INTRODUCTION TO THE REENTRY INITIATIVE TOOLKIT

Overview of the Reentry Initiative

[The Reentry Initiative](#), also referred to as the Justice-Involved Initiative, is part of California’s 1115 Demonstration Waiver that was approved by the Centers for Medicare and Medicaid Services (CMS). Its goal is to establish a coordinated community reentry process that will assist people leaving incarcerations in connecting to the physical and behavioral health services they need prior to release and when reentering their communities. These efforts include:

- » Allowing eligible Californians who are currently incarcerated to enroll in Medi-Cal and receive a targeted set of services (e.g., case management, clinical consultations, medication and medication administration laboratory and radiology services, medications for substance use disorder (SUD), and [community health worker](#) services) for up to 90 days prior to their release into the community as well as medications and durable medical equipment (DME) in-hand upon release; and
- » Ensuring continuity of health care coverage and services before, during, and immediately after an individual’s release to the community.

Overview of the Reentry Initiative Toolkit

The Reentry Initiative Toolkit focuses on implementing data-sharing under the Reentry Initiative. Under the Reentry Initiative, county welfare departments (CWDs), county correctional facilities (CCFs), and county youth correctional facilities are required to implement the mandatory Pre-Release Medi-Cal Application Process.¹ The All County Welfare Director Letter (ACWDL) makes clear that the application process

Disclaimer

As the state’s Medi-Cal agency, DHCS does not have the authority to interpret or enforce many of the federal privacy laws that apply to the disclosure of information under CalAIM and that are discussed and referenced throughout this Toolkit. As such, DHCS cannot provide legal advice to Medi-Cal Partners regarding when disclosures comply with applicable privacy laws. This document is meant to provide guidance only; Medi-Cal Partners should consult with their individual legal counsels before making any determinations regarding data-sharing and required consent.

¹ California Department of Health Care Services, All County Welfare Directors Letter No. 22-27, <https://www.dhcs.ca.gov/services/medi-cal/eligibility/letters/Documents/22-27.pdf> (November 10, 2022).

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

requires ongoing communication between CCFs and CWDs, and, furthermore, that California law permits sharing of records among CCFs and CWDs, provided such sharing complies with all applicable state and federal requirements. More information regarding the implementation and operational policies, including the coordination of data sharing, can be found in the [Policy and Operational Guide for Planning and Implementing the CalAIM Justice-Involved Initiative](#).

This Toolkit describes specific scenarios that organizations and/or providers in the field may encounter when requesting and/or sharing health and social service information (HSSI) from Medi-Cal Partners. The goal is to provide operational guidance through real-world scenarios and data flows regarding when consent may be needed to share information and help stakeholders understand the state and federal laws that are implicated when implementing the Reentry Initiative and coordinating care across institutions.

Reentry Initiative Toolkit Program Services

Each Toolkit scenario will fall under one of the program service categories below:

- » Pre- and Post-Release Services
- » Care Management Services
- » Additional Reentry Initiative-Related Clinical Services
- » [Behavioral Health Links](#) (see [Appendix A](#) for more information)

Toolkit Actors

This Toolkit includes various scenarios that involve different individuals or “actors” to carry out the tasks described in each situation. Below is a list of the actors included in this Toolkit.² For specific definitions of terms, please see the glossary in [Appendix A](#).

Reentry Initiative Individuals

- A Reentry Initiative Individual is someone who is currently or was formerly incarcerated within the past twelve months

State Departments

- California Department of Health Care Services (DHCS)
- County Social Services Departments

² These are intended to be illustrative examples of individuals receiving services under the Reentry Initiative.

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

Pre-Release Providers

- Correctional Facility Clinical Staff (e.g., health care providers within the correctional facility)
- In-Reach Providers (e.g., clinical consultants, In-Reach Specialty Behavioral Health Provider)
- Pre-Release Care Managers (embedded and In-Reach)

Post-Release Providers

- Durable Medical Equipment Provider
- Post-Release Enhanced Care Management Lead Care Manager

Community Organizations

- Community-Based Providers
- Community Health Workers

Additional Toolkit Actors

- Designated Support System
- Managed Care Plans (MCPs)
- MCP Justice Involved Liaison
- Prior Treating Providers

OVERVIEW OF APPLICABLE LAWS AND REGULATIONS

Federal Laws and Regulations

Health Insurance Portability and Accountability Act of 1996 (HIPAA). HIPAA is a federal law that regulates “protected health information” (PHI). PHI is a subset of Personally Identifiable Information (PII) that consists of PII relating to an individual’s health that is created or received by a “covered entity.”³ Covered entities include health care providers and payers, such as doctors, hospitals, clinics, behavioral health care providers, ECM health care providers, and Medi-Cal. HIPAA permits disclosure of PHI among covered entities for certain purposes—including treatment, payment, or health care operations (certain administrative, legal, financial, and quality improvement activities, including care coordination and case management)—**without** patient authorization. Disclosures can also be made for other purposes if the patient who is the subject of the PHI (or, in some cases, their parent/guardian) authorizes its disclosure on a signed consent form.

With respect to what care coordination and case management activities entail, the Department of Health and Human Services Office for Civil Rights (OCR) has taken the position, in a 2021 Proposed Rule – “Proposed Modifications to the HIPAA Privacy Rule To Support, and Remove Barriers to, Coordinated Care and Individual Engagement” – that the Privacy Rule currently permits covered entities to disclose PHI without individual authorization to social services agencies, community-based organizations, Home and Community Based (HCBS) Services providers, and other similar third parties that provide health-related services to specific individuals for individual-level care coordination and case management, either as a treatment activity of a covered health care provider or as a health care operations activity of a covered health care provider or health plan.

In light of OCR’s statements in the preamble to this proposed rule, in addition to the current text of the HIPAA Privacy Rule, covered entities, including managed care plans, are able to disclose PHI to organizations and service providers involved in an individual’s treatment and care without the individual’s authorization as long as the disclosure is for the purpose of providing health-related services – including housing support services – for care coordination and case management.

Notably, HIPAA contains an important requirement governing the *amount* of PHI that can be disclosed for most purposes other than treatment, known as the “minimum necessary” rule. It holds that disclosures of PHI other than for treatment purposes,

³ US Department of Health and Human Services, “Covered Entities and Business Associates,” June 16, 2017, available at <https://www.hhs.gov/hipaa/for-professionals/covered-entities/index.html>

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

including for purposes including health care operations (e.g., care coordination), be limited to the minimum necessary to accomplish the intended purpose.

Key Takeaway:

Health care providers and plans can disclose health information to organizations involved in individuals' care, including housing support organizations, without the individuals' consent, if such disclosures are for purposes of care coordination and case management.

Note: Not all providers of health care are subject to HIPAA. However, for purposes of the scenarios outlined in this Toolkit, we are assuming that the described health care providers, including Enhanced Care Management health care providers and those who deliver health care through behavioral health entities, are covered entities under HIPAA.⁴ We are also assuming that county behavioral health agencies are covered entities under HIPAA. County Social Services Departments (SSDs) and other providers of health-related social services, however, are not typically covered entities under HIPAA and instead may be Business Associates. Business Associates are entities that use or store PHI on behalf of covered entities and have entered into a contract with the covered entities (a "Business Associate Agreement" (BAA)) that governs such use.

42 C.F.R. Part 2: 42 C.F.R. Part 2 (or Part 2) is a set of federal regulations that protects the confidentiality of some types of SUD information. Part 2 does not apply to all SUD information, but only to information that has been obtained by a Part 2 provider, sometimes called a Part 2 program, and that would identify an individual as having or having had an SUD.⁶ In order to be deemed a Part 2 provider or program, the provider must: (1) receive federal assistance; and (2) hold themselves out as providing and actually provide SUD diagnosis, treatment, or referral for treatment. Many, but not all, SUD providers are "Part 2 providers."

When Part 2 applies, it is often stricter than HIPAA, in part because the regulation does not permit disclosures of information for treatment or care coordination purposes without patient consent. Part 2 also does not permit disclosures of Part 2 information for payment purposes without consent, meaning Part 2 programs need their patients to provide a written consent if they want to submit claims to their patients' health insurers, including Medi-Cal.

⁴ Note that not all health care providers are HIPAA covered entities, nor are all housing providers. In order to be a covered entity under HIPAA, a provider must submit HIPAA transactions, such as claims for payment, electronically. Understanding that whether or not a particular housing organization is a covered entity will vary, for purposes of this Toolkit, we are assuming that the health care providers described in each scenario are Medi-Cal-enrolled providers that submit their claims for health care payment to Medi-Cal electronically and are thus covered by HIPAA.

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

Because Medi-Cal Partners provide services to Members with SUDs, the Part 2 regulations apply to some of the information exchanged under CalAIM, and as a result Medi-Cal Partners need to assess whether the information they are exchanging is subject to Part 2.

