## Medi-Cal Managed Care Health Plan Name Abbreviations

Health Services Advisory Group, Inc. (HSAG) uses the following abbreviated Medi-Cal managed care health plan (MCP) names in this volume.

- ◆ **AAH**—Alameda Alliance for Health
- ◆ **Aetna**—Aetna Better Health of California
- ◆ **Anthem Blue Cross**—Blue Cross of California Partnership Plan, Inc., DBA Anthem Blue Cross Partnership Plan
- ◆ **Blue Shield Promise**—Blue Shield of California Promise Health Plan
- ◆ **CalOptima**—CalOptima
- ◆ **CalViva**—CalViva Health
- ◆ **CAAH**—Central California Alliance for Health
- ◆ **CCHP**—Contra Costa Health Plan
- ◆ **CenCal**—CenCal Health
- ◆ **CHG**—Community Health Group Partnership Plan
- ◆ **CHW**—California Health & Wellness Plan
- ◆ **GCHP**—Gold Coast Health Plan
- ◆ **Health Net**—Health Net Community Solutions, Inc.
- ◆ **HPSJ**—Health Plan of San Joaquin
- ◆ **HPSM**—Health Plan of San Mateo
- ◆ **IEHP**—Inland Empire Health Plan
- ◆ **Kaiser**—Kaiser Permanente
- ◆ **KHS**—Kern Health Systems, DBA Kern Family Health Care
- ◆ **L.A. Care**—L.A. Care Health Plan
- ◆ **Molina**—Molina Healthcare of California
- ◆ **Partnership**—Partnership HealthPlan of California
- ◆ **SCFHP**—Santa Clara Family Health Plan
- ◆ **SFHP**—San Francisco Health Plan

## Commonly Used Abbreviations and Acronyms

Following is a list of abbreviations and acronyms used throughout this volume.

- ◆ **AAS**—alternative access standards
- ◆ **APL**—All Plan Letter
- ◆ **CAP**—corrective action plan
- ◆ **CMB**—California Medical Board
- ◆ **DHCS**—California Department of Health Care Services
- ◆ **ENT**—ear, nose, and throat
- ◆ **EQR**—external quality review
- ◆ **EQRO**—external quality review organization
- ◆ **FTE**—full-time equivalent
- ◆ **HSAG**—Health Services Advisory Group, Inc.
- ◆ **HIV/AIDS**—human immunodeficiency virus/acquired immunodeficiency syndrome
- ◆ **IQR**—interquartile range
- ◆ **MCP**—managed care health plan
- ◆ **N/A**—not applicable
- ◆ **NPI**—National Provider Identifier
- ◆ **OB/GYN**—obstetrics/gynecology
- ◆ **PCP**—primary care provider
- ◆ **PSP**—population-specific health plan
- ◆ **SFY**—State Fiscal Year
- ◆ **USPS**—United States Postal Service
- ◆ **WIC**—Welfare and Institutions Code

# 1. Introduction

## Overview

The California Department of Health Care Services (DHCS) is responsible for the ongoing monitoring and oversight of its contracted Medi-Cal managed care health plans (MCPs) and population-specific health plans (PSPs), including the assurance that MCPs' and PSPs' provider networks are adequate to deliver services to Medi-Cal members. If health care providers are unavailable or unwilling to serve Medi-Cal members such that the MCP or PSP is unable to meet provider network standards, MCPs and PSPs may request that DHCS allow an alternative provider network access standard for specified provider scenarios (e.g., provider type, geographic area).

The DHCS All Plan Letter (APL) 23-001<sup>1</sup> provides DHCS' clarifying guidance regarding certification requirements, including alternative access standards (AAS) requests.

In areas where MCPs do not meet time or distance standards but do meet specific DHCS criteria, MCPs may also choose to offer members telehealth services<sup>2</sup> in lieu of submitting an AAS request, consistent with California Welfare and Institutions Code (WIC) section (§)14197(f)(1).<sup>3</sup> In general, if at least 85 percent of members in an area have access to in-person care within the time/distance standards, MCPs may propose to deliver synchronous telehealth to members in lieu of submitting an AAS. The MCPs must meet the required telehealth provider-to-member ratio specified by DHCS while also facilitating in-person care for members who request it.

WIC §14197.05<sup>4</sup> requires DHCS to publish information related to MCPs' AAS requests. DHCS uses its annual external quality review (EQR) technical report to present this information. As such, DHCS requested its external quality review organization (EQRO), Health Services Advisory Group, Inc. (HSAG), to process and report on data related to AAS for provider networks. In addition, DHCS has asked HSAG to report information on DHCS-approved MCP requests to address network adequacy issues by providing telehealth services, consistent with

WIC §14197(f)(1). The measurement period for this study is March 25, 2024, through November 21, 2024.

Note: In previous years, MCPs conducted their own time or distance analyses and delivered accessibility analyses results. For the 2023–24 measurement period, DHCS began using ArcGIS, a suite of applications and tools for mapping, analyzing, and managing geographic data, to assess MCPs' compliance with time or distance requirements. DHCS provided MCPs with a Time or Distance Analysis Report based on the results of the analysis conducted using ArcGIS for each ZIP Code in each MCP's service areas, stratified by provider type. For its network adequacy analysis, DHCS identified representative population points within ZIP Codes in each service area and estimated the size and location of the Medi-Cal-eligible population by combining 2020 U.S. Census Bureau data and 2022 United States Postal Service (USPS) delivery route data (with updates to account for route changes in 2023). This method was intended to encourage MCPs to build networks capable of offering access to all potential members rather than current members only. This change in approach for the 2023–24 measurement period resulted in a significant increase in the number of AAS requests submitted; however, the increase in AAS requests does not represent a material change in member access to care. MCPs do not have access to DHCS' network adequacy software and may have difficulty tracking interim progress toward network adequacy goals as a result. DHCS makes the population estimates layer available to MCPs and provides technical assistance to help them adapt to the new methodology and enhance their ability to proactively detect and address network deficiencies. DHCS is working toward sharing additional time or distance computational data directly with plans in future years and will continue to provide technical assistance and tailor it to MCPs' needs to help them track interim progress toward network adequacy goals.

