistance to implementation stakeholders as needed. **(Ongoing)**

Prompts	Summary
	Challenges and Mitigation Approaches: • **Challenge:** Given the prevalence of short-term stays and unpredictable release dates, particularly in county jails and county youth correctional facilities, correctional facilities may face operational challenges in ensuring that individuals incarcerated for a short period receive a person-centered transitional care plan prior to release. ○ **Mitigation Approach**: As noted above, DHCS has developed detailed operational guidance for correctional facilities on navigating short-stay situations. DHCS expects all county facilities to begin pre-release services as soon as the individual is identified as eligible. DHCS provided a short-term model in the Policy and Operations Guide outlining time period for when pre-release services should begin in order to ensure maximum access to services in a short time period. DHCS defined the time period for which an initial health screening and health care need assessment must occur. During the initial health screening, if the individual appears to qualify for ECM under any Population of Focus eligibility criteria (including but not limited to the Individuals Transitioning From Incarceration Population of Focus), the correctional facility will be required to provide the individual with an ECM informational flyer that describes Medi-Cal and ECM and lists the name and phone number of the individual's county ECM contact; this is meant to connect the individual to post-release care management services in instances in which an individual may be deemed eligible to receive pre-release services but released before the correctional facility is able to assign a pre- or post-release care manager or complete the transitional care plan. If the individual is released prior to the development or completion of the transitional care plan, the post-release ECM care manager will be

Prompts	Summary
	required to develop the transitional care plan/ECM Care Management Plan.
3.b. Implement State policies to provide or facilitate timely access to any post-release health care items and services, including fills or refills of prescribed medications and medical supplies, equipment, appliances or additional exams, laboratory tests, diagnostic, family planning, or other services needed to address the physical and behavioral health care needs identified in the course of care management and the development of the person-centered care plan.	***Current State:*** • DHCS does not yet have processes in place to provide or facilitate timely access to post-release health care items and services. • DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to set up pre-release and post-release care management processes. ***Future State: Planned Activities & Associated Timelines:*** • As described in Section 3.a., as a component of transitional care planning, DHCS will require the pre-release care manager to coordinate and schedule necessary post-release health care services, including but not limited to fills or refills of prescribed medications and medical supplies as well as DME, diagnostic, family planning, primary care, specialty, mental health, substance use, dental, or other services. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date)** For example: o *Medications in Hand Upon Release***.** Correctional facilities will be required to provide a full supply of prescribed medications in hand to eligible individuals upon their release from a correctional setting.[47] Correctional facilities will also be required to provide naloxone upon release and a clinically appropriate supply of MAT with follow-up to support overdose prevention. In addition to providing the medications in hand upon release, the correctional facility will be required to submit a prescription for any active medication to a community pharmacy as appropriate and feasible so that the individual has access to refills. Correctional facilities and pre-release care

[47] Full supply is defined as the maximum amount that is medically appropriate and allowed by the Medi-Cal State Plan. DHCS will provide additional guidance on minimum requirements for short-term stays in the Policy and Operational Guide.

Prompts	Summary
	managers are required to work with the post-release care manager (if different) to submit prescriptions and transfer medication refill orders to the individual's preferred community pharmacy, near the individual's anticipated residence in the community, as clinically appropriate. DHCS understands concerns in implementing this policy for individuals with short-term stays; the Policy and Operational Guide will provide expected timelines for meeting minimum requirements in the Short-Term model and will be updated on an on-going basis. o *Durable Medical Equipment.* Correctional facilities will be required to screen for and provide necessary DME upon release for any individual who is incarcerated for longer than 14 days. Correctional facilities must ensure that, at a minimum, individuals who use DME reenter the community with a prescription for their DME in hand; the prescription should also be provided to the post-release ECM provider/care manager. Individuals entering the community with DME in hand should also be provided with prescriptions for all necessary DME at the time of release in case the DME in hand is lost, stolen, or broken. ▪ For individuals requiring new DME upon their release in the community, the correctional facility, pre-release care manager, and post-release ECM provider/care manager will be required to coordinate to ensure that residential DME is in place when needed. If the necessary residential DME cannot be set up by the time of release, the provider prescribing the DME must share a copy of the prescription and necessary clinical documentation with the individual and the post-release ECM provider/care manager to be filled in the community. o *Behavioral Health Linkages.* As part of the Reentry Demonstration Initiative, DHCS will require correctional facilities, county behavioral health agencies, and Medi-Cal MCPs to implement behavioral health linkages to initiate behavioral health care services in the community and to ensure continuity in care management through

Prompts	Summary
	professional-to-professional clinical handoffs.[48] The State mandate to implement behavioral health linkages requires State prisons, county jails, youth correctional facilities, county behavioral health departments, and Medi-Cal MCPs to implement processes for facilitated referrals and linkages to continue behavioral health treatment in the community for individuals who receive behavioral health services while incarcerated. o The State will provide services with reasonable promptness consistent with the unique circumstances and constraints of the carceral setting. • DHCS detailed in the Policy and Operational Guide the requirements related to timeliness of provision of pre-release services and follow-up activities in the community. **(October 2023)** • DHCS will monitor reasonable promptness against these expectations **(DHCS will monitor compliance on an on-going basis once the correctional facility goes live)** • DHCS will work with correctional facilities and community-based providers to continue to refine operational processes. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenges:** Correctional facilities and pre- and post-release care managers may face challenges in ensuring timely access to post-release items and services. For example: ▪ *Support for Medications Upon Release:* Correctional facilities that already have on-site pharmacies or partnerships with community-based pharmacies will need to enroll in Medicaid and develop new processes to bill /claim Medi-Cal Rx (including prior authorization as needed). Correctional facilities that currently do not provide any medications to have in-hand upon release because they do not have a

[48] Behavioral Health Linkage requirements are outlined in California Penal Code section 4011.11(h)(5) and consistent with the CalAIM behavioral health linkages initiative (see page 51 of the CalAIM Proposal and AB 133).

Prompts	Summary
	pharmacy on-site or a partnership pharmacy will need to establish new processes for providing medications upon release. DHCS also understands there will be operational complexities associated with the requirement that the correctional facility send active medications to a community pharmacy to ensure continued access in the post-release period, specifically for individuals leaving prison who may have been incarcerated for a relatively longer period of time and do not have an established residence/pharmacy. ▪ *Support for DME Upon Release:* Correctional facilities will have to establish new processes to purchase DME for specific patients (as many currently do not provide DME or provide DME that was used by others within the correctional facility and purchased in bulk at a date outside of the 90-day pre-release period), develop new processes to bill /claim Medicaid for DME, including prior authorization as needed, secure space to store DME until individual is released, and ensure that care managers coordinate to ensure provision of DME. ○ **Mitigation Approaches:** DHCS will work with correctional facilities to refine operational processes, providing targeted technical assistance as needed. DHCS will also take targeted mitigation approaches to the challenges listed above, including: ▪ *Support for Medications Upon Release:* DHCS will require, at a minimum, that the care manager be able to facilitate the linkage to a community pharmacy near the individual's anticipated residence in the community for individuals leaving prison and assist with ensuring that the individual is able to obtain refills of needed medications in the community post-release. In order to ensure individuals have

Prompts	Summary
	an established pharmacy in the community, DHCS will require, at a minimum, that the care manager will be able to facilitate this linkage for individuals leaving prison. DHCS does not expect the same operational complexities to exist for those with shorter stays who have preexisting relationships with outpatient pharmacies and permanent preexisting addresses, such as those leaving jails. ▪ *Support for DME Upon Release*: DHCS developed a model roles and responsibilities chart that was included in the Policy and Operations Guide that describes a potential approach for coordinating across relevant entities for the provision of DME upon release. DHCS will also be closely monitoring the amount of DME that is provided to have in-hand and identify correctional facilities that may need more intervention or targeted technical assistance with assisting individuals in obtaining DME.
3.c. Implement State processes to ensure, if applicable, that managed care plan contracts reflect clear requirements and processes for transfer of the member's relevant health information for purposes of continuity of care (e.g., active prior authorizations, care management information, or other information) to another managed care plan or, if applicable, State Medicaid agency (e.g., if the beneficiary is moving to a region of the State served by a different managed care plan or to another State after release) to ensure continuity	***Current State:*** • DHCS does not yet have processes in place for the transfer of the member's relevant health information for the purposes of continuity of care. ***Future State: Planned Activities & Associated Timelines:*** DHCS will take a multi-pronged approach to ensure continuity of coverage, information sharing, and alignment across the pre- and post-release periods. • Pre-release services will be delivered on a fee-for-service basis. DHCS will require that everyone who is eligible for pre-release services be enrolled in managed care and deemed eligible for a post-release ECM care manager, who will be responsible for assisting the individual in connecting to services in the post-release period. **(The Policy and Operations Guide was released in October 2023. DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024.**

Prompts	Summary
of coverage and care upon release (coordinated with the requirements under milestone #1 above).	**Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities go-live date)** o To ensure smooth reentry, continuity of care management relationships, and access to providers as soon as possible when the individual is released into the community, DHCS will (1) auto-assign individuals to a managed care plan based on the County of Residence in MEDS at the time of release (with choice period post-plan assignment) and (2) establish current month enrollment (i.e., an individual would be enrolled in a MCP beginning the first of the month in which they are released). o DHCS will require that individuals be assigned a post-release care manager (and in-reach pre-release care manager, as applicable) that works in the county in which the individual will be released to ensure the care manager is familiar with and can connect the individual with community-based providers in the county of release. MCPs will be required to ensure that ECM providers can support the scheduling of community-based services for the individual post-release. • DHCS will require all pre-release care managers to share information gathered during the pre-release period, including the needs assessment and transitional care plan, with the individual, the post-release care manager, if they are different, during the warm handoff, and with the assigned MCP. MCPs will be required to have processes and data infrastructure in place to receive member data from the correctional facility and pre- and post-release care managers to support care for the individual in the post-release period. The elements of the transitional care plan that must be shared are described above. This information shall also include information related to all active prior authorizations and prescriptions. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities go-live date)** • DHCS will update managed care contracts (Medi-Cal MCPs, county MHPs, County Drug Medi-Cal Organized

