**SCHIP**

The State Children's Health Insurance Program (SCHIP) was established by the federal government in the late 1990's to provide health insurance to children in families at or below 200 percent of the federal poverty level. SCHIP allowed states to create new programs to serve these children and families and/or expand their existing Medicaid programs. California elected to create the Healthy Families Program, serving children with family incomes below 250% of the federal poverty level and expand Medi-Cal programs to serve lower income children that would not previously qualify for Medi-Cal.

The HFP was established to provide a basic health, vision, and dental benefit package (provided by HFP health plans) that includes a mental health benefit for children assessed with serious emotional disturbances (SED). Mental health services for children meeting the SED criteria are provided by the county mental health departments. The enhanced Federal Medicaid Assistance Percentage (FMAP) of 65% under Title XXI is provided for HFP health and mental health service expenditures

California expanded Medicaid (Medi-Cal) eligibility for certain populations of children for the provision of health and mental health services. Known in California as MCHIP, services are reimbursed for “optional targeted low-income children” using the enhanced FMAP of 65% under Title XXI. These children are defined in federal law as targeted low-income children who would not otherwise qualify for Medicaid.