## Reporting Elements

The following reporting elements are defined by WIC §14197.05 for inclusion in the annual EQR technical report:

1. The number of requests for AAS in the plan service area for time or distance, categorized by all provider types, including specialists, and by adult and pediatric.
2. The number of allowable exceptions for the appointment time standard, if known, categorized by all provider types, including specialists, and by adult and pediatric.
3. Distance and driving time between the nearest network provider and ZIP Code of the beneficiary furthest [*sic*] from that provider for requests for AAS.
4. The approximate number of beneficiaries impacted by AAS or allowable exceptions.
5. Percentage of providers in the plan service area by provider and specialty type that are under a contract with a Medi-Cal MCP.
6. The number of requests for AAS approved or denied by ZIP Code and provider and specialty type, and the reasons for the approval or denial of the request for AAS.
7. The process of ensuring out-of-network access.
8. Descriptions of contracting efforts and explanation for why a contract was not executed.

9. Time frame for approval or denial of a request for AAS by DHCS.
10. Consumer complaints, if any.

## 2. Methodology

### Data Sources

To compile information for each reporting element, HSAG used the following datasets and background information supplied by DHCS:

- ◆ Export(s) from DHCS' Alternative Access Standards Request and Decision Database.
  - Exports included all AAS requests submitted to DHCS by the MCPs during the measurement period, and all approval/denial administrative data corresponding to the AAS requests. (Reporting Elements 1, 3, 4, 6, and 9)
  - Exports also included information on provider contracting efforts. (Reporting Element 8)
- ◆ Grievance data that included MCP identification information, county name, reporting quarter associated with the grievance, and quarterly results for access-related grievance categories.<sup>5</sup> (Reporting Element 10)
- ◆ MCP network 274 provider data current as of mid-2024. (Reporting Element 5)
- ◆ Documentation on DHCS requirements for the process of ensuring out-of-network access. (Reporting Element 7)
- ◆ Telehealth request data for areas and provider types for which telehealth was approved in lieu of AAS.

### Analysis

HSAG reviewed each data source for completeness and internal consistency. Reporting elements were computed as described under the Reporting Elements heading in Section 1 of this volume ("Introduction"), subject to the analytic considerations described below. Results were compared to those from the previous year. Section 5 of this volume ("Alternative Access Standards Tables") provides methodological details for each data element and data table.

---

<sup>5</sup> The access-related grievance categories available from DHCS that will be used for the 2023–24 analysis include (1) Geographic Access, (2) Out-of-Network, (3) Rural Member Denied Out-of-Network Request, and (4) Timely Access.

## Analytic Considerations

No MCPs requested exceptions to the appointment time standard during the measurement period; therefore, Reporting Element 2 (the number of allowable exceptions for the appointment time standard) is not included in the analysis.

Reporting Element 5, the percentage of providers in the plan service area that are under a contract with a Medi-Cal MCP, requires a count of all providers practicing in each plan service area. HSAG was unable to locate a data source capable of producing a reliable estimate of the total provider population in each plan service area.<sup>6</sup> Instead, HSAG identified the universe of all Medi-Cal-contracted providers with an address in the plan service area who were under contract with any MCP using data from the DHCS 274 provider data files. This choice has consequences for the interpretation of percentages in Table 5.7 through Table 5.64. Because the number of Medi-Cal-contracted providers practicing in a service area is inherently less than the number of all providers, the percentages shown in the tables will be greater than would have been the case had the number of all providers in the service area been known. The percentages in Table 5.7 through Table 5.64 can therefore be interpreted as the upper limit of the percentage of providers located within a service area who are contracted with each MCP serving that area as a percentage of all providers.

For Reporting Element 10, consumer complaints, the data are limited to grievance calls received by the MCPs. Data from the Medi-Cal Managed Care and Mental Health Office of the Ombudsman are not presented. While the Office of the Ombudsman likely receives relevant complaints, the complaint categories provided in its database do not allow the specific identification of travel time or distance issues.

Please note that MCPs and PSPs with specific types of health care delivery systems are eligible to petition DHCS to consider system-level exemptions to the time or distance standard.<sup>7</sup> This approach is used by Kaiser Permanente and the PSPs (AIDS Healthcare Foundation and SCAN Health Plan). Each MCP and PSP requesting an exemption must document the capability to deliver the appropriate level of care within its specialized delivery structure. If DHCS concludes that the MCP or PSP is delivering the appropriate level of access to care, the MCP or PSP is not required to submit detailed time or distance AAS requests. DHCS reviews each exemption request to determine that the requesting MCP or PSP has

---

<sup>6</sup> HSAG's review of the California Medical Board (CMB) licensing data determined that these data do not contain adequate information about providers' practice locations to be a reliable estimate of the total number of providers for a specific county. Further, the 274 provider network data files and CMB licensing data do not share a common identifier such as National Provider Identifier (NPI) or license number, preventing HSAG from linking the two datasets to assess the completeness of the CMB data.