Prompts	Summary
	Delivery System, and Drug Medi-Cal State Plan) to reflect the requirements described above. **(October 2024)** • DHCS released the Policy and Operations Guide that lays out requirements for information sharing across the pre- and post-release periods. **(October 2023)** • DHCS is implementing a process for monitoring MCPs' implementation of ECM and Community Supports, and for following up through technical assistance and/or escalation – up to and including sanctions, as established in the MCP contract – where implementation deficiencies are seen. DHCS' oversight and monitoring process of ECM and Community supports will be strongly data-centered and implemented in a consistent way across the MCPs. Prior to launch of ECM for Justice Involved Population of Focus (effective January 2024) MCPs are required to submit a comprehensive Model of Care detailing their policies for implementing ECM and Community Supports in the counties in which they operate. o Prior to go-live for the justice-involved ECM Population of Focus, MCPs must submit model of care responses pertaining to the new populations they are required to serve, with updated policies to be submitted to DHCS upon request. **(October 2023)** o DHCS reviews and approves MOC submissions from each MCP. **(December 2023)** • DHCS will monitor compliance with requirements related to the transfer processes for transfer of the member's relevant health information to MCPs for purposes of continuity of care. **(Ongoing)** • DHCS will provide technical assistance to stakeholders as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** Correctional facilities and MCPs will need to establish new processes and systems to receive and exchange member data to ensure continuity of care and align services across the pre- and post-release period. o **Mitigation Approach:** DHCS will provide clear data guidance to facilitate data exchange between implementing partners.

Prompts	Summary
3.d. Implement State processes to ensure care managers coordinate with providers of pre-release services and community-based providers, if they are different providers. Implement a State policy to require care managers to facilitate connections to community-based providers pre-release for timely access to services upon reentry in order to provide continuity of care and seamless transitions without administratively burdening the beneficiary (e.g., identifying providers of post-release services, making appointments, having discussions with the post-release care manager, if different, to facilitate a warm handoff and continuity of services). A simple referral is not sufficient. Warm hand-offs to a post-release care manager and follow-up are expected, consistent with guidance language in the care management section.	***Current State:*** • DHCS does not yet have processes in place to ensure care managers coordinate with providers of pre-release services and community-based providers, if they are different. • DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to set up processes for facilitating health service linkages upon release. ***Future State: Planned Activities & Associated Timelines:*** • As described in Section 3.a., as a component of transitional care planning, DHCS will require the pre-release care manager to coordinate and schedule necessary post-release health care services, including but not limited to fills or refills of prescribed medications and medical supplies as well as DME, diagnostic, family planning, primary care, specialty, mental health, substance use, dental, or other services to ensure a minimally burdensome and seamless transition to services post release. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities go-live date)** • As described in 2.c., DHCS will require that, in cases where pre-and post-release care managers are different (i.e., the correctional facility leverages an embedded care management model or the individuals is release to a different county from the correctional facility in which they are incarcerated), the embedded care manager implement a warm handoff with the community-based care manager in accordance with the standard requirements described below. **(The Policy and Operations Guide was released in October 2023. Correctional facility processes will be phased in over a two year period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities go-live date)**

Prompts	Summary
	○ In cases where pre- and post-release care managers are different, the embedded pre-release care manager and the community-based post-release care manager must conduct a warm handoff with the individual present prior to release. ○ Minimum requirements for the pre- and post-release care managers conducting warm handoffs are as follows: ▪ Sharing the transitional care plan with the individual, the post-release care manager and the individual's assigned MCPs. ▪ Scheduling and conducting a warm handoff meeting that includes the individual and both the pre- and post-release care managers to begin establishing a trusted relationship, review the transitional care plan and address questions, and identify any outstanding service needs and supports required for successful community reentry. ○ For individuals with known release dates, DHCS recommends that the warm handoff meeting occur at least 14 days prior to release. Telehealth may be used to conduct warm handoffs. If it is not possible for the warm handoff, including the requirements listed above, to occur prior to the individual's release (e.g., if the individual is released by court order earlier than expected or has a very short stay), the pre- and post-release care managers must conduct the warm handoff in the community post-release within one week, but the pre-release care manager must share the reentry plan and other pertinent information with the post-release care manager and the assigned MCP within a clinically appropriate time frame (e.g., 24 hours after release). ○ In addition, correctional facilities, county behavioral health agencies, and MCPs must facilitate behavioral health linkages for all individuals who receive behavioral health services while incarcerated, including professional-to-professional clinical handoffs, facilitated referrals, and linkages to continued behavioral health treatment.

Prompts	Summary
	• DHCS released the Policy and Operations Guide that details the requirements as described above. **(September 2023)** • DHCS will monitor compliance with continuity of care, including warm handoff, requirements. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** • DHCS will also provide technical assistance to implementation stakeholders, as needed. **(Ongoing)**

	Challenges and Mitigation Approaches:
	• **Challenge:** The pre- and post-release care managers may face challenges in facilitating the warm handoff during the pre-release period in some instances, such as when the individual is released by court order earlier than expected or has a very short stay.
	  ○ **Mitigation Approach:** DHCS will require that pre- and post-release care manager meet with the individual to conduct the warm handoff in the community post-release within one week, and that the pre-release care manager shares the re-entry plan and other pertinent information with the post-release care manager and the assigned MCP within 24 hours of release (or as close to that timeline as possible). DHCS recommends as a best practice that post-release care managers meet the individual at release if possible, or, if that is not possible, within one to two days of release.
	• **Challenge:** Individuals may be released into a different county than the one in which they are incarcerated. This could present challenges for connecting them to community-based providers due to pre-release care managers' limited knowledge about providers and services in the county of release.
	  ○ **Mitigation Approach:** DHCS requires that individuals be assigned a post-release care manager (and in-reach pre-release care manager, as applicable) that works in the county in which the individual will be released to ensure the care

Prompts	Summary
	manager is familiar with and can connect the individual with community-based providers in the county of release. Post-release care managers are expected to collaborate with the pre-release care manager on development of the transitional care plan. If the post-release care manager is located in a different county than the correctional facility, warm handoffs may be provided via telehealth. Correctional facilities and pre-release care managers may also reach out to the established Justice-Involved MCP point-of-contact in the county of release for assistance in identifying community-based providers and coordinating services in the county to which the individual will be released.

Milestone 4: Connecting to services available post-release to meet the needs of the reentering population

STC Language: The State must describe how it will develop and implement a system to monitor the delivery of post-release services and ensure that such services are delivered within the appropriate time frame, per the guidelines in the forthcoming State Medical Director Letter (SMDL). The Implementation Plan must also capture how the State will monitor and adjust, as needed, ongoing post-release care management and describe its process to help ensure the scheduling and receipt of needed services, as well as other services needed to address HRSN and LTSS. Additionally, the State must describe how it will ensure that care managers are able to effectively serve demonstration beneficiaries transitioning into the community and recently released beneficiaries who are no longer demonstration beneficiaries.

Prompts	Summary
4.a. Develop State systems to monitor individuals who are incarcerated and their person-centered care plans to ensure that post-release services are delivered within an appropriate time frame. We expect this generally will include a scheduled contact between the reentering individual and the care managers that occurs within one to two days post-release and a second appointment that occurs within one week of release to ensure continuity of care and seamless transition to monitor progress and care plan implementation. These short-term follow-ups should include the pre-release and post-release (if different) care managers, as possible, to ensure longer-term post-release care management is as seamless as possible. In keeping with the person-centered care plan and individual needs, CMS is providing these general time frames as suggestions but	***Current State:*** • DHCS does not yet have State processes in place to monitor individuals who are incarcerated to ensure that post-release services are delivered within appropriate time frames. • DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to set up processes for ensuring coordination across the pre- and post-release periods to ensure continuity of care. ***Future State: Planned Activities & Associated Timelines:*** • DHCS will develop processes and oversight and evaluation protocols to monitor individuals who are incarcerated and their person-centered care plans to ensure post-release services are delivered within an appropriate timeframe. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.** ○ DHCS will require that an individual have a scheduled contact with a post-release ECM care manager as close to release as possible (e.g., within one- or two-days post-release) and a second appointment that occurs within one week of release to ensure continuity and seamless transitions. • Individuals transitioning from incarceration into the community will be eligible to receive the ECM benefit from their MCPs in order to address clinical and non-

Prompts	Summary
recognizes that depending on the beneficiary's individualized needs and risk factors, a care manager may determine that the first scheduled contact with the beneficiary should occur, for example, within the first 24 hours after release and on a more frequent cadence in order to advance the goals of this demonstration.	clinical needs through intensive coordination of health and health-related services, as described in Section 3.c. above. Post-release care management will be delivered by ECM providers and monitored by MCPs. DHCS will require that post-release ECM care managers meet with the individual as close to the release date as possible (e.g., within one or two days post-release) and conduct a follow-up appointment within one week of release to ensure continuity of coverage. ECM care management includes:[49] ○ Conducting outreach and engaging individuals. ○ Updating the individual's needs assessment and care plan with newly identified needs. ○ Coordinating the services necessary to implement the care plan. ○ Providing health promotion services to encourage and support individuals to engage in healthy behaviors. ○ Supporting individuals and their support networks during discharge from the hospital or institutional settings. ○ Ensuring individuals and their support networks are knowledgeable about the individual's conditions. ○ Coordinating referrals and transportation to community and county social service agencies/offices. To ensure implementation of these requirements: • DHCS will ensure post-release care managers are able to deliver post-release services in an appropriate time frame as part of the warm handoff requirements to a community-based care manager prior to release. The post-release care manager will be responsible for ensuring follow-up appointments are scheduled, work with the individual to attend these appointments (for example, helping with transportation), and follow up with the individual if an appointment is missed to ensure it is rescheduled and services are delivered. Post-release care managers will be based in the same geographic community that the member will reenter,

