2:05 – 2:25	Medi-Cal Rx: Pharmacy Benefits
2:25 – 2:40	Program Update
2:40 – 3:00	Public Comment

Pharmacy Benefits Updates

Bassant Khalil
Assistant Division Chief
Pharmacy Benefits Division

Agenda

- » State Budget Policy Updates
- » Medi-Cal Rx Operational Updates
- » Support for Members Aging Out of Pediatric Care

State Budget Policy Updates

- » Pursuant to the enacted [2025-26 State Budget](#), the Department of Health Care Services (DHCS) will be implementing a series of Medi-Cal Rx policy updates to:
 - Reduce pharmacy spending,
 - Improve program integrity, including addressing fraud, waste, and abuse,
 - Ensure continued, equitable access to medically necessary, high-quality pharmacy benefits and services.
- » Changes will be effective on January 1, 2026.
- » As some will have no impact to the pediatric population, we will focus only those proposals that do have an impact.

Step Therapy for Select Medications

- » Part of the existing utilization management, including prior authorization (PA) request review process.
- » Providers may be asked for additional justification for unlisted Contract Drug List (CDL) medication approval.
- » Not expected to impact California Children Services (CCS) Panel Providers who currently have authority to prescribe most medications without a prior authorization.
- » Providers without CCS Panel Provider status will need to submit justification for use of a non-CDL product when requesting prior authorization approval. Continuing care will not be sufficient justification.

Changes to Continuing Care for Select Products

- » For medications that had been on the CDL, but are no longer included, continuation of therapy will not be automatically granted.
 - These medications will now require a prior authorization for medical necessity.
- » CCS Panel Providers who have Panel Authority will not be impacted assuming the claim is not denied for other UM edits such as quantity or cost limits.
- » For non-paneled CCS providers:
 - Prior Authorizations for non-CDL medications will be required, even when the member has a history with that medication while it was on the CDL.
- » DHCS will issue letters to impacted members to inform them of the change in coverage.
- » For the lists of drugs, refer to the State Budget Policy Updates tab on the [Medi-Cal Rx Education and Outreach webpage](#).

Coverage for Over-the-Counter (OTC) Covid-19 Antigen Tests

- » OTC Covid-19 Antigen Tests will require prior authorization approval for Medi-Cal Rx coverage.
 - Prior Authorization requests are for one-time only approval and restricted to up to 4 tests per member, per 30 days.
 - Medical necessity must demonstrate a clinical need for testing.
- » When prescribed by CCS Panel Provider with Panel Authority, no prior authorization will be required.

Exclusion of GLP-1 Drugs for Weight Loss

- » GLP-1 drugs indicated for weight loss and weight loss-related indications will be excluded from Medi-Cal Rx coverage for all Medi-Cal members.
- » GLP-1 drugs indicated for Type 2 diabetes or other non-weight loss related indications will continue to be a benefit with an ICD-10 code diagnosis.
- » DHCS will issue letters to all members to inform them of the change in coverage.

Resources

- » [90-Day Countdown: Upcoming Changes to Medi-Cal Rx](#) – Published October 1, 2025
- » [Upcoming Changes to Medi-Cal Rx](#) – Published August 19, 2025
- » [DHCS-FY-2025-26-Budget-Act-Highlights](#) – Released July 1, 2025
- » [2025-26 State Budget](#) – Enacted June 27, 2025
- » State Budget Policy Updates tab located on the [Medi-Cal Rx Education and Outreach webpage](#)

Medi-Cal Rx Operational Updates

- » Implementation of a “Clinical Literature Repository” for citation of clinical literature in Prior Authorization requests – eliminates need to upload articles with Prior Authorization request submission
- » Confirmation of holistic review of prior authorization requests to enable override of cost limit when approving exemption from quantity limit for medical necessity – eliminates need for multiple prior authorizations

Support for Members Aging Out of Pediatric Care

- » DHCS is exploring a policy change to allow prescriptions written by CCS Panel Providers with Panel Authority, for any pediatric member, to be eligible for a 100-day prior authorization extension when the member becomes 21 years of age.
 - This provides a grace period while the member establishes relationship with an adult care provider.
 - This policy also aligns with the intent of the CCS Panel Provider Authority – to recognize the status of paneled providers and eliminate administrative burden for those caring for the most vulnerable pediatric patients.