<sup>7</sup> California WIC §14197(f)(2)(B). Available at: <https://codes.findlaw.com/ca/welfare-and-institutions-code/wic-sect-14197/>. Accessed on: Feb 28, 2025.

adequately described its delivery structure to exhibit a clinically integrated health care model/network consisting of, but not limited to either of the following:

- ◆ Medical Home: A team-based health care delivery model led by a health care team in a centralized facility to provide comprehensive and continuous medical care to patients with a goal to obtain maximal health outcomes.
- ◆ Specialty Services for Specialty Population: A limited but comprehensive network that renders services specific to the diagnoses of the members and ensures that care coordination and support services are available across the continuum of care regardless of location.

This exemption from the time or distance standard does not preclude MCPs and PSPs from meeting the other Annual Network Certification components. DHCS reserves the right to revoke this alternative standard if concerns regarding quality of care are discovered through avenues including but not limited to grievances and appeals reporting and timely access survey results.

## 3. Results

This section contains a summary of analytic results. Full results for the quantitative reporting elements (i.e., all elements except Process of Ensuring Out-of-Network Access and Contracting Efforts) may be found in Section 5 of this volume (“Alternative Access Standards Tables”).

### Number of Requests, Approvals, and Denials

The AAS requests were tabulated and stratified by the following characteristics: MCP, county, ZIP Code, provider type (including specialty), and population served (adult, pediatric, or not applicable [N/A]).<sup>8</sup> For each combination of the strata, HSAG tabulated the total number of requests submitted and then identified the final disposition of the request as approved or denied. Regardless of the number of requests submitted for a given MCP, county, ZIP Code, provider type, or adult or pediatric combination, there is only one final approval or denial for that combination of characteristics.

During the measurement period, MCPs submitted 16,115 AAS requests to DHCS. There were 15,499 distinct combinations of request characteristics, of which DHCS approved 14,146 (91.3 percent), denied 1,351 (8.7 percent), and rendered no decision for two (<0.1 percent). The primary reason for not rendering a decision was that the ZIP Code in the request is a special, non-residential ZIP Code (e.g., a post office box-only ZIP Code), where an AAS request would not be appropriate because no members reside there. One MCP, SFHP, did not submit any requests.<sup>9</sup>

The complete results of the analysis of the total number of requests submitted and the number approved or denied are in Section 5 of this volume (“Alternative Access Standards Tables”).

---

<sup>8</sup> The population served for the following provider types can be either adult or pediatric: mental health (non-psychiatry) outpatient services, core specialists as defined in APL 23-001 Attachment B, and PCPs. The population served for Hospitals and OB/GYN specialists is designated as “N/A,” because these provider types do not exclusively serve adults or children.

<sup>9</sup> Kaiser and the PSPs (AHF and SCAN) are not included in these counts as they are not required to submit AAS requests.

## Reasons for the Approval or Denial of Alternative Access Standards Requests

DHCS requires, as part of the process of developing an AAS request, that MCPs identify the name and location of the nearest network provider outside the time/distance standard, as well as the names and locations of the two nearest out-of-network providers.<sup>10</sup> MCPs are also required to demonstrate that they have attempted to contract with the identified out-of-network providers if they are closer to affected members than the identified network provider. (See additional information under the “Contracting Efforts” heading in this section of the volume.) DHCS approvals and denials relate to the appropriateness and completeness of AAS requests, the MCP’s selection of providers, and the MCP’s documented contracting efforts. In the data provided for the 2023–24 analyses, the most common reasons for DHCS to approve or deny an AAS request included:

### ◆ Approval Reasons

- The MCP is contracted with the closest provider (network or out-of-network), and DHCS did not identify a closer network or out of-network provider than the provider indicated on the request.
- Although DHCS identified closer out-of-network providers than the network provider indicated on the request, the MCP has attempted to contract with those providers and clearly explained why they could not be added to the MCP’s network.

### ◆ Denial Reasons

- The MCP’s AAS request is incomplete. The MCP is to revise the request that follows APL 23-001<sup>11</sup> Attachment C instructions and resubmit.
- DHCS located a closer out-of-network provider than the network provider and out-of-network provider that the MCP identified on the AAS request. The MCP is to revise the request for miles/minutes or provide a justification and resubmit.
- DHCS located a network provider within the time or distance standards that the MCP did not identify on the AAS request. The MCP is to submit an updated accessibility analysis that shows the MCP is already meeting the time or distance standard.
- The MCP’s justification as to why the MCP was unable to contract with the closer out-of-network provider is insufficient. The MCP is to revise the justification and resubmit.

<sup>10</sup> See Instructions in APL 23-001, Attachment C. Available at <https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2023/APL23-001-ANC-Attachment-C.xls>. Accessed on: Feb 28, 2025.

<sup>11</sup> All Plan Letter 23-001. Available at: [APL 23-001 \(ca.gov\)](https://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2023/APL23-001-ANC-Attachment-C.xls). Accessed on: Feb 28, 2025.

## Distance and Driving Time Between Nearest Network Provider and Farthest Member

A completed AAS request submission includes the distance and drive time between the nearest network provider and the member farthest from that provider within the specified ZIP Code.<sup>12</sup> Each MCP may submit several AAS requests for different provider types and populations served within a single ZIP Code. To summarize the characteristics of requests at the ZIP Code level, HSAG computed the median driving distance and time between the nearest network provider and the farthest member within each ZIP Code, across all provider types and populations served. HSAG also calculated the median number of members impacted and the range of driving distances, driving times, and members impacted across requests for the affected ZIP Codes. The calculations used all requests submitted except those with missing or invalid ZIP Codes. DHCS did not approve all requests included in this analysis, and DHCS approvals may have included driving distance or time standards that differed from submitted requests.