[49]

Prompts	Summary
	ensuring the care manager will be familiar with local resources and provider networks. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. Correctional facility processes will be phased in over a two year period,, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date)** • DHCS is implementing a process for monitoring MCPs' implementation of ECM and Community Supports, and for following up through technical assistance and/or escalation – up to and including sanctions, as established in the MCP contract – where implementation deficiencies are seen. DHCS' oversight and monitoring process of ECM and Community supports will be strongly data-centered and implemented in a consistent way across the MCPs. Prior to launch of ECM for Justice Involved Population of Focus (effective January 2024) MCPs are required to submit a comprehensive Model of Care detailing their policies for implementing ECM and Community Supports in the counties in which they operate. o Prior to go-live for the justice-involved ECM Population of Focus, MCPs must submit updated policies relevant to the new populations they are required to serve. **(October 2023)** o DHCS reviews and approves MOC submissions from each MCP. **(November 2023)** o Subsequent to the effective date of the Justice Involved Population of Focus, MCPs will be required to submit monthly monitoring data through the JavaScript Object Notation (JSON) file . **(Starting in Q3 2024)** o DHCS will leverage existing Enhanced Care Management program monitoring mechanisms to track ongoing engagement in post-release Enhanced Care Management **(Ongoing)** o DHCS supplements this data report with a wide range of secondary sources for monitoring, which includes, for example, extensive stakeholder feedback with multiple Advisory Groups. DHCS is committed to long-term monitoring and continuing technical assistance to MCPs. **(Ongoing)**

Prompts	Summary

	• DHCS will be tracking claims and encounter data in the post-release period to track the number of services that an individual who was eligible for pre-release services received in the post-release period (and within how many months post-release). While DHCS has not yet received CMS' Reentry Monitoring Protocol Template, it is committed to tracking number and types of physical and behavioral health services and medications that an individual has received in the post-release period. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.**
	• DHCS developed clear requirements for inclusion in the Policy and Operational Guide, regarding:
	  ○ The development of whole-person care plan assessments—including assessment of mental health, substance use, physical health, health-related social needs, long-term services and supports, and functional needs—and the scope of these care plans, which should include plans that address the needs of the member in the community upon release.
	  ○ Guidance on the division of responsibilities during the warm handoff between pre- and post-release care managers (if applicable) and, different entities involved in warm handoffs (correctional facilities, county behavioral health agencies, and MCPs), and required timelines to ensure continuity of care in the community. **(September 2023)**
	• As described in Section 3.c., DHCS will develop MCP auto-assignment enrollment processes for individuals eligible for pre-release services who are not currently enrolled in a MCP, ensuring members will be afforded timely access the ECM benefit and Community Supports services in the community. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)**

	Challenges and Mitigation Approaches:

Prompts	Summary

	• **Challenge:** ECM care managers may have challenges contacting individual in the community, because they lack access to a reliable phone or stable housing.
	  ○ **Mitigation Approach:** The pre-release care manager will be required to collect information about how to contact in the individual in the community when released, including names and contact information for the individual's identified support network (e.g., family members or trusted friends). The pre-release care manager will provide this contact information as part of the reentry care plan, shared with the post-release ECM care manager and the MCP. In addition, the post-release ECM care manager contact information and the MCP's contact information will be included in the reentry plan given to the individual upon release so they can reach out directly to the ECM care manager or plan for assistance.
	• **Challenge:** While DHCS is implementing policies to ensure ECM can begin the day of release, including effectuating MCP auto-assignment and ECM enrollment prior to release, there may be instances when short-term stay individuals are released prior to MCP enrollment and are receiving FFS Medi-Cal benefits upon release.
	  ○ **Mitigation Approach:** DHCS has existing state plan authority for FFS case management and is creating policies to ensure that if a member is not yet enrolled in the MCP, the ECM care manager will be able to serve the member post-release and bill FFS case management for reentry case management services for up to 4 weeks post-release.

4.b. Develop State processes to monitor and ensure ongoing care management to ensure successful transitions to the community and continuity of care post-release; to provide an assessment; monitor the	***Current State:*** • DHCS does not yet have State processes in place to monitor ongoing care management to ensure successful transition to the community and continuity of care post-release.

Prompts	Summary
person-centered care plan implementation and to adjust it, as needed; and to ensure scheduling and receipt of needed covered services.	***Future State: Planned Activities & Associated Timelines:*** • DHCS will develop processes and monitor to ensure that individuals receive ongoing care management that ensure successful transition to the community and continuity of care post-release. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.** o To ensure that individuals are provided with continuous care management that facilitates successful re-entry into the community and ongoing services post-release, DHCS will require that individuals be enrolled in an MCP and receive ECM services upon release into the community. o DHCS will require MCPs to oversee the delivery of ECM services to the Justice-Involved Population of Focus, and DHCS will continue to oversee and monitor the delivery of ECM for this population, as part of its overall ECM oversight and monitoring processes. This includes oversight of the core responsibility of the ECM provider to develop, review, maintain, and update a comprehensive individualized person-centered care management plan.[50] • DHCS is implementing a process for monitoring MCPs' implementation of ECM and Community Supports, and for following up through technical assistance and/or escalation – up to and including sanctions, as established in the MCP contract – where implementation deficiencies are seen. DHCS' oversight and monitoring process of ECM and Community supports will be strongly data-centered and implemented in a consistent way across the MCPs. Prior to launch of ECM for Justice Involved Population of Focus (effective January 2024) MCPs are required to submit a comprehensive Model of Care detailing their policies for implementing ECM and Community Supports in the counties in which they operate.

[50] Requirements for the ECM comprehensive assessment and care management plan can be found in the CalAIM Enhanced Care Management Policy Guide, available at: https://www.dhcs.ca.gov/Documents/MCQMD/ECM-Policy-Guide.pdf.

Prompts	Summary
	○ Prior to go-live for the justice-involved ECM Population of Focus, MCPs must submitted updated policies relevant to the new populations they are required to serve. **(September 2023)** ○ DHCS reviews and approves MOC submissions from each MCP. **(November 2023)** ○ Subsequent to the effective date of the Justice Involved Population of Focus, MCPs will be required to submit monthly monitoring data through a JavaScript Object Notation (JSON) File **(Starting in Q3 2024)** ○ DHCS will leverage existing Enhanced Care Management program monitoring mechanisms to track ongoing engagement in post-release Enhanced Care Management **(Ongoing)** ○ DHCS supplements this data report with a wide range of secondary sources for monitoring, which includes, for example, extensive stakeholder feedback with multiple Advisory Groups. DHCS is committed to long-term monitoring and continuing technical assistance to MCPs. **(Ongoing)** • As a companion to the Model of Care, DHCS detailed in the Policy and Operational Guide all the requirements for the ECM post-release care manager around ongoing care management and continuity of care following release. **(September 2023)** • DHCS will meet regularly with the MCPs to provide ongoing technical assistance, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** MCPs have expressed concern that there may not be adequate workforce of community-based providers available to provide ECM services to justice-involved individuals in the post-release period. ○ **Mitigation Approach:** DHCS is committed to increasing ECM community-based provider capacity, and through the PATH Capacity and Infrastructure Transition Expansion and Development (CITED) Initiative and the PATH technical assistance marketplace, has funding to support organizations and technical assistance for ECM. DHCS meets monthly with the MCPs and will establish a standing meeting agenda item to assess implementation on an on-going

Prompts	Summary
	basis as it relates to adequate workforce for ECM providers. DHCS will work with MCPs to identify additional mitigation strategies to help address emerging workforce issues including assisting in provider enrollment processes and addressing any other operational issues that may be impacting the number of providers who are willing to serve as ECM care managers for justice-involved individuals. Finally, and as a last resort: similar to other ECM populations of focus, DHCS will allow MCPs to submit an exception to DHCS that allows the MCP to temporarily use their own staff to provide ECM services if there is not enough capacity in the community. • **Challenge:** Ensuring that post-release providers, including the ECM care manager and treating behavioral and physical health providers have information on the medical treatment provided in the carceral system and the care plan developed by the pre-release care manager is critical to ensuring successful transitions. Providers and MCPs have expressed concern about the difficulty of accessing correctional facility health information. ○ **Mitigation Approach:** DHCS outlined requirements and best practices for information sharing between correctional facilities and the receiving providers and plans in the Policy and Operational Guide. DHCS will monitor the effectiveness of reentry data sharing by leveraging monthly meetings with MCPs and County Behavioral Health Providers, to identify data sharing barriers and identify correctional facilities that are not providing timely information to MCPs or County Plans or their contracted ECM, physical health, or Behavioral health providers. DHCS will evaluate the causes of identified issues, provide technical assistance, and clarify guidance or policy, as necessary, on expected and allowable information sharing to the correctional facility. As Necessary, DHCS will develop corrective action plans for correctional facilities to improve timely information sharing.

