

'Job Aid' For Governmental Agencies

That Use One Taxpayer Identification Number For All Health Services

This document provides information for proper disclosure of control interests by governmental agencies that use one Taxpayer Identification Number (TIN) to bill for all health services provided by the governmental agency. They also use the same one TIN when completing and submitting Medi-Cal applications through the PAVE online enrollment system.

Working In The PAVE System And PAVE Business Profiles

The PAVE Business Profile is the 'virtual area' where the Medi-Cal records and applications related to a same TIN are managed and worked, many times by multiple PAVE users. When using the PAVE enrollment system to submit applications and to manage accounts for large organizations, such as governmental agencies, it is important for all users in the Business Profile of the organization to coordinate their work to avoid causing deletions or changes to the work that others are doing at the same time. This is especially true for the information about the control interest persons and managers since these persons should be the same in all Medi-Cal records reported under the agency's TIN in the Business Profile. Once approved, the information about these persons displays in the Medi-Cal records, (called Accounts) in the Business Profile for all sites and provider types that submit claims under the same TIN.

Provider Accounts - Ownership & Control Interest Information

It is important to know that some Medi-Cal records created prior to the existence of the PAVE enrollment system **do not** contain any information about the persons with control interest or the site managers and some of them **do** contain information about the approved control interest persons, but the information is incomplete.

In the cases where Medi-Cal records **do not** hold any control interest/manager information saved under the TIN, the first time a user in the Business Profile for that TIN starts an application, the Disclosure Information Form for Ownership/Control Interests will be blank, see below.

Ownership/Control Interest

Summary

In this section, a complete disclosure of Ownership and financial interest is required. Please let me know about any individuals who have ownership or control interest in your practice. Fortunately, you can share any record with another user, making it easy to complete your application.

Are there any individuals or entities (corporations, unincorporated associations, partnerships, or similar entities) who have 5% or more (direct or indirect) ownership or control interest, or any partnership interest in

All officers of a corporation, directors, agents, and managing employees of must be reported in this section as well.

All board members and officers of a non-profit entity must also be reported in this section.

Use the table below to add any new individual or entity owners or those with control interest

☐ I reviewed the above information and to the best of knowledge, I do not have any updates or additions to make.

In summary, when an organization starts their first PAVE application(s) in a Business Profile and they open the “Disclosure Information Form” for Ownership/Control Interests, they may need to provide all of the organization’s control interest persons’ information or they might see that some persons are already pre-populated and they only need to update or add some additional information.

How to Update the Ownership & Control Interest Information

If the PAVE user sees persons are pre-populated in this part of the application, the user will need to click on “View Details” and for each person’s name in the list, click on **the “Edit” button** (pencil icon) and add information for all of the listed topics that open up (SEE NEXT TWO SCREENSHOTS). To complete this section, the user must answer all questions listed, i.e., addresses and personal information, roles in the organization, associations, participation in Medicare or Medicaid, ownership in other healthcare businesses and adverse actions for every person with control interest.

The screenshot displays the PAVE application interface for the 'Ownership/Control Interest' section. On the left, a sidebar lists various sections: Getting Started, Business Information, Practice Information, Disclosure Information (expanded), Program Participation, Adverse Actions, Fines/Debts (Gov.), Subcontractors, Ownership/Control Interest (selected), Significant Transactions, Rendering Provider Affiliations, Claim Payment, Signature, and Submit Application. The main content area shows a progress bar at the top with 'Ownership/Control Interest' and 'Summary' tabs. A callout box explains that the information is associated with the TAXID/EIN entered in the Business Information social form and provides instructions on how to add or view details. Below this, a summary of current owners and those with control interest is shown. A table lists individual records, with the first record highlighted and a red box around the 'View Details' button. A tooltip for the 'View details' button states: 'Select this option to view more details or search a particular record for edition.' The table shows 1 total record. Below the table, there is a checkbox for reviewing the information and a section for reporting ownership or control interest in other entities, specifically mentioning ROBERT MARRIOTT MEDICAL CORP. At the bottom, there is a search bar and an 'Add' button.

Once the first PAVE application has been approved, PAVE will populate the information about these persons in all Accounts in the Business Profile, which is the “TIN owner” level of the Medi-Cal record and includes all locations/sites. Once this information is complete in the PAVE Business Profile due to approved PAVE applications, then subsequent applications made in the Business Profile will populate all of these persons. It is recommended that none of these persons be deleted unless they no longer work for the governmental agency in the role that would require reporting them.

If a user finds that an application does not auto-populate these persons and this is not the first PAVE application, it is possibly because a previous PAVE application was denied that would have added them or a previous PAVE application was approved without all of the persons contained in it.