Across all combinations of MCPs and ZIP Codes, the shortest median driving distance was 0 miles for Aetna and ZIP Codes 92103, 95630, and 95817. The shortest median driving time was 0 minutes for Aetna and ZIP Codes 95630 and 95817. DHCS instructed plans to submit AAS requests with a distance of 0 miles and a time of 0 minutes to represent an MCP's disagreement with the DHCS compliance assessment calculation. In these instances, DHCS reviews the MCP's analysis to determine whether the MCP's closest contracted provider is located within the time/distance standards. If DHCS confirms the MCP's closest contracted provider is located within the time/distance standards, an AAS request is not required, and no further action is required by the MCP. If DHCS concludes that the MCP's closest contracted provider is located outside of the time/distance standards, DHCS approves an AAS based on the DHCS-calculated miles and minutes of the closest contracted provider. The longest median driving distance was 207 miles for Anthem Blue Cross and ZIP Code 93527, while the longest median driving time was 263 minutes for Anthem Blue Cross and ZIP Code 93664.

The smallest median number of impacted members was 0 in 71 distinct combinations of MCPs and ZIP Codes associated with six different MCPs. A count of 0 impacted members most likely indicates that the MCP did not currently have any members residing in the ZIP Code. The MCP, however, would have been required to submit an AAS request because DHCS' model identified a Medi-Cal-eligible resident population in the ZIP Code that did not have access to providers of a given type within time or distance standards. The largest median number of impacted members was 42,633 individuals for IEHP and ZIP Code 92345.

---

<sup>12</sup> This is operationalized in the instructions for APL 23-001, Attachment C, as the driving distance or time "between the identified nearest network provider and the farthest edge of the ZIP code border."

The complete results for the analysis of distances, drive times, and impacted members are in Section 5 of this volume (“Alternative Access Standards Tables”).

## Time Frame for Approval or Denial of Requests

In accordance with WIC §14197(f)(4), DHCS must approve or deny an AAS request within 90 days of submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the AAS request within 30 days of submission of the additional information.

For each request for which a decision was rendered, HSAG calculated the time between the initial AAS request submitted by the MCP and the first decision for approval or denial made by DHCS. HSAG then calculated the median number of days to approval or denial for each MCP, the median across MCPs (that is, the median of the MCP medians), and the range of medians across MCPs. Please note that approvals included AAS requests for which the initial disposition was “Approve,” and denials included requests for which the initial disposition was “Denial.”

For requests submitted during the initial request and decision phase between March 25, 2024, and October 27, 2024, the median number of days to approval or denial across MCPs was 78 days. For requests submitted during the corrective action plan (CAP) resubmission phase between November 7, 2024, and November 21, 2024, the median number of days to approval or denial was eight days for 25 requests from five MCPs.<sup>13</sup> This calculation includes only requests where a decision was rendered.

The complete results for the analysis of the time between an AAS request and approval or denial are in Section 5 of this volume (“Alternative Access Standards Tables”).

## Approved Telehealth Requests

In areas where MCPs do not meet time or distance standards but do meet specific DHCS criteria,<sup>14</sup> MCPs may also choose to offer members telehealth services in lieu of submitting an

---

<sup>13</sup> HSAG also calculated the median number of days to approval or denial across all distinct requests with approvals or denials, independent of MCP. Those medians are 83 days for the initial request and decision phase and 11 days for the CAP resubmission phase.

<sup>14</sup> All Plan Letter 23-001. Available at: [APL 23-001 \(ca.gov\)](https://apl.ca.gov/23-001). Accessed on: February 28, 2025.

AAS request, consistent with WIC §14197(f)(1).<sup>15</sup> In general, if at least 85 percent of members in an area have access to in-person care within the time/distance standards, MCPs may propose to deliver synchronous telehealth to those members without access. In doing so, MCPs must agree to contract with the number of full-time equivalent (FTE) providers specified by DHCS. DHCS calculates the number of providers required based on the minimum provider-to-member ratios defined in MCP contracts for each provider type and on the number of members without in-person access within the time/distance standards. MCPs are also required to facilitate in-person care for members who do not have access to care within the time/distance standards but decline to use telehealth services.

For each approved request, the telehealth data provided by DHCS included the MCP, county, ZIP Code, population served (adult, pediatric, or N/A), provider type, percentage of members with in-person access, number of telehealth providers required by DHCS, and number of telehealth providers contracted. For 2023–24, DHCS approved 155 requests received from four MCPs: CCAH, CenCal, HPSJ, and Partnership. Partnership received approval for 79 requests, which is more than any other MCP. DHCS approved requests for 14 provider types—all provider types for which telehealth could be requested except ENT/Otolaryngology and OB/GYN.<sup>16</sup> At least one adult and one pediatric request was received for 13 of the 14 provider types (93 percent); no requests were received for adult Ophthalmology. The population served and provider type for which requests were most frequently approved was adult PCP, with 19 approved requests. Across all approved requests, the percentage of members with in-person access ranged from 85.7 percent to 99.6 percent, with a median of 92.2 percent. The number of FTE providers required by DHCS ranged from 0.25 to 1.75, with a median of 0.75. The number of telehealth providers contracted by the MCP was greater than or equal to the number of providers required by DHCS for all approved requests.

The complete results for the analysis of approved telehealth requests are located in Section 5 of this volume (“Alternative Access Standards Tables”).

## Consumer Complaints

HSAG reviewed DHCS’ quarterly grievance reports from State Fiscal Year (SFY) 2022–23 Quarter 3 (Q3) through SFY 2023–24 Q2 (January 2023 through December 2023) for member complaints related to access to providers. Grievance call frequencies were collected for four categories of complaints: “Timely Access,” “Geographic Access,” “Out-of-Network,” and “Rural Member Denied Out-of-Network Request.” Results were stratified by MCP and county.