Prompts	Summary
4.c. Develop State processes to ensure that individuals who are receiving services through the Reentry Section 1115 Demonstration Opportunity are connected to other services needed to address LTSS and HRSN, such as housing, employment support, and other social supports as identified in the development of the person-centered care plan.	***Current State:*** • DHCS does not yet have processes in place to connect individuals eligible for pre-release services to services post-release. ***Future State: Planned Activities & Associated Timelines:*** DHCS will develop oversight and monitoring processes to ensure that individuals receiving pre-release services are connected to other services needed to address LTSS and HRSN that are identified in the care plan. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** o As described in Section 3.c., part of pre-release care management for Medi-Cal-enrolled individuals who are incarcerated includes the development of a transitional care plan with the individual; this transitional care plan will include a plan to address LTSS, HRSN, and other social supports available to members once they are in the community. Additionally, as described in Section 4.a., members eligible for managed care will be automatically enrolled into a MCP and eligible for the ECM benefit and Community Supports. (Community Supports are available at plan discretion, and individuals must meet eligibility criteria to receive Community Supports.) • DHCS will be tracking claims and encounter data in the post-release period to track the number of services that an individual who was eligible for pre-release services received in the post-release period (and within how many months post-release). While DHCS has not yet received CMS' Reentry Monitoring Protocol Template, it is committed to tracking number and types of LTSS and HRSN services that an individual has received in the post-release period. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** DHCS detailed in the Policy and Operational Guide requirements related to connecting individuals to LTSS, HRSNs, and other social supports. **(September 2023)**

Prompts	Summary
	• DHCS will meet regularly with the MCPs to provide ongoing technical assistance, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** An on-going challenge that DHCS anticipates is that individuals leaving incarceration will not be connected to HRSNs or LTSS in a timely manner. ○ **Mitigation Approach:** DHCS will be closely monitoring the number of people who received HRSNs and LTSS in the post-release period and will work to identify and implement new policies and operational processes for increasing access and receipt of such services.
4.d. Implement State policies to monitor and ensure that care managers have the necessary time needed to respond effectively to individuals who are incarcerated who will likely have a high need for assistance with navigating the transition into the community.	***Current State:*** • DHCS does not yet have processes in place to connect individuals eligible for pre-release services to services post-release. • DHCS is administering a PATH capacity building funds process to support correctional facilities in their implementation processes. Correctional facilities may use PATH funds to set up processes for facilitating health service linkages upon release.
	Future State: Planned Activities & Associated Timelines: • DHCS will implement policies and monitor to ensure that care managers have the necessary capacity to provide the required high-touch, intensive care management services in the pre- and post-release periods that will be required to effectively serve individuals transitioning from incarceration to their community. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.))** ○ As described in Section 5.a. below, DHCS will require correctional facilities to demonstrate

Prompts	Summary
	readiness for providing pre-release services. This readiness assessment will include process development and capacity building for delivering care management services and connecting incarcerated individuals to community-based providers. ○ Upon release, individuals who are eligible for pre-release services will also be eligible to receive ECM, which is a MCP benefit available to high-need MCP members that provides systematic coordination of services and comprehensive care management that is community based, interdisciplinary, high touch and person centered. ECM providers will coordinate all care across the physical and behavioral health delivery systems. ECM providers will play a critical role in supporting individuals' transitions into the community. More information about ECM can be found in the ECM Policy Guide. • DHCS released the Policy and Operations Guide that details the requirements as described above. **(October 2023)** • DHCS will also provide technical assistance to implementation stakeholders, as needed. **(Ongoing)** • DHCS is implementing a process for monitoring MCPs' implementation of ECM and Community Supports, and for following up through technical assistance and/or escalation – up to and including sanctions, as established in the MCP contract – where implementation deficiencies are seen. DHCS' oversight and monitoring process of ECM and Community supports will be strongly data-centered and implemented in a consistent way across the MCPs. Prior to launch of ECM for Justice Involved Population of Focus (effective January 2024) MCPs are required to submit a comprehensive Model of Care detailing their policies for implementing ECM and Community Supports in the counties in which they operate. ○ Prior to go-live for the justice-involved ECM Population of Focus, MCPs must submit model of care responses pertaining to the new populations they are required to serve, with updated policies to be submitted to DHCS upon request. **(October 2023)**

Prompts	Summary
	○ DHCS reviews and approves MOC submissions from each MCP. **(December 2023)** ○ Subsequent to the effective date of the Justice Involved Population of Focus, MCPs will be required to submit quarterly monitoring data through a Quarterly Implementation Monitoring Report. **(Starting in Q1 2024)** ○ DHCS supplements this data report with a wide range of secondary sources for monitoring, which includes, for example, extensive stakeholder feedback with multiple Advisory Groups. DHCS is committed to long-term monitoring and continuing technical assistance to MCPs. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** For individuals with short term stays, it is possible that there will not be enough time for pre-release care managers respond effectively to individuals who are incarcerated and who will likely have a high need for assistance with navigating the transition into the community ○ **Mitigation Approach:** DHCS will provide operational guidance for correctional facilities on navigating short-stay situations, including minimum requirements and timelines for correctional facilities to provide pre-release care management services and coordinate with community-based providers.

Milestone 5: Ensuring cross-system collaboration

STC Language: The State must describe how correctional facilities will facilitate access for incarcerated beneficiaries to community health care providers, including care managers, either in person or via telehealth. The State must also document its plans for establishing communication and engagement between corrections systems, community supervision entities, health care organizations, the State Medicaid agency, and supported employment and housing organizations. The State must also develop a system (e.g., a data exchange, with requisite data-sharing agreements) and establish processes to monitor individuals' health care needs, HRSN, and access to and receipt of health care services pre-and post-release and identify anticipated challenges and potential solutions. Further, the State must develop and share its strategies to improve awareness about Medicaid coverage and access among stakeholders, including those who are incarcerated.

Prompts	Summary
5.a. Establish an assessment outlining how the State's Medicaid agency and participating correctional system/s will confirm they are ready to ensure the provision of pre-release services to eligible beneficiaries, including but not limited to how facilities participating in the Reentry Section 1115 Demonstration Opportunity will facilitate access within the correctional facilities for community health care providers, including care managers, in person and/or via telehealth, as appropriate. A State could phase in	***Current State:*** To ensure the delivery of high-quality services in the pre-release period, and as required by the 1115 Waiver's Special Terms and Conditions, DHCS developed a readiness assessment with elements that lay out what correctional facilities must demonstrate in order to be eligible to "go live" with the delivery of pre-release services. The correctional facility readiness assessment will assess the ability of correctional facilities to implement and support the focus areas listed below. All correctional facilities will be required to demonstrate ability to designate space for in-reach meetings, including physical space for in-person visits and/or space and technology for individuals to connect to virtual consultation (e.g., laptop or similar device, webcam, internet access, telephone line) while ensuring appropriate security protections remain in place (e.g., Health Insurance Portability and Accountability Act of 1996 (HIPAA) compliance). While DHCS will have certain elements marked as minimum requirements, all aspects of the readiness assessment must still be supported and ready to go live prior to the planned go-live date; however, DHCS may use discretion when reviewing minimum requirements to determine whether an agency is ready to go live. All correctional facilities must meet all go-live requirements through their readiness assessment submission and go-live with pre-release services by October 1, 2026. DHCS will also abide by all CAA of 2023 Section 5121 implementation timelines agreed upon with CMS. The focus areas are:

Prompts	Summary
implementation of pre-release services based on the readiness of various participating facilities and/or systems.	1. **Medi-Cal Application Processes** a. Screening *(minimum requirement)* b. Application Support *(minimum requirement)* c. Unsuspension/Activation of Benefits *(minimum requirement)* 2. **90-Day Pre-Release Eligibility and Behavioral Health Linkage Screening** a. Screening for Pre-Release Services *(minimum requirement)* b. Screening for Behavioral Health Linkages *(minimum requirement)* 3. **90-Day Pre-Release Service Delivery** a. Medi-Cal Billing and Provider Enrollment *(minimum requirement)* b. Support of Pre-Release Care Management *(minimum requirement)* c. Clinical Consultation d. Virtual/In-Person In-Reach Provider Support *(minimum requirement)* e. Support for Medications *(minimum requirement)* f. Support for MAT *(minimum requirement)* g. Support for Prescriptions Upon Release *(minimum requirement)* h. Support for DME Upon Release 4. **Reentry Planning and Coordination** a. Release Date Notification *(minimum requirement)* b. Care Management Reentry Plan Finalization *(minimum requirement)* c. Reentry Care Management Warm Handoff *(minimum requirement)* d. Reentry Behavioral Health Linkage *(minimum requirement)* 5. **Oversight and Project Management** a. Staffing Structure and Plan *(minimum requirement)* b. Governance Structure for Partnerships *c.* Reporting and Oversight Process *(minimum requirement)* Correctional facilities must submit their readiness assessments to DHCS at least five months prior to their proposed go-live date (as early as November 2023 and no later than November 2025). DHCS will require each correctional facility to complete a readiness assessment and receive DHCS approval prior to its go-live date. Readiness decisions will be made at the facility level, not at the county level. For example, if a county has five facilities, and three are ready to go live, but two are not, the three can go live.

