Background and Overview

In accordance with Assembly Bill (AB) 205, the Department of Health Care Services (DHCS) is required to post approved Alternative Access Standards (AAS). AB 205 authorizes DHCS, upon request of a Medi-Cal managed care health plan (MCP), to allow alternative access standards for time and distance standards.¹

Upon request by an MCP, DHCS may allow alternative access standards for the time and distance standards established in AB 205 if the requesting MCP has exhausted all other reasonable options to obtain providers to meet the applicable standard. The Department will review the MCP's request and determine if the MCP has demonstrated that it meets these requirements.²

Applicability of Alternative Access Standards

AB 205 allows MCPs to submit Alternative Access Standard (AAS) requests for time and distance standards for the following provider types:

- Primary Care Providers (PCP) – adult and pediatric
- OB/GYN PCPs (only for assigned members)
- OB/GYN specialists
- Core specialists³ – adult and pediatric
- Hospitals
- Pharmacies
- Outpatient mental health providers⁴

DHCS reviews AAS requests based on the zip code and provider type.

DHCS Review Process

DHCS requested that MCPs submit geographic access maps or accessibility analyses that demonstrated compliance with applicable time or distance standards or demonstrated that they had requested DHCS approval of an AAS for the entire service area.

DHCS reviewed the geographic access maps and/or accessibility analysis for time and distance standards based on county population density for the following provider types: pediatric and adult PCPs, pediatric and adult core specialists, OB/GYN PCP and

¹ Welfare and Institutions Code (WIC) 14197(e)(1)

² WIC 14197(e)(1)(B)

³ [Table 3](#)

⁴ Psychologists, Licensed Marriage and Family Therapists, and Licensed Clinical Social Workers

specialist, hospitals, mental health providers, and pharmacies. Additionally, DHCS assessed and ensured there was entire service area coverage for time and distance standards. DHCS verified that the MCP submitted an AAS request if they were unable to meet time and distance standards based on the geographic access analysis.

MCP AAS requests were organized by zip code and county and included:

- Driving time and/or the distance, in miles, between the nearest in-network provider(s) and the most remote members;
- Three nearest out-of-network providers;
- Proposed AAS standard in minutes and miles from the most remote members; and
- Detailed the MCP's contracting efforts including documentation of all the providers with whom the MCP attempted to contract and an explanation of why the contract was not executed.

DHCS assessed the requests for AAS and either approved or denied each request on a zip code and provider type basis using the following review criteria:

- Driving times to the nearest in-network provider request exceeds the time standard or distance to the nearest in-network provider exceeds the distance standard;
- Name and address of closest in-network provider;
- Names and addresses of three closest provider;
- Narrative explaining why the plan was unable to execute contract with located provider, to include if there was a rate dispute between the provider and MCP; and
- Determine whether the proposed alternative standard is a reasonable request based on:
 - Health Care Options website;
 - Medicare.gov;
 - Office of Statewide Health Planning and Development;
 - California Health and Human Services Open Data/Fee-for-Service;
 - Any additional web based sites; and
 - Consider the geographic region, size, and total members affected when assessing the request. If the standard is within 5 miles of the nearest provider, DHCS does not require additional substantiation.

DHCS-approved AAS requests are valid for one contract year and must be resubmitted to DHCS for approval annually.

MCPs were required to submit a letter of request to DHCS for an exemption from time and distance standards. In response, DHCS sent an Alternative Access Standards Exemption Template to the MCP. The MCP was required to provide written responses on the template to demonstrate that their MCP's delivery structure is capable of delivering the appropriate level of care and access.

AAS Exemptions

MCPs may request DHCS to consider the WIC 14197(e)(1)(B) exemption to the time and distance standards. This exemption process allows for the MCP to provide justification that their delivery structure is capable of delivering the appropriate level of care so that they are not required to meet the network adequacy time and distance standards.

DHCS reviewed each MCP's exemption request and determined that the requesting MCP has adequately described its delivery structure to exhibit a clinically integrated health care model/network, consisting of either a:

- **Medical Home:** A team-based health care delivery model led by a health care team in a centralized facility to provide comprehensive and continuous medical care to patients with a goal to obtain maximal health outcomes.

OR

- **Specialty Services for Specialty Population:** A limited but comprehensive provider network that renders services specific to the diagnoses of the members and ensures there is care coordination and support services across the continuum of care regardless of location.

DHCS has approved the alternative access exemption request due to the items outlined above for the following MCPs:

- Kaiser Permanente (KP Cal LLC)
- AIDS Healthcare Foundation
- Rady Children's Hospital – San Diego

Alternative Access Standards Results

The AAS chart is displayed by county by zip code in alphabetical order by specialty type.

