How Can You Check Baby’s Teeth?

Each day when you clean your baby’s teeth and gums:

✔ Lay baby’s head on your lap and gently push back the lips.
✔ Look at the front and back of all upper teeth, then all lower teeth.
✔ If you see chalky white, brown or black spots on the teeth, take baby to the dentist.

What Should You Do?

Take your child to a dentist by age 1. To find a dentist:

- Ask your child’s doctor for a referral
- Ask a friend, relative, or coworker
- If you have Medi-Cal, contact Denti-Cal at 1-800-322-6384 or www.denti-cal.ca.gov
- Contact the California Dental Association at 1-800-CDA-SMILE (232-7645) or www.cda.org/PublicResources/FindaDentist
- Contact Child Health & Disability Prevention (CHDP) Program at your health department www.dhcs.ca.gov/services/chdp

Baby Teeth Are Important!

• To Chew     • To Talk     • To Smile     • To Feel Good
• To Be Healthy • To Save Room For Adult Teeth
**What Is Tooth Decay (Cavities)?**

It is a disease that is caused by germs in the mouth.

Can start when first tooth appears (white line on tooth near gums)

Leads to pain, infection and can destroy teeth

**How Does Tooth Decay Happen?**

Germs + Sugar = Acid → Tooth Decay

Germs eat sugar, then make acid. Acid attacks the tooth.

**What Can You Do To Protect Baby Teeth?**

**Take care of your own teeth:**
- Brush morning and before bed and floss daily
- Visit your dentist twice a year

**Germs**

Tooth decay germs can be passed from your mouth to your child’s mouth.

Do not share:
- Cups
- Straws
- Spoons/Forks
- Toothbrushes

Do not “clean” pacifier with your mouth.

**Sugar**

When sugar stays on teeth, tooth decay can start, especially if your child:
- Falls asleep with the bottle
- Sips from a bottle or cup all day

Sugar hides in:
- Milk/Formual
- Juice
- Sweet drinks
- Cookies, Crackers, Chips

**How Can You Protect Baby’s Teeth?**

**Take care of baby’s teeth:**
- Put only breast milk or formula in bottle
- Brush baby’s teeth twice a day with a dab of fluoride toothpaste

**Fluoride Toothpaste**

(pea size)

**Fluoride Toothpaste**

(rice grain size)

- Stop bottle by age one
- Take baby to dentist by age one, then every 6 months
- Ask doctor about fluoride varnish and drops/tablets

**GERMS**

Tooth decay germs can be passed from your mouth to your child’s mouth.

Do not share:
- Cups
- Straws
- Spoons/Forks
- Toothbrushes

Do not “clean” pacifier with your mouth.

**SUGAR**

When sugar stays on teeth, tooth decay can start, especially if your child:
- Falls asleep with the bottle
- Sips from a bottle or cup all day

Sugar hides in:
- Milk/Formual
- Juice
- Sweet drinks
- Cookies, Crackers, Chips