Prompts	Summary
	In their readiness assessment submission, correctional facilities are expected to explain in a narrative format how they meet or will meet the readiness assessment elements. Correctional facilities will be required to include attachments such as program policy guides, workflows, and organizational charts to respond to questions in the readiness assessment. The readiness assessment will also include a list of attestations that the correctional facility will be expected to sign. Readiness will not be finalized until correctional facilities sign this attestation. DHCS recognizes that some correctional facilities may not have all the required capabilities in place for all five focus areas described below (and/or for each of their facilities) at the time of submitting their readiness assessment. In these instances, agencies will be asked to describe their plan for achieving readiness prior to the planned go-live date. For each of the five focus areas, DHCS will determine a score based on the correctional agency's narrative response, attestation, and documentation of their readiness for implementing pre-release services. The DHCS review team will use the following scoring rubric to determine the score for each focus area *(note DHCS may update terminology around the scoring rubric based on lessons learned)*: • **Pass:** Correctional facility's response is complete and indicates total or almost total readiness (i.e., all minimum requirements are met) and facility receives a pass in each focus area, and the facility has process in place to go-live with non-minimum requirement elements within a timebound glidepath. • **Conditional Pass:** Correctional facility response is complete and indicates that facility meets some, but not all, components of the readiness assessment. The facility must minimally be able to deliver case management, MAT services, and a 30-day supply of medication upon release in order receive a conditional pass, and may phase in the populations that receive this minimum set of services completely within 12 months of the facility going live for increasing their capacity to provide this minimum set of services to all eligible individuals, taking into consideration all appropriate federal laws regarding civil rights such as the Americans with Disabilities Act, etc. Nothing in this approval will supersede the state's compliance actions to meet all CAA of 2023 Section 5121 implementation requirements and timelines. DHCS will require all facilities that receive a conditional pass to specify a structured glidepath and time bound implementation plan for increasing capacity and achieving a pass rating by the

Prompts	Summary
	end of the defined ramp up period as part of their readiness assessment review process. DHCS and correctional facilities will agree on specific target metrics to demonstrate the facility's progress in reaching full compliance and will meet with facilities under conditional approval on a regular basis until all metrics are met and facility receives a "Pass". If a facility does not achieve a pass rating by the end of the 12-month ramp-up period, the facility must submit a corrective action plan or the facility will be considered to have not demonstrated readiness to go live. • **Fail:** Correctional facility's response is incomplete, the provided response does not sufficiently address the question, or the provided response does not indicate readiness to go live. Additional information on what is required for each readiness element is available in DHCS' Policy and Operational Guide.

	Future State: Planned Activities & Associated Timelines:
	
	• Go-Live dates will occur on a quarterly basis (e.g., October 2024, January 2025, March 2025) through October 2026. The readiness assessment process will open at least 6 months prior to each quarterly cohort. The following is an example timeline for the six-month readiness process:
	  ○ By April 1, 2024, correctional facilities submit their readiness assessment plans and materials (gives facilities at least two months to complete).
	  ○ By August 1, 2024, DHCS confirms readiness (gives DHCS four months to review plans, conduct site visits, and follow-up with correctional facilities).
	  ○ By October 1, 2024, first facility goes live (gives facilities two months)
	• DHCS will review assessments and provide approval, on a rolling basis, to facilities demonstrating readiness to go live, with an earliest anticipated go-live date of October 1, 2024. **(The Policy and Operations Guide was released in October 2023. DHCS released a draft readiness assessment template in October 2023 and plans to release the final readiness assessment tool in early 2024. DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. Correctional facility processes will be phased in over a two year go-live period, beginning as soon as October 2024 and no later than October 2026, depending on correctional facilities' go-live date. For more information on go-live dates and readiness**

Prompts	Summary
	assessment requirements and timelines, please see Appendix.)

	Challenges and Mitigation Approaches:
	• **Challenge:** DHCS expects Medi-Cal provider enrollment and billing/claiming requirements to be most challenging for correctional facilities to meet.
	  ○ **Billing and Claiming:** Until this 1115 Reentry Demonstration Opportunity, correctional facilities have been unable to bill for Medi-Cal services due to the inmate payment exclusion. Because of this, correctional facilities have not set up billing and claiming systems within their EHRs and do not have robust/standardized data exchange processes in place with DHCS or community-based providers to facilitate billing and claiming of Medi-Cal services.
	  ○ **Provider Enrollment:** Correctional facilities have raised concern around requiring provider enrollment as it relates to administrative burden, lack of staff resources/bandwidth, and union negotiations.
	• **Mitigation Approach:**
	  ▪ **Billing and Claiming:** DHCS will provide technical assistance to all correctional facilities to support billing/claiming processes. DHCS also expects correctional facilities to use PATH funding to build billing/claiming arms of EHRs.
	  ▪ **Provider Enrollment:** As mentioned above, DHCS will enroll all correctional facility and pharmacy providers who provide services under existing enrollment pathways. DHCS will provide technical assistance to all correctional facilities to assist in Medi-Cal enrollment.

5.b. Develop a plan for organizational-level engagement, coordination, and communication between the corrections systems, community supervision entities, health care providers and	***Current State:*** DHCS has been facilitating regular meetings of the cross-sector stakeholder Justice-Involved Advisory Group since 2021. The purpose of the Advisory Group is to communicate program policy, solicit stakeholder feedback to inform program design, and share best practices among implementing entities. Members of the Advisory Group include representatives of corrections systems, community supervision entities, health care providers and provider organizations, county entities, social services organizations, and individuals with lived experience.

Prompts	Summary
provider organizations, State Medicaid agencies, and supported employment and supported housing agencies or organizations.	DHCS has also been facilitating, and intends to continue to facilitate, one-on-one technical assistance sessions with implementation stakeholders including but not limited to State prisons, county jails, providers, individuals with lived experiences, and MCPs. Depending on the implementing stakeholder, DHCS has been convening these discussions on a weekly, biweekly, monthly, or quarterly basis. The purpose of these meetings is to glean stakeholder feedback to inform program design and provide direct technical assistance to implementing entities. For example, DHCS has been facilitating monthly meetings with CDCR, the state's prison system, on Medicaid provider and pharmacy enrollment and billing and claiming requirements. DHCS has also taken steps to support information sharing between implementing entities. In July 2021, Governor Newsom signed into law the health omnibus trailer bill legislation for the 2021-2022 California Budget (AB 133; Chapter 143 of Statutes of 2021). In recognition of the importance of information sharing in supporting collaboration and communication as part of the implementation of the Reentry Demonstration Initiative and other components of CalAIM, AB 133 included provisions to permit specified entities to disclose personally identifiable information—including protected health information—among one another so long as such disclosure is (1) necessary to implement CalAIM components or the CalAIM terms and conditions and (2) consistent with federal law. AB 133 also modified the California Penal Code to promote information sharing for the purposes of health insurance affordability program enrollment and the provision of behavioral health services post-release. DHCS released guidance on these provisions to the public in March 2022.[51] As part of the CalAIM Reentry Demonstration Initiative approval, DHCS received authority to provide capacity building grants to implementation partners, known as the PATH initiative. These PATH funds are available to correctional facilities and county behavioral health agencies and are intended to support cross-stakeholder coordination. PATH funds may be used toward "activities to promote collaboration," i.e., expenditures related to facilitating collaborative planning activities between correctional agencies, MCPs, county behavioral health agencies, and

[51] Guidance is available here: https://www.dhcs.ca.gov/Documents/MCQMD/CalAIM-Data-Sharing-Authorization-Guidance.pdf.

Prompts	Summary
	other stakeholders as needed to support planning, implementation, and modification of Medi-Cal pre-release service processes.[52] PATH grant awardees are also required to submit periodic progress reports, which include a description of collaborations or working sessions with local social services agencies/offices, local Medi-Cal MCPs, in-reach providers, and correctional agencies/county behavioral health agencies.
	Future State: Planned Activities & Associated Timelines: • DHCS will continue to facilitate the Advisory Group and one-on-one technical assistance sessions with implementation partners. **(Ongoing)** • DHCS will update the data-sharing guidance to include additional use cases and clarifications. The revised guidance is planned for release by September 2023, and additional updates may be released in the future. **(September 2023)** • DHCS released the Policy and Operations Guide that details the requirements as described above. **(October 2023)** • DHCS will provide technical assistance to implementation stakeholders, as needed. **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge**: Coordination and communication needs are often unique to the county or locality in which the implementation partners operate, and the individual stakeholders within each, requiring tailored support and technical assistance. ○ **Mitigation Approach:** DHCS plans to leverage the PATH program to support local capacity building and collaboration. This includes leveraging PATH capacity grants for collaboration and planning activities, as well as for building and implementing the necessary processes, systems and formal agreements that are required for ongoing coordination among local implementation partners. It also includes potentially leveraging regional Collaborative Planning and Implementation groups to bring together stakeholders to plan customized

[52] Additional guidance on this funding can be found on the DHCS CalAIM JI website under the Providing Access and Transforming Health Initiative section, available here: https://www.dhcs.ca.gov/CalAIM/Pages/Justice.aspx.

Prompts	Summary
	approaches that build on relationships and processes at the local level. • **Challenge:** Correctional facilities, MCPs, community-based providers and other stakeholders will need to establish new processes and systems to share information, including to receive and exchange member data, to facilitate engagement, coordination, and communication among stakeholders in support of successful program implementation. ○ **Mitigation Approach:** DHCS will provide clear data guidance and technical assistance to facilitate information sharing between implementing partners.
5.c. Develop strategies to improve awareness and education about Medicaid coverage and health care access among various stakeholders, including individuals who are incarcerated, community supervision agencies, corrections institutions, health care providers, and relevant community organizations (including community organizations serving the	***Current State:*** DHCS has taken a multi-pronged approach to improving stakeholder awareness about Medi-Cal and the Reentry Demonstration Initiative. Since 2021, DHCS has hosted 11 Advisory Group webinars about the Reentry Demonstration Initiative to inform the key stakeholders about design decisions, program requirements, and key milestones; these webinars were also open to the public and allowed a chance for non-advisory group members to provide feedback on the Reentry Demonstration Initiative. DHCS has also regularly facilitated meetings of a cross-sector stakeholder advisory group to inform program design, with representation from corrections systems, community supervision entities, health care providers and provider organizations, county entities, and social services organizations. DHCS has also pursued targeted engagement of an array of stakeholders to provide one-on-one ongoing education and technical assistance (e.g., meeting weekly with the State prison system, establishing a small working group of correctional facilities and providers to inform the initiative's billing and claiming approach). DHCS released formal policy and guidance to support program implementation. In 2022, DHCS released guidance to help correctional agencies, county social service agencies/offices, and other entities fulfill their obligation to support incarcerated individuals in completing an application for Medi-Cal coverage prior to their release.[53] In 2023, DHCS also released State guidance to correctional agencies on how to access a tool to verify an individual's enrollment in Medi-Cal.[54]Most recently, DHCS finalized the release of the Policy and Operational Guide based

[53] See ACWDL 22-27 (November 10, 2022) for more information on pre-release application processes.
[54] See MEDIL 23-24 (April 13, 2023) for more information on policies and procedures for county Medicaid eligibility departments and county correctional facilities to document implementation efforts of the pre-release Medicaid mandate.