<sup>15</sup> California WIC §14197(f)(1). Available at: [https://leginfo.ca.gov/faces/codes\\_displayText.xhtml?lawCode=WIC&division=9.&title=&part=3.&chapter=7.&article=6.3](https://leginfo.ca.gov/faces/codes_displayText.xhtml?lawCode=WIC&division=9.&title=&part=3.&chapter=7.&article=6.3). Accessed on: Feb 28, 2025.

<sup>16</sup> See Table 5 in Attachment A of APL 23-001 for a complete list of telehealth-eligible provider types.

Overall, 59,666 complaints were received across the four included categories, with 10.2 percent related to Geographic Access, 4.7 percent related to Out-of-Network provider issues, less than 0.1 percent related to Rural Member Denied Out-of-Network Request issues, and 84.9 percent related to Timely Access. On average, each MCP received 2,594.2 complaints across all categories. Across all MCPs that received complaints, the smallest number of complaints was 40 (CenCal), and the largest number of complaints was 18,220 (L.A. Care).

The complete results for the analysis of consumer complaints are in Section 5 of this volume (“Alternative Access Standards Tables”).

## Process of Ensuring Out-of-Network Access

DHCS sets the requirements for MCPs to provide out-of-network access. Specifically, MCPs must provide out-of-network access if their network is unable to provide medically necessary covered services with a contracted provider. They must also ensure that transportation is available when necessary for access to out-of-network providers. Additionally, MCPs must provide for the completion of covered services by a terminated or out-of-network provider at the request of a member in accordance with the continuity of care requirements in the California Health and Safety Code Section 1373.96. Furthermore, MCPs that are under a CAP for failing to meet time or distance standards must ensure subcontractors and delegated entities adhere to the out-of-network access requirements, submit a policy or procedure to ensure there is a consistent process for out-of-network access compliance, and demonstrate their ability to effectively provide information about out-of-network access to members.

## Contracting Efforts

MCPs that submit an AAS request are required to document their attempts to contract with the closest out-of-network providers and the outcomes of those attempts. Contracting attempts are not required, however, for out-of-network providers farther away than the nearest network provider.

HSAG reviewed data on MCP contracting efforts and the outcomes of those efforts as documented in AAS requests submitted between March 25, 2024, and November 21, 2024. The following bullet points summarize common themes in the current year’s data:

- ◆ No contracting efforts were required
  - Network provider closer than out-of-network provider
  - Out-of-network provider’s location outside of MCP’s contracted service area
- ◆ Provider outreach in progress
  - Planning to contact provider in near future
  - Contacted or tried to contact provider by telephone, mail, or email

- Contracting steps/negotiations in progress<sup>17</sup> or credentialing in progress
- Provider already contracted with MCP but not yet credentialed
- Provider already contracted with MCP but not yet contracted at location
- Provider affiliated with network contracted with MCP but not yet credentialed or contracted at location
- ◆ Provider outreach unsuccessful
  - Provider unreachable due to incorrect/outdated phone and address information
  - Provider does not practice at specified location or is on extended leave
  - Provider is a hospitalist or administrator and does not take appointments
  - Members cannot make appointments for care at the specified location
  - Incorrect provider information regarding provider specialty or population served (e.g., seeking pediatric provider but provider does not see children)
- ◆ Contracting efforts were unsuccessful
  - Unable to resolve rate dispute with provider
  - Provider has policy against contracting with Medi-Cal or MCPs
  - Provider affiliated with closed network that prohibits additional contracts
  - Provider lacks capacity to take on new patients/new networks
  - Provider credentialing failed or quality of care issue

Some MCPs noted that when address or phone information was incorrect, they utilized internal databases, the national NPI directory, Google Maps, and other tools to locate the suggested out-of-network providers. It is also noteworthy that when contracting efforts were unsuccessful, MCPs often indicated that providers' contractual relationships with other networks played an important role. This may be a particular problem in service areas shared by multiple MCPs and service areas where one or more MCPs sign providers to exclusive contracts. A small number of MCPs implied that Kaiser's expansion to new counties as an MCP may have made their contracting efforts more difficult.

## Providers under Contract

To understand the scope of each MCP's network in its service areas, HSAG calculated the percentage of all providers located within a given county who are contracted with each MCP serving that county.<sup>18</sup> Due to the absence of a reliable and sufficiently detailed source of data

<sup>17</sup> If applicable, the rationale must detail the targeted time frame for execution.

<sup>18</sup> Within the 274 provider network data files received from DHCS, none of the 15,386,144 provider data records received were missing the taxonomy data required to determine provider type. After filtering down to the 4,475,366 records with a provider type within the scope of the analysis, 1,329 records were found to be missing the NPI data required to

that includes all providers and their practice locations, the pool of providers in each county is limited to the providers for which full data are available—those contracted with MCPs. The following are results of calculations based on 274 provider network data files distributed by DHCS for September 2024:

- ◆ For all MCPs, the median percentage of contracted providers across counties, populations served, and provider types was 38.4 percent (interquartile range [IQR] 6.2 percent–75.0 percent).<sup>19</sup> This indicates that an MCP typically contracts with roughly 38.4 percent of the providers who are contracted with any MCP in a county.
- ◆ The MCPs with the highest median percentage of contracted providers across counties and provider types were CenCal (100.0 percent; IQR 94.4 percent–100.0 percent) and Partnership (100.0 percent; IQR 52.9 percent–100.0 percent). These MCPs typically contract with a higher proportion of providers located within the counties they serve than other MCPs.
- ◆ The provider type with the highest median percentage of contracted providers across counties and MCPs was Hospitals (61.1 percent; IQR 40.0 percent–100.0 percent). MCPs typically contract with a higher proportion of providers of this type located within the counties they serve compared to other provider types.
- ◆ The provider type with the lowest median percentage of contracted providers across counties and MCPs was adult ENT/Otolaryngology (7.1 percent; IQR 0.0 percent–46.7 percent). MCPs typically contract with a lower proportion of providers of this type located within the counties they serve compared to other provider types.