Under the recently released Part 2 final rule,⁷ patients may now consent to current and future uses and disclosures of their SUD records for treatment, care coordination, and payment purposes using a single form (referred to in the rule as a “TPO consent”). Pursuant to this new rule, if an individual signs a TPO consent, a covered entity or business associate may use and disclose their SUD records for treatment, payment, and health care operations as permitted by the HIPAA regulations, until such time as the patient revokes such consent in writing.

Individuals also may now describe an entire category of people who can receive their SUD data (e.g., “housing support organizations,” or “my treating providers, health plans, third party payers, and people helping to operate this program”), rather than having to list the name of every potential recipient on the form. Consents may also have an expiration date of “none.”⁸

When individuals are signing a TPO consent for future disclosures of their health information, their Part 2 records may also now be re-disclosed by Part 2 record recipients **who are covered entities and business associates** without additional patient consent as long as such redisclosure complies with the HIPAA Privacy Rule.⁵ When recipients of Part 2 records are **not** covered entities or business associates (e.g., a provider of housing support services), individual authorization for redisclosure of Part 2 information is generally required.⁶

⁵ This permitted redisclosure excludes uses and disclosures for civil, criminal, administrative, and legislative proceedings against the patient. 45 C.F.R. 2.33(b)(1).

⁶ When Part 2 information is “disclosed for payment or health care operations activities to a lawful holder that is not a covered entity or business associate, the recipient may further disclose those records as may be necessary for its contractors, subcontractors, or legal representatives to carry out the payment or health care operations specified in the consent on behalf of such lawful holders.” (42 C.F.R §2.33(b)(3).) The lawful holder must have in place a contract with the contractor or legal representative that meets certain requirements set forth in §2.33(c).

Key Takeaway:

Part 2 now permits an individual:

- »To describe an entire category of providers on a Part 2 consent form, such as “my housing support providers.”
- »Sign a single TPO consent for all future uses and disclosures of Part 2 information that are for treatment, payment, or healthcare operations.

Part 2 data recipients that are not covered entities generally need to obtain additional consent before redisclosing such records; Part 2 data recipients that are covered entities or business associates may redisclose Part 2 data without additional authorization when using or disclosing Part 2 in accordance with HIPAA.

Note: The federal statute underlying the Part 2 regulations incorporates the HIPAA Privacy Rule definition of “health care operations,” which, as explained above, includes care coordination and case management activities.

As a result, the Part 2 rule updates allowing redisclosure of Part 2 records received by covered entities and their business associates for purposes of treatment, payment, and health care operations “as permitted by the HIPAA regulations” enable health care clinicians and managed care organizations to share these SUD records for purposes of care coordination without additional patient consent.

State Laws and Regulations

Assembly Bill (AB) 133: AB 133 is a law that was passed in July 2021 and changed California state law to promote data exchange and care coordination for people receiving services under CalAIM (see section 3 in the Data Sharing Authorization Guidance, describing AB 133⁷). AB 133 permits Medi-Cal Partners to disclose personal health information (PHI) and personally identifiable information (PII) among one another so long as such disclosure improves care coordination and health outcomes and is consistent with federal law. Specifically, as part of an effort to improve access to

⁷ CA Department of Health Care Services, “CalAIM Data Sharing Authorization Guidance,” October 2023, available at <https://www.dhcs.ca.gov/CalAIM/ECM/Documents/CalAIM-Data-Sharing-Authorization-Guidance.pdf>

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

care and delivery of comprehensive health care, AB 133 allows data sharing without consent even in situations where other California privacy laws would require consent.

Note that this Toolkit does not analyze the impact of most of the California laws whose consent requirements are pre-empted by AB 133⁸, such as:

- » Health and Safety Code § 11845.5 (which governs SUD records);
- » Health and Safety Code § 121010 (which governs HIV/AIDS information);
- » The Confidentiality of Medical Information Act (CMIA), which governs disclosures of medical information and has special protections for abortion-related information.

These analyses are not included because AB 133 applies in each of the Toolkit scenarios. You may wish to consult legal counsel to confirm whether AB 133 applies in your specific situation. If AB 133 does **not** apply, you may need to consider whether the above-mentioned or other California and/or Federal laws require consent to share data.

Overview of General Process Flows

The purpose of this high-level general process flow is to outline situations in which data sharing can occur under HIPAA and to help Medi-Cal Partners understand whether: 1) they are a HIPAA covered entity; and 2) whether consent is required for the desired exchange of data.

Disclaimer

As the state's Medi-Cal agency, DHCS does not have the authority to interpret or enforce many of the federal privacy laws that apply to the disclosure of information under CalAIM and that are discussed and referenced throughout this Toolkit. As such, DHCS cannot provide legal advice to Medi-Cal Partners regarding when disclosures comply with applicable privacy laws. This document is meant to provide guidance only; Medi-Cal Partners should consult with their individual legal counsels before making any determinations regarding data-sharing and required consent.

Draft for Public Comment: Updated November 21, 2024

Example of Data Exchange Between HIPAA Covered Entities

The following data-flow provides an example of the exchange of PHI between HIPAA covered entities and non-covered entities, such as housing providers. The flow also provides examples of HIPAA covered entities and non-covered entities that will be highlighted throughout the Toolkit scenarios. In the example illustrated below, PHI does **not** include information that is also subject to 42 C.F.R. Part 2.

DRAFT

Frequently Asked Question Regarding Disclosures for Purposes of Healthcare Operations

Question: Can health care providers, such as ECM providers or specialty behavioral health providers, or health plans, such as Medi-Cal managed care, share health information with entities such as housing-support organizations for purposes of care coordination?

Answer: Yes. The HIPAA Privacy Rule permits covered entities – including health care providers and health plans – to use or disclose protected health information (PHI), without individual authorization, for purposes of treatment, payment, and healthcare operations.⁹ “Healthcare operations” are defined to include “case management and care coordination” activities of a covered entity.¹⁰ This means that housing organizations are able to receive PHI as part of their receipt of referrals for Medi-Cal-covered services, as would housing organizations providing non-Medicaid-covered services, such as county housing organizations for BHSA-funded housing supports.

(For a more detailed analysis, please see p. 5 of this Toolkit.)

Community Supports Housing Navigation and Support Services

For the purposes of this Toolkit, the provision of Housing Community Supports services to Medi-Cal MCP Members by housing organizations is considered to fall within the scope of treatment and/or care coordination as defined by HIPAA.

⁹ 45 C.F.R. §164.506(a).

¹⁰ 45 C.F.R. §164.501

Draft for Public Comment: Updated November 21, 2024

General Process Flow – Part 2 Providers

How to Determine Whether an Individual or Entity is a Part 2 Provider

This data flow provides a decision-tree, along with guiding questions and answers, to help partners determine if they are considered a Part 2 provider. Note that even if a partner is not a Part 2 provider, Part 2 may apply to records they have received from a Part 2 provider. (For more information on Part 2 and its requirements, see page 6.)

DRAFT

Note: Housing providers are usually not Part 2 providers because they do not provide or hold themselves out as providing SUD diagnosis, treatment, or referrals. For more information about whether your organization is a Part 2 provider, please see the Frequently Asked Questions below.

Part 2 Frequently Asked Questions:

This FAQ contains guidance published by the Substance Abuse and Mental Health Services Administration (SAMHSA), the agency within the U.S. Department of Health and Human Services that leads public health efforts to advance behavioral health. All Part 2 providers must comply with all applicable federal requirements under Part 2 and this FAQ is relevant to all Part 2 providers rendering SUD services under the CalAIM 1115 Demonstration Waiver. This FAQ will define several terms that are used throughout the toolkit related to Part 2 Providers.

Question: Is a correctional facility a Part 2 provider?

Answer: While generally correctional facilities do not hold themselves out to the public as providing SUD services and are thus likely not considered Part 2 providers, DHCS defers to the individual correctional facility to make a legal determination as to whether it meets the criteria to be considered a Part 2 provider.

Question: How do I know if I “hold myself out as providing SUD services and provide SUD diagnosis, treatment or referral”?

Answer: According to SAMHSA,¹¹ a provider may “hold itself out” as providing SUD services if it, among other activities, obtains a state license specifically to provide SUD services, advertises SUD services, has a certification in addiction medicine, or posts statements on its website about the SUD services it provides.¹² Individual clinicians, as well as clinics, hospitals, and other health care facilities, can be Part 2 providers; a physician can be subject to Part 2 even if that physician works in a facility that is not subject to the regulation.¹³

Question: What is considered a federally assisted program?

¹¹ Substance Abuse and Mental Health Services Administration, “About Us,” February 14, 2024, available at <https://www.samhsa.gov/about-us>.

¹² Substance Abuse and Mental Health Services Administration, “Substance Use and Confidentiality Regulations,” October 27, 2023, available at <https://www.samhsa.gov/about-us/who-we-are/laws-regulations/confidentiality-regulations-faqs>.