Prompts	Summary
reentering population).	on extensive stakeholder feedback. .
	Future State: Planned Activities & Associated Timelines: • DHCS will release guidance to support stakeholder implementation of the Reentry Demonstration Initiative. Guidance will leverage standard DHCS processes and instruments and will include: o Release Policy and Operational Guide laying out operational and information sharing expectations. *(Intended audience: all interested stakeholders)* **(October 2023)** o All County Welfare Directors Letter (ACWDL) that provides an overview of the Reentry Demonstration Initiative. *(Intended audience: primarily county social service agencies/offices)* **(October 2023)** o Behavioral Health Information Notice (BHIN) that provides an overview of the Reentry Demonstration Initiative. *(Intended audience: primarily county behavioral health agencies)* **(October 2023)** o All-Plan Letters that provide an overview of the Reentry Demonstration Initiative. *(Intended audience: primarily Medi-Cal MCPs)* **(October 2023)** o Updates to the Medi-Cal Provider Manual, as needed. (*Intended audience: Medi-Cal-enrolled providers)* **(Winter 2024)** • DHCS will announce the release of guidance through standard channels including press releases, email listservs, social media, and presentation at meetings with stakeholder representation. **(Ongoing)** • DHCS will also continue to provide targeted stakeholder engagement and technical assistance to implementing entities (e.g., correctional facilities, county agencies) partially informed by entities' responses to the justice-involved readiness assessments. (See 5.a. for additional information on readiness assessments) **(Ongoing)**
	Challenges and Mitigation Approaches: • **Challenge:** Due to the nature of carceral settings, potential for lack of trust between correctional facility representatives and individuals who are incarcerated, and the oft-complex health and social needs of this population, facilities may face challenges in attempts to engage members who are incarcerated to improve their awareness and education about Medi-Cal coverage and

Prompts	Summary
	health care services available to them while they are incarcerated and after their transition to the community. ○ **Mitigation Approach:** DHCS will require correctional facilities to provide individuals with all required Notices regarding Medi-Cal coverage and access to services. DHCS will require that correctional facilities provide individuals who were incarcerated for a short period or unexpectedly released to the community, DHCS will require that they are provided with a flyer and other information regarding their eligibility for and how to access ECM and other post-release services. DHCS will work with correctional facilities and other stakeholders to refine messaging and communication protocols to improve engagement and education of incarcerated members regarding Medi-Cal coverage and services. • **Challenge:** Many community-based providers, including those who have traditionally served the justice-involved population and who employ individuals with lived experience, might lack connections to standard Medi-Cal channels of communication and knowledge of Medi-Cal coverage and services. ○ **Mitigation Approach:** DHCS will leverage a broad range of communication strategies to ensure focused outreach to community-based providers and other stakeholders who have not traditionally provided or billed Medi-Cal services. This includes potentially identifying "amplifiers" at the local level with ties to relevant community-based organizations who can serve as a trusted source of information and best practices for implementing partners.
5.d. Develop systems or establish processes to monitor the health care needs and HRSN of individuals who are exiting carceral settings, as well as the services they received pre-release and the care they received post-release. This	***Current State:*** • DHCS does not yet have a monitoring process in place to monitor the health care needs and HRSN of individuals who are exiting correctional facilities or the services required post-release in the Reentry Demonstration Initiative.
	Future State: Planned Activities & Associated Timelines: • DHCS will establish a comprehensive monitoring approach for the Reentry Demonstration Initiative, in alignment with its approved demonstration and State monitoring priorities. The approved demonstration requires DHCS to submit a Monitoring Protocol after the approval of the demonstration and regular Quarterly and

Prompts	Summary
includes identifying any anticipated data challenges and potential solutions, articulating the details of the data exchanges, and executing related data-sharing agreements to facilitate monitoring of the demonstration, as described below.	Annual Monitoring Reports throughout the duration of the demonstration. **(January 2024)** (Note: In light of the fact that CMS intends to develop a Monitoring Protocol template for all Reentry Demonstrations, CMS provided an extension for submitting the Monitoring Protocol with a revised due date of January 2, 2024). It is expected that DHCS' Monitoring Protocol will include: ○ A selection of quality-of-care and health outcomes metrics and population stratifications based on CMS' upcoming guidance on the Health Equity Measure Slate. ○ Standardized reporting on categories of metrics, including but not limited to beneficiary participation in demonstration components, number of primary and specialist provider participation, utilization of services, quality of care, and health outcomes. ○ Metrics related to: ▪ Number of beneficiaries served, and types of services rendered under the demonstration. ▪ Administration of screenings to identify individuals who qualify for pre-release services. ▪ Utilization of applicable pre-release and post-release services (e.g., care management, MAT, clinical/behavioral health assessment pre-release and primary and behavioral health services post-release). ▪ Provision of health or social service referral pre-release. ▪ Participants who received care management pre-release and were enrolled in care management post-release. ▪ Take-up of data system enhancements among participating carceral settings. ○ Methods and timeline to collect and analyze non-Medicaid administrative data to help calculate applicable monitoring metrics. • In addition to the Reentry Demonstration Monitoring Protocol, DHCS also intends to establish an overall program monitoring and evaluation approach. Building upon the readiness assessment process described above, DHCS will establish ongoing monitoring and oversight within the correctional facilities to ensure delivery of pre-release services consistent with the approved Demonstration and the State's Policy and Operational Guide. **(January 2024)** Components of the monitoring and oversight approach will include:

Prompts	Summary
	○ **Use of available administrative data** to support ongoing monitoring and oversight of the Reentry Demonstration Initiative, including but not limited to claims data of services provided to individuals during both the pre- and post-release periods. **(Ongoing)** ○ **Use of data from the Justice-Involved Screening Portal** to support data collection for individuals who were found to be eligible for services, with metrics to include the number of individuals found to be eligible and the duration of services received. **(establish by October 1, 2024)** ○ **Development of care management bundles** to allow the State to track delivery of discrete sets of care management services (e.g., completion of needs assessment, completion of care manager warm hand-off). **(establish by October 1, 2024)** • DHCS is also exploring opportunities to partner with other State departments (e.g., California Department of Corrections and Rehabilitation) and implementing entities to leverage additional data to support ongoing oversight and monitoring. **(DHCS IT systems to support the Reentry Initiative will be in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** • To support the streamlined information exchange required to implement the reentry demonstration, DHCS has develop data-focused guidance for inclusion in policy and operational guidance. **(October 2023)** This guidance will clarify required data exchanges with information on transaction methods and formats. • DHCS is also requiring managed care plans and correctional facilities to establish memoranda of understanding (MOUs) regarding Reentry Initiative data exchange and will release a model MOU. **(DHCS will have template in place by October 1, 2024. DHCS will monitor compliance on an on-going basis once the correctional facility goes live.)** • DHCS will continue to convene stakeholders to understand anticipated data challenges and potential solutions (e.g., as part of a stakeholder advisory group meeting, engaging a targeted group of implementers). **(Ongoing)** • DHCS will also administer PATH capacity building funding opportunities to support implementing entities in establishing the IT systems and processes to support monitoring. **(Ongoing through duration of demonstration period)** ○ PATH funding opportunities will permit implementing entities to apply for funding to support the following activities, among other priorities:

Prompts	Summary
	▪ **Implementing Billing Systems:** This includes expenditures related to modifying IT systems needed to support delivery of and billing for Medi-Cal Reentry Services (e.g., adoption of certified electronic health record (HER) technology, purchase of billing systems). ▪ **Adoption of Certified HER Technology:** This includes expenditures for providers' purchase or necessary upgrades of certified HER technology and training for the staff that will use the HER. ▪ **Technology and IT Services:** This includes the development of electronic interfaces for prisons, jails, and youth correctional facilities to support Medicaid enrollment and suspension/unsuspension and modifications. This also includes support to modify and enhance existing IT systems to create and improve data exchange and linkages with correctional facilities, local county social service agencies/offices, county behavioral health agencies, and others, such as MCPs and community-based providers.
	Challenges and Mitigation Approaches: • **Challenge:** The carceral setting of care delivery as well as the narrow scope of covered services requires the State to establish a comprehensive and nuanced approach to program monitoring and oversight, including with regards to preventing fraud, waste, and abuse. o **Mitigation Approach:** DHCS continues to build a comprehensive, multi-pronged monitoring and oversight approach that considers the complexity of delivering a targeted set of covered services in correctional settings. DHCS plans to leverage the pre-release services aid code to identify individuals eligible for pre-release services and ensure that only eligible individuals receive covered services through the demonstration. DHCS is also building a new code set for billable pre-release service codes to ensure that only the limited set of covered services are billed during the pre-release services period. **(establish by October 1, 2024)**

Reentry Demonstration Initiative Reinvestment Plan

In accordance with the California Advancing and Innovating Medi-Cal (CalAIM) Section 1115 Demonstration Special Terms and Conditions (STC 9.11) and CMS' State Medicaid Director Letter (SMDL 23-003), California is required to reinvest federal dollars linked to certain services provided under its recently approved Reentry Demonstration Initiative. This Reentry Initiative Reinvestment Plan defines the total amount of reinvestment required and types of reinvestments that will be made over the term of the Demonstration.

Reinvestment Required

Services Requiring Reinvestment

CMS and the California Department of Health Care Services (DHCS) have identified two categories of Reentry Initiative services for determining whether and how much reinvestment may be required when net new savings are realized, including:

1. "New services" that had not previously been provided by carceral settings prior to the Demonstration; and
2. "Existing services," which would be newly Medicaid matched under the Demonstration but would have been provided by carceral settings prior to the Demonstration.