The complete results for the analysis of the number of providers contracted with an MCP within each county for each provider and specialty type as a percentage of all providers in that county are in Section 5 of this volume (“Alternative Access Standards Tables”).

---

uniquely identify specific providers. No other records were missing data in required data fields.

<sup>19</sup> The IQR of a distribution is the distance from the 25th percentile value to the 75th percentile value, delimiting the middle 50 percent (approximately) of values.

## 4. Conclusions

The results presented in Section 3 are generally consistent with those presented in *Volume 5 of 6 Medi-Cal Managed Care External Quality Review Technical Report—July 1, 2022–June 30, 2023*, but changes in the DHCS network adequacy assessment methodology appear to have affected these results.

For example:

- ◆ The new DHCS methodology appears to have increased the number of requests submitted. More than twice as many distinct AAS requests were submitted in 2023–24 compared to 2022–23 (15,499 requests versus 6,897 requests) with a higher proportion of approvals in 2023–24 (91.3 percent versus 76.3 percent), a similar proportion of denials (8.7 percent versus 7.7 percent), and a lower proportion of “no decision” outcomes (<0.1 percent versus 16.0 percent).
- ◆ The median number of days across MCPs between the initial submission of an AAS request and the delivery of an initial approval or denial by DHCS was longer in 2023–24 than in 2022–23 during the initial submission phase (78 days versus 58 days) but shorter in the resubmission phase (eight days versus 32 days).<sup>20</sup> This difference in the resubmission phase was largely due to a much smaller volume of requests to process in 2023–24 (25 versus 560).
- ◆ The longest median travel time and longest median travel distance to the nearest network provider were both higher in 2023–24 than in 2022–23 (207.0 minutes versus 178.5 minutes and 263.0 miles versus 222.0 miles), and the largest median number of members impacted was also higher in 2023–24 (42,633 members versus 29,206 members).
- ◆ The total number of member complaints was higher in 2023–24 compared to 2022–23 (59,666 calls versus 52,840 calls), but the distribution of complaints across categories was similar (e.g., 10.2 percent of calls in 2023–24 concerned geographic access compared to 10.4 percent in 2022–23).
- ◆ The median number of providers contracted with an MCP as a percentage of providers contracted with any MCP in a county was lower in 2023–24 compared to 2022–23 (37.7 percent versus 50.3 percent). This indicates that MCPs typically contracted with a lower proportion of providers located within the counties they served in 2023–24 compared to 2022–23. This result may have been affected by a 2024 MCP reorganization discussed below.

Reporting on approved telehealth requests was new in 2022–23. DHCS did not provide data on the number of telehealth requests submitted, but the number of approvals increased from 33 in 2022–23 to 155 in 2023–24, and the number of provider types for which requests were

---

<sup>20</sup> WIC §14197(f)(4) requires DHCS to approve or deny an AAS request within 90 days of submission.

approved increased from five to 14. The number of MCPs with approved requests decreased from six to four, however, and only two MCPs (CCAH and CenCal) had approved requests in both years. This simultaneous growth and contraction may mean that MCPs are increasingly considering telehealth as a viable alternative to AAS requests but are also seeing telehealth as only a stopgap.

Finally, DHCS initiated a major reorganization of MCP reporting units effective January 1, 2024, which resulted in the following:

- ◆ The exit of Aetna and CHW from the Medi-Cal Managed Care market
- ◆ A decrease in the number of counties served by some MCPs
- ◆ The addition of a new MCP serving the Imperial Valley
- ◆ An increase in the number of counties served by Kaiser and other MCPs

This report concerns only MCPs contracted with DHCS in 2023, but AAS requests were submitted and processed in 2024, and MCP contracting efforts took place during 2024 in the environment created by the reorganization. This was reflected in a small number of remarks made by MCPs when justifying their inability to contract with nearby out-of-network providers in counties being newly served by Kaiser in 2024.

## 5. Alternative Access Standards Tables

The tables in this section present key reporting elements defined in WIC §14197.05 regarding AAS requests for provider networks.

### Table 5.1—Reporting Elements 1 and 6

Table 5.1 shows the number and final disposition of MCPs’ AAS requests. Results are presented according to the MCP’s service area (County and ZIP Code), provider type (including specialists), and population served (adult, pediatric, or N/A). The analysis is based on AAS requests submitted to DHCS between March 25, 2024, and November 21, 2024.

Note the following regarding Table 5.1:

- ◆ AAS requests with missing or invalid ZIP Codes were excluded. All other requests submitted by MCPs were counted, including resubmissions for a given service area and provider type.
- ◆ The population served (adult, pediatric, N/A) is reported as “N/A” for Hospitals and OB/GYN specialists.
- ◆ Final dispositions listed as “Approve” in the DHCS data are reported as “Approved”; and final dispositions listed as “Denial” in the DHCS data are reported as “Denied.”
- ◆ If the final disposition of a request is “No decision,” DHCS had not reported a decision as of November 21, 2024. The primary reason for not rendering a decision is that the ZIP Code in the request is a special, non-residential ZIP Code (e.g., a post office box only ZIP Code), where an AAS request would not be appropriate because no members reside there.
- ◆ MCPs received results for all AAS requests, including those with “No decision,” by the end of the corrective action period.

**Table 5.1—Number of Requests and Final Disposition for Alternative Access Standards, by MCP, Service Area, and Provider Type**

MCP	County	ZIP Code	Adult Pediatric N/A	Provider Type (Including Specialists)	Number of Requests	Final Disposition (Approved or Denied)

## Table 5.2—Reporting Elements 3 and 4

For AAS requests submitted to DHCS, Table 5.2 shows the median distance in miles and drive time in minutes between the nearest network provider and the member farthest from that provider within the specified ZIP Code, and the median number of members impacted. Minimum, maximum, and median values are presented by MCP and ZIP Code for distance, drive time, and number of members impacted. The analysis is based on AAS requests submitted to DHCS between March 25, 2024, and November 21, 2024.