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

Answer: A program (e.g., individual, entity (other than a general medical facility) is federally assisted¹⁴ if it:

1. Is authorized, licensed, certified, or registered by the federal government;
2. Received federal funding in any form, even if the funds do not directly pay for the alcohol or drug use services;
3. Is assisted by the Internal Revenue Service through a grant of tax-exempt status or allowance of tax deductions for contributions;
4. Is authorized to conduct business by the federal government (e.g., certified as a Medicare provider, authorized to conduct methadone maintenance treatment, or registered with the Drug Enforcement Agency (DEA) to dispense a controlled substance used in the treatment of alcohol or drug abuse); or
5. Is conducted directly by the government.

Question: What are examples of providers that meet the definition of a Part 2 provider?

Answer: A provider can be either a person or a program. In guidance,¹⁵ SAMHSA has said the following providers, among others, meet the definition of a Part 2 provider:

- » A SAMHSA-certified opioid treatment program that advertises its SUD services.
- » A physician at a community mental health center who is identified as the center's leading SUD practitioner and who primarily treats patients with SUDs.¹⁶

Question: Does Part 2 apply to me even if I am not a Part 2 provider?

¹⁴ Legal Action Center for Substance Abuse and Mental Health Services Administration, "Frequently Asked Questions: Applying the Substance Abuse Confidentiality Regulations to Health Information Exchange (HIE)," 2010, available at "<https://www.samhsa.gov/sites/default/files/faqs-applying-confidentiality-regulations-to-hie.pdf>

¹⁵ Substance Abuse and Mental Health Services Administration, "Substance Use and Confidentiality Regulations," October 27, 2023, available at "<https://www.samhsa.gov/about-us/who-we-are/laws-regulations/confidentiality-regulations-faqs>

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

Answer: Part 2 records can be disclosed pursuant to an individual's authorization. An entity that is not a covered entity that receives records from a Part 2 provider that is not a covered entity may generally only redisclose those Part 2 records pursuant to scope of the individual's original authorization, or with the individual's authorization. If the individual signed a consent for all future uses and disclosures of SUD information for purposes of treatment, payment, or healthcare operations and the entity that received Part 2 records is a covered entity or business associate, such records may be redisclosed in accordance with HIPAA.¹⁷ For more information on redisclosure of Part 2 records, please see p. 6.

¹⁷ Department of Health and Human Services Fact Sheet 42 CFR Part 2 Final Rule, *available at*: <https://www.hhs.gov/hipaa/for-professionals/regulatory-initiatives/fact-sheet-42-cfr-part-2-final-rule/index.html>

TOOLKIT SCENARIOS: OVERVIEW

The scenarios in this Toolkit are intended to provide Medi-Cal Partners with guidance on how to navigate federal and state laws when sharing data, and how to determine whether consent for disclosure – pursuant to either HIPAA or Part 2 – is needed during various interactions expected over the course of the Reentry Initiative. The accompanying data-flow diagrams are intended to provide a visual representation of the legal analyses presented in the charts included in each scenario.

Please note that the legal analysis charts and associated diagrams are specific **only** to the data flow that is contemplated by the individual Toolkit scenario.

The scenarios cover pre- and post-release services, care management services, additional Reentry Initiative-related clinical services, and behavioral health links. **Each Toolkit scenario covers both an embedded care management model and In-Reach care management model.** The reader should pick the scenario in each instance that best applies to their own situation.

- » Under an [embedded care management model](#), care managers employed by or contracted with the correctional facilities (“embedded care managers”) deliver pre-release care management services to individuals eligible for pre-release services.
- » Under an [In-Reach care management model](#), community-based care management providers deliver pre-release care management for individuals eligible for pre-release services, either in person or via telehealth. These can be community-based care managers enrolled in Medi-Cal fee-for-service (FFS) or managed care plan (MCP) contractors or employees who are authorized to provide services in correctional facilities.

DHCS allows correctional facilities to use a mixed model approach that includes both embedded and In-Reach providers to provide pre-release services.

The Toolkit scenarios do not cover information on pre-release Medi-Cal applications, as DHCS has already published extensive guidance on pre-release Medi-Cal applications and suspensions processes.¹⁸

¹⁸ CA Department of Health Care Services, “All County Welfare Directors Letter, “ February 29, 2024, available at <https://www.dhcs.ca.gov/services/medi-cal/eligibility/letters/Documents/24-04.pdf>

Toolkit Scenarios: Administrative Tasks for Pre- and Post-Release Services

Activate Pre-Release Benefits

Embedded Care Management Model: Nico is a 25-year-old adult with co-occurring bipolar and opioid use disorders who was arrested for a drug offense and taken to the county jail. The [correctional facility](#) is not itself a Part 2 provider, nor is any of its clinical staff. Upon intake, the correctional facility completed an initial health screening and identified Nico as having serious mental illness (SMI) and SUD, both qualifying conditions for pre-release services and for a behavioral health link.¹⁹

The [correctional facility clinical](#) staff wants to look up Nico’s current Medi-Cal status (enrollment and Managed Care Plan (MCP) assignment) and activate pre-release services through the JI Screening Portal. To do that, the correctional facility must enter Nico’s personal information to look him up, and if enrolled in Medicaid, enter any of his qualifying clinical conditions into the JI Screening Portal. This information will be sent to DHCS to activate the JI pre-release services aid code to allow payment of pre-release services. The types of information to enter include incarceration date, projected release date, qualifying health condition categories (if known), and demographic information.

| Law/Regulation | Applicable? | Key Questions | Consent to share information needed? |
|----------------|-------------|--|--|
| HIPAA | Yes | » Are Nico’s correctional facility providers (the correctional facility clinical staff and the pre-release care manager) covered | Correctional facility clinical staff and DHCS are HIPAA-covered entities, and HIPAA permits disclosures of PHI for purposes of treatment, payment, and healthcare operations. In this scenario, information is being shared between the correctional facility and DHCS for purposes of both payment and |