Federal financial participation (FFP) invested in "new services" does not prompt the need for reinvestment, as these services would not have otherwise been provided through Medicaid. Reinvestment is required in an amount equivalent to the amount of FFP invested in "existing services."

Based on a Statewide assessment of services provided or paid for by carceral settings prior to implementation of the Reentry Initiative, California has identified the following "existing services."

- **Laboratory and radiology services**. Prior to implementation of the Reentry Initiative, all carceral facilities provided laboratory and radiology services on-site or arranged for their provision off-site, as needed.
- **Medication and Medication Administration.** Prior to implementation of the Reentry Initiative, all carceral facilities provided medically necessary medications. However, for some facilities, there may be a gap in the provision of certain high-cost medications, such as long-acting injectables.

All other Reentry Initiative services were determined to be "new services" that had not previously been provided by carceral settings prior to the Demonstration, as further outlined below.

Amount of Reinvestment Required

In line with requirements in the STCs, **California must reinvest at least $65,375,000**, which is the total amount of projected FFP for existing services over the course of the Demonstration. This reinvestment obligation amount is within the bounds of approved budget neutrality estimates for the Demonstration and assumes the following ramp-up in participation by jails and youth correctional facilities across the

Demonstration period: 15% participation in DY 20; 70% participation in DY 21; and 90% participation in DY 22. There are separate ramp-up assumptions for State prisons across the Demonstration period as follow: 0% participation in DY 20 and DY 21; and 100% participation in DY 22.

Types of Reinvestments to Be Made Over the Course of the Demonstration

In total, **California will make an estimated $174,883,000 in reinvestments to improve health care for the justice-involved population over the course of its Demonstration**, including reinvestments in new reentry services and in the Providing Access and Transforming Health (PATH) Reentry Demonstration Initiative Planning and Implementation Program. This amount exceeds the required amount of reinvestment identified above.

New Reentry Services Approved Under the Demonstration

According to STC 9.11, the State's share of funding associated with new services covered under the Reentry Initiative qualifies as reinvestment. Based on a Statewide assessment of services provided or paid for by carceral settings prior to implementation of the Reentry Initiative, California identified the following services as "new services":

- **Care Management.** Requirements and expectations related to providing reentry care management include the following: ensuring a warm handoff to post-release care manager (if different than the pre-release care manager); ensuring the pre-release services are provided; conducting referral activities for post-release such as obtaining consent, scheduling appointments, and making warm linkages to community-based services and supports, including but not limited to educational, social, pre-vocational, vocational, housing, nutritional, transportation, childcare, child development, and mutual aid support groups; connecting individuals to services upon reentry into the community; and providing ongoing monitoring and follow-up activities to ensure the care plan is implemented. Care management may be provided by both correctional and community-based providers. Reentry care management constitutes a new investment in (and a new component of) the continuum of services provided under the Reentry Initiative.
- **Physical and Behavioral Health Clinical Consultation.** Clinical consultation services are intended to support the creation of a comprehensive, robust, and successful reentry plan, including conducting diagnosis, stabilization, and treatment in preparation for release (including recommendations or orders for needed labs, radiology, and/or medications); providing recommendations or orders for medications and durable medical equipment (DME) that will be needed upon release; and consulting with the pre-release care manager to help inform the pre-release care plan, including professional-to-professional warm handoffs for individuals who will receive behavioral health treatment in the community. Physical and behavioral health clinical consultation may be provided by both correctional and community-based providers. Pre-release physical and behavioral health clinical consultation constitutes a new investment in (and a new component to) the continuum of services that support reentry and smooth transitions into the community.
- **Medication-Assisted Treatment (MAT).** For purposes of this demonstration, MAT is defined as medication in combination with counseling/behavioral therapies, as appropriate and individually determined, and should be available for all types of SUD (e.g., both opioid and alcohol use disorders) as clinically appropriate. Correctional facilities will be able to provide all FDA-approved medications for opioid use disorder, including buprenorphine, methadone, and naltrexone, and acamprosate and naltrexone for alcohol use disorder. State prisons currently provide MAT for both

opioid and alcohol use disorders. Delivery of MAT varies by county jail, with roughly 35 out of 58 counties participating in "Expanding MAT in Criminal Justice Settings" initiative; within those 35 counties, jails have taken varied approaches in the types of MAT they provide. Youth correctional facilities generally do not provide MAT. All correctional facilities will need to adjust the delivery of MAT to align with the justice-involved pre-release services requirements, and therefore, the State considers MAT to be a new service under the Reentry Initiative.

- **Community Health Workers.** Community Health Worker (CHW) services are preventive health services, as defined in 42 CFR 440.130(c), to prevent disease, disability, and other health conditions or their progression; prolong life; and promote physical and mental health. CHWs are trusted members of their community who help address chronic conditions, preventive health care needs, and health-related social needs. CHW services constitute a new investment in (and a new component of) the continuum of services that support reentry and smooth transitions into the community.

DHCS estimates the State will reinvest approximately $74,883,000 in State dollars for the above "new services" over the course of the Demonstration. Again, this planned reinvestment amount is consistent with budget neutrality estimates for the Demonstration and assumes the same ramp-up in participation by jails, State prisons, and youth correctional facilities across the Demonstration period as outlined above for "existing services."

PATH

According to STC 9.11, California may also reinvest dollars in a range of allowable initiatives that benefit the justice-involved population broadly, including health information technology and data sharing as well as increased community-based provider capacity linked to the specific needs of justice-involved individuals or individuals at risk of justice involvement. California's investment in the PATH initiative's Reentry Demonstration Initiative Planning and Implementation Program is consistent with these goals. The PATH Reentry Demonstration Initiative Planning and Implementation Program will fund and support planning and IT investments that will enable implementation of the Reentry Initiative and care coordination to support reentry.

Over the course of the Demonstration, DHCS estimates the State will reinvest approximately $100 million in State general fund dollars for the PATH Reentry Demonstration Initiative Planning and Implementation Program.

Summary of Reinvestment Required and Planned

Reinvestment Required	
(A) Projected FFP for existing services	$65,375,000
Reinvestment Planned	
Projected State share of funding for new services	$74,883,000
Projected State share of funding for PATH Reentry Demonstration Initiative Planning and Implementation Program	$100,000,000
(B) Total Reinvestment Planned	$174,883,000

Total Excess Reinvestment Planned (B)-(A)	**$109,508,000**

Attachment FF

Time-limited Expenditure Authority and Associated Requirements for the COVID-19 Public Health Emergency (PHE) Demonstration Amendment

Expenditure Authority

Under the authority of section 1115(a)(2) and title XIX of the Social Security Act (the Act), expenditures made by the state for the items identified below, which are not otherwise included as expenditures under section 1903 of the Act, shall be regarded as expenditures under section 1903 of the Act for the period from March 1, 2020 through the end of the unwinding period, or until all redeterminations are conducted during the unwinding period.

Continuous Coverage for Individuals Aging Out of CHIP. Expenditures to provide continued eligibility for CHIP enrollees who turned 19 between March 1, 2020, and the end of the California's unwinding period and therefore would be ineligible for CHIP due to age, and who are ineligible for Medicaid due to having income above 133 percent of the federal poverty level (FPL), provided such individuals have satisfactory immigration status.

Continuous Coverage for Specified Formerly Pregnant Individuals. Expenditures to provide continued eligibility for formerly pregnant individuals for whom coverage in the Medi-Cal Access Program (i.e., having income above 208 percent and up to and including 317 percent of the FPL) in CHIP has ended, and Health Services Initiative (HSI) postpartum coverage has ended, and who:

a. No longer have coverage under the CHIP unborn child option due to the pregnancy ending;
b. Finished up to 12 months of postpartum coverage under the state's HSI;
c. Are otherwise ineligible for Medicaid or CHIP due to the pregnancy ending; and
d. Have satisfactory immigration status.

Expenditures are not allowed for individuals who do not have satisfactory immigration status.

Monitoring and Evaluation Requirements

1. **Evaluation Design.** The state must submit an Evaluation Design to CMS no later than 60 days after the demonstration amendment approval. Once approved, the state is required to post its Evaluation Design to the state's website within 30 days of CMS approval of the Evaluation Design, per 42 CFR 431.424(e). In developing the Evaluation Design, the state can focus on qualitative methods and descriptive data to address evaluation questions that will support understanding the successes, challenges, and lessons learned in implementing the demonstration amendment. The state must also describe its plans to collect and report data on the size of the populations served under this demonstration amendment, and a summary of service utilization. The Evaluation Design must outline plans to assess how demonstration outlays affect the state's response to the PHE. The state must also describe in the Evaluation Design its process to: (1) identify accurately individuals with satisfactory immigration status; and (2) only claim FFP for services for individuals with satisfactory immigration status. CMS will provide additional technical assistance to support developing the Evaluation Design.

2. **Final Report.** The state is required to submit to CMS for review and approval a Final Report,

which will consolidate the monitoring and evaluation reporting requirements for this demonstration amendment. The Final Report is due no later than one year after the end of the expenditure authority. In addition to capturing data on the number of individuals served and utilization of services under this amendment, the Final Report must undertake qualitative and descriptive assessment on the demonstration implementation, lessons learned, and best practices for similar situations. The state is required to track expenditures associated with this demonstration, as applicable, and may include but not be limited to, administrative costs and program expenditures. Furthermore, the state must include in the Final Report a discussion on how it implemented the process—including any challenges encountered and how those were overcome—to accurately identify claims and capitation payments for individuals with satisfactory immigration status, and to assure that individuals with UIS were not included in FFP claims for services. For each year of the amendment that the state is required to complete an Annual [Monitoring] Report per 42 CFR 431.428(a), the state may submit all applicable information for the amendment approval period in the Final Report. CMS will provide additional guidance on the structure and content of the Final Report.

