“At Zócalo Health, we’re working to rebuild trust in the health care system by meeting communities with culturally grounded, consistent care they can rely on. That’s why our partnership with BrightLife Kids is so meaningful. They provide a service that removes barriers entirely, offering families immediate mental health coaching without the friction that so often leads to disengagement. It gives us real peace of mind knowing our patients and their families are not only being supported, but that someone will be there when they reach out. Together, we’re creating a more connected, trustworthy system of care for the communities that need it most.”

Walther Perez, Community Partnerships Manager