Trends and Explanations

Time and Distance standards can be met by either minutes or miles. Some MCPs elected to request AAS standards for either minutes only or miles only or both minutes and miles. Most MCPs requesting AAS standards submitted for distance rather than time.

MCPs are not required to meet time and distance standards for certain zip codes due to those zip codes being carved out to fee for service or another MCP. Please refer to

Table 4 for a list of the [Carved-Out Zip Codes](#).

Some of the differences in approvals are attributed to providers contracting with one plan but not the other within the same service area.

Due to the county population density and geographical attributes within the State, a large number of AAS requests are due to geographically remote regions. Additionally, the trends show that there is a lack of specialists, specifically pediatric specialists, in both rural and urban counties within time and distance standards.

Current AAS Approval Status

The AAS requests that have been approved in the charts below are current at the time of posting and will be updated at least annually and on an as-needed basis. DHCS continues to review AAS requests as they are received throughout the year and during the corrective action plan (CAP) process. As the CAPs are closed out, DHCS will update the approved AAS requests in the charts below. The CAPs are tied to specific provider types for which time and distance standards apply and consequently, did not submit corresponding AAS requests. Information on MCPs under an Annual Network Certification CAP can be found at: [add link: *2018 Annual Network Certification: Corrective Action Plans and MCP Responses Report*].

If you have any questions regarding this report please contact MCQMDNAU@dhcs.ca.gov

Network Adequacy Standards

Table 1. Network Adequacy Standards

Provider Type	Timely Access Standard	Time and Distance Standard by County Size ⁵			
		Rural	Small	Medium	Dense
Primary Care (Adult and Pediatric)	Within 10 business days to appt. from request	10 miles or 30 minutes from the beneficiary's residence			
Specialty Care ⁶ (Adult and Pediatric)	Within 15 business days to appt. from request ⁷	60 miles or 90 minutes from the beneficiary's residence*	45 miles or 75 minutes from the beneficiary's residence*	30 miles or 60 minutes from the beneficiary's residence*	15 miles or 30 minutes from the beneficiary's residence*
Obstetrics/Gynecology (OB/GYN) Primary Care	Within 10 business days to appt. from request	10 miles or 30 minutes from the beneficiary's residence			
Obstetrics/Gynecology (OB/GYN) Specialty Care	Within 15 business days to appt. from request	60 miles or 90 minutes from the beneficiary's residence*	45 miles or 75 minutes from the beneficiary's residence*	30 miles or 60 minutes from the beneficiary's residence*	15 miles or 30 minutes from the beneficiary's residence*
Hospitals	N/A	15 miles or 30 minutes from the beneficiary's residence			
Pharmacy	Dispensing of at least a 72-hour supply of covered outpatient drug in an emergency situation	10 miles or 30 minutes from the beneficiary's residence*			
Mental Health (non-psychiatry) Outpatient Services ⁸	Within 10 business days to appt. from request	60 miles or 90 minutes from the beneficiary's residence*	45 miles or 75 minutes from the beneficiary's residence*	30 miles or 60 minutes from the beneficiary's residence*	15 miles or 30 minutes from the beneficiary's residence*

⁵ See Table 2

⁶ Time and Distance Standards apply to core specialists outline in Table 3

⁷ Timely Access standards apply to all specialists not only core specialists

⁸ Non-specialty mental health services for members with mild to moderate impairments

Table 1. Network Adequacy Standards

Long Term Services and Supports	If applicable	Time and distance standards did not need to be established for Multipurpose Senior Services Program (MSSP), Skilled Nursing Facilities (SNF), or Intermediate Care Facilities (ICF) providers as these providers either travel to the beneficiary to provide services or the beneficiary resides at the facility for care.
---------------------------------	---------------	--

Table 2. County Size Categories by Population

Size Category	Population Density	# of Counties	Counties
Rural	<50 people per square mile	21	Alpine, Calaveras, Colusa, Del Norte, Glenn, Humboldt, Imperial, Inyo, Lassen, Mariposa, Mendocino, Modoc, Mono, Plumas, San Benito, Shasta, Sierra, Siskiyou, Tehama, Tuolumne, Trinity
Small	51 to 200 people per square mile	19	Amador, Butte, El Dorado, Fresno, Kern, Kings, Lake, Madera, Merced, Monterey, Napa, Nevada, San Bernardino, San Luis Obispo, Santa Barbara, Sutter, Tulare, Yolo, Yuba
Medium	201 to 600 people per square mile	9	Marin, Placer, Riverside, San Joaquin, Santa Cruz, Solano, Sonoma, Stanislaus, Ventura
Dense	≥600 people per square mile	9	Alameda, Contra Costa, Los Angeles, Orange, Sacramento, San Diego, San Francisco, San Mateo, Santa Clara

Table 3. DHCS Adult and Pediatric Core Specialists