Note the following regarding Table 5.2:

- ◆ Calculations in this table are based on all submitted AAS requests except those with missing or invalid ZIP Codes.
- ◆ Not all requests were approved, and DHCS approvals may have included distance or travel time standards differing from the submitted requests.
- ◆ NR = not reported. Information was omitted from all requests submitted for the MCP and ZIP Code.

**Table 5.2—Median Distance, Drive Time, and Number of Members Impacted by Alternative Access Standards Requests, by MCP and ZIP Code**

MCP	ZIP Code	Median Distance (Range)	Median Time (Range)	Median Number of Members Impacted (Range)
AAH	94505	34.0 (34.0, 34.0)	49.0 (49.0, 49.0)	100.0 (100.0, 100.0)
AAH	94514	29.0 (21.0, 42.0)	39.5 (34.0, 53.0)	69.0 (38.0, 100.0)
AAH	94539	19.0 (17.0, 20.0)	38.0 (37.0, 42.0)	6.0 (6.0, 6.0)

## Table 5.3—Reporting Element 9—Initial Submission Period

Table 5.3 presents the number of distinct AAS requests submitted and the median number of days between the initial submission of an AAS request and the delivery of an initial approval or denial by DHCS for each MCP that submitted AAS requests during the initial review between March 25, 2024, and October 27, 2024.

In accordance with WIC §14197(e)(3), DHCS must approve or deny an AAS request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the AAS request within 30 days of submission of the additional information.

Note the following regarding Table 5.3:

- ◆ AAS requests with missing or invalid ZIP Codes were excluded.
- ◆ Median days were calculated only using initial requests for which a decision was rendered by October 27, 2024.<sup>21</sup>
- ◆ The number of days is the difference between the date an AAS request was first submitted by the MCP for a specific service area and type of provider and the date of the earliest decision delivered by DHCS.
- ◆ NR = not reportable. No decisions were rendered by October 27, 2024, for initial requests submitted by the MCP during this period.

<sup>21</sup> The median represents the time to a decision at the 50th percentile in Table 5.3. This summary statistic was chosen because it is not easily influenced by outliers (e.g., a small group of requests with unusually large numbers of days to a decision).

**Table 5.3—Time Frame for DHCS Approval or Denial of Alternative Access Standards Requests for the Initial Submission Period, by MCP**

MCP	Number of Requests	Median Days
AAH	65	39
Aetna	1,052	71
Anthem Blue Cross	3,632	95
Blue Shield Promise	791	84
CCAH	129	52
CCHP	44	34

L.A. Care	593	73
Molina	1,633	83
Partnership	2,242	81
SCFHP	183	93

## Table 5.4—Reporting Element 9—Resubmission Period

Table 5.4 presents the number of distinct AAS requests submitted and the median number of days between the initial submission of an AAS request and the delivery of an initial approval or denial by DHCS for each MCP that submitted AAS requests during the CAP review between November 7, 2024, and November 21, 2024.

In accordance with WIC §14197(e)(3), DHCS must approve or deny an AAS request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the AAS request within 30 days of submission of the additional information.

Note the following regarding Table 5.4:

- ◆ AAS requests with missing or invalid ZIP Codes were excluded.
- ◆ Median days were calculated only using requests for which a decision was rendered by November 21, 2024.<sup>22</sup>
- ◆ The number of days is the difference between the date an AAS request was first submitted by the MCP for a specific service area and type of provider and the date of the earliest decision delivered by DHCS.
- ◆ NR = not reportable. No decisions were rendered by November 21, 2024, for initial requests submitted by the MCP during this period.

**Table 5.4—Time Frame for DHCS Approval or Denial of Alternative Access Standards Requests for the Resubmission Period, by MCP**

MCP	Number of Requests	Median Days
Anthem Blue Cross	12	11
CHG	3	8
IEHP	5	6
L.A. Care	2	1
Molina	3	12

<sup>22</sup> The median represents the time to a decision at the 50th percentile in Table 5.4. This summary statistic was chosen because it is not easily influenced by outliers (e.g., a small group of requests with unusually large numbers of days to a decision).

## Table 5.5—Telehealth

Table 5.5 shows the percentage of members with in-person access, the number of telehealth providers required by DHCS, and the number of telehealth providers contracted by the MCP for telehealth requests approved by DHCS. Results are presented according to the MCP's service area (County and ZIP Code), provider type (including specialists), and population served (adult, pediatric, or N/A). The analysis is based on telehealth requests submitted to DHCS between March 25, 2024, and November 21, 2024.

In areas where MCPs do not meet the time or distance standards but do meet specific DHCS criteria,<sup>23</sup> MCPs may also choose to offer members telehealth services in lieu of submitting an AAS request, consistent with California WIC §14197(f)(1).<sup>24</sup> In general, if at least 85 percent of members in an area have access to in-person care within the time/distance standards, MCPs may propose to deliver synchronous telehealth to those members without access. The MCPs must meet the required telehealth provider-to-member ratio specified by DHCS for each eligible provider type while also facilitating in-person care for members who request it.