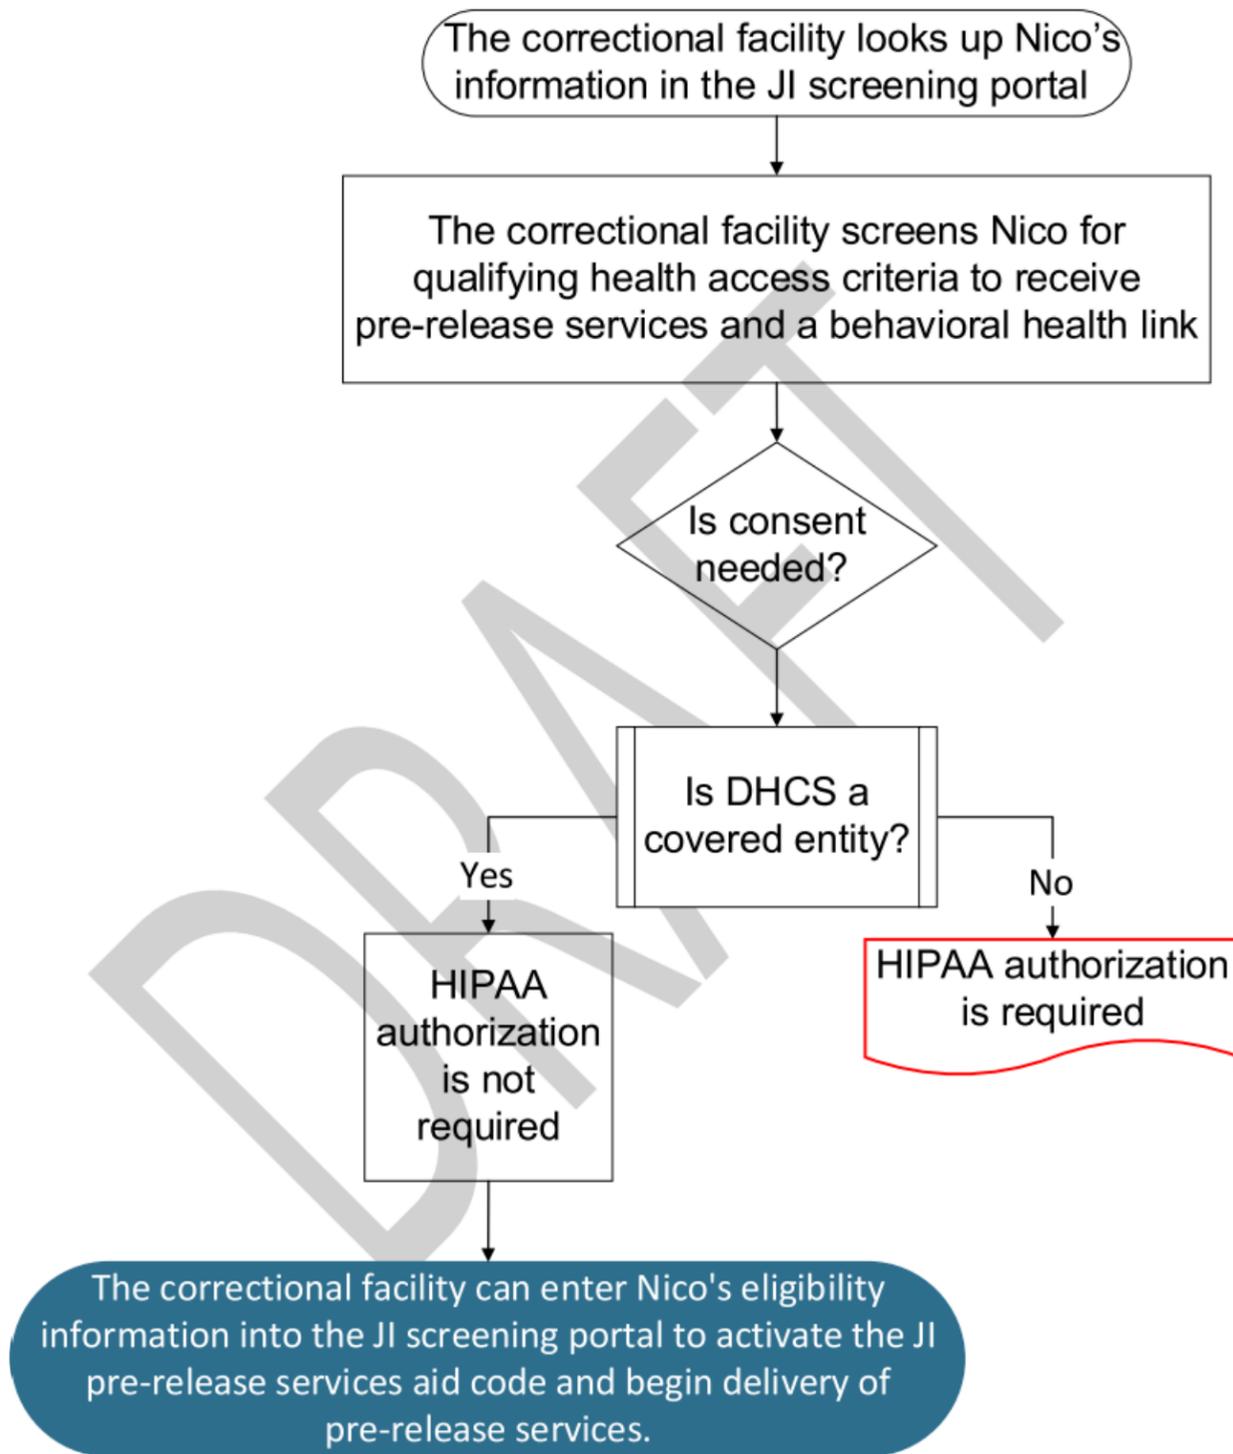

¹⁹ A behavioral health link is a referral process requiring correctional facilities to facilitate referrals to county specialty mental health services (SMHS), Drug Medi-Cal (DMC), the Drug Medi-Cal Organized Delivery System (DMC-ODS), and/or Medi-Cal MCPs for incarcerated individuals who received behavioral health services while incarcerated to allow them to continue behavioral health treatment. For additional information, see CA Department of Health Care Services, “Policy and Operational Guide for Planning and Implementing the CalAIM Justice-Involved Initiative,” October 20, 2023, available at <https://www.dhcs.ca.gov/provgovpart/pharmacy/Documents/CalAIM-JI-Policy-and-Operations-Guide-FINAL-October-2023-updated.pdf>

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

| Law/Regulation | Applicable? | Key Questions | Consent to share information needed? |
|-------------------------|-------------|---|--|
| | | <p>entities under HIPAA?</p> <p>» Are the necessary disclosures for the purpose of treatment, payment, or health care operations (e.g., care coordination)?</p> | <p>health care operations, and thus no HIPAA authorization is required.</p> |
| 42 C.F.R. Part 2 | No | <p>» Is anyone seeking to obtain or disclose information covered by Part 2?</p> | <p>Even though Nico presents with a SUD, in this particular scenario, no one is seeking to obtain his SUD records from a Part 2 provider who may previously have treated him, and as a result no Part 2 consent is required.</p> |
| AB 133 | Yes | <p>» Is the information being shared for the purposes of delivering services under CalAIM (e.g., Reentry Initiative)?</p> | <p>AB 133 permits the sharing of data among Medi-Cal partners for purposes of implementing CalAIM without individual authorization, so no consent is required under California state law for these disclosures.</p> |

Data Flow for Embedded Care Management Model Under Activate Pre-Release Benefits Scenario

Coordination with the MCP JI Liaison and Post-Release Enhanced Care Management (ECM) Provider Assignment

Embedded Care Management Model

The [correctional facility](#) contacts the MCP to whom Nico is assigned, through an agreed-to process or through the MCP's JI Liaison. The [correctional facility clinical staff](#) informs the JI Liaison of any additional needs (e.g., SUD or high-needs mental health, as determined by the correctional facility's screening) and confirms the correctional facility will use an embedded care management model.

The correctional facility staff shares client identifiers (e.g., demographic information) and relevant PHI with the MCP through an agreed-to process or through the [MCP JI Liaison](#). The JI Liaison assigns Nico a [Post-Release ECM Lead Care Manager](#) who will participate in a warm handoff (see [Warm Handoff scenario](#) for more information) with the correctional facility's Pre-Release Care Manager prior to Nico's release and will continue to provide services post-release. Neither the Pre-Release Care Manager nor the Post-Release ECM Lead Care Manager are Part 2 providers.

The correctional facility clinical staff also screens Nico during intake for behavioral health needs using a screening tool mutually agreed upon between the correctional facility and county behavioral health agency and identifies Nico as meeting the need for a behavioral health link. This means Nico's behavioral health needs will be served by a county-based Specialty Mental Health Services (SMHS) provider and/or a Drug Medi-Cal (DMC) or Drug-Medi-Cal Organized Delivery System (DMC-ODS) provider in the community.

The correctional facility clinical staff notifies the county behavioral health agency in the county in which Nico will be released to inform the county that Nico is eligible for a behavioral health link. The county behavioral health agency will work with the correctional facility clinical staff to complete the behavioral health link prior to Nico's release, including relevant data-sharing and a professional-to-professional clinical handoff.

The MCP and/or JI Liaison, Post-Release ECM Lead Care Manager, and the Pre-Release Care Manager want to exchange information about Nico's health, including previous medical history, for continuity of care.

In-Reach Care Management Model

The [correctional facility](#) contacts the assigned MCP through an agreed-to process or through the MCP's JI Liaison. The correctional facility clinical staff informs the JI Liaison of any additional needs (e.g., SUD or high-needs mental health, as determined by the

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

correctional facility’s screening) and confirms the correctional facility will use an In-Reach care management model, which means that a community-based care management provider (referred to as an In-Reach [Pre-Release Care Manager](#)) will provide Nico’s pre-release services while he’s in jail, either in-person or via telehealth, and will also provide Nico’s care management services once he’s released from jail. The correctional facility clinical staff shares client identifiers (e.g., demographic information) and relevant PHI with the MCP through an agreed-to process or through the [MCP JI Liaison](#). The JI Liaison assigns Nico an In-Reach Pre-Release Care Manager; the In-Reach Pre-Release Care Manager is not a Part 2 provider.

The MCP or the MCP JI Liaison wants to share client identifiers (e.g., demographic information) and PHI with the In-Reach Pre-Release Care Manager, as well as communicate this assignment back to the correctional facility clinical staff. The communication may occur through an agreed-to process between the In-Reach Care Management provider, the correctional facility, and the MCP.

The In-Reach care manager or In-Reach clinical staff screens Nico during intake for behavioral health needs using a screening tool mutually agreed upon between the correctional facility and county behavioral health agency and identifies Nico as meeting the need for a behavioral health link. This means Nico’s behavioral health needs will be served by a county-based Specialty Mental Health Services (SMHS) provider and/or a Drug Medi-Cal (DMC) or Drug-Medi-Cal Organized Delivery System (DMC-ODS) provider in the community.

The correctional facility clinical staff notifies the county behavioral health agency in the county in which Nico will be released to inform the county that Nico is eligible for a behavioral health link. The county behavioral health agency will work with the correctional facility clinical staff to complete the behavioral health link prior to Nico’s release, including relevant data-sharing and a professional-to-professional clinical handoff.

Data Flow for Embedded and In-Reach Care Management Models Under Coordination with the MCP JI Liaison and Post-Release ECM Provider Assignment Scenario

Toolkit Scenarios: Care Management Services

Health Risk Assessment

Pre-Release Care Management Model

Dana is a 37-year-old woman who was recently incarcerated. She works with her embedded [Pre-Release Care Manager](#), who is not a Part 2 provider, to complete a Health Risk Assessment (HRA), which includes screenings for mental health and SUD needs, to determine appropriate [behavioral health links](#) and referrals, physical health, and other health-related social and functional needs. The HRA is also informed by previous medical history. The Pre-Release Care Manager reaches out to Dana’s prior treating providers to receive any pertinent records that would assist in her receiving appropriate treatment during the pre-release period and upon her release into the community (e.g., mental health treatment records, as well as other relevant medical records). Dana’s relevant medical records are sent to the Pre-Release Care Manager by her prior treating providers. The Pre-Release Care Manager documents Dana’s HRA in her medical records.