Background:

This standalone appendix may be utilized by the state during emergency situations to request amendment to its approved waiver. It includes actions that states can take under the existing Section 1915(c) home and community-based waiver authority in order to respond to an emergency. Other activities may require the use of various other authorities such as the Section 1115 demonstrations or the Section 1135 authorities.[i] This appendix may be completed retroactively as needed by the state.

Appendix K-1: General Information

General Information:

A. State: California

B. Waiver Title: CalAIM Section 1115 Demonstration

C. Control Number:
11-W-00193/9

D. Type of Emergency (The state may check more than one box):

●	**Pandemic or Epidemic**
○	**Natural Disaster**
○	**National Security Emergency**
○	**Environmental**
○	**Other (specify):**

E. Brief Description of Emergency. *In no more than one paragraph each*, briefly describe the: 1) nature of emergency; 2) number of individuals affected and the state's mechanism to identify individuals at risk; 3) roles of state, local and other entities involved in approved waiver operations; and 4) expected changes needed to service delivery methods, if applicable. The state should provide this information for each emergency checked if those emergencies affect different geographic areas and require different changes to the waiver.

COVID-19 pandemic. This Attachment K will apply to specific provider types, providing direct-care services through Community-Based Adult Services (CBAS). The State intends to use funds from section 9817 of the American Rescue Plan (ARP) Act for one-time payment meant to help alleviate financial strain and hardships suffered by California's HCBS direct care workforce during the COVID-19 PHE and expand access to providers and incentivize retention of current California's existing HCBS direct care workforce. The State will begin processing the direct care workforce payments September 1, 2023.

F. Proposed Effective Date:
Start Date: March 1, 2023

Anticipated End Date: November 11, 2023

G. Description of Transition Plan.

All activities will take place in response to the impact of COVID-19 as efficiently and effectively as possible based upon the complexity of the change.

H. Geographic Areas Affected:

These actions will apply to all direct-care HCBS providers impacted by the COVID-19 virus pandemic, across the State of California, providing services through CBAS.

I. Description of State Disaster Plan (if available) ***Reference to external documents is acceptable*:**

N/A

Appendix K-2: Temporary or Emergency-Specific Amendment to Approved Waiver

Temporary or Emergency-Specific Amendment to Approved Waiver:

These are changes that, while directly related to the state's response to an emergency situation, require amendment to the approved waiver document. These changes are time limited and tied specifically to individuals impacted by the emergency. Permanent or long-ranging changes will need to be incorporated into the main appendices of the waiver, via an amendment request in the waiver management system (WMS) upon advice from CMS.

a.___Access and Eligibility:

i.___Temporarily increase the cost limits for entry into the waiver.
[Provide explanation of changes and specify the temporary cost limit.]

ii.___Temporarily modify additional targeting criteria.

[Explanation of changes]

b.___Services

i.___Temporarily modify service scope or coverage.

[Complete Section A- Services to be Added/Modified During an Emergency.]

ii.__Temporarily exceed service limitations (including limits on sets of services as described in Appendix C-4) or requirements for amount, duration, and prior authorization to address health and welfare issues presented by the emergency.

[Explanation of changes]

iii.___Temporarily add services to the waiver to address the emergency situation (for example, emergency counseling; heightened case management to address emergency needs; emergency medical supplies and equipment; individually directed goods and services; ancillary services to establish temporary residences for dislocated waiver enrollees; necessary technology; emergency evacuation transportation outside of the scope of non-emergency transportation or transportation already provided through the waiver).

[Complete Section A-Services to be Added/Modified During an Emergency]

iv.___Temporarily expand setting(s) where services may be provided (e.g. hotels, shelters, schools, churches) Note for respite services only, the state should indicate any facility-based settings and indicate whether room and board is included:

[Explanation of modification, and advisement if room and board is included in the respite rate]:

v.___Temporarily provide services in out of state settings (if not already permitted in the state's approved waiver). [Explanation of changes]

c. ___ Temporarily permit payment for services rendered by family caregivers or legally

responsible individuals if not already permitted under the waiver. Indicate the services to which this will apply and the safeguards to ensure that individuals receive necessary services as authorized in the plan of care, and the procedures that are used to ensure that payments are made for services rendered.

d.____Temporarily modify provider qualifications (for example, expand provider pool, temporarily modify or suspend licensure and certification requirements).

i.____Temporarily modify provider qualifications.

[Provide explanation of changes, list each service affected, list the provider type, and the changes in provider qualifications.]

ii.____Temporarily modify provider types.

[Provide explanation of changes, list each service affected, and the changes in the .provider type for each service].

iii.____Temporarily modify licensure or other requirements for settings where waiver services are furnished.

[Provide explanation of changes, description of facilities to be utilized and list each service provided in each facility utilized.]

e.____Temporarily modify processes for level of care evaluations or re-evaluations (within regulatory requirements). [Describe]

f. X Temporarily increase payment rates

[Provide an explanation for the increase. List the provider types, rates by service, and specify whether this change is based on a rate development method that is different from the current approved waiver (and if different, specify and explain the rate development method). If the rate varies by provider, list the rate by service and by provider].

The State intends to use funds from section 9817 of the American Rescue Plan (ARP) Act for one-time payments meant to help alleviate financial strain and hardships suffered by California's HCBS direct care workforce during the COVID-19 PHE and expand access to providers and incentivize retention of current California's existing HCBS direct care workforce. The State will begin processing the direct care workforce payments September 1, 2023.

In accordance with the American Rescue Plan Act of 2021, Section 9817, allow a one-time incentive payment of $500 to each direct care, non-In-Home Supportive Services (IHSS) provider, identified below, of Medi-Cal CBAS services to Medi-Cal beneficiaries for at least two months during the Public Health Emergency, that are currently providing direct care services through CBAS. These payments are funded through California's HCBS Spending Plan, approved by CMS on January 4, 2022.

The payment will serve as an incentive payment to maintain the pool of provider infrastructure for HCBS. Providers eligible for this incentive payment are currently providing HCBS direct care services and provided services to program recipients during a minimum of two months during the Public Health Emergency, between the dates of March 2020 and March 2022.

- Nurse Case Managers
- Social Work Case Managers
- Social Worker Assistants
- Program Aides

- Driver (Excluding rideshare)
- Nutrition services aide
- Physical therapist
- Physical therapist assistant
- Physical therapist aide
- Occupational therapist
- Occupational therapist assistant
- Occupational therapist aides
- Speech Language Pathologist
- Speech Language Pathologist Aide

The payment will be issued through a self-verification process and provider organizations will apply on behalf of their eligible employees. The State will provide a one-time lump sum payment to the provider organization; and the provider organization will be required to distribute the payments to employees within 30 days of receipt.

These payments are for the direct benefit of direct care service workers and provider organizations cannot take any fees from the $500 direct payment (e.g., administrative costs) and direct care service workers will receive 100% of the payment. If a provider organization is unable to distribute a payment to an eligible employee, they are required to return the funds to the State.

g. ___ Temporarily modify person-centered service plan development process and individual(s) responsible for person-centered service plan development, including qualifications.

[Describe any modifications including qualifications of individuals responsible for service plan development, and address Participant Safeguards. Also include strategies to ensure that services are received as authorized.]

h. Temporarily modify incident reporting requirements, medication management or other participant safeguards to ensure individual health and welfare, and to account for emergency circumstances. [Explanation of changes]

i.___Temporarily allow for payment for services for the purpose of supporting waiver participants in an acute care hospital or short-term institutional stay when necessary supports (including communication and intensive personal care) are not available in that setting, or when the individual requires those services for communication and behavioral stabilization, and such services are not covered in such settings.
[Specify the services.]

j.___Temporarily include retainer payments to address emergency related issues.

[Describe the circumstances under which such payments are authorized and applicable limits on their duration. Retainer payments are available for habilitation and personal care only.]

k.___Temporarily institute or expand opportunities for self-direction.

[Provide an overview and any expansion of self-direction opportunities including a list of services that may be self-directed and an overview of participant safeguards]

l.___Increase Factor C.

[Explain the reason for the increase and list the current approved Factor C as well as the proposed revised Factor C]

m.__Other Changes Necessary [For example, any changes to billing processes, use of

contracted entities or any other changes needed by the State to address imminent needs of individuals in the waiver program]. [Explanation of changes]

Contact Person(s)

A. The Medicaid agency representative with whom CMS should communicate regarding the request:

First Name:	Nichole
Last Name	Kessel
Title:	HCBS Policy Branch Chief
Agency:	California Department of Health Care Services
Address 1:	1501 Capitol Avenue
Address 2:	P.O. Box 997413, MS 4502
City	Sacramento
State	California
Zip Code	95899-7413
Telephone:	916-713-8345
E-mail	Nichole.Kessel@dhcs.ca.gov
Fax Number	N/A

B. If applicable, the State operating agency representative with whom CMS should communicate regarding the waiver is:

Provider Type:	License *(specify)*	Certificate *(specify)*	Other Standard *(specify)*

Verification of Provider Qualifications

Provider Type:	Entity Responsible for Verification:	Frequency of Verification

Service Delivery Method				
Service Delivery Method *(check each that applies)*:	☐	Participant-directed as specified in Appendix E	☐	Provider managed

[i] Numerous changes that the state may want to make necessitate authority outside of the scope of section 1915(c) authority.

States interested in changes to administrative claiming or changes that require section 1115 or section 1135 authority should engage CMS in a discussion as soon as possible. Some examples may include: (a) changes to administrative activities, such as the establishment of a hotline; (b) suspension of general Medicaid rules that are not addressed under section 1915(c) such as payment rules or eligibility rules or suspension of provisions of section 1902(a) to which 1915(c) is typically bound.