Note the following regarding Table 5.5:

- ◆ Eligible provider types are limited to Cardiology/Interventional Cardiology, Dermatology, Endocrinology, ENT/Otolaryngology, Gastroenterology, Hematology, HIV/AIDS Specialists/Infectious Diseases, Nephrology, Neurology, Non-Specialty Mental Health Providers, OB/GYN, Oncology, Ophthalmology, Primary Care, Psychiatry, and Pulmonology.
- ◆ The “Number of Telehealth Providers Required by DHCS” is the number of FTE telehealth providers needed to meet the required provider-to-member ratio for the provider type. This number is rounded to the nearest 0.25 FTEs.

**Table 5.5—Number of Telehealth Providers Contracted by an MCP, by MCP, Service Area, and Provider Type**

MCP	County	Zip Code	Adult Pediatric N/A	Provider Type (Including Specialists)	Percent of Members with In-Person Access	Number of Telehealth Providers Required by DHCS	Number of Telehealth Providers Contracted by MCP
CCAH	Merced	93635	Adult	Endocrinology	99.1%	0.25	11

## Table 5.6—Reporting Element 10—Grievances

Table 5.6 summarizes consumer complaints related to access to providers collected in DHCS' quarterly grievance reports from SFY 2023 Q3 through SFY 2024 Q2 (i.e., January 2023 through December 2023).

Note the following regarding Table 5.6:

- ◆ DHCS assigns each grievance call to one of a large set of categories. This analysis is limited to the following categories deemed relevant to network adequacy:
  - Geographic Access
  - Out-of-Network
  - Rural Member Denied Out-of-Network Request
  - Timely Access
- ◆ A category is only reported if at least one call in that category was received.

## Table 5.7 through Table 5.64—Reporting Element 5

Reporting Element 5 is defined by WIC §14197.05<sup>25</sup> as the percentage of providers in the plan service area by provider and specialty type that are under contract with a Medi-Cal MCP. Table 5.7 through Table 5.64 show the number of providers that an MCP has under contract within a plan service area and the number of providers under contract by the MCP as a percentage of providers in the service area under contract with any MCP, by provider type (including specialists) and population served (adult, pediatric, or N/A). Note that if the total number of providers in the service area had been the denominator for calculation of the percentage rather than the number of providers under contract with any MCP, the percentage would likely be smaller. This makes the percentage reported in Table 5.7 through Table 5.64 the upper limit of the number of providers under contract by the MCP as a percentage of all providers in the service area. For additional information, see the “Limitation” subsection below.

### Limitation

The numerator for Reporting Element 5 is the number of providers contracted with a specific MCP in a specific service area as identified in DHCS 274 provider network data files. The denominator for Reporting Element 5 is the number of providers practicing in the service area. HSAG’s review of the CMB licensing data determined that the licensing data do not contain adequate information about providers’ practice locations to be a reliable estimate of the total number of providers for a specific county. Furthermore, the 274 provider network data files and CMB licensing data could not be linked by an NPI or license number to ensure that providers identified in the 274 provider network data files were also identified in the CMB data. For these reasons, the available data are limited in their ability to identify the denominator as defined above. The alternative denominator used in Table 5.7 through Table 5.64 is the count of providers physically located in the plan service area that are under contract with any MCP. The total number of providers located in a service area will exceed the number of Medi-Cal contracted providers, making the actual percentage of providers under contract with Medi-Cal MCPs smaller than the percentage reported in Table 5.7 through Table 5.64.

<sup>25</sup> California WIC §14197.05. Available at: [https://leginfo.ca.gov/faces/codes\\_displaySection.xhtml?lawCode=WIC&sectionNum=14197.05](https://leginfo.ca.gov/faces/codes_displaySection.xhtml?lawCode=WIC&sectionNum=14197.05). Accessed on: Feb 28, 2025.

Note the following regarding Table 5.7 through Table 5.64:

- ◆ The analysis is based on DHCS 274 provider network data files distributed by DHCS for September 2024.
- ◆ Please note that MCPs in certain counties had increases or decreases of 25 percent or more in the number of provider records submitted to DHCS for September 2024 relative to the those submitted to DHCS for May 2024. Affected MCPs and counties are Anthem Blue Cross in Fresno (92.9 percent decrease), Kern (49.5 percent increase), Kings (94.1 percent decrease), Madera (82.9 percent decrease), Sacramento (99.0 percent decrease), San Francisco (94.0 percent decrease), Santa Clara (92.4 percent decrease), Tulare (91.8 percent decrease), and L.A. Care in Los Angeles (446.2 percent increase). Large changes in provider network data in a short period of time may indicate MCP data processing issues rather than network expansion or contraction, suggesting that results for the listed counties and MCPs should be interpreted with caution.
- ◆ The population served (adult, pediatric, or N/A) is derived from a “Sees Children” indicator in the 274 provider network data files, not from taxonomy codes. The population served field is reported as “Pediatric” for providers who see only children or see both children and adults, “Adult” for providers who do not see children, and “N/A” for Hospital and OB/GYN specialist providers.
- ◆ The number (percent) of providers in the county contracted by the MCP is limited to providers with addresses in the county to allow accurate comparisons across MCPs serving the same county. While MCPs may contract with providers outside a county to provide needed coverage, they are not required to do so. The actual number of providers contracted by the MCP to serve the county may therefore be larger than the total number of providers located within the county.
- ◆ The number (percent) of providers in the county contracted by the MCP is reported as “N/A” if there are no providers of a given type (Adult/Pediatric/N/A and Provider Type [Including Specialists]) located in the county that are contracted with any MCP.

**Table 5.7—Number (Percent) of Providers with an Address in Alameda County Contracted with an MCP for the Alameda County Service Area, by MCP and Provider Type**

MCP	County	Adult Pediatric N/A	Provider Type (Including Specialists)	Number (Percent) of Providers in the County Contracted by the MCP	Number of Providers in the County Contracted by Any MCP
AAH	Alameda	Adult	Cardiology/ Interventional Cardiology	56 (49.6%)	113