Note, that in the In-Reach Care Management Model Dana’s Pre-Release Care Manager shares Dana’s information with the correctional facility clinical staff. In the Embedded Care Management Model, this final step is not necessary.

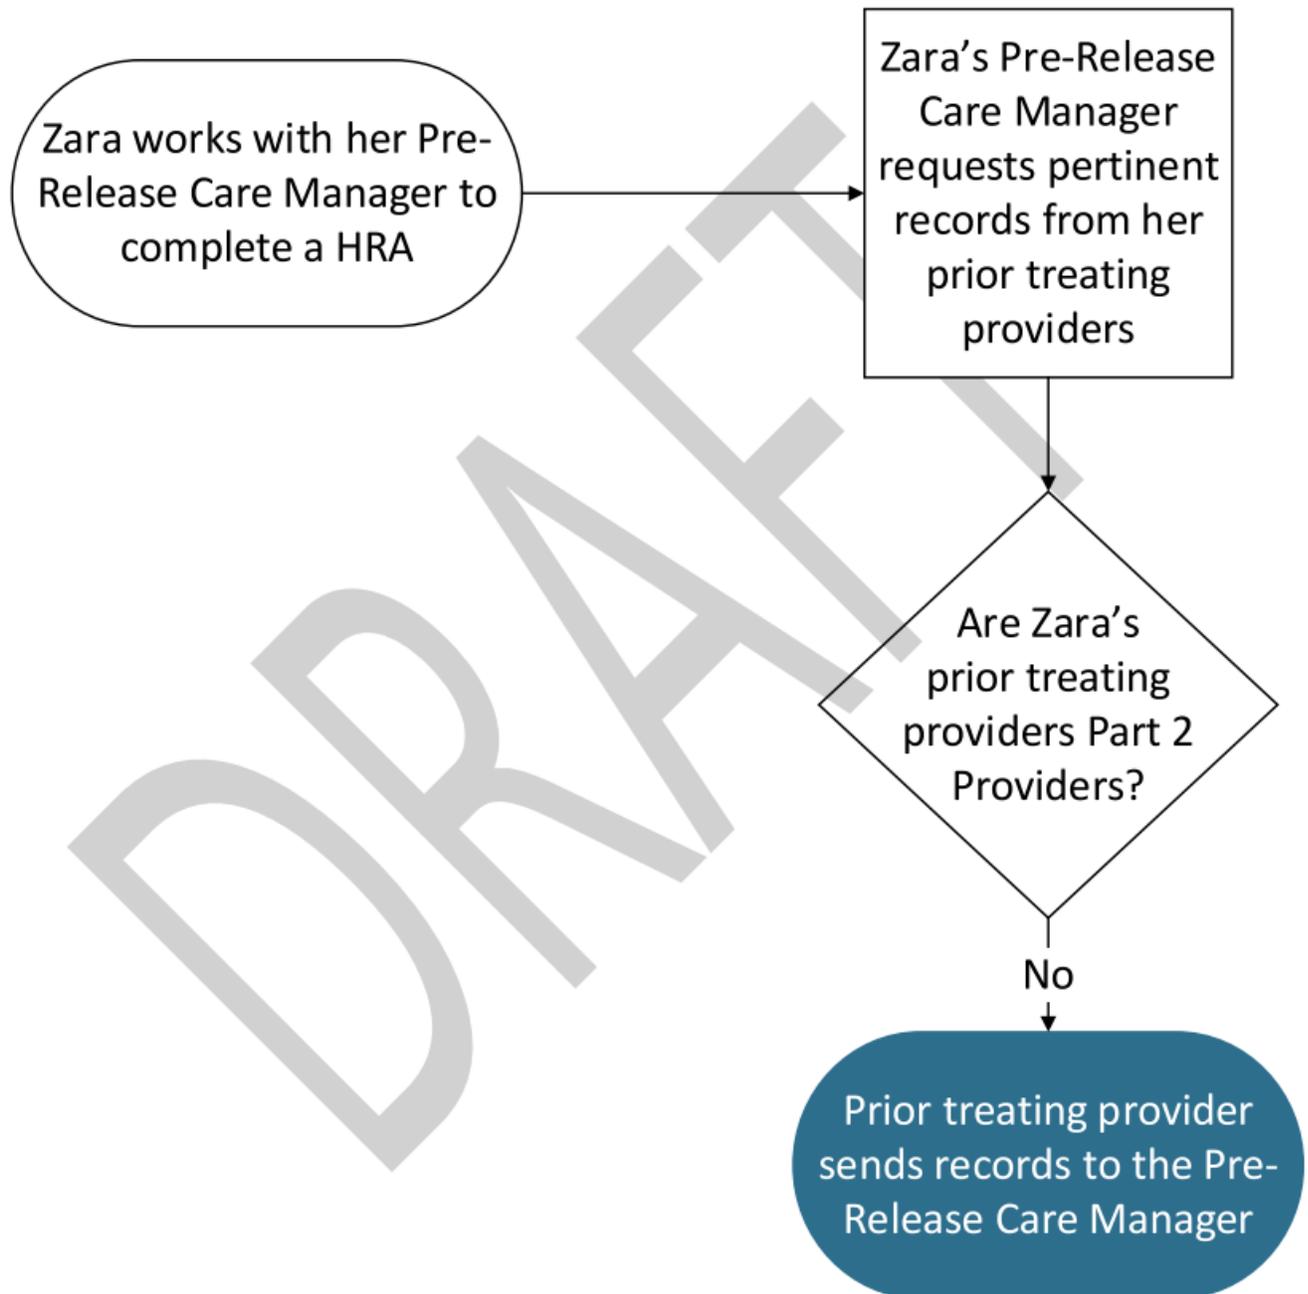

| Law/Regulation | Applicable? | Key Questions | Consent to share information needed? |
|----------------|-------------|---|---|
| HIPAA | Yes | <ul style="list-style-type: none"> » Is the Pre-Release Care Manager, whether embedded or In-Reach, a covered entity under HIPAA? » Are Dana’s prior treating providers covered entities under HIPAA? » Are the desired disclosures for purposes of treatment or health care | <p>The prior treating providers and Pre-Release Care Managers are covered entities under HIPAA, and they are sharing information for purposes of treatment and care coordination.</p> <p>Because HIPAA permits disclosures for these purposes without individual authorization, no consent is required.</p> |

Services for the Reentry Initiative are part of CalAIM and therefore no consent is required.</p> |

Data Flow for Embedded and In-Reach Care Management Model Under Health Risk Assessment Scenario

Care Coordination for Housing:

In-Reach/Embedded Pre-Release Care Management Model

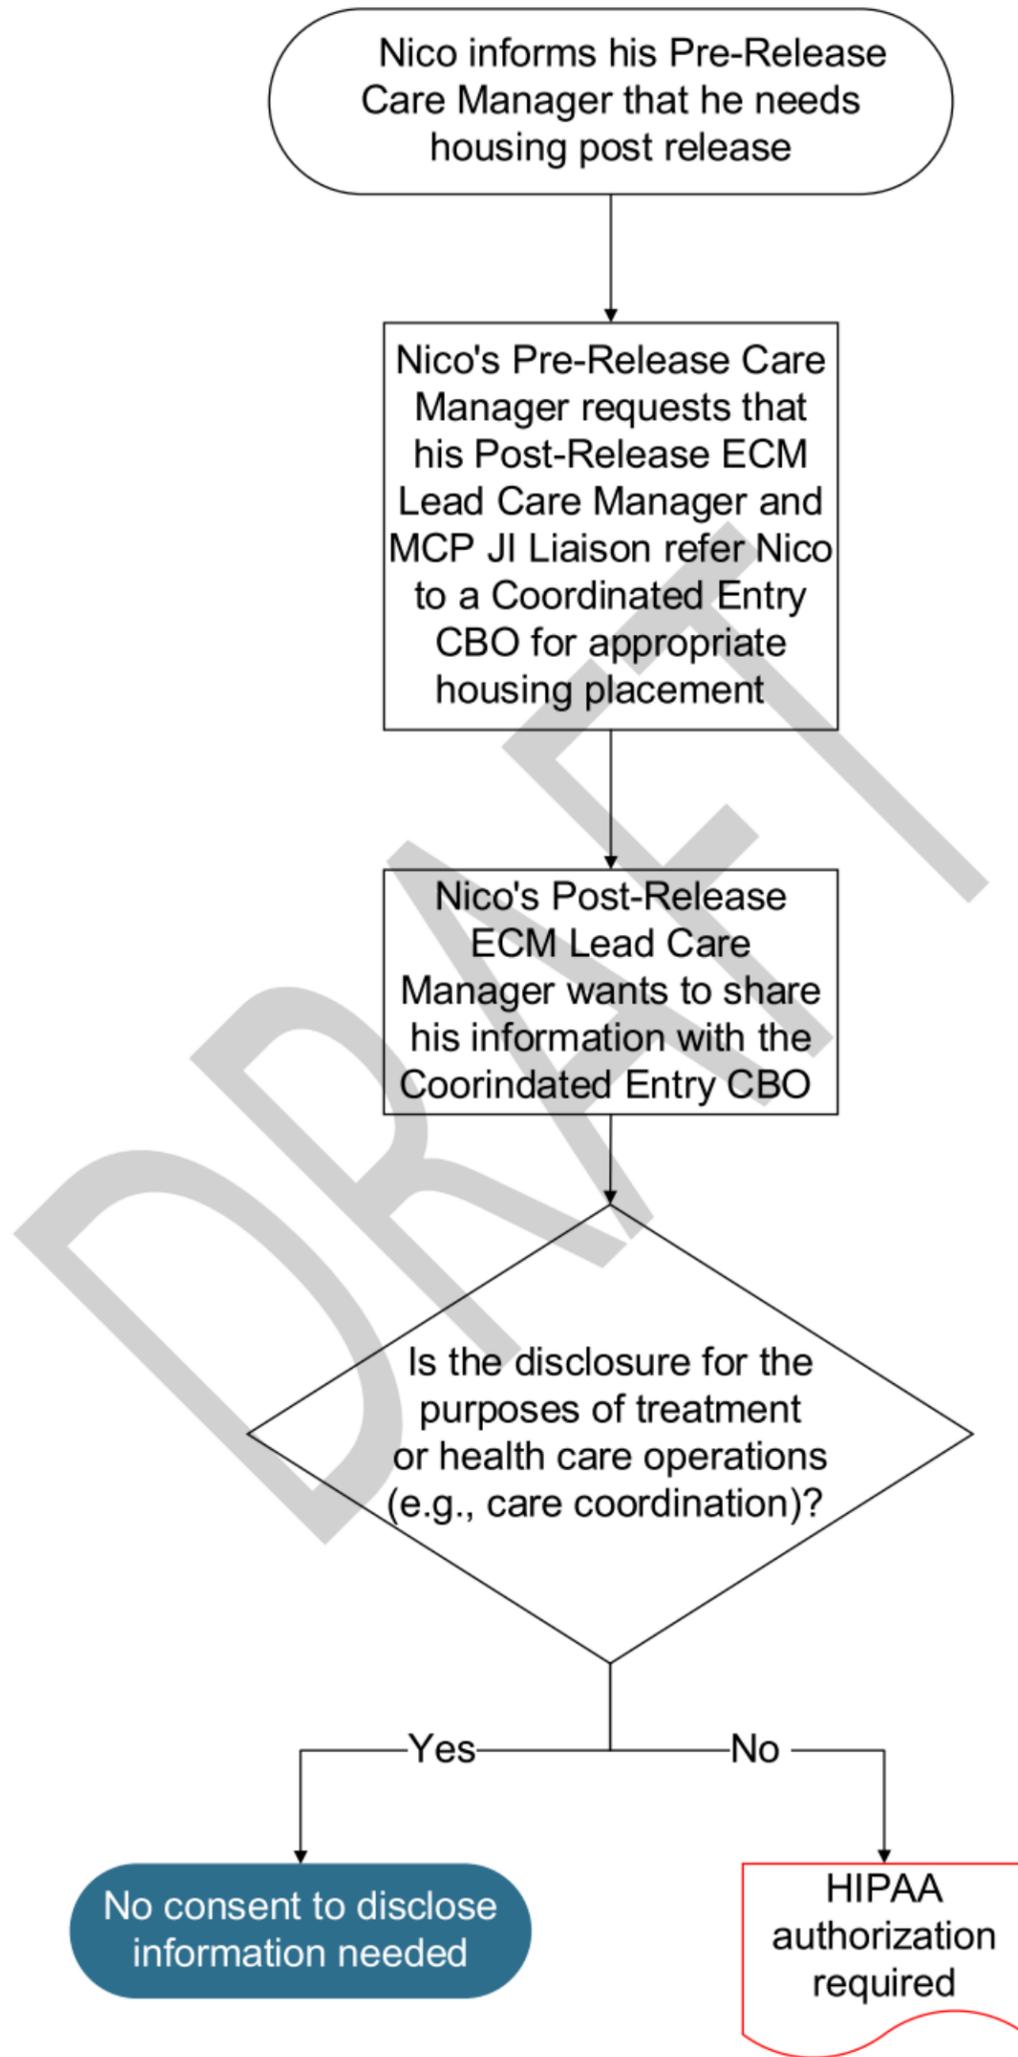

The [Pre-Release Care Manager](#) (embedded or In-Reach, neither of which is a Part 2 provider) learns from Nico that he will need housing post-release and notifies the [Post Release ECM Lead Care Manager, which is not a Part 2 provider](#), and [MCP JI Liaison](#) to identify and refer Nico to a Coordinated Entry Community-Based Organization (CBO) for appropriate housing placement. The Post-Release ECM Lead Care Manager wants to share Nico’s necessary information, such as name, age, demographic, and relevant health status, with the Coordinated Entry CBO. None of the information held by the Pre-Release Care Manager or Post-Release Care Manager was originally obtained by a Part 2 provider.

| Law/Regulation | Applicable? | Key Questions | Consent to share information needed? |
|-------------------------|-------------|--|---|
| HIPAA | Yes | <ul style="list-style-type: none"> » Is the Pre-Release Care Manager, whether embedded or In-Reach, a covered entity under HIPAA? » Are the MCP’s referral staff covered entities under HIPAA? » Are the desired disclosures for purposes of treatment or health care operations (e.g., care coordination)? | <p>The prior treating providers and Pre-Release Care Managers are covered entities under HIPAA, and they are sharing information for purposes of treatment and care coordination.</p> <p>Because HIPAA permits disclosures for these purposes without individual authorization, no consent is required.</p> |
| 42 C.F.R. Part 2 | No | <ul style="list-style-type: none"> » Is anyone seeking to obtain or disclose | Although Nico does have a SUD, in this scenario neither Nico’s Pre-Release Care Manager or Post Release ECM |

| AB 133 | Yes | » Is the information being shared for the purposes of delivering services under CalAIM (e.g., Community Supports)? | AB 133 permits the sharing of data among Medi-Cal partners for purposes of implementing CalAIM without individual authorization, and as a result no consent is required under California state law. |

Reentry Care Plan

In-Reach/Embedded Pre-Release Care Management Model

The [Pre-Release Care Manager](#) must complete a final [reentry care plan](#), documented in Nico’s medical record, which includes release plans related to physical health, mental health, substance use, housing needs, other health-related social needs, functional needs, strengths, and support resources. The final reentry care plan and supporting medical records will be shared with the Post-Release ECM Lead Care Manager and assigned MCP within one business day of release, as well as with [community-based providers](#) (e.g., specialty BH providers) as needed.

The Pre-Release Care Manager also shares the final reentry care plan with Nico and identified members of Nico’s designated [support system](#) (e.g., family members) that Nico previously authorized to receive information.

| Law/Regulation | Applicable? | Key Questions | Consent to share information needed? |

Data Flow for In-Reach and Embedded Pre-Release Care Management Model Under Reentry Care Plan Scenario

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

Warm Handoff

Embedded Pre-Release Care Management Model²⁰

Because the [correctional facility](#) is using an embedded care management model, the [Pre-Release Care Manager](#) and the assigned [Post-Release ECM Lead Care Manager](#) are required to conduct a [warm handoff](#) prior to release, with Nico present. A warm handoff is the first step in establishing a trusted relationship between Nico and his community-based care manager to ensure seamless service delivery and coordination. The Pre-Release Care Manager schedules a warm handoff appointment to introduce the Post Release ECM Lead Care Manager, assigned by Nico’s MCP, to Nico and to review and update (as needed) the correctional facility medical records, the HRA, and the [reentry care plan](#). Nico has already signed a [Part 2 consent form that enables his Pre-Release Care Manager to share SUD information originally held by his prior treating providers that may be contained in his HRA or reentry care plan.](#)

Toolkit Scenario: Additional Reentry Initiative-Related Clinical Services

Treatment for SUD (also referred to as medication-assisted treatment or MAT)

In-Reach Pre-Release Care Management Model

Quinn receives a behavioral health assessment and behavioral health counseling/therapy while incarcerated from an In-Reach County BH Provider (i.e., clinical consultant), who is a Part 2 provider. The In-Reach Specialty BH provider submits a referral and shares medical documentation, including diagnoses, recommended treatment and relevant clinical information, with the [correctional facility](#) clinical staff so that the correctional facility can prescribe medications for SUD. The correctional facility prescribing staff receives this recommendation with associated clinical information and prescribes as appropriate to Quinn. Additionally, Quinn receives cognitive behavioral therapy (CBT) from the correctional facility provider. The correctional facility CBT provider receives clinical information from the Pre-Release Care Manager to inform the counseling services provided to Quinn. The correctional facility CBT provider shares pertinent clinical information back to the In-Reach specialty behavioral health provider so they can adjust medications as needed.

