

Performance Outcomes System Initial Reports

Report run on November 16, 2017

Background

This is the first in the series of new Adult/Older Adult Quality of Life (QOL) reports for the Performance Outcomes System (POS). The reports meet the intent of the Legislation, as stated in Welfare and Institutions Code Section 14707.5, to develop a Performance Outcomes System for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) mental health services that will improve outcomes at the individual, program, and system levels and inform fiscal decision-making related to the purchase of services. This reporting effort is part of the implementation of the Performance Outcomes System for Medi-Cal Specialty Mental Health Services (SMHS) for children and youth.

Since 2012 DHCS has worked with several groups of stakeholders to create a structure for reporting, develop the performance measurement paradigm, and develop indicators and measures. Through this process, seven domains were identified as necessary to assess in order to meet the legislative requirements for the POS. The domains are: Access, Engagement, Service Appropriateness to Need, Service Effectiveness, Linkages, Cost Effectiveness and Satisfaction.

Purpose and Overview

For the QOL Adult/Older Adult data one statewide aggregate report will be produced. Due to the small yearly sample sizes it is not possible to provide reports at the population-based county grouping level or at the county-specific level. These are the initial statewide, aggregate reports using data created for the Performance Outcomes System; they establish a foundation for on-going reporting and are anticipated to be produced on an annual basis.

These reports provide trend information by displaying information for Fiscal Years (FY) 13/14, 14/15 and 15/16. This report includes all the questions broken out by Adult/Older Adult respondents. The QOL questions address the following seven domains: General Life Satisfaction, Living Situation, Daily Activities, Family Relationships, Social Relationships, Safety and Health.

Definitions

Population - Adults (age 18-59) and Older Adults (age 60 and over) receiving Specialty Mental Health Services.

Data Source - Consumer Perception Survey Database FY 13/14 through FY 15/16.

Additional Information

The **Measures Catalog** is the companion document for these reports and provides the methodology and definitions for the measures. Each measure is defined and the numerator and denominator used to develop the metrics are provided with relevant notes and additional references. The Measures Catalog may be found at:

http://www.dhcs.ca.gov/services/MH/Documents/POS_MeasuresCatalog_Sept2016.pdf

Background information on the Performance Measures System implementation is available on the DHCS website through the POS landing page. Documents posted include the relevant legislation, plans submitted to the Legislature, and handouts for meetings with the Stakeholder Advisory Committee dating back to the first meeting in 2012. Report Highlights

Sample size varies by question and by domain.

The number of Quality of Life respondents for FY 13/14 was 13,938.

The number of Quality of Life respondents for FY 14/15 was 17,181.

The number of Quality of Life respondents for FY 15/16 was 19,794.

Each of the questions are answered using a 7-point Likert scale with the following values: 1 = Terrible; 2 = Unhappy; 3 = Mostly Dissatisfied; 4 = Mixed; 5 = Mostly Satisfied; 6 = Pleased; and, 7 = Delighted.

- in FY 15/16 the average response for the General Life Satisfaction domain was 4.54
- in FY 15/16 the average response for the Living Situation domain was 4.67
- in FY 15/16 the average response for the Daily Activities domain was 4.63
- in FY 15/16 the average response for the Family Relationships domain was 4.73
- in FY 15/16 the average response for the Social Relationships domain was 4.74
- in FY 15/16 the average response for the Safety domain was 4.88
- in FY 15/16 the average response for the Health domain was 4.31

In addition to the Quality of Life questions, this report also contains statistics from survey demographic/personal questions (e.g., age, gender, length in the program). The results from these questions start on page 10 of this report. Note there were more survey respondents who decided to complete these questions compared to the Quality of Life questions, generally

Please contact cmhpos@dhcs.ca.gov for any questions regarding this report.