Community Health Worker Services

Embedded or In-Reach Pre-Release Care Management Model

Nico's Pre-Release Care Manager (either an embedded care manager or an In-Reach care manager who will continue to serve Nico as his [Post-Release ECM Lead Care Manager](#)) works at a facility that leverages [community health workers](#) (CHWs) with lived experience to provide pre-release CHW services as part of the Reentry Initiative. The Pre-Release Care Manager identifies that Nico could benefit from CHW services related to education and navigation during their sessions together and through Nico's Health Risk Assessment.

The CHW receives information from the Pre-Release Care Manager about Nico's [reentry care plan](#). The CHW meets with Nico via telehealth, facilitated by the correctional facility, and during their conversation learns that Nico is worried about drug activity in his planned release housing. The CHW provider recommends that the [Pre-Release Care Manager](#) update the reentry care plan to change the plan for Nico's release housing/location, as well as update his follow-up appointments to be closer to his planned release location. The Pre-Release Care Manager works with Nico's assigned post-release MCP to connect him to a new housing situation.

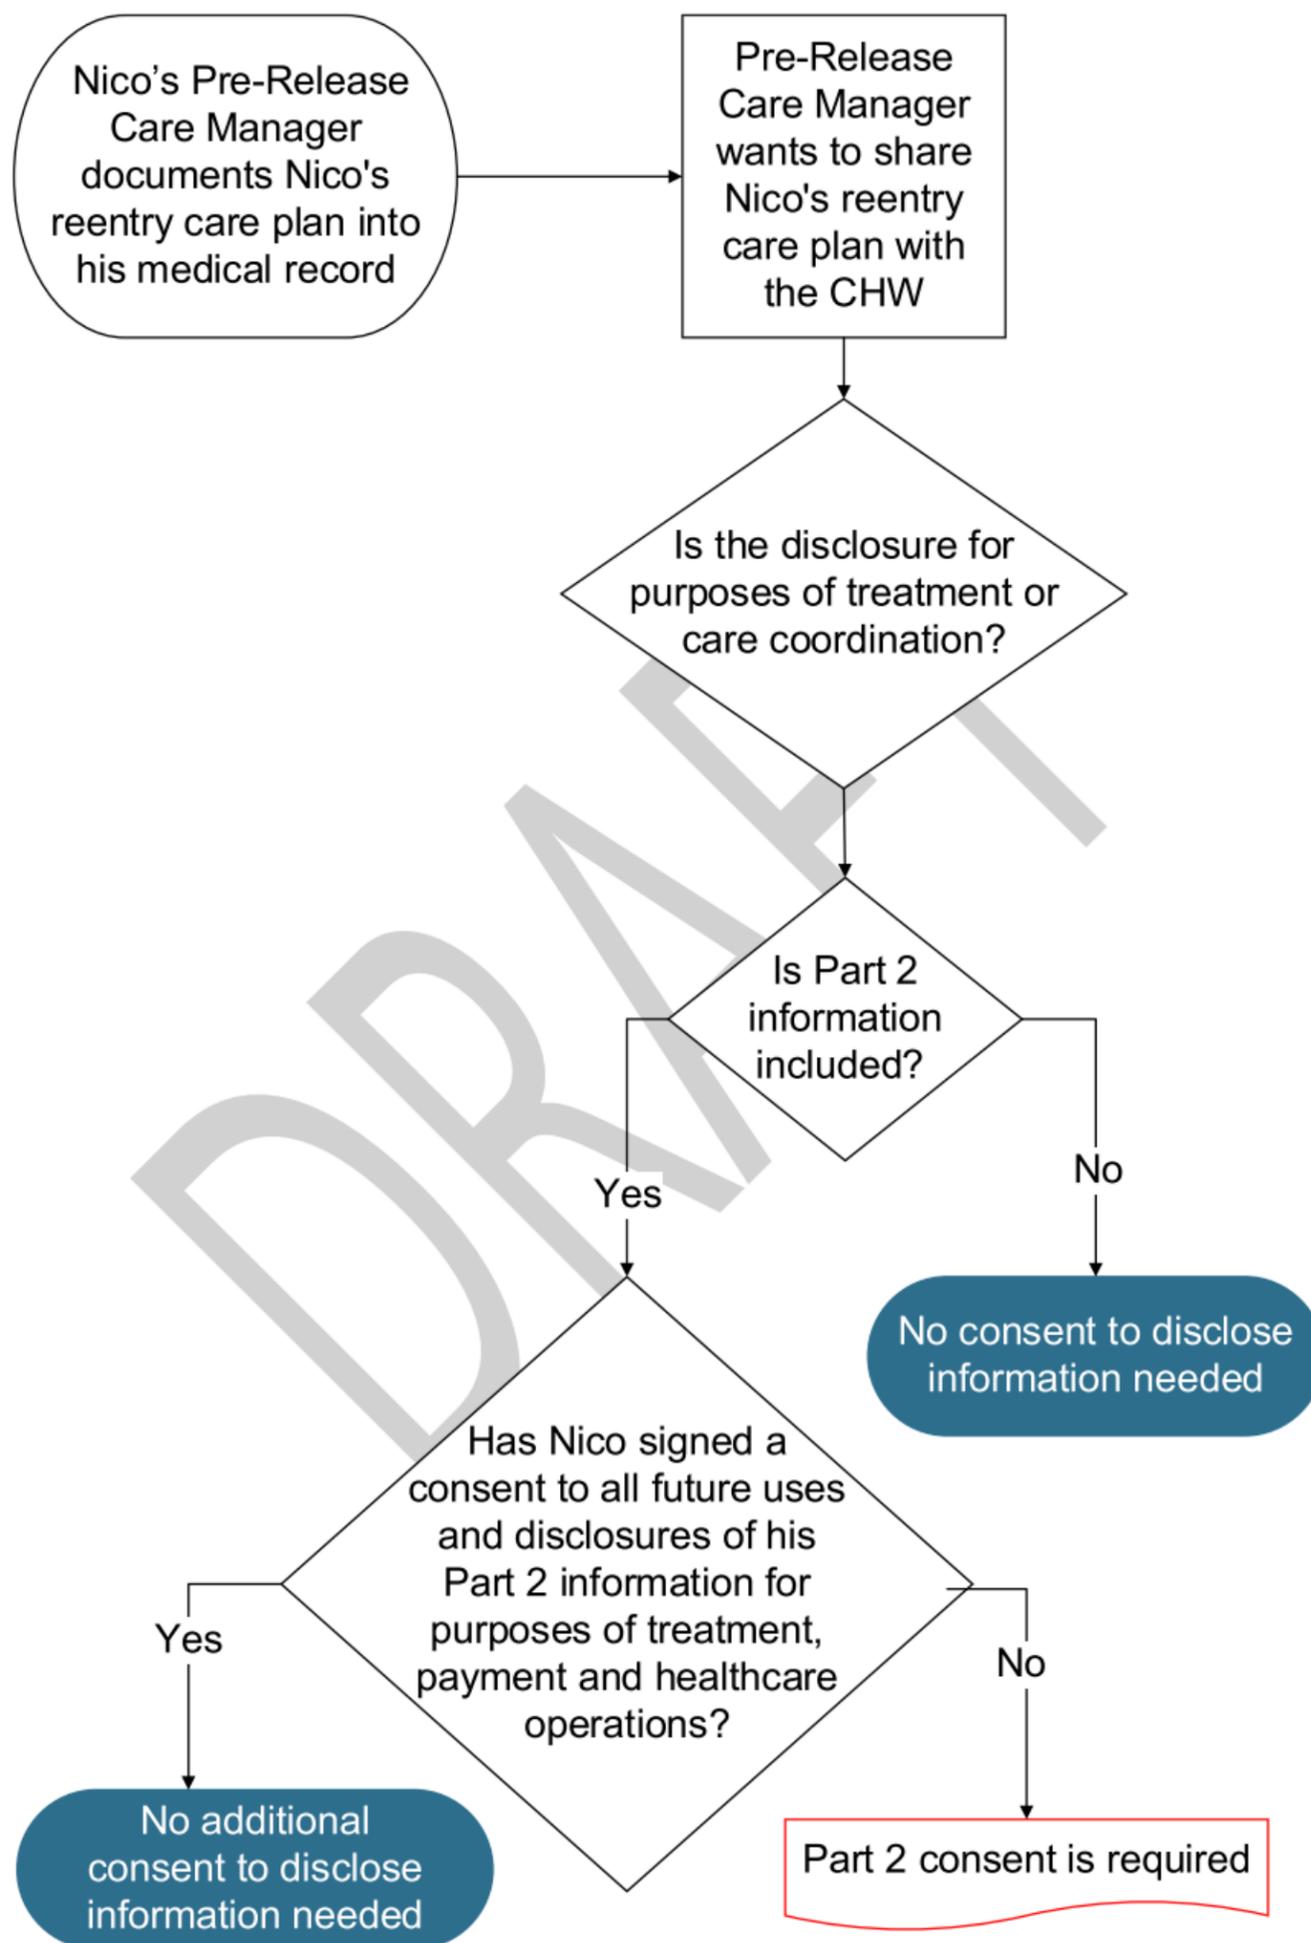

Nico previously signed a consent form that allows for future disclosures of his Part 2 information with other covered entities, such as CHWs, for purposes of his treatment and care coordination.

²¹ DME provider to use while completing the Treatment Authorization Request for DHCS FFS program

APPENDIX A: GLOSSARY OF TERMS

Most of these terms originate from the Policy and Operational Guide for Planning and Implementing the CalAIM Reentry Initiative,²² except where noted otherwise:

- 1. 1115 Demonstration Waiver:** A waiver approved by the Centers for Medicare & Medicaid Services that, among other things, allows DHCS to partner with state agencies, providers, counties, and CBOs to offer a targeted set of Medicaid services to Medi-Cal-eligible youth and adults in state prisons, county jails, and youth correctional facilities for up to 90 days prior to release.
- 2. Behavioral Health Link:** Behavioral health links were created under state law AB 133 in 2021 to implement a process requiring correctional facilities to facilitate referrals to county specialty mental health services (SMHS), Drug Medi-Cal (DMC), the Drug Medi-Cal Organized Delivery System (DMC-ODS), and/or Medi-Cal MCPs for incarcerated members who received behavioral health services while incarcerated to allow for the continuation of behavioral health treatment. These referrals are called behavioral health links.

Behavioral health links seek to ensure continuity of treatment for individuals who receive behavioral health services while they were incarcerated and who wish to continue to receive these services from SMHS, DMC, and/or DMC-ODS in the community. Behavioral health links are also for individuals who receive medication treatment for SUD, including through the MCP provider network. Correctional facilities and County Behavioral Health Agencies will work in partnership to facilitate professional-to professional clinical handoffs to post-release providers and share information with the member's health plan (e.g., county MHP, DMC/DMC-ODS counties, and MCPs as needed) or the provider who will prescribe the medication for SUD.

- 3. Care Manager Warm Handoff:** In cases where different care managers provide pre- and post-release care management services (i.e., if the correctional facility leverages an embedded care management model or if the individual will be released into a county in which their In-Reach prerelease care manager does not operate), the two care managers must conduct a warm handoff with the individual prior to release. The warm handoff is the first step in establishing a

trusted relationship between the individual and the new care manager to ensure seamless service delivery and coordination.

Community-Based Organization: a public or private non-profit organization with a 501(c)(3) status or a fiscally sponsored entity of a 501(c)(3) non-profit organization²³

- 4. Community-Based Providers:** Providers who provide care in the community. These may include, but are not limited to, Post-Release Enhanced Care Management Lead Care Manager, Managed Care Plans, and Specialty Behavioral Health Providers.
- 5. Community Health Worker:** May include individuals known by a variety of job titles, including promoters, community health representatives, navigators, and other non-licensed public health workers, including violence prevention professionals. Community health worker services are preventive health services to prevent disease, disability, and other health conditions or their progression; to prolong life; and promote physical and mental health and well-being.²⁴
- 6. Correctional Facility:** State prisons, county jails, and county youth correctional facilities.
- 7. Correctional Facility Clinical Staff:** A clinical provider employed or directly contracted by the correctional facility to provide health care services (physical and behavioral health) in the correctional facility.
- 8. County Welfare Department (CWD):** Another term for a county social services department. In the context of reentry, the department often serves as the designated entity to facilitate enrollment of inmates and youth in health insurance affordability programs on or before their release date.
- 9. Designated Support System:** Family members or guardians of the Medi-Cal individual.
- 10. Drug Med-Cal Organized Delivery System (DMC-ODS):** A voluntary pilot program which offers California counties the opportunity to expand access to

high-quality care for Medi-Cal members with an SUD. The goal of the system is to demonstrate how organized SUD care improves beneficiary health outcomes, while decreasing system-wide health care costs. Counties that choose to participate are required to provide access to a full continuum of SUD benefits modeled after the American Society of Addiction Medicine (ASAM) Criteria.²⁵

- 11. Durable Medical Equipment (DME) Providers:** A clinician (physician, nurse practitioner, clinical nurse specialist, or physician assistants) prescribing durable medical equipment.²⁶
- 12. Enhanced Care Management:** a statewide Medi-Cal benefit available to select members with complex needs. Enrolled members receive comprehensive care management from a single lead care manager who coordinates all their health and health-related care, including physical, mental, and dental care, and social services.²⁷
- 13. ECM Lead Care Manager:** A member's designated care manager for ECM, who works for the ECM Provider. The Lead Care Manager operates as part of the member's care team and is responsible for coordinating all aspects of ECM and referrals for any Community Supports. To the extent a member has other care managers, the Lead Care Manager will be responsible for coordinating with those individuals and/or entities to ensure a seamless experience for the member and non-duplication of services.
- 14. ECM Provider:** A Provider of ECM. ECM Providers are community-based entities with experience and expertise providing intensive, in-person care management services to individuals in one or more of the Populations of Focus for ECM.
- 15. Embedded Care Management Model:** A model through which embedded care managers (i.e., care managers employed by or contracted with the correctional facility) deliver pre-release care management services to individuals eligible for pre-release services.
- 16. Health and Social Service Information:** information gathered by a medical provider or community organization that may include personal demographics;

housing information; employment and financial needs; and/or receipt of or eligibility for social services.²⁸

17. In-Reach Care Management Model: A model through which community-based care management providers deliver pre-release care management for individuals eligible for pre-release services, either in person or via telehealth.

In-Reach Providers: Providers can include but are not limited to clinical consultants and In-Reach Specialty Behavioral Health (BH) Providers.

Reentry Initiative Individual: An individual who is currently or was formerly incarcerated within the past twelve months.

18. Medications for SUD: This includes medications to treat opioid use disorder or medications (MOUD) to treat alcohol use disorder (MAUD), including the important use of medication as a stand-alone treatment without the prerequisite use of psychosocial services, when clinically indicated.

19. Mental Health Plans: Health plans run through county behavioral health departments which are responsible for the delivery of care for patients with specialty mental health issues that result in impairment in functioning, and for emergency and in-patient behavioral health services for all Medi-Cal beneficiaries.²⁹

20. Managed Care Plan (MCP): Medi-Cal contracts for health care services through established networks of organized systems of care, which emphasize primary and preventive care. MCPs are a cost-effective use of health care resources that improve health care access and assure quality of care.

21. MCP JI Liaison: An individual or a team (i.e., a live person not an automated hotline) who will be available to support correctional facilities, Pre-Release Care Manager, and/or ECM providers as needed.

22. Protected Health Information: Individually identifiable health information, held or maintained by a covered entity or its business associates acting for the covered entity, that is transmitted or maintained in any form or medium (including the individually identifiable health information of non-U.S. citizens). This includes identifiable demographic and other information relating to the past, present, or future physical or mental health or condition of an individual, or the

Data Sharing Authorization Guidance Toolkit: Reentry Initiative

Draft for Public Comment: Updated November 21, 2024

provision or payment of health care to an individual that is created or received by a health care provider, health plan, employer, or health care clearinghouse.³⁰

23. Pre-Release Care Manager: The person who will act as the primary point of contact to ensure whole-person reentry services are provided as outlined by the CalAIM JI policy. The care manager will work, as appropriate, with other providers, including correctional facility providers, Post-Release ECM Providers (if different than the prerelease care manager), County Behavioral Health Agency providers, and community-based resources.

24. Prior Treating Providers: providers who treated Medi-Cal individuals prior to their incarceration.

25. Post-Release ECM Lead Care Manager: The person who will act as the primary point of contact after reentry once the member is enrolled in an MCP and at any point during the post-release period enrollment gap when the member is still in the FFS delivery system. If this provider is different from the Pre-Release Care Manager, they should have a warm handoff of the member, ideally at least two weeks prior to release.

26. Reentry Care Plan: Pre-Release Care Managers must develop a person-centered reentry care plan for all individuals receiving pre-release care management.

27. Medi-Cal Specialty Mental Health Services: a group of Medi-Cal mental health services covered under county mental health plans that are available to children, youth, and adults with a diagnosed or suspected mental health disorder that causes significant impairment or has reasonable probability of causing significant deterioration in an important area of life functioning. These services may include crisis counseling, individual/group/family therapy, medication management, targeted case management, psychological testing, psychiatric inpatient hospitalization, and recovery services.³¹
